

SEPTEMBER 17-18 & 20, 2015 | LONG BEACH

Lot 4304

U.S. Coins

Featuring: The Rolling Thunder 50 Piece Commemorative Collection • The Stephen A. Walling Collection

September 17-18 & 20, 2015 | Long Beach

Signature® Floor Sessions 1-4

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Long Beach Convention Center • Room 102B
300 E. Ocean Blvd. • Long Beach, CA 90802

Session 1

Thursday, September 17 • 1:00 PM PT • Lots 3001-3673

Session 2 – PREMIER

Thursday, September 17 • 6:00 PM PT • Lots 3674-4305

Session 3

Friday, September 18 • 1:00 PM PT • Lots 4306-4989

Session 4

Friday, September 18 • 6:00 PM PT • Lots 4990-5457

Signature® Internet Session 5

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 5

Sunday, September 20 • 2:00 PM CT • Lots 7001-8408

LOT SETTLEMENT AND PICK-UP

Friday, September 18 • 10:00 AM – 1:00 PM PT
Saturday, September 19 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

This auction is subject to a 17.5% Buyer's Premium 17.5% (minimum \$14).

BIDDING METHODS

HERITAGE Live!®¹ Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at HA.com/Live

Live Floor Bidding

Bid in person during the floor sessions.

Live Telephone Bidding (floor sessions only)

Phone bidding must be arranged on or before
Wednesday, September 16, by 12:00 PM CT.
Client Service: 866-835-3243

Internet Absentee Bidding

Proxy bidding ends one hour prior to the session start time.
Live Proxy bidding continues through the session.
HA.com/1224

Fax Bidding

Fax bids must be received on or before Wednesday,
September 16, by 12:00 PM CT. Fax: 214-409-1425

Mail Bidding

Mail bids must be received on or before
Wednesday, September 16.

HERITAGE AUCTIONS

HA.com

Dear Bidder:

Welcome to Heritage's September, 2015 Long Beach Signature auction. This is our third trip of the year to the West Coast as the official auctioneer of the Long Beach Expo, and it is our pleasure to welcome you to the keystone September show. We hope you will attend and make the most of the many outstanding opportunities presented at the Expo. This event is definitely the numismatic "best in the West."

Our Signature auction features four Floor Sessions including a high-value Premier Session on Thursday evening, September 17. As always, many memorable rarities will change hands. Highlights include an 1875 proof half eagle, the exceptional series key date. Only nine proofs are known in private hands, with this example ranked in the top five and graded PR64 Cameo NGC. Also, the renowned Judd-10 Reeded Edge 1792 copper dime makes an appearance graded XF40 PCGS Secure. It is the former 1914 ANS Exhibition plate coin, Ex: Wurtzback-Partrick – small in size, but a big numismatic rarity. And speaking of large, the very rare 1877 Half Union in gilt copper, one of the most interesting (and large) issues of the entire pattern series, is up for bid certified PR63 NGC, now housed in a custom holder to accommodate the oversized fifty-dollar Half Union format.

Two Long Beach Signature Featured Collections deserve special mention:

The Rolling Thunder 50 Piece Commemorative Collection

Our consignor spent the better part of twenty years assembling this remarkable collection of U.S. commemoratives, which ranks sixth in the PCGS Registry of Silver Commemoratives 50 Piece Type Set, Circulation Strikes (1892-1954). In building the set, special attention was given to strike and color with more than half of the collection "Plus-graded" by PCGS – a critical distinction among the highest-graded commemoratives where multiple coins share a high numerical grade. Many fine coins were passed over during the formation of this set simply because they fell short of our consignor's meticulous attention to strike characteristics and eye appeal. The importance and historical significance of the classic commemorative series cannot be overstated, and a love of U.S. history was instrumental in assembling this fantastic, highly ranked Registry Set.

The Stephen A. Walling Collection

A wide-ranging collection of copper, silver, and gold type coins shows an emphasis on early issues and a keen eye for value in popular collector grades. When asked what inspired his interest in coins, Mr. Walling replied, "Like many kids of my generation, I started collecting coins before I turned 10. I purchased a Whitman blue coin book and began filling in the holes with the help of my dad who would let me check his change. I actually did find a few of the key dates in circulation like the 1909-S. I purchased a few others when I had a little extra money from my paper route. It was fun! However, it was not until about 15 years ago that I started getting serious about coins. That is when I turned to Heritage because of their strong reputation. I have thoroughly enjoyed this relationship, and now that it is time to sell my investment pieces, I have gone back to Heritage. Oh, by the way, I still have that original penny collection in the blue Whitman book. It is not for sale." Among his favorite coins in the consignment, Steve mentioned two that are of special appeal – a wonderfully original 1797 Draped Bust half dollar, O-101a, graded Fine 15 PCGS with CAC endorsement (the former Peter Mougey specimen from the 1910 Thomas Elder sale) and an equally Choice 1795 Small Eagle five dollar gold piece, AU55 NGC, struck from the scarce BD-4 die pair, one of just 60 to 75 examples that exist of the variety.

Whether you participate in person at the Premier or Floor Sessions, or prefer to bid remotely, numerous opportunities await you in all U.S. Coins categories from colonials to rare modern issues. Nearly 200 individual consignors have consigned more than 3,800 lots, including over 600 Premier lots. Online bidders are encouraged to participate in our Signature® Internet Session on Sunday, September 20, when over 1,400 certified coins are available for the online session.

Bidding is simple before the auction and instantaneous during the sale, wherever you are in the world. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® (our proprietary, award-winning online platform). Of course, if you are attending the Long Beach Expo we encourage you to stop by our booth on the Bourse, view the lots on-site, and bid in person from the auction floor.

Good luck! We look forward to a mutually successful and entertaining Long Beach sale.

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

SESSION ONE

COLONIALS

- 3001** 1652 Pine Tree Threepence, No Pellets at Trunk — Repaired — PCGS Genuine. VF Details. Noe-36, W-640, Salmon 2-B, R.4. The pearl-white obverse is misaligned toward 6 o'clock but the charcoal-gray reverse is well centered. Moderately granular, and the upper left obverse has been faintly tooled to remove verdigris. Listed on page 39 of the 2016 *Guide Book*. NGC ID# 5GYA, PCGS# 45366
- 3002** 1652 Pine Tree Shilling, Large Planchet, No Pellets at Trunk — Tooled — PCGS Genuine. VF Details. Noe-2, W-700, Salmon 2-C, R.5. 68.36 gn. The "Straight Tree" variety. The silver-gray flan is oval-shaped and wavy, favoring the upper legends, left obverse, and right reverse. Most of the tree is apparent although the upper branches are faint. A series of thin marks affect the central obverse and the field above the 5 in the date. Listed on page 39 of the 2016 *Guide Book*. NGC ID# 5JDU, PCGS# 45370 Base PCGS# 23
- 3003** (c. 1828) American Plantations 1/24 Part Real, Restrike XF45 PCGS. Newman 4-E, W-1155, R.5. According to the *Whitman Colonial Encyclopedia*, Roger S. Siboni has encountered only pewter restrikes for Newman 4-E. A lightly circulated and oxidized but unmarked silver-gray example with a few spots near the rims, most apparent over the A in VAL. Listed on page 41 of the 2016 *Guide Book*. NGC ID# AUB5, PCGS# 52
- 3004** 1722 Hibernia Halfpenny, Harp Left, MS63 Brown PCGS. M. 4.1-Bb.2, W-12690, R.3. This is a scarce and popular variety in any grade, and it is virtually never encountered in full Mint State condition. Lustrous medium brown surfaces are nearly mark free. The obverse is from a late die state, with a die crack below the first G into the field. Outstanding eye appeal. The reverse shows some softness on the center, but hints of original orange mint color attest to the remarkable quality. Listed on page 44 of the 2016 *Guide Book*. Population: 7 in 63 Brown, 6 finer (7/15).
Ex: Long Beach Signature (Heritage, 9/2005), lot 518. NGC ID# 2ATA, PCGS# 167
- 3005** 1710-AA French Colonies 30 Deniers MS62 PCGS. CAC. Metz Mint. Hints of tan toning overlie unmarked, cream-gray fields. A good strike exists, although minor striations from the planchet are found here and there. A small edge flaw is noted at 11:30, and the strike is off a few degrees toward 7:30. Listed on page 53 of the 2016 *Guide Book*. Population: 6 in 62, 1 finer (8/15).
Ex: Denver Signature (Heritage, 8/2006), lot 18; Houston Signature (Heritage, 11/2012), lot 3015. NGC ID# 2AVB, PCGS# 158677
- 3006** 1787 Connecticut Copper, Laughing Head, M. 6.1-M, W-2820, R.1, AU50 PCGS. One of two Mailed Bust Left, Laughing Head varieties, the Miller 6.1-M shows the dot after AUCTORI above the tip of the highest leaf. Generally well centered and sharply defined on the devices, only minor roughness and pitting is visible on both sides, most noticeably at the jawline and around the date. Attractive medium-brown surfaces provide substantial eye appeal. Listed on page 61 of the 2016 *Guide Book*. Population: 7 in 50, 13 finer (8/15). NGC ID# 2B2W, PCGS# 358
- 3007** 1783 Nova Constellatio Copper, Pointed Rays, Large US, AU50 PCGS. Crosby 1-A, W-1860, R.4. Complete legends remain entirely "on the coin" on both sides despite a slight shift to the southwest as normally seen for the variety. The variety is notable for a curved row of dentil impressions at the upper obverse. Deep chocolate-brown surfaces show glossy luster that remains despite brief circulation. An attractive, sharply struck example of the issue, which is listed on page 54 of the 2016 *Guide Book*. Population: 10 in 50, 10 finer (8/15). NGC ID# 2AYY, PCGS# 804

1787 Fugio Cent, MS62 Brown
N. 12-X, STATES UNITED, Pointed Rays

- 3008** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, N. 12-X, W-6820, R.3, MS62 Brown PCGS. A pair of perpendicular die cracks around the sun face and a vertical radial crack at 6 o'clock on the reverse confirm the Newman 12-X die variety. This glossy brown Mint State example is uniformly colored with chocolate-brown patina and no significant surface faults. Struck off-centered a trifle toward 5 o'clock, just like the Newman MS64 Red and Brown example of this variety. Listed on page 87 of the 2016 *Guide Book*. NGC ID# AX5E, PCGS# 883

- 3009** 1789 Mott Token, Thick Planchet, Plain Edge, MS63 Brown NGC. Breen-1020, Rulau-E-NY-610. The Mott store card is traditionally collected by colonial specialists, but is currently regarded as a Hard Times token, backdated to reflect the year that the firm was founded. An unabraded chocolate-brown example. The familiar late die state with an indistinct eagle and a large die break from the upper left clock corner. Listed on page 74 of the 2016 *Guide Book*. Census: 7 in 63 Brown, 11 finer (8/15). NGC ID# 2B5K, PCGS# 603

Kentucky Token, MS65 Red
LANCASTER Edge, W-8810

- 3010** (1792-94) Kentucky Token, LANCASTER Edge, Breen-1156, W-8810, R.5, MS65 Red PCGS. A splendid orange-red Gem with slight mellowing on the high points and the lower right obverse field. CAUSE is well-struck, unusual for a Kentucky token. In fact, the strike is essentially full, though a loupe reveals minor obverse mint-made planchet lines. The sole post-strike imperfection is a wispy field mark between the scroll and THE. Edge-lettered Kentucky tokens are significantly scarcer than the Plain Edge W-8800. Listed on page 75 of the 2016 *Guide Book*. Population: 8 in 65 Red, 0 finer (8/15). NGC ID# AUBN, PCGS# 625

**1794 Franklin Press Token, MS64 Red and Brown
W-8850, A Ben Franklin Numismatic Legacy**

- 3011 1794 Franklin Press Token MS64 Red and Brown PCGS. Breen-1165, W-8850, R.1.** Certified in a PCGS green-label holder, this near-Gem Franklin Press token still boasts a substantial amount of red color retained around the device edges and in the interiors. There are no surface problems. On a recent visit to the Philadelphia Mint, the present cataloger (GH) paid homage to the Franklin family graves, across the side street in the Trinity Church cemetery. Franklin's contributions both to American numismatics of his day and contemporary American thought today are still remarkable. Listed on page 76 of the 2016 *Guide Book*. NGC ID# 2B5V, PCGS# 631

**Washington Funeral Urn Medal, VF25
Silver, Baker-166A, Dies 1-B**

- 3012 (1800) Washington Funeral Urn Medal, Silver, VF25 NGC. Baker-166A, R.6. Dies 1-B.** Two large funeral processions were staged in early 1800 for Washington, who died on December 14, 1799. Baker-165, distinguished by a skull and crossbones on the lower reverse, was worn by certain attendees of the Masonic ceremony on February 11. The civic procession took place on February 22, and the Baker-166 medal was worn by some of those present. A small hole at 12 o'clock is characteristic of the issue. Deeply toned in electric-blue and peach colors. The surfaces are typically abraded. *Ex: Long Beach Signature (Heritage, 2/2006), lot 49, which realized \$1,495. PCGS# 928*

HALF CENTS

- 3013 1793 C-2, B-2, R.3 — Smoothed — PCGS Genuine. VG Details.** The peripheral legends are fully readable, although AMERICA and LIBERTY are faint. An olive-green and chestnut-gold representative of this scarce introductory single-year type. The surfaces are moderately granular and the left obverse field is burnished. Our EAC grade Fair 2. NGC ID# 2222, PCGS# 35006 Base PCGS# 1000

**1793 C-4 Half Cent, Good 4
Appealing for the Grade**

- 3014 1793 C-4, B-4, Low R.3, Good 4 PCGS. CAC.** A well-worn but problem-free example of the Cohen-4 variety with the longest stems and a short 7 in the date. The L of LIBERTY sits low and close to the hair. Pleasing, medium-brown fields show slight pitting and microscopic corrosion with magnification, but the surfaces are outwardly smooth. The legends, fraction, and date blend to the edges with grade consistent wear, but all of the motifs are present and identifiable. CAC endorsed. Our EAC grade Fair 2. NGC ID# 2222, PCGS# 35012 Base PCGS# 1000

- 3015 1795 Lettered Edge, C-1, B-1, R.2, Fine 15 PCGS. Manley Die State 1.0.** A lovely chocolate-brown Liberty Cap type coin. Essentially void of verdigris, and the only reportable marks are a pair of faded thin lines above HALF. Our EAC grade VG8. NGC ID# 2224, PCGS# 35067 Base PCGS# 1009

**1797 Liberty Cap Half Cent, XF40
1 Above 1, Plain Edge, C-1
Overstruck on Token Stock**

- 3016 1797 1 Above 1, C-1, B-1c, R.2, XF40 PCGS. Manley Die State 2.** A single die bulge left of the L in LIBERTY is obvious, as is the diagnostic vertical die crack that extends from the rim at 12:00 through the right side of B into the hair. Other than the interesting characteristics of the die state, few overt flaws exist on this deep-mahogany example. Light granularity covers both sides of the coin (visible with a glass), with the faint roughness possibly attributable to the token stock planchet. The reverse legend fades to the border, where evidence of an undertype exists. Similarly, clear numerals or letters from an undertype are seen in the dentils beneath the date — perhaps remnants of a cut-down Talbot, Allum & Lee token, as suggested in the Breen reference. Otherwise, the strike is well-detailed on the central motifs. Our EAC grade VF20. Population: 6 in 40, 19 finer (8/15). NGC ID# 2228, PCGS# 35101 Base PCGS# 1042

**1797 Half Cent, C-2, Plain Edge, VF25
Smooth, Problem-Free Surfaces**

- 3017** 1797 Plain Edge, C-2, B-2, R.3, VF25 PCGS. The reverse die crack from the 2 in the fraction to the dentils above the I in UNITED is weak, but visible. The ICA of AMERICA is characteristically soft, though the borders are otherwise strong. Smooth, auburn-brown surfaces deliver a high degree of eye appeal for the grade, as no signs of environmental impairment are observed on either side. The portrait is well-defined and an old dig on the pole in front of the neck is the only mark of note. Our EAC grade Fine 12. Population: 17 in 25, 42 finer (7/15). NGC ID# 2228, PCGS# 35104 Base PCGS# 1036

**1797 Half Cent, Scarce XF40
C-2, Plain Edge**

- 3018** 1797 Plain Edge, C-2, B-2, R.3, XF40 NGC. The vast majority of C-2 survivors are well-circulated. This XF example is conditionally scarce. The coin is evenly struck and well-centered, with deep chocolate-brown surfaces that appear unaffected by environmental impairments. An ancient, hair-thin scratch in the lower-left obverse field is the only discernible break in the surface. The interior devices are bold and the borders are equally well-defined. Our EAC grade VF25. NGC ID# 2228, PCGS# 35104 Base PCGS# 1036
- 3019** 1800 C-1, B-1, R.1, AU55 NGC. Manley Die State 4.0. A lovely deep olive-brown Draped Bust type coin. The surfaces shimmer with luster and show scant evidence of wear. Impressively void of abrasions. The strike is crisp except on the F in OF. Our EAC grade XF45. NGC ID# 222B, PCGS# 35119 Base PCGS# 1051

**1804 Half Cent, MS63 Brown
C-10, Crosslet 4, Stems**

- 3020** 1804 Crosslet 4, Stems, C-10, B-9, R.1, MS63 Brown NGC. Manley Die State 3.0. A coruscating chocolate-brown Draped Bust type coin. Well struck given the late die state. Marks are negligible aside from an inconspicuous rim knock at 2 o'clock on the reverse and a thin line on Liberty's neck. Our EAC grade AU50. *Ex: New York Signature (Heritage, 7/2004), lot 5037, which realized \$1,897.50.* From The Stephen A. Walling Collection. NGC ID# 222F, PCGS# 35158 Base PCGS# 1069

- 3021** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS62 Brown NGC. Manley Die State 2.0. A smooth golden-brown example of this collectible Draped Bust variety. Each side has a few tiny spots. Well struck aside from the dentils, which are mostly indistinct due to the die state. Our EAC grade AU50. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

**1805 Half Cent, MS62 Brown
No Stems, C-1**

- 3022** 1805 No Stems, C-1, B-1, R.1, MS62 Brown PCGS. CAC. Manley Die State 1.0 with a small break in the reverse dentils near 6 o'clock. The Small 5 is repunched north. A coruscating walnut-brown and steel-gray example of the stemless C-1 variety. The strike is good, and marks are confined to a single brief line below the hair ribbon. Our EAC grade AU50. NGC ID# 222H, PCGS# 35179 Base PCGS# 1081

**1834 C-1 Half Cent, MS66 Brown
Full Strike, Smooth Surfaces**

- 3023 1834 C-1, B-1, R.1, MS66 Brown NGC.** Manley Die State 1.0. A dusky golden-brown Premium Gem. The strike is intricate and the eye appeal is undeniable. Cartwheel luster sweeps splendidly preserved surfaces. Census: 5 in 66 (2 in 66 ★) Brown, 2 in 66 Red and Brown (8/15). Our EAC grade AU55.
Ex: Denver Signature (Heritage, 8/2006), lot 125, which realized \$1,955.
From The Stephen A. Walling Collection. NGC ID# 2232, PCGS# 35285 Base PCGS# 1165

- 3024 1849 Large Date, C-1, B-4, R.2, MS64 Red and Brown PCGS.** No business issue 1849 half cents have been certified as Red by either leading service, and even Red and Brown examples are surprisingly rare. The present well struck and prooflike near-Gem displays ample orange-red color, especially on the reverse. The high points and fields are steel-blue. Our EAC grade MS62. Population: 6 in 64 Red and Brown, 0 finer (8/15). PCGS# 35319 Base PCGS# 1219

- 3025 1855 C-1, B-1, R.1, MS65+ Brown NGC.** The sole die marriage for the date. Cherry-red outlines design elements, but this lustrous Gem half cent is mostly toned sea-green. Smooth aside from a tick near the obverse border at 3 o'clock. Our EAC grade MS63. NGC ID# 26YZ, PCGS# 35333 Base PCGS# 1233

- 3026 1856 C-1, B-2a, R.1, MS64 Red and Brown PCGS. CAC.** A well struck Choice half cent that has good luster and a few moderate grazes on the left obverse. The brick-red color is only slightly mellowed on the obverse, while the reverse has a steel-gray center framed by a mahogany border. Our EAC grade MS63. PCGS# 35337 Base PCGS# 1237

PROOF HALF CENTS

**1841 B-1 Half Cent, PR58
Original, Large Berries**

- 3027 1841 Original PR58 PCGS. B-1, R.5.** Large, round berries in the wreath identify this proof half cent as an original striking. The high points of the leaves have a trace of wear, but the lavender and olive-brown fields are minimally marked and retain their initial reflectivity. Each side has a few edge knocks that range from trivial to noticeable. Our EAC grade PR55. NGC ID# 26Z6, PCGS# 1254

LARGE CENTS

**1793 Chain Cent, AG Details
AMERI., S-1**

- 3028 1793 Chain, AMERI., S-1, B-1, R.4 — Damage — PCGS Genuine. AG Details.** The E in ONE is distant from the chain, characteristic of the historic AMERI variety, the first regular issue struck at the Philadelphia Mint. UNITED is clear, and portions of LIBERTY, STATES, and ONE CENT are apparent. The present example is recolored and mildly bright. Small to moderate marks are scattered, and minor rim knocks are noted on the lower obverse and between 1 and 3 o'clock on the reverse. Our EAC grade Poor 1. NGC ID# 223G, PCGS# 35432 Base PCGS# 1340

**1793 Chain Cent, VG Details
Sheldon-1, AMERI.**

- 3029 1793 Chain, AMERI., S-1, B-1, R.4 — Repaired — NGC Details. VG.** The scarce Sheldon-1 die marriage, with the AMERI. abbreviation on the reverse. This example is well-circulated with mild corrosion overall. Yet, the peripheral legends, including the date, are readable and the chain, denomination, and fraction are clear. Liberty's portrait is outlined and the eye is visible. Our EAC grade Fair 2.

- 3030 1793 Wreath, Vine and Bars Edge, S-5, B-6, R.4 — Environmental Damage — PCGS Genuine. VG Details.** Deep chocolate-brown surfaces are heavily pitted and corroded in the recesses, with smooth areas over the high points of Liberty's hair the wreath bow. On the obverse, LIBERTY is clear and the date is weak. The reverse legends are all readable, including the fraction. Our EAC grade Fair 2. NGC ID# 223H, PCGS# 35447 Base PCGS# 1347

- 3031 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Smoothed — PCGS Genuine. Fine Details.** Struck a few degrees off center toward 4 o'clock. The ebony-brown surfaces display bold legends, but the reverse is moderately granular and the obverse was burnished to remove verdigris. Our EAC grade AG3. NGC ID# 223H, PCGS# 35450 Base PCGS# 1347

- 3032 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — Tooled — PCGS Genuine. Fine Details.** This piece is well-detailed, with clear legends and bold central devices. Extensive tooling on the obverse smooths much of the surface corrosion; the reverse is less reworked, with darker, widespread environmental impairment. Suitable for the collector on a strict budget. Our EAC grade AG3. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

3033 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Damage — PCGS Genuine. Fine Details. The horizontal stem is parallel to the date, and the bow is large and rounded. Liberty's portrait, the leaves, STATES, and most of the denomination are clear with much of the remaining detail obscured. Medium olive-brown surfaces are expectedly abraded, and the reverse has a rim knock at 6 o'clock. A desirable first-year cent nonetheless. Our EAC grade Good 4. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

3034 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Tooled — PCGS Genuine. Fine Details. The gunmetal-gray surfaces have been wiped and display faint pinscratches from verdigris removal. The borders are granular near 9 o'clock on the obverse, and 12 and 6 o'clock on the reverse. The obverse has a moderate rim ding at 11 o'clock. Our EAC grade Good 4. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

3035 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Environmental Damage — PCGS Genuine. VG Details. Heavily corroded surfaces exhibit a distinct woodgrain pattern with deep chocolate-brown color. Smooth areas of wear appear on the high points of the portrait and the lower-right reverse. The lettered edge is identifiable, but differentiating between S-11b and S-11c by the number of leaves following DOLLAR cannot be accomplished due to the extent of the corrosion. The more available S-11c is presumed. Our EAC grade Fair 2. NGC ID# 4DM3, PCGS# 35477 Base PCGS# 1350

**1793 S-11c Wreath Cent, VF Sharpness
Pleasing Surfaces, Counterstamp on Cheek**

3036 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Counterstamped — NGC Details. VF. Breen Die State IV. The prominent clash marks seen on other die states are absent by lapping of the obverse die in this later state. Sheldon-11c is the second of two Lettered Edge variants for the S-11 die pair, with a single leaf after DOLLAR on the edge. The other S-11 edges include a Vine and Bars edge and a Lettered Edge with two leaves after DOLLAR. This example displays chocolate and tan-brown surfaces with minor microporosity visible with a glass. A silversmith-style counterstamp shows the raised letters LB in a rectangular depression, perhaps the mark of Loring Bailey of Hingham, MA who an active silversmith in the late 1700s and early 1800s. Other known hallmarks are similar, which makes this piece an interesting subject for research as well as a pleasing example of S-11c. Our EAC grade VG8.

3037 1794 Head of 1794, S-28, B-10, R.2, VF20 PCGS. An evenly defined ebony-brown Liberty Cap cent. The surfaces and rims appear unabraded. The obverse is lightly granular and the reverse is granular. In AMERICA, the letters CA nearly touch while IC is very wide. Our EAC grade VG8. NGC ID# 223P, PCGS# 35549 Base PCGS# 901374

**1794 Cent, VF35
S-44, B-33, Head of 1794**

3038 1794 Head of 1794, S-44, B-33, R.1, VF35 PCGS. A late die state example, with a bold radial die crack from the reverse rim at 12:30, and two more on the obverse, one from the denticles below the 79 in the date and the other from the rim near the tip of the cap. The borders are complete and the central relief elements bold. Deep burgundy-brown patina blankets each side, with numerous light, scattered ticks visible on each side upon close examination. Our EAC grade Fine 15. NGC ID# 223P, PCGS# 35597 Base PCGS# 901374

**1794 Cent, Pleasing VF30
S-59, Head of '94**

3039 1794 Head of 1794, S-59, B-57, R.3, VF30 NGC. CAC. Ex: Exman Collection. Breen Die State V. A heavy die crack crosses the fraction and right ribbon end; this fracture later breaks away completely, obscuring much of the fraction. Given the relatively smooth, medium brown surfaces of this mid-grade Sheldon-59 example, we feel Bill Noyes' grade of VG10 is a mite conservative, but concur with his assessment of the sharpness as Fine 15. Del Bland's Fine 12 estimate is exact to our EAC assessment. There is substantial detail remaining in Liberty's hair curls and the wreath is well-defined. Border denticils grow slightly weak along the left obverse periphery, but a distinct rim is still brought up. Our EAC grade Fine 12.
Purchased by Dr. William H. Sheldon from Chapman (1920); acquired by Dorothy I. Paschal (1952); purchased from Dorothy I. Paschal (1956); Eugene Exman. NGC ID# 223P, PCGS# 35639 Base PCGS# 901374

3040 1794 No Fraction Bar, S-64, B-50, Low R.5 — Environmental Damage — PCGS Genuine. VF Details. This Sheldon-64 representative is sharp for the VF grade level, with deep brown color. The surfaces are uniformly granular, but all legends and design elements remain clear. The borders are strong and the denticils are complete. An old scratch on Liberty's cheek is mostly consumed by the moderate corrosion. Our EAC grade Good 6. NGC ID# 223P, PCGS# 35708 Base PCGS# 911374

3041 1794 Head of 1795, S-71, B-63, R.2, Fine 15 PCGS. A minimally granular chocolate-brown and sea-green second-year cent. All legends are sharp and Liberty's eye is bold. The rims exhibit a few minor imperfections, and a small mark is noted on the throat, but the surfaces are lightly abraded overall. Our EAC grade VG7. NGC ID# 223R, PCGS# 35696 Base PCGS# 1365

**1795 Cent, Choice XF
Plain Edge, S-76b**

3042 1795 Plain Edge, S-76b, B-4b, R.1, XF45 NGC. A charming tan-brown and olive-green Liberty Cap type coin. Glimmers of luster remain, and no marks are remotely consequential. The strike is generally consistent, although planchet striae is noted near the date and OF. Struck from lightly clashed dies. Our EAC grade VF20. NGC ID# 223T, PCGS# 35723 Base PCGS# 1380

3043 1796 Liberty Cap, S-84, B-5, R.3, VF20 NGC. A deep steel-gray cent from the waning weeks of the Liberty Cap type. The only remotely noticeable marks are minor obverse rim nicks at 3 and 5 o'clock. Evenly defined and also evenly microgranular. Our EAC grade Fine 12. NGC ID# 223V, PCGS# 35759 Base PCGS# 1392

3044 1797 Reverse of 1797, Stems, S-130, B-25, R.2, XF40 PCGS. Breen Die State V. The conspicuous die break on the left obverse field attaches to the rim, and the right obverse field shows a vertical crack. A well-defined medium-brown example with minor peripheral granularity and a narrow lamination (as made) across CENT to the rims near 2 o'clock and 7:30. Our EAC grade VF20. PCGS# 35930 Base PCGS# 1422

3045 1798 Second Hair Style, S-166, B-32, R.1, VF30 NGC. The heavy diagonal crack across the lower left reverse identifies the Sheldon variety. A glossy medium brown cent. OF A and LIBERTY show softness, but the remainder of the legends are bold. The upper obverse has a couple of moderate abrasions. Our EAC grade Fine 12. NGC ID# 2244, PCGS# 36068 Base PCGS# 1434

3046 1799 S-189, B-3, R.2, Poor 1 PCGS. The portrait is well outlined, and the top half of the date is clear. TES OF is readable. A moderately granular medium brown representative of this key Draped Bust date. The reverse exhibits a couple of minor pinscratches. Our EAC grade Poor 1. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

**1799 S-189 Cent, VG Details
Struck 30% Off Center**

3047 1799 S-189, B-3, R.2 — Repaired, Struck 30% Off Center — PCGS Genuine. VG Details. A number of off center large cents are known, but a widely off center 1799 is unlikely to appear again in the market for many years. 30% off toward 11:30, with LIBERTY, UNITED, and the fraction absent from the coin. Both sides exhibit a broad arc of unstruck surface. Designated as Repaired by PCGS, but the glossy medium brown and cobalt-blue surfaces are better described as pitted and burnished. The pits display glimpses of aqua verdigris. Liberty's hair is well defined for the VG level, and the reverse legends (where present) are sharp. Our EAC grade Good 4. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443

3048 1800/79 Style Two Hair, S-194, Low R.3, VF25 NGC. Breen Die State VIII, the latest state of the dies. Deemed "extremely rare" by the Breen *Encyclopedia of Early United State Cents*, this VF example shows the extensive rim break beneath the fraction including three separate peaks, called by Breen "almost like a mountain panorama." Deep brown fields surround lighter tan-brown raised elements, with slight planchet roughness and unevenness of strike at the peripheries. Our EAC grade Fine 15. NGC ID# 2U57, PCGS# 36161 Base PCGS# 1455

3049 1801 1/000, S-220, B-12, R.3, VF30 NGC. Breen Die State VII. A particularly attractive and well-detailed example of this late, near-terminal die state of Sheldon-220. A short bar over the fraction and a Pointed 1 in the date confirm the die pair. Die breaks beneath the date and around the reverse legend are diagnostic, but overall the surfaces are smooth and show only scattered small marks. A single tiny carbon spot is located in the right obverse field midway between the chin and the rim of this popular blundered fraction cent. Our EAC grade Fine 12. NGC ID# 224D, PCGS# 36275 Base PCGS# 1464

3050 1802 S-232, B-12, R.1, AU55 NGC. Breen Die State VII. A deep mahogany brown example of the S-232 late die state that shows a sizeable rim cud above ATE of STATES and numerous smaller die cracks surrounding the cud. The fraction bar is long, nearly touching the ribbons left and right. The T in LIBERTY is struck over an erroneous Y. Sharp detail remains on this Choice About Uncirculated example with generally smooth and attractive surfaces. Our EAC grade VF30. NGC ID# 224E, PCGS# 36305 Base PCGS# 1470

**1803 S-247 Cent, AU50
Small Date, Small Fraction**

3051 1803 Small Date, Small Fraction, S-247, B-5, R.3, AU50 PCGS. CAC. A die chip below the jaw and clash marks through the denominator (all as made) combine to attribute the variety. A well struck example with golden-brown and steel-blue toning. The reverse is refreshingly unabraded, while the obverse has scattered small marks. Our EAC grade XF40.

Ex: Phoenix ANA Signature (Heritage, 3/2008), lot 156, which realized \$4,312.50.

From The Stephen A. Walling Collection. NGC ID# 224G, PCGS# 36359 Base PCGS# 1482

3052 1803 Small Date, Small Fraction, S-250, B-10, R.3, XF45 PCGS. An evenly, well-struck coin with smooth, problem-free surfaces. The fields show light brown patina, while deeper burgundy color appears over the relief elements. Significant detail remains in Liberty's hair curls and the peripheral legends are clear; the border dentils are nearly complete around each side. A pleasing Draped Bust type coin. Our EAC grade VF25. NGC ID# 224G, PCGS# 36365 Base PCGS# 1482

3053 1804 S-266c, B-1, R.2, AG3 ANACS. Smoothly but extensively worn, the low-mintage 1804 issue is confirmed by prominent rim breaks above RTY of LIBERTY and MERIC of AMERICA. The date is only partially visible but readable. The rims merge into the legends and date on both sides of this piece. An unnatural reddish hue at the centers of both sides is likely from an old cleaning, but not especially important in this basal condition. Housed in an early generation ANACS holder. Our EAC grade Fair 2. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

- 3054 1804 Restrike MS66 Brown PCGS.** An out-of-mint issue, struck circa 1860 from muled and altered-date Mint dies that had been sold as steel scrap. The rarity of the official 1804 cent, known from a single die pair, created demand that was partly met by this contemporaneously condemned private restrike. Struck from broken and heavily rusted dies. Evenly toned golden-brown, but otherwise essentially as made. Our EAC grade MS60.
Ex: West Palm Beach Signature (Heritage, 7/2009), lot 74. NGC ID# 224J, PCGS# 45344
- 3055 1814 Crosslet 4, S-294, B-1, R.1, VF30 NGC.** An essentially unabraded example of the penultimate Sheldon marriage, promptly attributed by the crosslet 4 in the date. The medium brown surfaces are moderately granular near OF. Our EAC grade Fine 12. NGC ID# 224Y, PCGS# 36520 Base PCGS# 1573
- 3056 1814 Plain 4, S-295, B-2, R.1 — Scratch — PCGS Genuine. AU Details.** A Classic Head type coin with glossy medium brown surfaces. The curls and leaves show slight wear. The reverse is unabraded, but the portrait and right obverse field display several thin marks. Our EAC grade Fine 15. NGC ID# 224Y, PCGS# 36517 Base PCGS# 1576
- 3057 1817 13 Stars, N-6, R.1, MS64 Red and Brown PCGS.** Rose-red fills the legends and outlines the stars. The centers and fields are apple-green. Lustrous and well struck with smooth surfaces and a bold clash mark near the N in CENT. Certified in an old green label holder. Our EAC grade MS62.
Ex: Long Beach Signature (Heritage, 6/2011), lot 1156, which realized \$1,840. PCGS# 36566 Base PCGS# 1595
- 3058 1817 13 Stars, N-14, R.1, MS64 Brown PCGS.** A splendid chocolate-brown near-Gem with olive-green and brick-red undertones. Lustrous and well preserved. The centers and left borders are nicely struck, although the right-side margins show selected softness. Our EAC grade AU55. NGC ID# 2252, PCGS# 36589 Base PCGS# 1594
- 3059 1818 N-10, R.1, MS63 Red NGC.** Although N-10 is available, courtesy of the Randall Hoard, full Red examples are surprisingly rare. NGC has certified just two 1818 cents as Red, the present coin and an MS64. Lustrous and lightly abraded with a few small spots and a splash of gunmetal-gray on the portrait. Housed in an early pre-hologram holder. Our EAC grade MS63.
Ex: FUN Signature (Heritage, 7/2009), lot 77, which realized \$1,955. PCGS# 36630 Base PCGS# 1602
- 3060 1820 Large Date, N-13, R.1, MS65 Brown PCGS. CAC.** A predominantly gunmetal-blue Gem with glimpses of peach-red about the stars and letters. The lustrous surfaces are smooth aside from minor marks on the chin. High grade N-13 cents were prevalent within the Randall Hoard. Our EAC grade MS62. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615
- 3061 1820 Large Date, N-13, R.1, MS64 Red and Brown PCGS. CAC.** Grellman Die State b, cracked through date and stars. More Red than Brown with ample copper-gold luster, though areas of mellowing are present, particularly beneath the T in CENT. A popular Randall Hoard variety. Our EAC grade MS64. NGC ID# 2256, PCGS# 36674 Base PCGS# 1616
- 3062 1823/2 N-1, R.2, VF25 NGC.** Both the normal date (N-2) and overdate (N-1) 1823 cents are available in scudzy condition, but examples of collector quality are surprisingly scarce. The present slightly wavy deep brown example shows minimal granularity, and abrasions are minor throughout. Our EAC grade Fine 12. NGC ID# 225B, PCGS# 36760 Base PCGS# 1630
- 3063 1824/2 N-1, R.1 AU58 ANACS.** A prominently overdated cent, with the curve of an underdigit 2 clearly visible beneath the primary 4. Struck from a late state of the dies, with heavy die cracks encircling the legend. Deep bluish-brown toning covers both sides, with fleeting glimpses of luster near the borders and mostly smooth, glossy surfaces. Boldly struck at the center motifs, with the usual weakness at a few of the stars. Two or three light scrapes in the left obverse field and a tiny carbon near star 4 are of little distraction. Housed in an early generation ANACS holder. Our EAC grade XF40. NGC ID# 225E, PCGS# 36778 Base PCGS# 1639
- 3064 1824 N-2, R.2, AU55 PCGS.** A pleasing chocolate-brown Matron cent that shows light wear on Liberty's forehead. No marks or spots merit individual discussion. A late die state with absent dentils and the outer star points drawn toward the rim. Our EAC grade VF35. NGC ID# 225D, PCGS# 36769 Base PCGS# 1636
- 3065 1825 N-2, R.2, AU58 PCGS.** The late die state with light cracks near star 7, the 1 in the date, and the wreath stem. The deep brown surfaces are satiny and minimally abraded. Light friction on the cheek confirms a momentary stint in commerce long ago. Our EAC grade AU50.
Ex: Long Beach Signature (Heritage, 2/2012), lot 3092, which realized \$1,495. NGC ID# 225F, PCGS# 36787 Base PCGS# 1642
- 3066 1830 Large Letters, N-4, R.2, MS64 Brown NGC.** Grellman Die State b. The N-4 variety is famous for its "inner circle" obverse. The splendid chocolate-brown surfaces are unblemished. The strike is crisp save for stars 6 to 12. Our EAC grade AU55. NGC ID# 225L, PCGS# 36946 Base PCGS# 1672
- 3067 1831 Large Letters, N-1, R.1, MS64 Brown PCGS. CAC.** A bold peripheral obverse die crack helps attribute the Newcomb marriage. This olive-brown Choice cent has booming luster, and the major motifs are well struck. We note only occasional wispy marks and a small spot left of the O in ONE. Our EAC grade AU55.
Ex: Scott Cedars Collection (Heritage, 4/2011), lot 4114, which realized \$1,265. NGC ID# 225M, PCGS# 36970 Base PCGS# 1678
- 3068 1837 Plain Cords, Medium Letters, N-7, N-8, R.1, MS65 Brown NGC.** A lengthy die crack runs from the left reverse rim through STATES to the center OF, to the rim over A. Elsewhere, a bold dot between EN of CENT is diagnostic. The lack of die scratches above MERIC suggest the N-7 designation, a late state of the dies. Delightful chestnut-brown color covers both sides of this glossy Gem, which is sharply struck with excellent eye appeal. Our EAC grade MS60. NGC ID# 225U, PCGS# 37162 Base PCGS# 1735

**1838 N-1 Cent, MS66 Red and Brown
Glistening Mint Luster**

- 3069 1838 N-1, R.1, MS66 Red and Brown PCGS. CAC.** This is a lovely coin that delivers eye appeal in keeping with the lofty Premium Gem grade. Coppery-red luster is well-balanced over each side with iridescent burgundy toning, largely encompassing the protected regions of the fields. There are no abrasions and carbon is trivial, at best. As usual, most peripheral stars are weak, but the central portrait and wreath are bold. Our EAC grade MS63. Population (all varieties included): 5 in 66 (1 in 66+) Red and Brown, 0 finer (8/15). NGC ID# 225V, PCGS# 37181
-

**1838 N-10 Cent, MS66 Brown
Green Label Holder**

3070 1838 N-10, R.1, MS66 Brown PCGS. Noyes Die State B/E with a small horn-shaped break from the M in AMERICA. A lustrous and unabraded mahogany-brown cent. The portrait and wreath are well struck, although several stars are lightly brought up. Among the finest examples of the Newcomb marriage. Housed in a green label holder. Our EAC grade MS60. PCGS# 37207 Base PCGS# 1741

3071 1839 Silly Head, N-9, R.2, MS63 Brown PCGS. The diagonal die crack across the portrait attributes the Newcomb pairing. An unblemished chocolate-brown Silly Head type coin. The strike is crisp on the portrait, although the stars show occasional blending. Our EAC grade AU55. NGC ID# 225Y, PCGS# 37234 Base PCGS# 1748

3072 1842 Large Date, N-8, R.1, MS64 Brown PCGS. CAC. Grellman Die State b. Minute points from star 13 and the N in CENT attribute the Newcomb variety. A lovely olive-green example that boasts a precise strike and satin luster. Mark-free but small strike-throughs are noted near star 3. Our EAC grade MS60. Ex: *Schaumburg Central States Signature (Heritage, 4/2012)*, lot 3093. NGC ID# 2268, PCGS# 405824 Base PCGS# 1835

3073 1843 Petite Head, Large Letters, N-4, N-13, R.1, MS64 Brown PCGS. Grellman Die State d. A transitional variety that pairs the newly introduced Large Letters reverse with the soon-to-be-replaced Petite Head obverse. The sole die marriage of that subtype combination. A crisply struck and lustrous olive-green Choice cent. Unabraded, though we note a strike-through near the T in CENT. Our EAC grade MS60. NGC ID# 2269, PCGS# 403922 Base PCGS# 1847

3074 1847 N-13, R.4, MS66 Brown NGC. Die state c, with die cracks (as made) on the rim above the R in AMERICA. Although designated as Brown, considerable orange-gold color remains, especially on the reverse. Sharply struck aside from the fifth star. As of (8/15), the single finest among 13 examples certified as Newcomb-13 by NGC. Our EAC grade MS62. Ex: *Dallas Bullet Sale (Heritage, 11/2003)*, lot 62, which realized \$977.50. From *The Stephen A. Walling Collection*. NGC ID# 226D, PCGS# 37298 Base PCGS# 1877

3075 1849 N-8, R.2, MS64+ Red and Brown PCGS. Grellman Die State d. The reverse legends are clearly die doubled. Orange-gold fills protected regions, while the devices and open fields are steel-gray. Lustrous and unabraded with occasional tiny spots. Our EAC grade MS63. PCGS# 405653

3076 1850 N-21, 10, High R.2, MS65 Red and Brown NGC. Ex: Hilt Collection. Gem-quality surfaces show well-balanced coppery-red and auburn-brown hues, with satiny luster observed when rotated beneath a light. The sharp strike encompasses the border dentils, stars, and central devices, and there are no bothersome carbon specks. Our EAC grade MS63. NGC ID# 226G, PCGS# 405911 Base PCGS# 1890

3077 1853 N-3, R.1, MS66 Brown NGC. CAC. Grellman Die State b. Hints of orange-red surround stars and letters, but this high grade cent is principally chocolate-brown. Coruscating and virtually void of contact. The fields have an orange-peel texture, as made from long-in-use dies. Our EAC grade MS62. PCGS# 405982 Base PCGS# 1901

3078 1853 N-10, R.1, MS65 Red and Brown PCGS. CAC. Grellman Die State b. Mint red lingers in protected regions, while the high points and open fields are steel-gray. Cartwheel luster rolls across virtually mark-free surfaces. Well struck except for the left-side stars. Certified in a green label holder. Our EAC grade MS62. PCGS# 406004 Base PCGS# 1902

3079 1853 N-25, R.1, MS64 Red PCGS. Grellman Die State b. A beautiful orange-red Choice cent. The fields are virtually free from contact, and the cheek shows only delicate grazes. A faint fingerprint fragment is apparent near the tip of the coronet. Our EAC grade MS64. PCGS# 403925 Base PCGS# 1903

3080 1855 Upright 55, N-4, R.1, MS66 Brown NGC. Ex: Childs Collection. Grellman Die State a. Minute die lumps on the portrait attribute N-4, the usually encountered 1855 die marriage in high grades. A gorgeous tan-brown and olive-green cent. Essentially unabraded, though mint-made strike-throughs are noted on the field near ONE. Our EAC grade MS62. Ex: *Walter S. Childs Collection (Bowers & Merena, 8/1999)*, lot 48, which realized \$978. NGC ID# 226M, PCGS# 406154 Base PCGS# 1907

3081 1855 Upright 55, N-4, R.1, MS65 Red and Brown PCGS. CAC. Grellman Die State a. Brick-red borders encompass gunmetal-gray centers. Coruscating and nearly unabraded. The upper stars show softness of impression. Small die lumps on the portrait identify the Newcomb pairing, prevalent among high grade 1855 examples. Our EAC grade MS62. NGC ID# 226M, PCGS# 46953

3082 1855 Slanted 55, N-10, R.1, MS67 ★ Brown NGC. Grellman Die State e. Grellman states that a "strong point down to left from front edge of coronet" identifies the Newcomb variety, one of only three with a slanted 55 in the date. Predominantly ocean-blue but glimmers of orange-red linger in protected regions. Lustrous and well struck with a pristine reverse and a couple of unobtrusive obverse grazes. Our EAC grade MS63. NGC ID# 226M, PCGS# 406174 Base PCGS# 1910

FLYING EAGLE CENTS

**1857 Flying Eagle Cent, MS65
Well-Preserved and Lustrous**

3083 1857 MS65 PCGS. Housed in a green label PCGS holder, this remarkable Gem has highly lustrous and frosty tan surfaces with traces of gold and iridescent toning on each side. A few minuscule spots are evident but of little concern. The strike is bold and the aesthetic appeal is excellent. PCGS has only certified 16 numerically finer examples (8/15). Ex: *Central States Signature (Heritage, 4/2009)*, lot 1078. NGC ID# 2276, PCGS# 2016

3084 1857 Doubled Die Obverse, Snow-4, FS-101, MS64 NGC. CAC. The obverse shows light die doubling throughout, with the spread most apparent on the final A in AMERICA. A well struck golden-brown near-Gem with exemplary surfaces and impeccable eye appeal. NGC ID# 2276, PCGS# 37378

3085 1857 Obverse Die Clash with Seated Half, Snow-9, FS-402, MS63 NGC. Eagle Eye Photo Seal, card not included. Clash marks on the obverse field are from a Seated Liberty obverse die. These are most interesting beneath STATES, but heaviest across AMERICA. A high grade example with lovely peach toning and a bold strike on the eagle. FS-402 Census: 4 in 63, 21 finer (7/15). NGC ID# 2276, PCGS# 37375

3086 1858 Small Letters MS64 PCGS. Low Leaves Reverse. Close E in ONE. An intricately struck and lustrous golden-brown and olive-green near-Gem. Marks are nearly absent, although a few tiny spots are scattered. The reverse exhibits a wire rim, unusual for the briefly coined Flying Eagle type. NGC ID# 2279, PCGS# 2020

1858 Flying Eagle Cent, MS65 Radiantly Lustrous

3087 1858 Small Letters MS65 PCGS. Low Leaves, Close E Reverse. The Small Letters 1858 Flying Eagle cent is scarcer than its Large Letters counterpart, particularly in Gem or finer grades. This MS65 coin is incredibly sharp throughout, with satiny bronze-gold luster and impeccably preserved surfaces. A small, shallow planchet depression below the first S in STATES is mint-made and should not be confused for an abrasion. Population: 76 in 65, 11 finer (8/15). NGC ID# 2279, PCGS# 2020

1858 Small Letters Cent, MS65 Short-Lived Type Coin

3088 1858 Small Letters MS65 NGC. High Leaves, Closed E in ONE. A light golden-brown Gem that boasts sweeping luster and virtually unmarked surfaces. The strike shows only minor blending on the edge of the tail and the right-side cotton leaves. A fleck at 5 o'clock on the obverse provides the sole consequential carbon. Ex: Exclusively Internet #25031 (Heritage, 2/2005), lot 11015, which realized \$2,900. From The Stephen A. Walling Collection. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

3089 1859 MS64 PCGS. CAC. Satiny bronze-gold luster shows a blush of deeper peach color on each side of this Choice Laurel Wreath type coin. The strike is bold throughout the wreath and headdress feathers, and the surfaces show remarkably few abrasions for the grade. A small planchet defect hides within the N in CENT. NGC ID# 227E, PCGS# 2052

1859 Indian Cent, MS65 First-Year Type Coin

3090 1859 MS65 NGC. Bold central devices and satiny bronze-gold luster are the hallmarks of this Gem Laurel Wreath type coin. Close study with a loupe reveals a few trivial grazes on Liberty's cheek which limit the grade, but the eye appeal is excellent. NGC has seen just 11 finer submissions (8/15). NGC ID# 227E, PCGS# 2052

1859 Indian Cent, MS65 One-Year Laurel Wreath Reverse

3091 1859 MS65 PCGS. CAC. A lustrous, tan-gold example of this inaugural Laurel Wreath type, this Gem Indian cent is razor-sharp on the obverse portrait, but a trifle weak on some of the peripheral lettering. The reverse shows significant die erosion in the fields, but much of the wreath remains sharp. PCGS reports only 27 coins finer (8/15). NGC ID# 227E, PCGS# 2052

3092 1860 MS66 NGC. A well struck peach-gold Premium Gem with hints of lilac toning on the high points. Lustrous and nearly free from contact. Despite a bountiful mintage, scarce in the present quality. Census: 39 in 66, 3 finer (8/15). Ex: FUN Signature (Heritage, 7/2007), lot 442, which realized \$1,610. From The Stephen A. Walling Collection. NGC ID# 227E, PCGS# 2058

3093 1861 MS65 PCGS. CAC. A magnificent Gem that boasts coruscating luster, a good strike, an unmarked appearance, and consistent golden-brown and jade-green toning. Despite a mintage that exceeded ten million pieces, none could be found in circulation a few years later, due to Civil War hoarding. NGC ID# 227G, PCGS# 2061

3094 1861 MS65 NGC. CAC. A pleasing copper-nickel type coin, this 1861 Indian cent shows exceptional surface quality, even for the Gem grade level, with softly luminous bronze-gold luster. As is sometimes seen on coins of this composition, the strike is a little soft on the upper headdress feathers and the reverse wreath bow. NGC ID# 227G, PCGS# 2061

3095 1861 MS66 PCGS. CAC. The 1861 is one of the more plentiful copper-nickel Indian cent issues, but it becomes conditionally scarce at the Premium Gem grade level. This piece is boldly struck, with satiny bronze-gold luster. There are no obvious carbon spots. Population: 63 in 66 (2 in 66+), 13 finer (7/15). NGC ID# 227G, PCGS# 2061

3096 1864 Copper-Nickel MS65 PCGS. Satiny luster illuminates tan-gray toning over much of this Gem copper-nickel Indian cent, although the patina is thin on the reverse. The surfaces are well-preserved and free of carbon, although the wreath bow and the headdress feathers show moderate weakness. PCGS lists 25 finer examples (8/15). NGC ID# 227K, PCGS# 2070

3097 1864 Bronze No L, Doubled Die Obverse, Snow-4c, MS63 Brown ANACS. This is a late die state example of the popular Snow-4 doubled die obverse, with both sides heavily polished and the reverse rotated 30 degrees counterclockwise. On the obverse there is a die crack extending from the rim through the 8 in the date. In the terminal die state, this crack extends to the first T in STATES and becomes extremely heavy. This Select example displays smooth, glossy surfaces with an appealing patina that includes olive, burgundy, gold, and plum hues. PCGS# 37396 Base PCGS# 2076

3098 1865 Fancy 5 MS66 Red and Brown PCGS. A lovely Fancy 5 representative, showing pristine surfaces with just a hint of glossy auburn toning. Significant coppery-orange luster shines through when rotated beneath a light. This piece is boldly struck and free of bothersome carbon. Population: 6 in 66 Red and Brown, 0 finer (8/15). NGC ID# 227N, PCGS# 2083

1865 Cent, MS66 Red and Brown High-End Fancy 5 Example

3099 1865 Fancy 5 MS66 Red and Brown PCGS. CAC. The Fancy 5, showing a curved flag on that date numeral, is slightly more available than its Plain 5 counterpart, but Premium Gem examples are nonetheless scarce. This Red and Brown coin shows significant coppery-orange luster, but a dusting of olive-brown toning over each side precludes a Red designation. The strike is bold and there are no discernible abrasions. Population: 6 in 66 Red and Brown, 0 finer (8/15). NGC ID# 227N, PCGS# 2083

3100 1867/67 Snow-1, FS-301, MS64 Red and Brown PCGS. The 67 in the date is widely repunched north. Blended orange, tan, and olive colors encompass this lustrous and unabraded Choice cent. The strike is bold except on the top of the shield.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 7254, which realized \$2,530. PCGS# 37460 Base PCGS# 92089

1869 Indian Cent, MS66 Red and Brown Well-Balanced Toning and Luster

3101 1869 MS66 Red and Brown NGC. CAC. Glowing coppery-orange luster penetrates soft auburn-brown overtones on each side of this Premium Gem example, while the surface preservation is outstanding. The wreath bow and the top three headdress feathers show slight softness, but the remaining design elements are bold. The 1869 is a better date in high grade, as can be seen by the certified population data. Census: 30 in 66 Red and Brown, 0 finer (8/15).
From The Stephen A. Walling Collection. NGC ID# 227T, PCGS# 2095

1872 Indian Cent, MS65 Red and Brown Elusive in High Grade

3102 1872 MS65 Red and Brown PCGS. The 1872 is a lower mintage issue that has been the subject of hoarding in the past in the XF to MS63 grade range. Few Gems are known, and are infrequently encountered. This is an attractive coin whose original mint red color is evenly mellowed over each side, giving the piece a well-balanced appearance. Just a bit softly struck over the highpoints, though all four diamonds are fairly sharp. Population: 73 in 65 (1 in 65+) Red and Brown, 6 finer (8/15).
Ex: Long Beach Signature (Heritage, 6/2005), lot 5143; FUN Signature (Heritage, 1/2006), lot 754; Central States Signature (Heritage, 5/2007), lot 1078.
From The Stephen A. Walling Collection. NGC ID# 227W, PCGS# 2104

3103 1873 Open 3 MS64 Red PCGS. The Open 3 Indian cent of 1873 is slightly more plentiful than the later Closed 3 variant, although both issues are scarce in full Red grades. This Choice Open 3 example is boldly struck, with fresh copper luster and no bothersome carbon spots. A few trivial grazes on Liberty's cheek preclude a finer grade. Population: 53 in 64 (2 in 64+) Red, 26 finer (7/15). NGC ID# 227Y, PCGS# 2108

3104 1874 MS65 Red and Brown PCGS. A single mark on Liberty's cheek is the only thing separating this lovely Gem from a grade one or even two points finer. The strike is razor-sharp and the virtually pristine, luminous surfaces showcase attractive coppery-orange luster penetrating subtle burgundy-brown overtones. Clashed on both sides, with a few trivial specks. PCGS lists three Red and Brown coins finer (8/15). NGC ID# 227Z, PCGS# 2119

- 3105 1874 MS65 Red NGC.** A rich orange-red Gem that has a crisp strike and exemplary preservation. A hint of gunmetal color is present on the cheek and eyebrow. A better date Indian cent seldom encountered with full Red color. Census: 19 in 65 Red, 3 finer (8/15).

Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 132, which realized \$1,841.15.

From The Stephen A. Walling Collection. NGC ID# 227Z, PCGS# 2120

- 3106 1877 VF35 NGC.** A problem-free midgrade example of this Indian cent key, showing moderate detail and even wear. The shallow N in ONE confirms the authenticity, and the overall eye appeal is pleasing for the grade. NGC ID# 2284, PCGS# 2127

- 3107 1877 VF35 NGC. CAC.** Steel-blue and chocolate-brown surfaces are problem-free with uniform wear from circulation. The top diamond on the hair ribbon is distinct, and LIBERTY is mostly sharp. The 1877 is immediately recognizable as the key date in the Indian Head cent series with a mintage of just 852,500 coins. NGC ID# 2284, PCGS# 2127

- 3108 1877 — Cleaning — PCGS Genuine. AU Details.** This moderately circulated key date cent is primarily orange-gold with glimpses of lime-green and a couple of tiny gray spots. Although recolored, the surfaces lack any obvious abrasions. NGC ID# 2284, PCGS# 2127

- 3109 1877 AU53 PCGS.** There is seemingly endless demand for affordable 1877 Indian cents among collectors putting together circulated date sets of this series. The present AU coin shows medium brown patina and strong detail. NGC ID# 2284, PCGS# 2127

1877 Indian Cent, Sharp AU58

- 3110 1877 AU58 NGC.** This is a sharply detailed, near-Mint example of the key Indian cent issue, showing hints of red luster beneath primarily auburn-brown toning. A trace of friction over the highest points of the obverse portrait confirms the grade, but the coin appears Mint State to the unaided eye. NGC ID# 2284, PCGS# 2127

1877 Indian Cent, MS61 Brown Collectible Mint State Example

- 3111 1877 MS61 Brown NGC.** A budget-friendly Uncirculated example of this key Indian cent issue, showing well-defined motifs and uniformly chocolate-brown surfaces. The shallow lower-right corner on the N in ONE is diagnostic of genuine circulation strikes. Light surface contact confirms the grade. From The Stephen A. Walling Collection. NGC ID# 2284, PCGS# 2127

1880 Snow-1 Cent, MS65 Red Off-Center Clash Marks on Reverse Doubled Die Obverse

- 3112 1880 Doubled Die Obverse, Clashed Reverse, Snow-1, FS-101, MS65 Red PCGS. CAC.** A spectacular variety, widely sought and seldom seen in Gem Red condition. Off-center die clashing shows boldly at the central reverse, with the clashed image of the obverse denticles and adjacent devices visible in E of ONE and within the shield. On the obverse, LIBER is narrowly doubled. According to Rick Snow's 2014 reference, "This is one of the top varieties of the series, and certainly one of the most interesting." The current example ranks tied at the top of the Snow census for the variety. Splendid peach-orange and ruby-red colors are brightly lustrous, with a few inconsequential pinhead-sized carbon spots but no serious marks. Population: 3 in 65 Red, 0 finer (7/15). PCGS# 37515

- 3113 1883 Misplaced Date, Snow-1, FS-403, MS66 Brown NGC.** Eagle Eye Photo Seal, card included. The base of a misplaced 1 is plainly visible protruding from the tip of the neck truncation just below the pearls. The hallmark of this example is its vibrant coloration, which includes steel-blue, plum, and olive-gold. The strike is bold and there are no bothersome abrasions. PCGS# 404543 Base PCGS# 2145

- 3114 1886 Type One MS65 Red and Brown PCGS.** This Gem Type One 1886 Indian cent displays attractive patina, including rich copper-red luster penetrating burgundy-brown and plum overtones. The strike is bold and there are no disruptive abrasions. Population: 43 in 65 (1 in 65+) Red and Brown, 4 finer (8/15). NGC ID# 228D, PCGS# 2155

- 3115 1888/7 Snow-1 — Environmental Damage — NGC Details. XF.** This late die state shows a large rim cud over the dentils at 9 o'clock on the obverse. The underlying 7 is clear above and below the upper and lower loops of the last 8. Rick Snow refers to this rare 1888/7 overdate as "the top variety in the Indian Cent series." Steel-blue surfaces feature good detail with LIBERTY and the overdate clear. The noted environmental damage from improper storage does not overly detract.

- 3116 1897 MS65 Red PCGS. CAC.** The obverse of this Gem 1897 cent shows vibrant coppery-red luster, while the reverse exhibits deeper hues of the same amid brighter lilac and mint-gold. Sharply struck and devoid of carbon, with no bothersome abrasions. Population: 57 in 65 (1 in 65+) Red, 20 finer (7/15). NGC ID# 342W, PCGS# 2198

- 3117 1908 MS66 Red NGC.** Blaze-orange surfaces flash lilac highlights when rotated under light. A beautifully lustrous, frosted Red cent with just-minted eye appeal and a sharp strike. A glass reveals a few tiny carbons near ER of AMERICA; otherwise, this Premium Gem example shows no limiting factors. Just two pieces are numerically finer at NGC. Census: 31 in 66 Red, 2 finer (8/15). NGC ID# 2295, PCGS# 2231

- 3118 1908-S MS64 Red PCGS. CAC.** The 1908-S was the first copper coin ever produced at the San Francisco Mint, and holds an important place in numismatic history. This brilliant example has rich orange luster and speckled brown toning on both sides. NGC ID# 2296, PCGS# 2234

- 3119 1908-S MS65 Red PCGS. CAC.** This is a lovely Gem example of this semikey San Francisco issue, one that must have just missed the next highest grade. There is some lightness of strike on parts of the reverse shield and around the date on the obverse, but the headdress feathers are well-defined. There are no obvious carbon specks on the coppery-orange surfaces. NGC ID# 2296, PCGS# 2234
- 3120 1909 MS66 Red PCGS.** This final-year Indian cent is boldly struck with hints of reflectivity in the fields. Glowing lemon-orange luster is visited by tinges of cherry-red around the outer peripheries, while a faint partial print appears at the upper-right reverse. Only six MS67 Red coins are finer at PCGS (7/15). NGC ID# 2297, PCGS# 2237
- 3121 1909-S MS63 Brown PCGS.** Commonly referred to as the “other” key date, the 1909-S Indian cent boasts the lowest mintage of the series (309,000 coins) and is a scarce issue in pleasing Mint State condition. This Select example shows satiny luster with tinges of gold color peeking through medium brown toning on each side. The feather tips are slightly soft, as usual. NGC ID# 2298, PCGS# 2238
- 3122 1909-S MS64 Red and Brown PCGS.** A faint dusting of brown toning prevents a full Red grade for this Choice 1909-S Indian cent, although the overall impression is one of coppery-orange luster. There are no significant abrasions, but the characteristic weakness is present on the wreath bow and the top three headdress feathers. NGC ID# 2298, PCGS# 2239
- 3123 1909-S MS64 Red and Brown PCGS.** A low-mintage key, from the final year of the design, this attractive Choice example offers well-detailed design elements and well-preserved surfaces that show a mix of original red and light brown patina. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

- 3124 1863 PR65 PCGS.** A beautiful Gem proof example of this popular copper-nickel type coin. The strike is tack-sharp, with intricate detail reminiscent of a fresh die pair. Significant mirroring in the fields supports this assessment, while each side is blanketed in deeper bronze-red color. An unimportant carbon speck is hidden inside the O in OF. Population: 24 in 65 (1 in 65+), 8 finer (8/15). NGC ID# 229D, PCGS# 2262
- 3125 1864 Copper-Nickel PR65 PCGS. CAC.** A recorded mintage of just 370 proof copper-nickel Indian cents in 1864 contributes to the issue's scarcity in Gem condition. This example shows soft golden-orange color with highly reflective fields and fully struck, frosty devices. A few faint flecks appear upon close examination, though the overall appeal is excellent. Population: 44 in 65, 10 finer (7/15). NGC ID# 229E, PCGS# 2265
- 3126 1864 Copper Nickel PR64 Cameo PCGS. CAC.** Razor-sharp definition is evident on all design elements of this attractive Choice example, and the reflective fields contrast boldly with the frosty devices. A few scattered minor contact marks prevent an even higher grade. Population: 28 in 64 (2 in 64+) Cameo, 36 finer (8/15). NGC ID# 229E, PCGS# 82265
- 3127 1882 PR67 Red and Brown PCGS.** A needle-sharp Superb Gem that has iridescent olive-green and honey-gold colors. The cheek and the field below the chin have wispy vertical toning streaks. Ex: *Long Beach Signature (Heritage, 6/2001)*, lot 6203; *Long Beach Signature (Heritage, 2/2003)*, lot 5309, which realized \$1,150. NGC ID# 22A3, PCGS# 2334
- 3128 1883 PR66 Red and Brown NGC. CAC.** A lovely Premium Gem proof with razor-sharp detail and deep, gleaming mirrors. The central regions exhibit vivid violet color, while the margins deepen to olive-brown and gold, and there are tinges of rose around the outer peripheries. Census: 35 in 66 (1 in 66 ★) Red and Brown, 4 finer (7/15). NGC ID# 22A4, PCGS# 2337

- 3129 1907 PR65 Red PCGS. CAC.** Splendid orange color occupies much of both sides, although the right reverse margin displays ruby-red. Lustrous and well struck with minor flecks near the 7 in the date and the C in CENT. Housed in a first generation holder. Population: 17 in 65 Red, 16 finer (7/15). NGC ID# 22AW, PCGS# 2410

LINCOLN CENTS

- 3130 1909-S VDB AU55 NGC.** A collector-grade example, showing sharp motifs with just a brush of wear. Both sides have glossy chocolate-brown patina with a few light marks as expected for the grade. The 1909-S VDB continues to be the most sought-after issue in the Lincoln cent series, and claims a spot among the *100 Greatest U.S. Coins*. NGC ID# BYKW, PCGS# 2426
- 3131 1909-S VDB AU58 PCGS.** The olive-brown surfaces of this pleasing near-Mint specimen show a few traces of original red at the borders and no large or distracting abrasions are evident. Just a touch of wear shows on the well-detailed design elements and the all-important designer's initials are bold. NGC ID# BYKW, PCGS# 2426
- 3132 1909-S VDB — Cleaning — PCGS Genuine. Unc Details.** Generally dusky orange-gold, although the lower reverse displays rose-red and sea-green. This recolored key date cent has a bold strike and vibrant luster. Lincoln's shoulder has a spot, and a few thin marks are on the upper right obverse field. NGC ID# BYKW, PCGS# 2426
- 3133 1909-S VDB MS63 Brown PCGS.** Satiny surfaces show medium brown toning with hints of tan-gold luster peaking through in the recesses. There are a few scattered specks on the reverse, but no bothersome abrasions. The strike is a trifle soft on the obverse portrait. NGC ID# BYKW, PCGS# 2426
- 3134 1909-S VDB MS64 Brown NGC. CAC.** Glossy bronze-brown appears over each side of this Choice Brown 1909-S VDB cent, but with significant underlying golden luster. The strike is boldly executed and the surfaces are free of any major abrasions. NGC ID# BYKW, PCGS# 2426
- 3135 1909-S VDB MS64 Red and Brown PCGS.** Significantly more red than brown color appears on this bronze-gold 1909-S VDB Lincoln cent, although subtle olive overtones on the reverse preclude a Red designation. The strike is well-executed and there are no major abrasions. NGC ID# 22B2, PCGS# 2427
- 3136 1909-S VDB MS64 Red and Brown PCGS.** An attractive Choice example of this famous key Lincoln cent, with well-detailed design elements and bold VDB. The lustrous red surfaces show hints of light brown in selected areas, but only the most insignificant signs of contact are evident. NGC ID# 22B2, PCGS# 2427
- 3137 1909-S VDB MS64 Red and Brown PCGS.** The original red surfaces of this iconic key issue have mellowed to light brown in many areas, but only a few minor contact marks are evident. The design elements are well-detailed and the designer's initials are bold. NGC ID# 22B2, PCGS# 2427
- 3138 1909-S VDB MS64 Red and Brown PCGS. CAC.** The well-preserved, lustrous surfaces of this important key Lincoln cent are mostly original red, with just a touch of light brown patina in selected areas. The design elements are sharply detailed and the designer's initials are bold. NGC ID# 22B2, PCGS# 2427
- 3139 1909-S MS65+ Red PCGS.** A semikey date in the context of the series, the 1909-S Lincoln cent is actually scarcer than the '09-S VDB in the finer full Red grades. This Plus-designated Gem is well-struck and lustrous, with satiny golden-orange surfaces that show dashes of peach and lilac. NGC ID# 22B4, PCGS# 2434

**1909-S Lincoln Cent, MS66 Red
Glowing Mint Luster**

- 3140 1909-S MS66 Red PCGS.** Although regarded as a semikey by comparison, the 1909-S Lincoln cent is actually scarcer than the 1909-S VDB in high grade. This Superb Gem Red example shows crisp detail, with satiny bronze-gold and amber hues over each side. The luster is original and a couple tiny specks do not detract. PCGS records only six finer representatives (8/15). NGC ID# 22B4, PCGS# 2434

- 3141 1909-S/S S Over Horizontal S, FS-1502, MS66 Red PCGS.** Most high grade examples of FS-1502 show only blurry traces of the horizontal S. But the present Premium Gem is from an early die state, and shows clear serifs on the blundered mintmark. Lustrous and precisely struck with consistent apricot-gold color and a few pinpoint obverse flecks. NGC ID# 22B4, PCGS# 37645

**1910 Lincoln Cent, MS67 Red
Incredibly Luminous**

- 3142 1910 MS67 Red PCGS. CAC.** Full Red examples of this early Philadelphia issue are available through MS66, but Superb Gems are rarely seen. This piece is among the finest certified, a prime Registry Set candidate. The strike is sharp and the carbon-free surfaces display glowing orange-gold luster. Population: 27 in 67 Red, 0 finer (8/15). NGC ID# 22B5, PCGS# 2437

- 3143 1910-S MS66 Red and Brown PCGS. CAC.** The well-preserved surfaces of this impressive Premium Gem are mostly original red, with a few hints of light brown patina mixed in. The design elements are well-detailed and eye appeal is outstanding. Population: 6 in 66 Red and Brown, 0 finer (8/15). NGC ID# 22B5, PCGS# 2439

- 3144 1910-S MS66 Red PCGS Secure.** This early San Francisco Lincoln cent issue is notably scarce finer than the Gem Red level, and poses a challenge for the Registry enthusiast. This Premium Gem example is bold throughout the design elements and displays matte-like orange-gold luster with hints of rose and olive revealed beneath a light. Population: 77 in 66 (2 in 66+) Red, 3 finer (8/15). NGC ID# 22B6, PCGS# 2440

- 3145 1912-D MS65 Red PCGS.** A seldom seen Gem Red example of this early Denver Lincoln cent. Satiny orange-gold luster is the primary color, although a dash of plum in front of Lincoln's brow serves as a pedigree marker. A few scattered specks and trivial die fatigue characterize the fields. There are only 18 full Red coins finer at PCGS (8/15). NGC ID# 22BB, PCGS# 2455

- 3146 1912-D MS65 Red PCGS.** A frosty and bright example that retains strong mint bloom and minimal traces of carbon. The dies show modest wear and thus lack the crispness seen on the earliest strikes. Minor planchet chatter marks are present on the upper reverse. David Lange (2005) writes: "Low-end Mint State coins are usually available, while choice and gem examples having original, fully red or even red/brown color are scarce and always in demand." PCGS lists only 18 Red examples finer (8/15).

Ex: *Portland Signature* (Heritage, 3/2004), lot 5179; *Central States Signature* (Heritage, 4/2006), lot 476; *Dallas Signature* (Heritage, 11/2007), lot 138. NGC ID# 22BB, PCGS# 2455

- 3147 1912-S MS65 Red and Brown PCGS. CAC.** The relief elements are sharply rendered aside for the slightest trace of softness over LI in LIBERTY and the O in ONE. The hair and beard are particularly bold. Glistening luster cascades over auburn-gold surfaces void of mentionable marks. Population: 52 in 65 (1 in 65+) Red and Brown, 3 finer (7/15). NGC ID# 22BC, PCGS# 2457

**1912-S Cent, MS65 Red
Better Date This Fine**

- 3148 1912-S MS65 Red PCGS.** The availability of this issue drops significantly at the Gem full Red grade level, and finer coins are extremely rare. This MS65 example displays well-struck design elements and satiny copper-orange luster. A few trivial specks do not detract. Population: 72 in 65 (5 in 65+) Red, 1 finer (8/15). NGC ID# 22BC, PCGS# 2458

- 3149 1914-D AU55 NGC.** The obverse of this important key-date Lincoln exhibits rich chocolate-brown patina, with lighter tan on the reverse. Trivial surface marks and a trace of high-point wear limit the grade. NGC ID# 84BX, PCGS# 2471

- 3150 1914-D — Cleaning — PCGS Genuine. Unc. Details.** A fully defined and satiny key date cent. The wheat-gold and lavender color would deceive many collectors. Devoid of any apparent abrasions. NGC ID# 84BX, PCGS# 2471

- 3151 1914-D MS61 Brown NGC.** A pleasing lower-end Mint State example of this key Lincoln cent issue, showing medium brown patina with hints of drab-olive here and there. The coin is well-struck and abrasions are at a minimum. NGC ID# 84BX, PCGS# 2471

**1914-D Lincoln Cent, MS63 Brown
Multihued Patina**

- 3152 1914-D MS63 Brown PCGS.** The 1914-D is a key Lincoln cent issue with limited Mint State availability. This Select example is designated Brown, but the patina includes rose, olive, and lilac hues in addition to an overall burgundy-brown hue. The strike is bold and there are no bothersome abrasions present. NGC ID# 84BX, PCGS# 2471

**1914-D Cent, MS64 Red and Brown
Significant Original Red**

3153 1914-D MS64 Red and Brown PCGS. This key Denver issue has proven scarcer with remaining mint red than has been previously believed. This Choice example is second to few in the Red and Brown category, showing well-preserved satin luster and blended coppery-orange and burgundy-brown hues. A few tiny specks do not detract. NGC ID# 22BH, PCGS# 2472

3154 1915 MS66 Red PCGS. Full Red examples of this early Philadelphia issue become scarce in Premium Gem condition, and are rarely seen finer. This piece displays needle-sharp detail in Lincoln's hair and beard, with satiny surfaces that reveal coppery-pink luster. A few trivial specks are invisible to the naked eye. PCGS lists 12 finer full Red examples (7/15). NGC ID# 22BK, PCGS# 2479

3155 1915 MS66 Red PCGS Secure. The blazing original red surfaces of this spectacular Premium Gem are free of mentionable distractions and the design elements exhibit razor-sharp definition throughout. Population: 93 in 66 (4 in 66+) Red, 12 finer (8/15). NGC ID# 22BK, PCGS# 2479

**1916 Lincoln Cent, MS67+ Red
Exceptional Registry Quality**

3156 1916 MS67+ Red PCGS Secure. CAC. The eye appeal and technical quality of this 1916 Lincoln cent are outstanding, rivaling the merit of many 1950s coins which are abundant in high grade. The 1916 is rare in Superb Gem full Red condition. This Plus-graded coin is tied for the finest at PCGS and displays radiant, mint-fresh luster accentuated by tinges of rose and orange in the central regions. Population: 55 in 67 (2 in 67+) Red, 0 finer (8/15). NGC ID# 22BN, PCGS# 2488

3157 1916-S MS65 Red and Brown PCGS. CAC. This lovely Gem exhibits slight mellowing of its full red mint luster with a few trivial spots on each side. The strike is bold and the eye appeal is exceptional. PCGS has certified 38 in MS65 Red and Brown and 23 in MS65 Red, the finest pieces that service has examined. NGC ID# 22BR, PCGS# 2493

**1918 Lincoln Cent, MS67 Red
New Obverse Hub**

3158 1918 MS67 Red PCGS. The end of World War I saw vast mintages of the Lincoln cent as commercial demand increased. The 1918 Philadelphia cent was struck to the extent of more than 288 million cents, followed by 392 million in 1919. But few can compare technically or aesthetically with this Superb Gem piece. The surfaces are a bright yellow-tinted orange-red, even overall, and the strike is full throughout. (The obverse hub was replaced in this year to replace a tiny VDB, removed from the reverse in 1909, on Lincoln's shoulder.) The only mentionable defect is a small carbon spot atop the neck, just below the beard. Population: 30 in 67 (3 in 67+) Red, 1 finer (8/15). NGC ID# 22BV, PCGS# 2506

3159 1918-D MS65 Red and Brown PCGS. This razor-sharp Gem is beautifully patinated. The reverse and the central obverse are mostly orange-red, while the obverse border (and glimpses of the reverse margin) are jade-green. The eye appeal is outstanding. Housed in an old green label holder. NGC ID# 28GF, PCGS# 2508

3160 1920-D MS65 Red PCGS. CAC. The design elements of this spectacular Gem are sharply detailed throughout and the lustrous red surfaces show no mentionable distractions, even on close inspection. Population: 89 in 65 Red, 7 finer (8/15). NGC ID# 22C4, PCGS# 2527

3161 1921-S MS64 Red PCGS. The lustrous red surfaces of this attractive Choice specimen show only minor signs of contact, with a few streaks of light brown toning. The design elements are well-detailed and eye appeal is quite strong. NGC ID# 22C7, PCGS# 2536

3162 1922-D MS65 Red PCGS. Awash in satin luster with pumpkin-gold color and light coppery rim accents, this well-struck Gem has minimal carbon spotting in the fields. The reverse shows three significant die breaks, the most prominent of which extends from the L in PLURIBUS to the E in Cent. PCGS counts just 10 finer pieces (6/15). NGC ID# 22C8, PCGS# 2539

3163 1922 No D, Strong Reverse, FS-401, XF45 PCGS. Die Pair 2. TRUST and the second 2 in the date are sharp, characteristics of the key No D, Strong Reverse variety. A lightly abraded and charming golden-brown example that displays separated lines within the wheat ears.

Ex: Long Beach Signature (Heritage, 6/2006), lot 388, which realized \$3,450.

From The Stephen A. Walling Collection. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

1922 No D Strong Reverse Cent, AU50

- 3164 1922 No D, Strong Reverse, FS-401, AU50 PCGS.** Die Pair 2. The reverse is as sharp as the missing-mintmark obverse is mushy. Medium-brown color on the obverse has a lighter mahogany counterpart over a minority of the reverse. This is a lightly worn but thoroughly pleasing example of one of the most sought-after Lincoln cent varieties.

Ex: *Long Beach Signature* (Heritage, 2/2012), lot 3897. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1922 No D, Strong Reverse Cent
MS63 Brown, FS-401**

- 3165 1922 No D, Strong Reverse, FS-401, MS63 Brown NGC.** Die Pair 2. The 1922 No D cents were not widely collected until a number of years after issue, when they began to appear on penny boards and in standard price guides. The typical example grades VF, and nice Mint State representatives are surprisingly rare. Three varieties are known, but only Die Pair 2 commands a large premium, because the other two varieties usually show traces or a "shadow" of a Denver mintmark. Die Pair 2 examples never show a mintmark and have a sharp reverse. The present coruscating and lightly abraded coin is primarily apple-green but has glimpses of rose-red near the rims. Census: 10 in 63 Brown, 3 finer (8/15). NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

- 3166 1924-D MS65 Brown PCGS. CAC.** With one of the lowest mintages in the entire Lincoln cent series, the 1924-D is a coveted semikey. Lincoln's head, LIB, and the O in ONE show a bit of strike softness, but the remaining elements are bold. Each side is colorfully toned in rich shades of purple, blue, and mahogany-brown, lending excellent eye appeal to this Gem. Population: 15 in 65 Brown, 0 finer (7/15). NGC ID# 22CD, PCGS# 2552

- 3167 1924-D MS65 Red and Brown NGC.** Gunmetal-blue and copper-orange patina blankets the carefully preserved surfaces of this Gem semikey. Lincoln's head, LIB, and the O in ONE show a bit of strike softness, but the remaining devices are crisp. Given the rarity of coins with full mint red color, this is a prime example for the collector on a budget. NGC reports only four Red and Brown coins finer (7/15). NGC ID# 22CD, PCGS# 2553

- 3168 1925 MS67 Red PCGS. CAC.** Ex: Jack Lee. A Superb Gem equal to the finest quality that PCGS has certified. Each side has exceptional orange mint color with frosty luster. A few splashes of light gold add to the impressive presentation. Dave Bowers says that the 1925 is "common in any grade you desire," but those comments seem to apply only up to MS65. Population: 65 in 67 Red, 0 finer (8/15). Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 5336; *Jack Lee Estate Lincoln Cent Registry Set* (Heritage, 12/2008), lot 1118, which realized \$3,220. NGC ID# 22CF, PCGS# 2560

- 3169 1925-S MS64 Red PCGS.** The 1925-S is an extremely challenging issue for the collector putting together a Lincoln cent set in full Red grades. This Choice example is actually upper-end for the Red color category. Satiny copper-red hues set each side aglow and grant pleasing eye appeal. The strike is a trifle soft on the finer details of the portrait. Population: 57 in 64 Red, 10 finer (8/15). NGC ID# 22CH, PCGS# 2566

**1926-D Cent, MS65 Red
Elusive This Well-Preserved**

- 3170 1926-D MS65 Red PCGS.** Ex: Jack Lee. This is an exceptional example with bright pinkish-orange mint luster and soft, frosty surfaces. It is far sharper than most examples and is among the finest survivors of the issue. Traces of greenish toning on each side only add to the overall eye appeal of this Gem. Struck from mildly rotated dies. Population: 50 in 65 Red, 4 finer (8/15). Ex: *The Ron Bozarth Registry Collection / FUN Signature* (Heritage, 1/2006), lot 47; *The Jack Lee Estate Lincoln Cent Registry Set / Houston Signature* (Heritage, 12/2008), lot 188. NGC ID# 22CK, PCGS# 2572

**1926-S Cent, MS64+ Red and Brown
Better San Francisco Issue**

3171 1926-S MS64+ Red and Brown PCGS. Olive and russet hues emerge from satiny bronze-gold luster on this near-Gem 1926-S, determining the Red and Brown color designation. Some striking softness appears on the portrait, mirroring minor die erosion in the peripheral regions of each side. This issue is rarely seen finer, regardless of color category. NGC ID# 22CL, PCGS# 2574

3172 1926-S MS64 Red and Brown PCGS. CAC. The 1926-S is one of the more challenging issues to locate with remaining mint Red. This Choice example displays a medium olive-gold hue with a few small flecks that are of little consequence. Well-struck with minimal die erosion. PCGS lists 15 Red and Brown coins finer (7/15). NGC ID# 22CL, PCGS# 2574

3173 1927 MS67 Red PCGS. A fully struck peach-red and olive-green Superb Gem. Contact and carbon are essentially absent. Outstanding quality for this plentiful but conditionally challenging issue. Encapsulated in a green label holder. Population: 45 in 67 (2 in 67+) Red, 0 finer (8/15). NGC ID# 22CM, PCGS# 2578

3174 1927-S MS64 Red PCGS. CAC. Within the full Red color category, MS64 is typically the finest that the 1927-S cent is available. Gem examples are rarely seen. This Choice representative displays a well-executed strike and satiny luster. The coppery-pink surfaces show hints of lilac, olive, and amber throughout. PCGS lists 18 Red coins finer (8/15). NGC ID# 22CP, PCGS# 2584

3175 1928 MS67+ Red NGC. CAC. The original red surfaces of this high-end Superb Gem radiate vibrant mint luster, with no visible flaws. Razor-sharp definition is evident on all design elements and eye appeal is terrific. A Registry Set essential. Census: 14 in 67 (1 in 67+) Red, 0 finer (8/15). NGC ID# 22CR, PCGS# 2587

**1928 Cent, MS67+ Red
Among the Finest Certified**

3176 1928 MS67+ Red PCGS. CAC. This exemplary 1928 Lincoln is tied for the finest certified by either service, an honor which makes it an essential acquisition for the competitive Registry Set collector. Fresh dies produced razor-sharp detail on the relief elements, while the satiny mint luster glows bronze-gold around the margins and deeper coppery-orange in the centers. Population: 66 in 67 (5 in 67+) Red, 0 finer (8/15). NGC ID# 22CR, PCGS# 2587

3177 1928-S Large S, FS-501, MS64 Red PCGS. This *Cherry-pickers'* variety, showing an abnormally large mintmark nearly the size of the 2, is seldom seen this fine. This piece is full red and satiny, with few surface imperfections. A couple tiny specks do not detract. Population: 4 in 64 Red, 0 finer (8/15). NGC ID# 22CT, PCGS# 37708 Base PCGS# 2593

3178 1929 MS67 Red PCGS Secure. CAC. Even collectors not overly interested in the Lincoln cent series will be drawn to this Superb Gem 1929. The surfaces are aglow with mint-fresh frost that shimmers in coppery-rose around the margins and lighter pink-gold in the centers. Completely free of carbon and an absolutely stunning coin. Population: 57 in 67 (3 in 67+) Red, 0 finer (8/15). NGC ID# 22CU, PCGS# 2596

3179 1935 MS67+ Red PCGS. CAC. A strong Registry Set candidate, this Plus-graded Superb Gem 1935 cent glows with mint-fresh luster and exhibits boldly rendered motifs. The surfaces show primarily coppery-gold color but with wisps of lilac and mint throughout. No discernible carbon is present. PCGS lists six coins finer (7/15). NGC ID# 22DB, PCGS# 2641

3180 1935-S MS66+ Red PCGS. The availability of this San Francisco issue declines sharply above the MS66 grade level, making this Plus-designated coin suitable for Registry consideration. The strike is well-executed, and the coppery-orange surfaces exhibit only a couple tiny specks of carbon. PCGS lists 12 Red coins finer (8/15). NGC ID# 22DD, PCGS# 2647

**1936 Lincoln Cent, MS66 Red
Doubled Die Obverse**

3181 1936 Doubled Die Obverse, Type Two, FS-102, MS66 Red PCGS. CAC. Ex: Jack Lee. A high-grade, full Red example of this rare *Guide Book* variety. In addition to the diagnostic broken left leg of the R, the date is also strongly doubled. The surfaces show warm mint red luster, with the only variation in color being a dash of lilac over the high point of Lincoln's cheek, only seen with a loupe. Population: 20 in 66 (7 in 66+) Red, 0 finer (8/15). Ex: FUN Signature (Heritage, 1/2006), lot 272; Central States Signature (Heritage, 5/2007), lot 1268; The Jack Lee Estate Lincoln Cent Registry Set / Houston Signature (Heritage, 12/2008), lot 216; Long Beach Signature (Heritage, 2/2011), lot 3142. NGC ID# 22DE, PCGS# 92650

3182 1936-S MS67 Red PCGS. From an original mintage just above 29 million coins, Lange (2005) notes that this San Francisco issue was widely hoarded by the roll and remains common in all grades. Lange's comments are accurate with respect to Uncirculated, full Red coins in MS63 to MS66 condition, but Superb Gems are scarce at both of the major grading services. This exemplary example is well-struck with shimmering mint luster and pleasing, light mint-red toning accompanied by faint lilac accents that appear mainly near the borders. Both sides of the coin are clean and distraction-free, as expected for the grade. Population: 54 in 67 (1 in 67+) Red, 0 finer (8/15). NGC ID# 22DG, PCGS# 2656

**1938-D Cent, MS67+ Red
Just One Coin Finer at PCGS**

- 3183 1938-D MS67+ Red PCGS.** A Registry-grade Superb Gem, this Plus-designated 1938-D Lincoln cent displays vibrant coppery-orange luster, devoid of carbon spotting. The strike is bold and the preservation is exceptional. This is one of just seven Plus-graded MS67 Red examples at PCGS, where only one MS68 Red coin is finer (8/15). NGC ID# 22DM, PCGS# 2671
- 3184 1940 MS67+ Red PCGS.** With just five MS68 coins finer at PCGS (8/15), this Plus-designated Superb Gem 1940 cent will appeal to a range of Registry collectors seeking to obtain the best possible coins for their collections. The strike is bold and the virtually carbon-free surfaces display glowing coppery-orange luster. NGC ID# 22DT, PCGS# 2686
- 3185 1940 MS67+ Red PCGS. CAC.** Intense mint frost glows on each side of this high-end Superb Gem, allowing rich orange-gold hues to dominate the lower portions of each side and softer rose shadings to grace the upper obverse. The strike is sharp and the surfaces are free of carbon spotting. Only five coins are finer at PCGS (7/15). NGC ID# 22DT, PCGS# 2686
- 3186 1943 MS68 PCGS.** The surfaces of this high-end steel cent type coin are nearly flawless and show no traces of oxidation. One tiny fleck is noted on Lincoln's cheek, this perhaps the only bar to an even finer designation. This coin's virtually unimprovable quality is reflected in the combined certified population, which shows none better. Population: 46 in 68, 0 finer (8/15).
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 4002; Baltimore Signature (Heritage, 3/2009), lot 323. NGC ID# 22E4, PCGS# 2711
- 3187 1943-D MS68 PCGS.** A magnificent MS68 example of this popular wartime issue, with razor-sharp definition on all design elements and lustrous, well-preserved surfaces that show a single spot of amber in Lincoln's hair. PCGS has graded no numerically finer examples (8/15). PCGS# 2714
- 3188 1944 MS67+ Red PCGS. CAC.** Blush-red and rose hues emerge from the lower obverse and upper reverse borders on this Superb Gem Registry coin, pushing back golden-orange hues to the far periphery. The strike is bold and the carbon-free surfaces emit generous frosty luster. A single coin is technically finer at PCGS (8/15). NGC ID# 22EA, PCGS# 2722
- 3189 1944 MS67+ Red PCGS. CAC.** This is a blazing Superb Gem Registry coin, showing intermingled shades of rose-red, peach-gold and lilac throughout the generously frosted surfaces. The strike is a trifle soft on the O in ONE, but this is trivial in light of the outstanding eye appeal. PCGS lists just a single coin finer (8/15). NGC ID# 22EA, PCGS# 2722
- 3190 1945-D MS67+ Red NGC. CAC.** A high-end Superb Gem that exhibits impeccably preserved original red surfaces with vibrant mint luster and no trace of carbon. The design elements are sharply detailed throughout and eye appeal is tremendous. Tied for finest-certified at NGC (8/15). NGC ID# 22EH, PCGS# 2737

3191 1945-S MS67+ Red PCGS. CAC. Ex: Jack Lee. Miraculously, even though more than 2,000 1945-S cents have been certified in MS67 Red, this remarkable coin is *one of only four awarded a Plus designation at PCGS and NGC combined*, and is thus tied for the finest certified (8/15). This paramount Registry coin is virtually perfect in regards to both strike and preservation, showing vivid coppery-red interiors and bright gold and lilac hues around the peripheries. NGC ID# 856Y, PCGS# 2740

3192 1946 MS67 Red PCGS. Rich copper-red and rose hues blend across the radiant obverse, while the reverse showcases strong copper-gold luster. Virtually free of carbon and abrasions, this beautiful Superb Gem is tied with 23 others as the finest certified at PCGS (7/15). NGC ID# 22EK, PCGS# 2743

3193 1946 MS67 Red PCGS Secure. This exceptional Registry-grade 1946 Lincoln cent is one of just two dozen Red examples which claim finest-certified status at PCGS (8/15). This coin is boldly struck, with intense, frosty luster and virtually carbon free surfaces. Both sides display fresh copper-pink luster. NGC ID# 22EK, PCGS# 2743

3194 1947 MS67 Red PCGS. One of the finest examples certified by PCGS, an outstanding representative for Registry purposes. This Red Superb Gem 1947 Lincoln is boldly struck and frosty, with vibrant copper-red luster that shows penetrating pinkish hues throughout. Population: 22 in 67 Red, 0 finer (8/15). NGC ID# 22EN, PCGS# 2752

**1948 Cent, MS67 Red
Exceptional, Conditionally Rare Example**

3195 1948 MS67 Red PCGS. Any Lincoln cent collector will recognize the exceptional quality of this Superb Gem 1948. The marvelously clean surfaces are intensely lustrous and display lovely mint-red and pale orange toning. A sharply struck and conditionally rare example of this Philadelphia Mint issue. Population: 17 in 67 Red, 0 finer (8/15). NGC ID# 22ES, PCGS# 2761

3196 1948 MS67 Red NGC. Few coins can match the technical quality and outstanding eye appeal of this spectacular Superb Gem, with flawless original red surfaces that have mellowed to light brown in some areas and well-detailed design elements throughout. Census: 60 in 67 (1 in 67+) Red, 0 finer (8/15). NGC ID# 22ES, PCGS# 2761

**1953 Cent, MS67 Red
Registry Set Contender**

3197 1953 MS67 Red PCGS. CAC. An available date in full Red Gem condition, the 1953 Lincoln cent suddenly becomes rare at the MS67 Red grade level, where PCGS has certified only 15 pieces, with none finer (8/15). This representative, showing frosty coppery-orange and pinkish luster, also ranks numerically equal to the coin in the current highest-rated Registry Set. The usual soft points, around the O in ONE and the finer details of the obverse portrait, are not full brought up, though the surfaces appear to be void of carbon spotting. NGC ID# 22LD, PCGS# 2806

3198 1953-D MS67 Red PCGS Secure. Glowing coppery-red luster yields hints of pinkish brilliance throughout the interiors of this boldly struck 1953-D. The mint-fresh surfaces are devoid of carbon spotting, making this coin ideal for Registry purposes. Population: 38 in 67 (1 in 67+) Red, 0 finer (8/15). NGC ID# 22FA, PCGS# 2809

3199 1955 Doubled Die Obverse, FS-101, AU58 NGC. There are a few small tinges of red in the crevices, but this near-Mint 1955 doubled die Lincoln cent shows primarily chocolate-brown patina with a satin finish. The strike is well-executed and abrasions are as expected for the grade. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3200 1955 Doubled Die Obverse, FS-101, AU58 PCGS. The blended olive-green and chocolate-brown surfaces are satiny, minimally abraded, and well defined. A momentarily circulated but problem-free example of this key *Guide Book* variety. Housed in an old green label holder. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3201 1955 Doubled Die Obverse, FS-101, AU58 PCGS. CAC. A momentarily circulated yet generously glossy near-Mint representative of this iconic Lincoln variety. The walnut-brown surfaces show only a few minor marks on the right obverse field. Narrow retained laminations (as struck) are present near the E in ONE.
Ex: Chicago Signature (Heritage, 8/2011), lot 3207, which realized \$2,070. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3202 1955 Doubled Die Obverse, FS-101, MS61 Brown ANACS. A brick-red and apple-green representative that boasts satin luster and only incidental contact. The strike is bold, although the cheekbone displays minor blending. The most famous doubled die variety of the Lincoln series. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3203 1955 Doubled Die Obverse, FS-101, MS62 Brown NGC. A medium brown representative that displays satin luster and only incidental contact. A good strike despite some incompleteness on Lincoln's jaw and cheekbone. A remarkably strong doubled die variety.
Ex: Chicago Signature (Heritage, 8/2011), lot 3208, which realized \$2,357.50. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Cent, MS63 Red and Brown
Doubled Die Obverse**

3204 1955 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS. CAC. It was hardly the finest moment for the Philadelphia Mint's quality control: approximately 5,000 Lincoln cents struck with a wildly doubled obverse die escaped the facility. This Red and Brown Select piece is one of the Mint State survivors, richly toned copper-orange, violet, and mahogany. The wispy abrasions on each side have surprisingly little impact on the all-around eye appeal.
Ex: Chicago Signature (Heritage, 8/2011), lot 3212. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

**1955 Doubled Die Obverse Cent
MS64 Red and Brown**

3205 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. Most doubled die 1955 cents are Brown, but the present near-Gem is colorful. Orange and ruby-red fill the legends and outline the borders and devices. The obverse field and portrait display olive-green, while portions of the reverse offer gunmetal toning.
Ex: Long Beach Signature (Heritage, 6/2006), lot 418, which realized \$4,887.50.
From The Stephen A. Walling Collection. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

3206 1964<1C> MS66+ Red PCGS. This 45-year-old Lincoln cent is every bit as bright, fresh, and crisp as the day it was struck. The strike is above average for this usually weak issue. A single spot prevents a higher grade. PCGS has only certified two finer examples (8/15)

PROOF LINCOLN CENTS

3207 1909 PR65 Red and Brown PCGS. CAC. Blended orange-red, apple-green, and lavender shades embrace this intricately struck and unabraded Gem. A loupe reveals unobtrusive obverse carbon. Encapsulated in an old green label holder. NGC ID# 22KS, PCGS# 3304

3208 1910 PR66 Brown PCGS. This is a razor-sharp example of the 1910 matte proof Lincoln cent, displaying impeccably preserved luster and rich coloration. The surfaces appear auburn-brown at first glance, but when tilted at an angle beneath light, reveal vivid ocean-blue, gold, a lavender hues. Population: 9 in 66 Brown, 2 finer (7/15). NGC ID# 22KT, PCGS# 3306

3209 1910 PR65 Red PCGS. CAC. Matte proof surfaces emit generous sun-gold luster, but with blushes of rose and lilac throughout. The strike is bold and the rims are broadly squared. A few scattered specks are not out of line for the grade. Population: 39 in 65 Red, 28 finer (8/15). NGC ID# 22KT, PCGS# 3308

- 3210 1912 PR65 Red and Brown PCGS.** A run of 2,172 matte proof Lincoln cents was accomplished in 1912, but examples are scarcely seen at the Gem grade level regardless of color designation. Reddish-brown and copper-orange surfaces show minimal contact marks. A small white spot appears beside the N in CENTS. NGC ID# 22KV, PCGS# 3313

**1912 Lincoln Cent, PR64 Red
Bold Matte Proof Type Coin**

- 3211 1912 PR64 Red PCGS. CAC.** Thick matte luster accentuates the intricate details of the powerful strike on this Choice Red proof Lincoln. Coppery-red and peach-orange hues compete for dominance on each side, with no bothersome marks. A few trivial specks are not out of line for the grade. Population: 32 in 64 Red, 20 finer (8/15). NGC ID# 22KV, PCGS# 3314

1915 Cent, Razor-Sharp PR65 Brown

- 3212 1915 PR65 Brown PCGS.** Matte luster gives this needle-sharp Gem proof an almost sculptural appearance, with a glow of coppery luminance residing beneath consistent auburn-brown toning. A loupe reveals scattered carbon, but this is of little impact on the eye appeal. The proof distribution of 1915 totaled just 1,150 cents, a number that would fall even further the following year. Population: 22 in 65 Brown, 28 finer (8/15). NGC ID# 22KY, PCGS# 3321

**1938 Lincoln Cent, PR66+ Cameo
Rare With Field-Motif Contrast**

- 3213 1938 PR66+ Cameo PCGS. CAC.** The proof 1938 Lincoln cent is readily available in most grades, but Cameo examples are rare. PCGS lists only 39 submissions in all Cameo grades, including a possible number of resubmissions. This Plus-designated Premium Gem is among the finer pieces in that category. The strike is bold and satiny luster over the devices provides for modest field-motif contrast. Rich coppery-orange patina is free of bothersome imperfections. Population: 20 in 66 (2 in 66+) Cameo, 2 finer (8/15). NGC ID# 22L5, PCGS# 83341

- 3214 1939 PR67 Red PCGS.** This is a bold Registry-grade full Red proof, with gleaming mirrors and just a hint of cameo contrast. Free of carbon or other surface imperfections. Population: 33 in 67 Red, 0 finer (8/15). NGC ID# 22L6, PCGS# 3344

- 3215 1950 PR67 Red Cameo PCGS.** An amazing Superb Gem Cameo proof, this 1950 exhibits brilliant orange mint color with deeply mirrored fields and frosty devices. Population: 15 in 67 Red Cameo, 1 finer (7/15). NGC ID# 22LA, PCGS# 83359

**1990 No S Cent, FS-101
PR66 Deep Cameo**

- 3216 1990 No S, FS-101, PR66 Deep Cameo PCGS.** Although several dime proof issues (1968, 1970, 1975, 1983) are known that lack the requisite San Francisco mintmark, a similar error for cents occurred only in 1990. Key to a set of proof Memorial cents, the 1990 No S is rare, and many examples show corrosion on the rims from moisture trapped in the sealed proof set packaging. This example is void of verdigris, and the peach-gold surfaces are pristine aside from trivial hairlines on the upper left obverse field. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

TWO CENT PIECES

- 3217 1864 Small Motto, FS-401, AU55 PCGS.** Walnut-brown fields and olive-gray high points characterize this lightly circulated representative. No marks are noticeable. The strike is good despite softness on the T in UNITED. A scarce introductory subtype. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

- 3218 1864 Large Motto MS66 ★ Red and Brown NGC.** The Star designation accompanies tremendous eye appeal on this Premium Gem Large Motto 1864, which trails only three MS67 Red and Brown coins at NGC (7/15). The strike is razor-sharp and the each side produces significantly more mint Red luster than brown. Colorful ribbons of forest-green and violet around the peripheries appear to be all that preclude a full Red color designation, and a single field mark below the EN in CENT is all that keeps this coin from a Superb Gem grade. NGC ID# 22N9, PCGS# 3577

- 3219 1864 Large Motto MS65 Red PCGS.** A Flynn-unlisted RPD variety with the crossbar of the 4 repunched south. Well struck and coruscating with scattered minute carbon and a few delicate obverse marks near 12 o'clock. Peach and reddish orange coloration cover both sides of this lightly freckled, Large Motto Gem. NGC ID# 22N9, PCGS# 3578

- 3220 1864 Large Motto MS65 Red PCGS.** A sharply detailed Gem from the first year of the denomination, this coin offers lightly marked lustrous surfaces that retain much of their original red color, but have mellowed to lavender in places on the reverse and show some minor carbon spots. NGC ID# 22N9, PCGS# 3578

- 3221 1864 Large Motto MS65 Red PCGS.** A sharply struck, unabraded, and lustrous orange-gold Gem. Minor obverse flyspecks decide the grade. The 4 in the date is faintly repunched north, and the upper obverse border displays three small cuds.
Ex: Exclusively Internet Auction #24035 (Heritage, 3/2004), lot 11158, which realized \$1,035.
From The Stephen A. Walling Collection. NGC ID# 22N9, PCGS# 3578

- 3222 1865 Fancy 5 MS65 Red PCGS.** A lustrous and boldly struck orange-red type coin. No marks are consequential, although a smattering of carbon limits the grade. The reverse is lightly strike doubled. NGC ID# 22NA, PCGS# 38258 Base PCGS# 3584

**1869 Two Cent Piece, MS65 Red
Sharp, Conditional Rarity**

- 3223 1869 MS65 Red PCGS.** The 1869 two cent issue is underappreciated for its scarcity at the Gem Red grade level. This piece is nearly sharp enough to rival a proof, but displays the frosty luster of a circulation strike. Each side glows with coppery-orange hues, and there are no significant abrasions. A few faint flecks appear beneath a loupe but are hidden from the naked eye. Population: 27 in 65 (1 in 65+) Red, 3 finer (8/15). NGC ID# 22ND, PCGS# 3605

PROOF TWO CENT PIECES

- 3224 1866 PR65 Red and Brown NGC. CAC.** The deeply mirrored fields contrast nicely with the lustrous devices of this Gem proof. Both sides exhibit considerable mint red and bluish-brown overtones. Census: 42 in 65 (1 in 65 ★) Red and Brown, 16 finer (7/15). NGC ID# 274V, PCGS# 3631

**1869 Two Cent Piece, PR65 Red
Bold Motifs**

- 3225 1869 PR65 Red NGC.** Like most issues in the proof two cent series, the 1869 becomes elusive in Gem or better full Red condition. This piece is fully struck with mirrored fields. The obverse is bright coppery-red, while the reverse shows some deeper amber color in the center. There are no bothersome carbon specks. Census: 13 in 65 Red, 10 finer (8/15). NGC ID# 274Y, PCGS# 3641

- 3226 1871 PR65 Red and Brown PCGS. CAC. FS-102.** The obverse displays variegated fire-red and cobalt-blue. The latter color is prevalent on the central reverse, although the border is mostly peach-gold. Well struck and mark-free with a few flecks on the reverse exergue. All proof 1871 two cent pieces show counter-clockwise die doubling on TRUST. NGC ID# 22NH, PCGS# 3646

**1873 Two Cent Piece, PR64 Red
Closed 3 Variant**

- 3227 1873 Closed 3 PR64 Red PCGS.** This gleaming final-year proof exhibits bright sun-gold hues around the peripheries with deeper lilac and coppery-red bands progressing toward the centers. The strike is bold and the fields are deeply reflective. The Open 3 and Closed 3 varieties are often difficult to distinguish to the novice, although this piece is a confirmed Closed 3 example. Population: 24 in 64 Red, 33 finer (8/15). NGC ID# 5L57, PCGS# 3653

**1873 Two Cent Piece, PR63 Brown
Later Open 3 Example**

- 3228 1873 Open 3 PR63 Brown PCGS. CAC.** Awarded a Brown color designation due to an array of amber-orange and auburn hues that blanket each side. Mirrored fields remain reflective and the design elements are razor-sharp. An example of this proof issue is a necessity for a complete two cent piece date set, as no circulation strikes were produced after 1872. Population: 13 in 63 Brown, 43 finer (8/15). NGC ID# 2754, PCGS# 3654

THREE CENT SILVER

- 3229 1851 MS66 PCGS. CAC.** An unabraded, frosty type coin, showing soft champagne and lavender hues over each side. The central high points are a trifle weak, but the borders are well brought up. Two radial die cracks appear on the obverse at 8 and 4 o'clock. PCGS lists 18 finer representatives (8/15). NGC ID# 22YX, PCGS# 3664

- 3230 1851 MS66+ PCGS. CAC.** This high-end Premium Gem exhibits well-detailed design elements, with some die striations in the centers and some spidery die cracks on the obverse. Vibrant mint luster adds to the tremendous visual appeal. PCGS has graded 18 numerically finer examples (8/15). NGC ID# 22YX, PCGS# 3664

**1851-O Three Cent Silver, MS65
Only Branch Mint Issue in the Series**

- 3231 1851-O MS65 PCGS.** New Orleans three cent silver coinage was limited to a single issue in 1851 (the denomination's introductory year). In fact, the 1851-O is the only branch mint date in the series, claiming a mintage of 720,000 coins. This Gem is largely brilliant with glimpses of pale gold and lavender-gray color over the reverse. The motifs show typical detail for the Louisiana facility, and small scattered ticks are in accord with the grade. NGC ID# 22YY, PCGS# 3665

**1851-O Three Cent Silver, MS65
First-Year, Branch Mint Type Coin**

- 3232 1851-O MS65 PCGS.** Representing the first year of the denomination, the 1851-O three cent silver coin claims a substantial mintage of 720,000 pieces. This impressive Gem offers sharply detailed design elements and well-preserved lustrous surfaces, with a few hints of greenish-gold and lavender-gray toning. Population: 49 in 65 (1 in 65+), 30 finer (7/15). NGC ID# 22YY, PCGS# 3665

**1852 Three Cent Silver, MS67
Pristine and Lustrous**

- 3233 1852 MS67 NGC.** Delicate olive-gold toning adorns highly lustrous and essentially pristine surfaces. The centers are well struck, although a few of the border stars are soft. The central reverse is clashed. A virtually unimprovable type coin. Census: 20 in 67 (1 in 67+), 0 finer (8/15).
Ex: Exclusively Internet #23121 (Heritage, 11/2003), lot 13163, which realized \$3,565.
From The Stephen A. Walling Collection. NGC ID# 22YZ, PCGS# 3666

- 3234 1853 MS66 PCGS.** Mostly brilliant surfaces on this frosty Premium Gem exhibit full cartwheel luster and hints of champagne and iridescent toning. A plentiful Type One issue for a high grade type set or a specialized collection. Population: 66 in 66 (3 in 66+), 10 finer (7/15). NGC ID# 22Z2, PCGS# 3667

- 3235 1853 MS66 PCGS. CAC.** Cream-gray, apple-green, and chestnut-toning graces this original and high grade type coin. Lustrous and nicely struck with exemplary preservation. Population: 66 in 66 (3 in 66+), 10 finer (8/15). NGC ID# 22Z2, PCGS# 3667

- 3236 1854 Repunched Date, FS-301, MS64 PCGS.** The date was initially entered too far west, then repunched in the proper position. A curve left of the knob of the 5 is the clearest remnant of the initial date logotype entry. The wheat-gold and powder-blue surfaces are lustrous and mark-free. The shield is fully struck, although peripheral elements show incompleteness. As of (8/15), the sole example of FS-301 certified as such by PCGS. NGC ID# 4JNT, PCGS# 38579 Base PCGS# 3670

**1857 Silver Three Cent, MS65
Shimmering Luster**

- 3237 1857 MS65 PCGS. CAC.** This Gem 1857 example is frosty and untuned, showing smooth, well-preserved surfaces. There is minor striking weakness on the obverse at the central shield and around the date, but the more extensive softness of the reverse is actually due to a heavily lapped die, not a deficient strike. This issue is seldom available in Gem condition, and finer pieces are rare. Population: 31 in 65, 11 finer (8/15). NGC ID# 22Z6, PCGS# 3673

- 3238 1858 MS65 PCGS.** A cream-gray and chestnut-gold Gem of the scarce Type Two design. The coruscating surfaces are typically struck and appear unabraded. Housed in a green label holder. Population: 61 in 65 (4 in 65+), 48 finer (6/15). NGC ID# 22Z7, PCGS# 3674

**1859 Three Cent Silver, MS66
Extraordinary Color**

- 3239 1859 MS66 PCGS.** Forest-green, ruby-red, and amber-gold shades appear on both sides of this remarkably toned three cent silver. As the first year of the Variety Three design, the 1859 issue is readily available in lesser grades but scarce in Gem condition. Premium Gem coins (such as the present coin) are rare. Sharply struck on the obverse with only a few areas of strike weakness on the reverse, this lustrous example ranks high among the most distinctively toned silver threes. Population: 19 in 66 (1 in 66+), 3 finer (7/15). NGC ID# 22Z8, PCGS# 3677

3240 1861 MS66 PCGS. This lovely Type Three silver three cent piece is essentially untuned, has smooth, satiny luster, and exhibits nice strike characteristics, save for softness in most of the stars. Heavy die clash marks (as made) occur on both sides, with an especially strong impression of the shield within the Roman numeral III. PCGS lists 30 coins finer (8/15).

Ex: Long Beach Signature (Heritage, 6/2004), lot 5489.

From The Stephen A. Walling Collection. NGC ID# 22ZA, PCGS# 3679

3241 1862 MS66 PCGS. The 1862 is the last readily available date in the silver three cent series, ideal for type representation. This Premium Gem example shows soft luster, with near-brilliant centers and shades of amber-gold, violet, and navy blue around the margins. The central design elements show a tinge of the usual striking softness. PCGS lists only 15 MS67 coins finer (7/15). NGC ID# 22ZB, PCGS# 3680

1862 Three Cent Silver Well-Preserved Superb Gem

3242 1862 MS67 PCGS. Pale blue, rose, and lilac patina prevail at the rims of this exquisitely preserved Type Three three cent silver, showing no mentionable post-Mint abrasions but the often-seen clash marks on both sides, as made. The 1862 issue's mintage of 343,000 pieces would be the last six-figure mintage of the series on its slide into oblivion. Significantly, no examples are graded in a finer numerical grade at either service. Population: 15 in 67, 0 finer (7/15). NGC ID# 22ZB, PCGS# 3680

PROOF THREE CENT SILVER

1859 Silver Three Cent, PR66 Conditionally Rare

3243 1859 PR66 NGC. *Ex: Highland Collection.* The availability of this proof issue begins to peter out above PR64, and it is rare at the Premium Gem level. This PR66 coin displays impressively bold design elements, with faint clash marks present in the mirrored fields. Light golden toning shows tinges of amber and sky-blue around the obverse periphery. Census: 11 in 66, 2 finer (8/15). NGC ID# 27C6, PCGS# 3708

1861 Three Cent Silver, PR66 Heavily Melted Wartime Issue

3244 1861 PR66 PCGS. An official mintage of 1,000 pieces was actually less than half of that amount when unsold proofs were melted at year's end. Many other proofs were lost to attrition, and today few pieces are known in Gem or finer condition. This well-preserved example displays deeply mirrored fields that are imbued with silvery iridescence and rich shades of gunmetal-blue, reddish-gold, and aged bronze. A Premium Gem, this wartime issue is seldom seen any finer. Population: 7 in 66, 5 finer (8/15). NGC ID# 27C8, PCGS# 3710

1867 Three Cent Silver, PR66 Rarely Seen Finer

3245 1867 PR66 PCGS. Only 625 proof three cent silver coins were struck in 1867, and examples in PR66 condition are rare. This attractive Premium Gem exhibits sharply detailed design elements and mirrored fields under attractive shades of champagne-gold and lavender toning. Population: 25 in 66 (1 in 66+), 3 finer (7/15). NGC ID# 27CD, PCGS# 3717

3246 1870 PR65 PCGS. Delicate shades of pink and champagne-gold toning blanket the well-preserved surfaces of this impressive Gem, with sharply detailed design elements and reflective fields underneath. Population: 28 in 65, 22 finer (7/15). NGC ID# 27CF, PCGS# 3721

3247 1871 PR65 NGC. From a mintage of 960 pieces, this impressive Gem displays well-detailed design elements and brightly reflective fields with a few highlights of pale gold toning. Census: 34 in 65 (1 in 65 ★), 31 finer (8/15). NGC ID# 27CG, PCGS# 3722

3248 1871 PR65 Cameo PCGS. This attractive Gem displays well-detailed design elements and reflective fields that contrast boldly with the frosty devices. A few hints of lavender and greenish-gold toning enhance the well-preserved surfaces, with some interesting die striations on the reverse. Population: 9 in 65 Cameo, 9 finer (8/15). NGC ID# 27CG, PCGS# 83722

THREE CENT NICKELS

3249 1871 MS66 PCGS. CAC. This is a beautifully preserved Premium Gem example of this conditionally scarce three cent nickel issue, showing a bold strike and warm golden toning. The obverse is heavily die clashed, with parallel die striae in the fields from the lapping processes. Population: 38 in 66 (2 in 66+), 1 finer (7/15). NGC ID# 22NN, PCGS# 3737

- 3250 1881 MS66+ PCGS. CAC.** The Mint inexplicably struck more than 1 million three cent nickels in 1881 despite no contemporary interest in the denomination by either the public or the channels of commerce. Collectors were likewise disinterested, and few high-grade pieces were saved. This exceptionally well-preserved example survived with nearly untuned and pristine surfaces, as well as a needle-sharp strike. It is the sole Premium Gem at PCGS with the Plus designation. Population: 44 in 66 (1 in 66+), 8 finer (8/15). NGC ID# 22NT, PCGS# 3749

PROOF THREE CENT NICKELS

1865 Three Cent Nickel, PR65 Cameo Sharp Proof Type Coin

- 3251 1865 PR65 Cameo PCGS.** A boldly struck example with modest contrast, free of the heavy die polishing that weakens details on later die state coins. There are no bothersome marks and each side exhibits a blush of light champagne toning. The date is boldly triple cut on this proof obverse. Population: 32 in 65 (2 in 65+) Cameo, 33 finer (8/15). NGC ID# 275K, PCGS# 83761
- 3252 1866 PR66 Cameo PCGS. CAC.** Few examples can match the technical quality and terrific eye appeal of this delightful Premium Gem, with stunning field-device contrast and impeccably preserved, lightly toned surfaces. Population: 18 in 66 Cameo, 1 finer (8/15). NGC ID# 275L, PCGS# 83762
- 3253 1867 PR66 Cameo PCGS. CAC.** This is a modestly contrasted example, with soft gold and lavender-blue hues spread over each side. The central Roman numeral III is slightly soft, but the design elements are otherwise sharp. Population: 29 in 66 (2 in 66+) Cameo, 0 finer (8/15). NGC ID# 275M, PCGS# 83763
- 3254 1868 PR65 Cameo PCGS. CAC.** Bold cameo contrast is evident between the sharply detailed frosty design elements and the reflective fields of this impressive Gem. The lightly toned surfaces are free of mentionable distractions. Population: 32 in 65 Cameo, 18 finer (8/15). NGC ID# 275N, PCGS# 83764

1873 Nickel Three Cent, PR66+ Cameo Contrasted Closed 3 Example

- 3255 1873 Closed 3 PR66+ Cameo NGC. CAC.** An untuned Premium Gem proof with frosty design elements that starkly contrast with the mirrored fields. As is characteristic of proofs from this period, there are a few microscopic strike-throughs on each side, but none are bothersome. The design definition is bold. Census: 21 in 66 Cameo (1 in 66+ Cameo), 3 finer (8/15). NGC ID# 275U, PCGS# 83769

- 3256 1876 PR66 Cameo PCGS.** Crisply struck and impeccably preserved, this moderately contrasted Cameo Proof displays wonderfully frosted devices set against satiny (rather than deeply mirrored) fields. 1876 Cameo proof three cent nickels are scarce in Premium Gem condition and rare any finer. Population: 18 in 66 (1 in 66+) Cameo, 2 finer (8/15). NGC ID# 275W, PCGS# 83772

- 3257 1882 PR67 PCGS. CAC.** This gold-tinted Superb Gem proof is nearly perfect, and few examples are certified finer. Both sides show modest contrast, but the fields are not quite mirrored enough to receive a Cameo designation from PCGS. Population: 93 in 67 (1 in 67+), 7 finer (8/15). NGC ID# 2764, PCGS# 3778

- 3258 1887 PR67 NGC.** Reflective fields provide a blemish-free backlight for the light golden hue that graces each side, and attractively frame the sharp, frosty relief elements. This piece ranks alongside just three others as the finest at NGC (8/15). NGC ID# 276A, PCGS# 3783

SHIELD NICKELS

- 3259 1866 Rays MS65 PCGS.** The 1 in the date is repunched north. All four date digits are strike doubled south. The variety is unlisted in the Fletcher standard reference. A fully struck, satiny, and unmarked olive-gray Gem of this briefly issued design subtype. *Ex: Dallas Signature (Heritage, 12/2004), lot 5507, which realized \$1,974.55.*
From The Stephen A. Walling Collection. NGC ID# 22NX, PCGS# 3790
- 3260 1866 Rays MS65 NGC. CAC.** This Gem 1866 Rays Shield nickel was struck from late-state dies and show some strike doubling and a rim cud on the obverse, the latter at about 3 o'clock. The reverse shows several of the stars and bars merging with blunt detail, along with incipient die cracks through the peripheral legend. This piece shows good luster and emphasizes just how unforgiving a coinage metal nickel was. NGC ID# 22NX, PCGS# 3790
- 3261 1866 Rays MS65 NGC. CAC.** This first-year Gem offers blushes of faint golden patina over brilliant nickel-gray surfaces. The olive leaves are bold, while the date and reverse stars exhibit moderate incompleteness. Each side is largely free of die cracks that normally plague coins from this issue. NGC shows just 23 pieces finer (7/15). NGC ID# 22NX, PCGS# 3790

1872 Shield Nickel, MS66+ One Finer Coin at PCGS

- 3262 1872 MS66+ PCGS. CAC.** The 1872 Shield nickel is a rare issue at the MS66 level, and finer coins are virtually unobtainable. This high-end Premium Gem is sharply detailed throughout and both sides radiate vibrant mint luster. The well-preserved surfaces show delicate shades of pale gold toning. Population: 26 in 66 (2 in 66+), 1 finer (7/15). NGC ID# 22P6, PCGS# 3799

**1874 Shield Nickel, MS66
Among the Finest Certified**

3263 1874 MS66 NGC. Gem examples of this Shield nickel issue are scarcely seen, and finer pieces are genuine rarities. This Premium Gem displays softly frosted luster with just a hint of light golden toning. The preservation is excellent, although some of the finer design elements show the typical striking softness. Census: 6 in 66 (1 in 66 ★), 0 finer (7/15). NGC ID# 22P9, PCGS# 3803

3264 1879 MS63 PCGS. The obverse of this piece displays semiprooflike fields, but the wreath leaves lack full definition, and the reverse is soft and satiny, characteristics that are in harmony with an upper-end circulation strike. Hints of light olive-gold toning grace the nickel-gray surfaces, and any grade-limiting abrasions are well-hidden. NGC ID# 276D, PCGS# 3808

**1883/2 Shield Nickel, MS61
Wide Overdate**

3265 1883/2 FS-301 MS61 NGC. A boldly struck example of this popular overdate variety, one of five known from this issue. A light overlay of autumn-gold toning increases the visual appeal of this lustrous representative. Wispy hairlines and a couple of trivial nicks define the grade, but hardly affect the eye appeal. PCGS# 38416 Base PCGS# 3814

PROOF SHIELD NICKELS

**1866 Rays Shield Nickel, PR66
Bold Proof Type Coin**

3266 1866 Rays PR66 PCGS. This is the debut proof issue in the Shield nickel series, a suitable acquisition for type purposes. The current coin is a conditionally scarce Premium Gem. The design elements are fully impressed, most notably on the reverse stars which show sharp recutting. A hint of cameo contrast is present beneath champagne toning, although the affect is not impressively strong. Population: 40 in 66, 1 finer (8/15). NGC ID# 276G, PCGS# 3817

3267 1867 No Rays PR64 PCGS. CAC. A lemon-gold Choice proof with occasional blushes of powder-blue patina. Flashy and fully struck with minimal carbon or contact. A scarce proof subtype. Certified in a first generation holder. NGC ID# 4T4L, PCGS# 3821

**1868 Shield Nickel, PR66 Cameo
Outstanding Strike from Fresh Dies**

3268 1868 PR66 Cameo PCGS. CAC. This is a high-end proof example of this early No Rays Shield nickel, with frosty design elements and deeply mirrored fields. A loupe fails to reveal any mentionable surface flaws and each side is cast in the glow of a light golden patina. Premium Gem examples of the 1868 proof are scarce, and are rarely seen with a Cameo designation. Population: 15 in 66 (2 in 66+) Cameo, 0 finer (7/15). NGC ID# 276J, PCGS# 83822

3269 1870 PR66+ Cameo PCGS. This high-end Premium Gem displays stunning cameo contrast between the deeply mirrored fields and the sharply detailed frosty design elements. The well-preserved surfaces show attractive highlights of greenish-gold toning. Population: 21 in 66 (3 in 66+) Cameo, 1 finer (8/15). NGC ID# 276L, PCGS# 83824

3270 1871 PR66 Cameo PCGS. CAC. A hint of nearly imperceptible champagne color resides on the surfaces of this Premium Gem Cameo. Well-struck devices and impeccable preservation rounds out the pleasing eye appeal of this example. Population: 20 in 66 (3 in 66+) Cameo, 0 finer (8/15). NGC ID# AMU3, PCGS# 83825

**1871 Nickel, PR66+ Cameo
Tied for Finest at PCGS**

3271 1871 PR66+ Cameo PCGS. CAC. The early nickel proofs were generally of modest quality as the Mint was inexperienced with the alloy. This impressive piece has high contrast with brilliant nickel-gray devices and deeply mirrored fields. Both sides exhibit delicate champagne toning. Population: 20 in 66 (3 in 66+) Cameo, 0 finer (7/15). NGC ID# AMU3, PCGS# 83825

**1872 Shield Nickel, PR67
Die Doubled Obverse**

- 3272 1872 PR67 NGC.** This proof obverse shows bold die doubling, with the annulet being the pickup point, as usual. The spread is similar to the FS-101 circulation strike obverse, but slightly wider. This Superb Gem is fully struck, with highly reflective fields. Soft champagne centers yield to pastel rainbow hues around the borders. Census: 6 in 67, 0 finer (8/15). NGC ID# 22P6, PCGS# 3826

- 3273 1874 PR66 Cameo PCGS.** A delightful Premium Gem from a mintage of 700 pieces, this coin exhibits well-detailed design elements, with a frosty texture that contrasts boldly with the reflective fields. The well-preserved surfaces show some die striations in the fields and a few hints of pale gold toning. Population: 18 in 66 (2 in 66+) Cameo, 4 finer (8/15). NGC ID# 276R, PCGS# 83828

- 3274 1876 PR66+ Cameo PCGS. CAC.** Hints of gold-tan and an occasional blush of soft violet reside on the well-preserved surfaces of this high-end Premium Gem. Sharply struck design features further enhance the coin's eye appeal. Population: 30 in 66 (4 in 66+) Cameo, 6 finer (8/15). NGC ID# 276T, PCGS# 83830

- 3275 1882 PR67 Cameo PCGS. CAC.** This is an exceptional Shield nickel type coin, showcasing razor-sharp detail and modest cameo contrast. The surfaces are seemingly pristine and the eye appeal is accentuated by a hint of light golden toning. Population: 22 in 67 Cameo, 1 finer (8/15). NGC ID# 5EBF, PCGS# 83837

LIBERTY NICKELS

1883 No Cents Liberty Nickel, Vibrant MS67+

- 3276 1883 No Cents MS67+ NGC. CAC.** This is a gleaming No Cents Liberty nickel type coin, showcasing dazzling, mint-fresh luster. The issue in general is readily available, but coins this fine are scarce, and none are known finer. The obverse is weak along the lower-left border dentils and stars, and the reverse is incomplete on the corn ear to the left of the wreath bow, as usual. Both sides show faint peripheral die cracks. Census: 73 in 67 (1 in 67+, 4 in 67 ★), 0 finer (8/15). NGC ID# 2772, PCGS# 3841

- 3277 1884 MS65 PCGS.** Soft pastel hues encase the vibrant luster of this Gem 1884 Liberty nickel, while above-average sharpness on the design elements further advances the eye appeal. A couple thin marks — one below the chin and the other near the ear — appear to be all that limit the grade. PCGS lists 31 Premium Gems finer (7/15). NGC ID# 22PJ, PCGS# 3845

- 3278 1885 AU58 PCGS. CAC.** This satiny 1885 Liberty nickel reveals just a brush of friction, appearing Mint State to the unaided eye. Both sides are toned dusky golden-gray and retain soft luster in the fields. The strike is unusually sharp on the stars and lower-left wreath. This piece is struck from a late die state — the obverse is cracked along the upper margin and the reverse shows some mild die pitting. NGC ID# 2773, PCGS# 3846

**1886 Liberty Nickel, MS64
Advanced Die State**

- 3279 1886 MS64 PCGS. CAC.** An outstanding example for the grade, this Choice 1886 Liberty nickel displays uncommonly well-preserved surfaces with incredibly bold detail on the stars and wreath. Satiny luster glows beneath light olive-gray, gold, and pale blue toning. A late die state coin, heavily cracked around both margins. NGC ID# 277U, PCGS# 3847

**1888 Liberty Nickel, MS66
Among the Finest Certified**

- 3280 1888 MS66 PCGS.** This Premium Gem is among the finest 1888 nickels known, and it is rare at this grade level. The golden-toned surfaces are impressively free of abrasions, showing soft satin luster and pleasing eye appeal. The lower-left portion of the wreath is considerably weak, as is seen to some extent on most examples of this type. Population: 20 in 66 (2 in 66+), 0 finer (8/15). NGC ID# 2774, PCGS# 3849

- 3281 1893 MS66 PCGS.** With a reported mintage of more than 13 million pieces, the 1893 Liberty nickel is surprisingly difficult to locate in high grades. This spectacular Premium Gem displays well-preserved, lustrous surfaces and sharply detailed design elements, save for the left ear of corn. Population: 27 in 66 (2 in 66+), 1 finer (7/15). NGC ID# 2778, PCGS# 3854

- 3282 1893 MS66 PCGS. CAC.** Lovely lavender, golden-gray, and pistachio-green hues blanket each side of this Premium Gem 1893 nickel. A few obverse stars lack full definition, but the corn ear to the left of the wreath bow is unusually well-defined. Population: 28 in 66 (2 in 66+), 1 finer (7/15). NGC ID# 2778, PCGS# 3854

- 3283 1894 MS65 PCGS. CAC.** A relatively low mintage of 5.4 million coins makes this one of the prized dates in the Liberty Head series. Splashes of champagne toning provide the only suggestion of color over largely brilliant surfaces. Liberty's hair is razor-sharp, while several stars and the left ear of corn show minor softness. NGC ID# 2779, PCGS# 3855

**1895 Liberty Nickel, MS66
Only One Coin Finer**

3284 1895 MS66 PCGS. This is a rare Premium Gem example of an otherwise plentiful issue in the Liberty nickel series. Many writers consider this series to be underappreciated, which gives high-end coins such as this piece added appeal. This coin is unusually well-struck and displays softly frosted luster with subtle pastel hues. Population: 21 in 66 (2 in 66+), 1 finer (8/15). NGC ID# 277A, PCGS# 3856

3285 1899 MS66 PCGS. CAC. The 1899 Liberty nickel is seldom seen in MS66, and finer coins are rare. This piece displays frosty ice-blue and champagne luster with hints of lavender and mint throughout. The lower-left portion of the wreath and the stars exhibit above-average sharpness. Population: 84 in 66 (7 in 66+), 2 finer (7/15). NGC ID# 22PR, PCGS# 3860

**1899 Nickel, MS66+
Few Known Finer**

3286 1899 MS66+ PCGS. CAC. The Plus designation separates this Premium Gem from most of its peers, and only a handful of Superb Gems are certified finer. This piece displays vibrant, frosty luster over surprisingly smooth surfaces. The corn ear to the left of the wreath bow is not quite full, but shows above-average definition. Population: 84 in 66 (7 in 66+), 2 finer (8/15). NGC ID# 22PR, PCGS# 3860

**1900 Liberty Nickel, MS66+
Blush of Champagne Toning**

3287 1900 MS66+ PCGS. CAC. This golden-toned Premium Gem is attractively free of bothersome abrasions, but the chief visual attribute is its crisp strike. The obverse stars, as well as the corn ear to the left of the wreath bow, are boldly rendered. This piece will appeal to the budget-conscious collector, as finer coins are rarely seen. Population: 56 in 66 (5 in 66+), 7 finer (8/15). NGC ID# 22PS, PCGS# 3861

3288 1902 MS66+ PCGS. CAC. This high-end Premium Gem offers well-detailed design elements, with just a touch of softness on the lower wreath, and well-preserved lustrous surfaces under shades of pale gold and lavender-gray toning. Population: 65 in 66 (6 in 66+), 5 finer (8/15). NGC ID# 277D, PCGS# 3863

3289 1907 MS66 PCGS. An impressive Premium Gem, with well-detailed design elements and lightly toned lustrous surfaces that show no mentionable distractions. Eye appeal is outstanding. Population: 30 in 66 (2 in 66+), 1 finer (8/15). NGC ID# 277J, PCGS# 3868

3290 1908 MS66 PCGS. A seldom seen Premium Gem example of this otherwise available 20th century issue. The vibrantly lustrous surfaces display warm champagne-gold toning. The corn ear to the left of the wreath bow is a trifle soft, but the peripheral stars on the obverse are well-defined. Population: 27 in 66 (3 in 66+), 0 finer (7/15). NGC ID# 24FR, PCGS# 3869

3291 1908 MS66 PCGS. CAC. This pleasing Premium Gem exhibits well-detailed design elements and well-preserved surfaces, under a blanket of lavender-gray and golden-tan toning. Frosty mint luster is evident on both sides, but slightly dimmed by the patina. Population: 27 in 66 (3 in 66+), 0 finer (8/15). NGC ID# 24FR, PCGS# 3869

1912-S Nickel, Lightly Toned MS65

3292 1912-S MS65 PCGS. High-end examples of this semikey San Francisco issue are auction highlights for the Liberty nickel collector. This Gem is sharper than typical for the issue, with satiny luster that exhibits olive-gold and pale lilac-orange toning overall. PCGS lists 32 coins finer, these out of reach for budget-conscious enthusiasts (8/15). NGC ID# 277R, PCGS# 3875

**1912-S Nickel, Satiny MS65
Sole S-Mint Issue**

3293 1912-S MS65 PCGS. An especially attractive example of this semikey San Francisco issue, showing smooth, satiny luster glowing beneath a soft golden-gray hue. The lower-left portion of the wreath is weak, as can be expected for this issue, but the obverse stars are bold. PCGS lists only 23 coins finer (8/15). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

3294 1883 With Cents PR66 PCGS. CAC. The design was modified to include the word CENTS to prevent counterfeiters from plating the first-year Liberty nickels and passing them off as five dollar gold pieces. This sharply detailed Premium Gem displays moderately reflective, well-preserved surfaces with a few hints of golden-tan toning. Population: 52 in 66 (3 in 66+), 5 finer (8/15). NGC ID# 277S, PCGS# 3881

3295 1888 PR66+ PCGS. CAC. Breen-2546. The 188 is repunched. Both sides display apricot-gold and powder-blue, with the former color more prevalent. An intricately struck and lustrous high grade proof nickel. The cheek exhibits incidental contact. NGC ID# 277W, PCGS# 3886

1892 Liberty Nickel, PR65 Ultra Cameo None Numerically Finer at NGC

3296 1892 PR65 Ultra Cameo NGC. CAC. A nominal proof mintage of 2,745 Liberty nickels was achieved in 1892 and the coin offered here is among the finest survivors. The sharply detailed design elements have a frosty texture that contrasts profoundly with the deeply mirrored fields, producing a dramatic cameo effect. The surfaces are impeccably preserved and eye appeal is outstanding. Census: 2 in 65 Ultra Cameo (1 in 65+ Ultra Cameo), 0 finer (8/15). NGC ID# 54DT, PCGS# 93890

3297 1894 PR66 Cameo NGC. CAC. Razor-sharp, frosty devices deliver stark contrast with the mirrored fields of this Premium Gem proof Cameo. A light golden hue graces each side, and the surfaces are seemingly pristine. Census: 8 in 66 Cameo, 9 finer (8/15). NGC ID# 5EJM, PCGS# 83892

3298 1897 PR66+ Cameo PCGS. CAC. Stark cameo contrast complements razor-sharp details of this high-end Premium Gem. The surfaces exhibit excellent preservation and are largely untoned, save for a faint golden tint around the rims. Population: 29 in 66 (6 in 66+) Cameo, 20 finer (8/15). NGC ID# 2787, PCGS# 83895

3299 1898 PR65 Deep Cameo PCGS. CAC. Profound cameo contrast is evident between the sharply detailed frosty design elements of this impressive Gem and the deeply mirrored fields, despite delicate shades of pale gold toning that blanket the well-preserved surfaces. Population: 3 in 65 Deep Cameo, 4 finer (8/15). NGC ID# 2788, PCGS# 93896

3300 1900 PR67 PCGS. CAC. This gleaming proof type coin exhibits just a hint of light golden color over ice-blue mirrors. Tack-sharp detail appears on the stars and wreath, including the corn ear to the left of the bowknot. Eye appeal is outstanding. Population: 28 in 67 (3 in 67+), 1 finer (7/15). NGC ID# 278A, PCGS# 3898

3301 1901 PR66 PCGS. CAC. Even the most minute details are razor-sharp on this Premium Gem proof type coin, accentuated by deeply mirrored fields. Both sides show golden toning and are devoid of bothersome marks or hairlines. PCGS lists 35 pieces finer (8/15). NGC ID# 278B, PCGS# 3899

1901 Nickel, PR67 Cameo Sharp Proof Type Coin

3302 1901 PR67 Cameo PCGS. CAC. This beautiful Superb Gem proof displays warm golden toning over frosty, sharp motifs, while the mirrored fields contrast starkly with glass-like reflection. There are no discernible surface flaws and the execution of the strike is outstanding. Population: 13 in 67 Cameo, 0 finer (8/15). NGC ID# 278B, PCGS# 83899

3303 1906 PR67 PCGS. A virtually unimprovable coin for the non-Cameo category, this Superb Gem proof is razor-sharp through the wreath and stars, and exhibits a light golden hue over mirrored fields. Satiny devices offer subtle contrast, particularly on the obverse. Population: 12 in 67, 0 finer (8/15). NGC ID# 278G, PCGS# 3904

3304 1906 PR66+ Cameo NGC. CAC. This high-end Premium Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. A few hints of pale gold toning enhance the flawless surfaces. Census: 13 in 66 Cameo (2 in 66+ Cameo, 2 in 66 ★ Cameo), 13 finer (8/15). NGC ID# 278G, PCGS# 83904

3305 1906 PR67 Cameo PCGS. Available in lower grades, the proof 1906 Liberty nickel becomes conditionally rare at the Superb Gem level, particularly with a Cameo designation. This piece is pleasantly contrasted beneath pastel gold and powder blue toning. A few light specks appear on the obverse. The corn ear to the left of the wreath bow is well-defined. Population: 21 in 67 (1 in 67+) Cameo, 2 finer (8/15). NGC ID# 278G, PCGS# 83904

BUFFALO NICKELS

1913 Type One Buffalo Nickel, MS67+ Beautiful Luster and Toning

3306 1913 Type One MS67+ PCGS. This eye-catching Type One Buffalo delivers glowing, frosty luster with soft pastel hues of rainbow color overall. There are no abrasions or significant evidence of die erosion. The reverse is rotated counterclockwise a few degrees. PCGS shows 17 pieces finer (8/15), although it would be difficult to trump this coin in regards to eye appeal. NGC ID# 22PW, PCGS# 3915

3307 1913-S Type One MS66 PCGS. The S-mint struck Type One Buffalo nickels between February 30 and April 19, 1913, according to Roger Burdette (2007). Output totaled 2.1 million coins. This frosty nickel-gray example is remarkably preserved. The devices are typically sharp; Dies were frequently replaced to avoid wear or clashing. NGC ID# 22PY, PCGS# 3917

3308 1913-S Type One MS66 PCGS. CAC. Only 2.1 million Type One Buffalo nickels were coined at San Francisco in 1913. This Premium Gem has typically strong central motifs with bold detail around the reverse periphery, including the mintmark. LIBERTY is a touch soft. Softly lustrous nickel gray surfaces show splashes of coppery toning. PCGS lists just 26 examples finer (7/15). NGC ID# 22PY, PCGS# 3917

3309 1915-S MS64 PCGS. An undeniably scarce date in the Buffalo nickel series, the lilac- and rose-tinged surfaces are satin-smooth and reasonably well-struck for the issue. There are no mentionable marks, and aside from a few pinpoint speckles there are no overt distractions of any kind. NGC ID# 25ZR, PCGS# 3929

3310 1917-S MS64 PCGS. This spectacular Choice example closely resembles the matte proof coins of earlier years, with fully struck design elements and satiny mint luster on both sides. Eye appeal is outstanding. NGC ID# 22RF, PCGS# 3936

3311 1918/7-D FS-101 VG8 PCGS. Seldom is an example of this *Guide Book* variety encountered in the VG grade range with a clear date. This piece is readily identifiable, with medium battleship-gray patina and prominent legends. The budget-minded collector should take this opportunity to fill this important whole in their collection. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

3312 1918/7-D FS-101 VG10 PCGS. The narrow openings within the loops of the 8, and the straight top of that digit, confirm the desirable overdate variety. The diagnostic die crack from the braid is also apparent. A cream-gray example with charcoal shades in design crevices. One slender diagonal mark is noted on the bison. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

3313 1918-D MS64 PCGS. A few small spots on each side prevent a higher grade assessment to this Choice Mint State 1918-D Buffalo nickel. Both sides have strong detail and full gray luster with hints of gold toning. NGC ID# 22RH, PCGS# 3938

1918-S Nickel, Lightly Toned MS64

3314 1918-S MS64 PCGS. The 1918-S Buffalo nickel seldom comes sharply struck, and the current coin displays some typical softness on the bison's shoulder and the hair above the Indian's braid. Nonetheless, the eye appeal is heightened by well-preserved surfaces and satiny champagne-toned luster. PCGS lists only 38 finer representatives (8/15). NGC ID# 22RK, PCGS# 3940

1919-S Nickel, MS64 Advanced Die State

3315 1919-S MS64 PCGS. This San Francisco issue is rare finer than the currently represented MS64 grade level. This collectible example is well-preserved, with a blush of light golden toning overall. Mild striking weakness is apparent, although die erosion in the fields is the most obvious characteristic of the surfaces. PCGS lists 34 finer examples (8/15). NGC ID# 22RN, PCGS# 3943

1919-S Buffalo Nickel, MS64 Razor-Sharp, Early Die State

3316 1919-S MS64 PCGS. CAC. The scarcity of this San Francisco issue in Gem condition increases demand among casual collectors for coins in the MS64 grade range. This piece is a delightful example for the Choice level, showcasing incredibly sharp detail and unusually clean surfaces — only a few faint slide marks prevent a Gem grade assignment. Traces of pastel toning accentuate surfaces devoid of die erosion. A standout coin for the issue, with only 34 pieces finer at PCGS (8/15). NGC ID# 22RN, PCGS# 3943

3317 1920 MS66 PCGS. Attractive shades of ice-blue and champagne-gold toning blanket the well-preserved surfaces of this sharply detailed Premium Gem, with outstanding visual appeal. PCGS has graded 11 numerically finer examples (8/15). NGC ID# 22RP, PCGS# 3944

3318 1920-D MS64 PCGS. Satiny luster shows light golden toning and minimal abrasions. The bison's shoulder is a trifle soft, but the obverse is bold. Die erosion is minimal, but the obverse shows several fine die cracks, indicating an early breakage of the head die. NGC ID# 22RR, PCGS# 3945

3319 1921 MS66 PCGS. CAC. A spectacular Premium Gem that displays razor-sharp definition on all design elements and well-preserved surfaces that radiate vibrant mint luster on both sides. PCGS has graded 23 numerically finer examples (8/15). NGC ID# 22RT, PCGS# 3947

3320 1924-D MS64+ PCGS. CAC. This high-end Choice example is sharply detailed throughout and the lightly toned surfaces show only minor signs of contact. Ample mint luster adds to the considerable visual appeal. NGC ID# 22RY, PCGS# 3952

3321 1925 MS66 PCGS Secure. CAC. The well-detailed design elements of this spectacular Premium Gem show just a touch of the usual softness on the bison's shoulder and the lightly toned surfaces are well-preserved and lustrous. PCGS has graded 14 numerically finer examples (8/15). NGC ID# 22S2, PCGS# 3954

- 3322 1926-S XF45 PCGS. CAC.** A mintage of 970,000 coins — the lowest total in the series — ranks the 1926-S among the most coveted Buffalo nickels. This attractive Choice XF example features an above-average strike and expected friction over the devices. The hair braid and horn are clear. Light golden-olive hues blanket each side. NGC ID# 22S7, PCGS# 3959

**1926-S Buffalo Nickel, AU58
Near Mint State, Amazing Appeal**

- 3323 1926-S AU58 PCGS.** A rare issue in the series with just 907,000 pieces struck, this near-Mint example of the '26-S bridges the gap between Mint State and About Uncirculated. The smooth surfaces retain most of the mint luster and display exceptional blue and sunset-gold toning over the sharply detailed fields and devices. Struck from characteristically worn dies, the quality of strike is remarkable for the grade and the issue. An opportunity not to be missed for the Buffalo nickel enthusiast. NGC ID# 22S7, PCGS# 3959

- 3324 1931-S MS66+ PCGS. CAC.** A fairly scarce issue in MS66 condition, the 1931-S Buffalo nickel is a condition rarity in finer grades. This high-end Premium Gem displays well-detailed design elements and impeccably preserved lustrous surfaces. PCGS has graded five numerically finer examples (8/15). NGC ID# 22SK, PCGS# 3971

- 3325 1935-D MS66+ PCGS. CAC.** The mostly brilliant, impeccably preserved surfaces of this high-end Premium Gem show a few highlights of greenish-gold and ice-blue toning. The design elements are sharply detailed and vibrant mint luster radiates from both sides. PCGS has graded eight numerically finer examples (8/15). NGC ID# 22SP, PCGS# 3975

- 3326 1936-D 3 1/2 Legs, FS-901, VF25 PCGS.** The bison's leftmost leg is greatly attenuated above the hoof. Much scarcer than its famous 1937-D Three-Legged counterpart. A silver-gray example with moderate wear and generally smooth surfaces, though we note a brief vertical mark below the E in STATES. NGC ID# 22ST, PCGS# 38471 Base PCGS# 93978

- 3327 1936-S MS67 PCGS. CAC.** An available date overall, the 1936-S Buffalo nickel is elusive in Superb Gem condition. This MS67 example is among the finest certified. The surfaces display satiny luster with shades of pale sky-blue, champagne, and mint-green toning. A well-struck coin, showing only a touch of weakness above the Indian's hair braid. Population: 85 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 22SU, PCGS# 3979

- 3328 1937 MS67+ PCGS. CAC.** The Plus designation accompanies exceptional surface quality on this gleaming 1937 Buffalo nickel type coin, illuminating well-struck devices and just a blush of light golden toning. Seldom encountered this fine, with only seven higher-grade coins seen at PCGS (7/15). NGC ID# 22SX, PCGS# 3980

- 3329 1937-D Three-Legged, FS-901, AU58 PCGS. CAC.** This cream-gray and wheat-gold key date nickel displays abundant luster for the near-Mint level. The sole reportable mark is a faded diagonal line on the hump of the bison. All diagnostics of the popular error are apparent. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3330 1937-D Three-Legged, FS-901, MS61 NGC.** Attractively patinated golden-brown, apple-green, and cream-gray. This satiny representative is smooth aside from a hair-thin vertical line on the cheek. An always-popular variety, created by zealous lapping at the Denver Mint. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3331 1938-D/S FS-511 MS67 PCGS.** The D mintmark is clearly punched over an earlier S. This Superb Gem is among the finest known of this *Guide Book* variety. The strike is bold and the satiny surfaces display softly blended ice-blue, lavender, and champagne hues. NGC ID# 22T3, PCGS# 38476 Base PCGS# 3985

PROOF BUFFALO NICKELS

- 3332 1936 Type One — Satin Finish PR66 NGC.** A few glints of reddish-gold toning embellish the primarily untuned, sharply struck surfaces of this beautiful, satin-finish Premium Gem. An appealing representative of the proof format that resumed after a 20-year absence in the Buffalo nickel series. NGC ID# 278X, PCGS# 3994

- 3333 1936 Type One — Satin Finish PR67 PCGS. CAC.** Usually called Type One proofs, the Satin Finish 1936 Buffalo nickels are a hybrid issue between the matte proofs issued two decades earlier, and the brilliant proofs struck later in 1936 and again in 1937. This Superb Gem has rich gold toning over satin luster with nearly flawless surfaces. PCGS has only certified 39 finer submissions (8/15). NGC ID# 278X, PCGS# 3994

**1936 Buffalo Nickel, PR67+
Type One, Satin Finish**

- 3334 1936 Type One — Satin Finish PR67+ PCGS. CAC.** The proof mintage in 1936 was 4,420 pieces, which included both the satin and brilliant finish proofs. This high-end Superb Gem satin proof raises itself above other examples not only by virtue of its PCGS Plus designation and the CAC endorsement, but also by its obviously full strike and extraordinary eye appeal. Golden toning visits the high points on the central motifs, emphasized by lilac and blue patina throughout the lustrous and smooth surrounding surfaces. Few are graded so fine. Population: 14 in 67+, 39 finer (7/15). NGC ID# 278X, PCGS# 3994

**1936 Buffalo Nickel, PR67
Later Brilliant Finish**

3335 1936 Type Two — Brilliant Finish PR67 PCGS. CAC. Struck from highly polished dies, this Superb Gem proof Buffalo displays gleaming fields and bold, satiny devices. A hint of golden color graces each side, and the underlying surfaces are devoid of any perceptible flaws. This Type Two 1936 proof is rarely seen finer, with just seven such coins certified by PCGS (8/15). NGC ID# 278Y, PCGS# 3995

3336 1937 PR67 PCGS. CAC. Satiny devices showcase razor-sharp detail while the mirrored fields are highly reflective when tilted beneath a light. Both sides are graced by delicate rainbow toning. PCGS reports only 22 finer examples (8/15). NGC ID# 278Z, PCGS# 3996

3337 1937 PR67 PCGS. CAC. This magnificent Superb Gem exhibits fully struck design elements and deeply mirrored fields, with impeccably preserved brilliant surfaces. PCGS has graded 22 numerically finer examples (8/15). NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

3338 1940 MS67+ PCGS. An essential Registry coin, tied for the finest Full Steps 1940 nickel certified by either service. The strike is bold and both sides display soft multicolor toning over satiny mint luster and beautifully unabraded surfaces. Population: 50 in 67 (8 in 67+), 0 finer (7/15). NGC ID# 22TD, PCGS# 84007

3339 1942-P Type Two MS67 PCGS. A delightful Superb Gem with the wartime silver composition. The design elements are razor-sharp, with Full Steps definition on Monticello. Vibrant mint luster adds to the incredible eye appeal. Population: 47 in 67 (1 in 67+), 0 finer (8/15). NGC ID# 22TM, PCGS# 84016

**1943/2 -P Jefferson Nickel, MS66 Full Steps
Popular Doubled Die Obverse Overdate**

3340 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS. The obverse die was first hubbed with a 1942-dated hub and then rehubbbed with a 1943-dated hub, creating this popular doubled die obverse overdate. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces, with Full Steps definition on Monticello. Struck in wartime silver composition. Population: 40 in 66 (4 in 66+) Full Steps, 4 finer (7/15). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

**1943/2-P Nickel, MS66 Full Steps
FS-101, Doubled Die Obverse**

3341 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS. CAC. The base and diagonal downstroke of an underdigit 2 is apparent within the 3 in the date. Last of the wartime hubbed overdates, the 1943/2-P is also a minor doubled die obverse variety. LIBERTY and the date are minutely doubled. Brilliant and well struck with booming luster and exemplary preservation. Population: 44 in 66 Full Steps (4 in 66+), 4 finer (8/15). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

3342 1943-S MS67+ PCGS. A high-end Superb Gem representative of this popular wartime silver issue, with sharply detailed design elements that include Full Steps on Monticello. The lustrous surfaces are visited by shades of greenish-gold toning. Population: 80 in 67 (3 in 67+), 0 finer (8/15). NGC ID# 22TT, PCGS# 84021

**1944-P Jefferson Nickel, MS67 Full Steps
Wartime Silver Composition**

3343 1944-P MS67 Full Steps PCGS. Struck in wartime silver composition, with the prominent reverse mintmark., this impressive Superb Gem exhibits sharply detailed design elements with full steps on Monticello. The impeccably preserved surfaces are lustrous, with light golden-brown toning on the obverse. Population: 17 in 67 (2 in 67+) Full Steps, 0 finer (7/15). NGC ID# 22TU, PCGS# 84022

3344 1946-D MS67 Full Steps PCGS. This Registry-grade example is among the finest certified by either leading service. The strike is bold and the surfaces are free of bothersome abrasions. This piece shows attractive multicolor toning on each side that is universally warmed by a sun-gold tint. Population: 12 in 67 (1 in 67+) Full Steps, 0 finer (7/15). NGC ID# 22U3, PCGS# 84029

1955-D Nickel, MS65 Full Steps
Gem Registry Coin

- 3345 1955-D MS65 Full Steps PCGS.** The 1955-D Jefferson nickel is surprisingly scarce with Full Steps definition, regardless of grade. This Gem example is among the finer-known. The strike is bold and the satiny surfaces are free of major abrasions. Light golden toning blankets each side. Population: 6 in 65, 1 finer (8/15). NGC ID# 22UW, PCGS# 84057

PROOF JEFFERSON NICKELS

1939 Nickel, White-on-Black PR67
Scarce Reverse of 1940 Variety

- 3346 1939 Reverse of 1940 PR67 PCGS. CAC.** The sides of the steps are strengthened, differentiating the Reverse of 1940 from the Reverse of 1938. Examples from the new reverse hub are considerably scarcer: There are 139 PR67 Reverse of 1938 coins and eight submissions finer at PCGS compared to just 31 PR67 Reverse of 1940 examples and a single coin finer (8/15). This black and white Superb Gem has deep mirroring in the fields, frosted motifs, and the surfaces are virtually devoid of contact. NGC ID# 279Z, PCGS# 94176

- 3347 1942-P Type Two PR68 NGC.** A beautiful Superb Gem proof of the silver wartime composition. The coin is fully struck and displays gleaming mirrored fields. Dusky, milky-gold toning reveals tinges of pastel color in the fields when tilted beneath a light. Among the finest certified at NGC. Census: 26 in 68 (5 in 68 ★), 0 finer (7/15). NGC ID# 27A4, PCGS# 4180

1976-S Nickel, PR70 Deep Cameo
Registry Set Essential

- 3348 1976-S PR70 Deep Cameo PCGS.** A flawlessly struck and perfectly preserved example of this popular proof issue, an unsurpassable Registry Set candidate and must-have item for the competitive collector. Just a trace of light golden color graces frosty design elements while the fully mirrored fields show glass-black contrast. Population: 40 in 70 Deep Cameo, (7/15). NGC ID# 27AP, PCGS# 94209

EARLY HALF DIMES

- 3349 1796 LIKERTY, V-1, LM-1, R.3 — Bent — NGC Details. VF.** Ex: Hilt Collection. LM-1 is the more often seen of the two 1796 half dime varieties. This example is well-detailed, with steel-gray color that deepens around the periphery. A few small abrasions are hardly distracting, and the peripheral legends are clear. A barely perceptible bend in the planchet is detected just behind Liberty's head. NGC ID# 22ZX, PCGS# 38596 Base PCGS# 94254

- 3350 1797 15 Stars, V-2, LM-1, R.3 — Repaired — NGC Details. VF.** Ex: Hilt Collection. Bold die cracks on each side denote a late die state, although the strike is bold, with complete border dentils. Faint tool marks appear in the obverse fields and on the portrait when studied with a loupe, but to the naked eye this coin offers pleasing appeal with deep gunmetal-gray patina. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

BUST HALF DIMES

1829 V-7, LM-1 Half Dime
Gem Type Coin

- 3351 1829 V-7, LM-1, R.2, MS65 NGC.** A prooflike example — perhaps an early strike — representing the resumption of the half dime series after a 24-year absence for the denomination. Sea-green and peach-gold toning conveys a lustrous and pleasing visual impression of both sides. The strike is razor-sharp and no marks of any significance disturb the vibrant appeal of this little Gem, perfect for type. Census: 33 in 65, 26 finer (8/15). NGC ID# 232B, PCGS# 38612 Base PCGS# 4276

- 3352 1829 V-6, LM-5, R.1, MS64 PCGS.** Golden-brown and aquamarine embrace this satiny and splendidly struck near-Gem. No conspicuous marks are detected on this worthy first-year representative of the Capped Bust type. For all 1829 varieties, Population: 71 in 64 (2 in 64+), 40 finer (6/15). Ex: Long Beach Signature (Heritage, 6/2006), lot 928, which realized \$862.50. PCGS# 38616 Base PCGS# 4276

3353 1830 V-3, LM-4.2, R.2, MS64 NGC. Light green-gold toning graces this sharply struck and lustrous near-Gem. Only wispy contact serves to limit the grade. A small die chip within the second S in STATES confirms the later Logan-McCloskey variant of V-3. PCGS# 38642 Base PCGS# 4277

3354 1830 V-6, LM-8, R.1, MS64 NGC. Delicate golden patina visits this intricately struck and essentially unabraded Choice half dime. A lustrous and lovely type representative. LM-8 has a defective E in E PLURIBUS UNUM, perhaps the most noteworthy aspect of the variety. NGC ID# 232C, PCGS# 38646 Base PCGS# 4277

3355 1831 V-6, LM-1.3, R.1, MS65 NGC. A late die stage with a retained cud (as made) through NIT in UNITED. The Logan-McCloskey standard reference states "a common die marriage although coins with the retained cud are rare." Lustrous aquamarine color bathes this exquisitely struck and splendidly preserved Gem. Certified in a former generation holder.

Ex: Long Beach Signature (Heritage, 1/2004), lot 5553, which realized \$1,667.50.

From The Stephen A. Walling Collection. NGC ID# 232D, PCGS# 38656 Base PCGS# 4278

3356 1832 V-11, LM-6, R.4, MS64 NGC. A very scarce die marriage, of interest for its many minor die cracks and breaks across the reverse. Lustrous and well preserved with lime-green and caramel-gold toning. The strike shows inexactness near the left shield border. Certified in a former generation holder. PCGS# 38668 Base PCGS# 4279

3357 1833 V-6, LM-9, R.2, MS64 NGC. Medium autumn-brown and cobalt-blue toning enriches the obverse of this well struck and lustrous Choice half dime. The reverse is lightly patinated in cream and tan shades. The reverse is pristine and the obverse exhibits moderate contact. NGC ID# 232F, PCGS# 38700 Base PCGS# 4280

3358 1833 V-1, LM-10, R.1, MS64 PCGS. A "Scarface" variety with a light vertical die crack across Liberty's cheek and neck. A richly patinated aquamarine and autumn-brown near-Gem. Unabraded and satiny with a precise strike and pleasing eye appeal. NGC ID# 232E, PCGS# 38701 Base PCGS# 4280

3359 1835 Large Date, Large 5C, V-2, LM-1, R.2, MS64 PCGS. Honey-gold centers are framed by broad sea-green margins. The present beautifully patinated near-Gem is semiprooflike and sharply struck. The fields are smooth and the portrait shows only a hair-thin mark on the neck. The reverse exhibits numerous cracks and small breaks. PCGS# 38707 Base PCGS# 4282

3360 1836 Small 5C, V-6, LM-5, R.2, MS64 PCGS. Star 1 is repunched, as is the N in UNITED. These two features combine to attribute Valentine-6. The present boldly clashed near-Gem is satiny and essentially devoid of contact. Faint gold, tan, and silver-gray toning adorns both sides. NGC ID# 232J, PCGS# 38728 Base PCGS# 4288

SEATED HALF DIMES

3361 1837 No Stars, Large Date (Curl Top 1) MS65 NGC. V-1, Flynn MPD-001. The noticeable, widespread repunching on the bottom of all date digits attributes this as the V-1 die pairing. The rose-gray surfaces show splashes of blue and gold amid good preservation. A couple of die cracks run through the wreath on the reverse. NGC ID# 232M, PCGS# 4311

3362 1837 No Stars, Large Date (Curl Top 1) MS65 NGC. A hint of golden patina visits the obverse rim, but this coruscating Gem is otherwise brilliant. Well struck and unmarked. A short-lived design subtype.

Ex: Exclusively Internet Auction #24063 (Heritage, 6/2004), lot 13231, which realized \$2,376.

From The Stephen A. Walling Collection. NGC ID# 232M, PCGS# 4311

1837 No Stars Seated Half Dime, MS66 Repunched Date

3363 1837 No Stars, Large Date (Curl Top 1), V-1, Flynn-001, MS66 NGC. This obverse die shows a boldly tripled date, with the secondary digits seen in the field below the primary. This No Stars type coin is boldly struck and beautifully preserved, showing golden-gray and lavender interiors amid deep ocean-blue margins. Finer pieces are rarely seen. Census: 81 in 66 (1 in 66+, 1 in 66 ★), 19 finer (8/15). NGC ID# 232M, PCGS# 4311

3364 1838 Large Stars, No Drapery MS65 NGC. A brilliant and mildly prooflike Gem that is well struck aside from a small portion of the upper left wreath. The first and eleventh stars are lightly recut. A splendidly preserved representative of this initial With Stars issue. *Ex: Long Beach Signature (Heritage, 9/2002), lot 6131; Fred Miller Collection (Heritage, 3/2004), lot 5476, which realized \$1,265.* *From The Stephen A. Walling Collection. NGC ID# 2TXX, PCGS# 4317*

3365 1838 Large Stars, No Drapery MS65 PCGS. CAC. A lovely Gem example of this highly popular and short-lived No Drapery, With Stars type. The strike is boldly executed and the frosty surfaces are devoid of obvious abrasions. A tinge of russet and ocean-blue toning along the lower-right obverse rim is the only mentionable color. Population: 57 in 65 (4 in 65+), 30 finer (7/15). NGC ID# 2TXX, PCGS# 4317

3366 1839 No Drapery MS65 PCGS. The surfaces of this Gem No Drapery half dime exhibit rich patina comprised of violet, rose, peach-orange, and blue-green tones. The devices are fully struck, and original mint luster glimmers over each seemingly unmarked side. Population: 23 in 65, 28 finer (7/15). NGC ID# 232S, PCGS# 4319

1845 Half Dime, Superb MS67 Beautifully Toned

3367 1845 Repunched Date V-5, FS-302, MS67 PCGS. This is a bold and beautiful Superb Gem condition rarity. The 1845 Seated half dime is available in lower Mint State grades, but the population declines significantly in Gem and finer condition. This piece displays frosty luster beneath shades of champagne, lilac, and aquamarine toning, with the latter hue most prevalent around the peripheries. Several thread-like strike-throughs appear on the obverse upon close examination. Population: 7 in 67 (1 in 67+), 0 finer (8/15). PCGS# 38736

3368 1849-O MS61 PCGS. Splendid forest-green and rose-gold toning encompasses this satiny and unmarked New Orleans half dime. The high points show moderate incompleteness of impression. Housed in a prior generation holder. NGC ID# 233E, PCGS# 4344

3369 1852 MS66 PCGS. Both sides of this impressive Premium Gem show prominent clash marks, with well-detailed design elements and well-preserved silver-gray surfaces. Population: 10 in 66, 5 finer (8/15). NGC ID# 233K, PCGS# 4349

3370 1853 No Arrows MS64 NGC. Vivid electric-blue toning covers the left obverse, while a mix of rose, russet, and blue paint the right side. Turquoise patina dominates the reverse with golden patina over the denomination. Boldly struck and well-preserved. The No Arrows issue (135,000 coins) is far scarcer in high grades than its With Arrows counterpart. NGC ID# 233M, PCGS# 4351

3371 1853 No Arrows MS65 PCGS. This sharply detailed Gem was struck earlier in the year, before the Arrows were added to the design to signify a weight change. Prominent clash marks are evident on the reverse and the lustrous surfaces show highlights of greenish-gold toning. Population: 7 in 65, 11 finer (8/15). NGC ID# 233M, PCGS# 4351

3372 1853 Arrows MS66 NGC. A fully struck Premium Gem that boasts dynamic luster and undisturbed surfaces. A whisper of almond-gold toning denies full brilliance. Census: 49 in 66 (4 in 66+, 1 in 66 ★), 23 finer (8/15).
Ex: Dallas Signature (Heritage, 12/2005), lot 401, which realized \$2,530.
From The Stephen A. Walling Collection. NGC ID# 233Y, PCGS# 4356

1853 Arrows Half Dime, MS66+ Clashed Dies

3373 1853 Arrows MS66+ PCGS. A conditionally scarce, boldly struck With Arrows type coin, this 1853 Seated half dime is chiefly eye-appealing due to its luminous luster and warm champagne toning which exhibits russet and bluish overtones around the peripheries. Heavily clashed on each side with evidence of die erosion in the fields. Population: 40 in 66 (2 in 66+), 9 finer (8/15). NGC ID# 233Y, PCGS# 4356

3374 1857 MS67 NGC. High-grade examples of the 1857 half dime are ideal type candidates. Brilliant, essentially unmarked surfaces display softness at the right obverse border and the corresponding area on the reverse. Among the finest certified. Census: 18 in 67 (5 in 67+), 1 finer (8/15). NGC ID# 233S, PCGS# 4365

3375 1858 MS67 PCGS. These small coins were prone to die clashing, and evidence of clashed dies shows on both sides of this otherwise unmarked coin. The *Guide Book* lists three date varieties for the 1858 half dime — a scarce Repunched High Date and an equally scarce Inverted Overdate, as well as a Normal Date. This is the Normal Date variety. The frosted surfaces of the coin are lustrous and lightly toned on both sides, where orange-gold toning mingles with lilac accents and bold mint luster. Only two coins are numerically finer than this sharply struck and attractive Superb Gem at PCGS. Population: 15 in 67 (1 in 67+), 2 finer (7/15). NGC ID# 233U, PCGS# 4367

3376 1867 MS63 NGC. Shades of golden-brown, blue, and amber toning visit the lightly marked surfaces of this attractive Select example, with well-detailed design elements and some prooflike reflectivity in the fields. Census: 16 in 63, 38 finer (7/15). NGC ID# 234L, PCGS# 4390

1870 Seated Half Dime, MS67 Rainbow Toning

3377 1870 MS67 NGC. The 1870 Seated Liberty half dime becomes a rarity in Gem condition, making this Superb Gem far finer than the average high-end coin. The upper-left portion of the wreath is predictably weak, although significant eye appeal stems from the lovely rainbow hues that encompass each side. Unabraded, with semiprooflike obverse fields. Census: 4 in 67, 3 finer (8/15). NGC ID# 234T, PCGS# 4396

3378 1872-S Mintmark Below Bow MS66 NGC. CAC. Vivid shades of greenish-gold, violet, and amber toning visit the well-preserved surfaces of this spectacular Premium Gem, with sharply detailed design elements throughout. Census: 50 in 66 (1 in 66+, 1 in 66 ★), 8 finer (8/15). NGC ID# 2352, PCGS# 4401

3379 1873-S MS66 PCGS. CAC. A spectacular Premium Gem with razor-sharp definition on the design elements and well-preserved surfaces that show much prooflike reflectivity, along with vibrant satiny mint luster. Population: 6 in 66, 2 finer (8/15). NGC ID# 2354, PCGS# 4405

PROOF SEATED HALF DIMES

1860 Seated Liberty Half Dime, PR67 Legend Obverse

3380 1860 PR67 NGC. An untoned silver-white example of this first-year half dime issue, struck to replace the Stars Obverse half dimes and using the Cereal Wreath reverse, suggested by half dime specialist Harold P. Newlin for some 1859 pattern half dollars (e.g. Judd-247-25 inclusive) and adopted in 1860 for this denomination. This Superb Gem proof shows some die polishing lines but virtually no post-Mint defects. Census: 8 in 67, 0 finer (8/15). NGC ID# 235V, PCGS# 4443

1861 Half Dime, PR66 Cameo
Rare This Starkly Contrasted

- 3381 1861 PR66 Cameo NGC.** This fully struck, near-brilliant proof possesses stark white-on-black contrast, with fully mirrored fields that are free of bothersome marks and hairlines. Most examples of this proof half dime issue lack significant contrast, which is where this coin stands far above most of the known survivors. It is tied with one other as the finest of just three Cameos certified by NGC in all grades (8/15). NGC ID# 235W, PCGS# 84444

- 3382 1862 PR65 Cameo PCGS. CAC.** This Gem proof 1862 half dime is needle-sharp throughout Liberty and the wreath, despite moderate die rust on the obverse portrait. There are no bothersome contact marks or hairlines and each side exhibits a hint of light champagne toning. Population: 5 in 65 (1 in 65+) Cameo, 9 finer (8/15). NGC ID# 235X, PCGS# 84445

- 3383 1864 PR66 NGC.** A high-grade Civil War half dime. The obverse is brilliant and the reverse displays faint gray toning. Intricately struck and flashy with appreciable (albeit undesignated) cameo contrast. A mere 470 proofs were struck.
Ex: Long Beach Signature (Heritage, 1/2004), lot 5580, which realized \$1,667.50.
From The Stephen A. Walling Collection. NGC ID# 235Z, PCGS# 4447

1867 Seated Half Dime, PR66 Cameo
Only One Numerically Finer at PCGS

- 3384 1867 PR66 Cameo PCGS. CAC.** Richly toned on both sides, this Premium Gem Cameo proof displays shades of gold, copper, orange, red, and sea-green on the obverse, while the reverse includes hues of copper, teal, and violet. A vertical toning streak appears on the reverse. A sharp strike adds to the appeal. A tiny mark and edge nick are present near 6 o'clock on the obverse. Population: 10 in 66 (2 in 66+) Cameo, 1 finer (8/15). NGC ID# 2364, PCGS# 84450

1869 Half Dime, PR67
Ex: Walter H. Childs

- 3385 1869 PR67 NGC.** *Ex: Childs.* Ocean-blue toning dominates the obverse field, although golden-brown is also present. The seated Liberty has dove-gray high points. The reverse periphery displays rich lilac-red, while the field near HALF DIME has light tan patina. The wreath exhibits cameo frost. Well struck and flashy with excellent eye appeal.
Ex: Walter H. Childs Collection (Bowers and Merena, 8/1999), lot 171, which realized \$3,220. NGC ID# 2366, PCGS# 4452

- 3386 1870 PR66 PCGS.** The bold devices and glassy fields on each side of this lovely Gem proof are accentuated by vivid ocean-blue, violet, and rose-gold hues, with a few tinges of mint-green also evident on the reverse. From a mintage of only 1,000 proofs. Population: 19 in 66 (1 in 66+), 3 finer (8/15). NGC ID# 2367, PCGS# 4453

- 3387 1870 PR66 PCGS.** This gleaming proof is fully struck and displays incredible flash when tilted beneath a light. Deep teal-blue toning encompasses much of the obverse, while the reverse shows primarily rose-gold color. Population: 19 in 66 (1 in 66+), 3 finer (8/15). NGC ID# 2367, PCGS# 4453

1872 Half Dime, PR67 Cameo
Sharp Condition Rarity

- 3388 1872 PR67 Cameo NGC.** Cameo examples of this late-series proof half dime issue are scarce in all grades, and Deep Cameos are extremely rare. This Superb Gem is devoid of toning, and the strike is razor-sharp. Modest contrast characterizes both sides. This piece is tied with two others as the finest Cameo certified by NGC (8/15). NGC ID# 2369, PCGS# 84455

- 3389 1873 PR65 Cameo PCGS.** Gold tones cling to the borders, while the interiors are mostly brilliant with pale blue accents. Deep mirroring in the fields and a rich coating of frost over the devices give this Gem proof a pleasing cameo appearance. Population: 4 in 65 Cameo, 10 finer (7/15). NGC ID# 236A, PCGS# 84456

EARLY DIMES

1797 JR-1 Dime, VF Sharpness

- 3390 1797 16 Stars, JR-1, R.4 — Damaged — NGC Details. VF.** Ex: Hilt Collection. Numerous digs and surface irregularities account for the NGC net grade, although there is no single area of significant damage. The pronounced obverse die crack that typifies the JR-1 variety is clearly visible above the date, where it extends to stars 1 and 2. Deep umber-gray toning at the margins surrounds light, silver-gray centers. A reasonably graded example of the Small Eagle reverse for the early dime or type collector.

- 3391 1797 13 Stars, JR-2, R.4 — Reverse Rim Damage — NGC Details. VG.** Ex: Hilt Collection. Appealing tan-gray patina shows deeper olive and gold hues in the fields on each side of this evenly worn 1797 dime. The obverse portrait is boldly outlined with the eye visible, and the border dentils are complete. The reverse shows the eagle, wreath, and peripheral legends clearly, but is soft around much of the dentilation. The rim damage noted by NGC is slight, and is hidden by one of the tabs of the holder. NGC ID# 236D, PCGS# 38749 Base PCGS# 4463

- 3392 1798/97 16 Stars Reverse, JR-1, R.3, VF20 NGC.** Ex: Hilt Collection. The overdate feature is plainly visible on this midgrade example. Wear is even and the strike is well-executed. The lower-left border dentils on each side are a trifle weak, but the rims are otherwise complete. An area of weakness also appears on the eagle's breast, partly due to wear. This piece shows uniform pewter-gray color. NGC ID# 236F, PCGS# 38750 Base PCGS# 4468

1800 Dime, JR-2, AU Details Wide A's, Spine Off Right Shield Corner

- 3393 1800 JR-2, R.5 — Improperly Cleaned — NGC Details. AU.** Ex: Hilt Collection. A disguised cleaning results in the NGC net grade for this sharply detailed dime. The bluish-gold and steel-blue coloration that covers the slightly porous surfaces is somewhat pleasing but of unnatural origin. Still, 1800 dimes are highly sought in all conditions. This example shows bold motifs from the scarce JR-2 die pair.

- 3394 1801 JR-1, R.4, Fine 15 NGC.** Ex: Hilt Collection. Central detail is bold for the grade, and the peripheral legends and stars are clear; the dentils are weak around much of each side. This piece shows russet-gray patina that lightens toward the centers. When studied beneath a glass, the obverse portrait and much of the outer rim show faint crisscrossing lines. NGC ID# 236J, PCGS# 38756 Base PCGS# 4471

- 3395 1802 JR-4, R.4 — Repaired — PCGS Genuine. Fine Details.** A significant amount of detail increases the appeal of this coin for the budget-conscious type collector, while each side is blanketed in dusky gray and olive-brown toning. Much of the open regions of the fields have been smoothed, although two noticeable hits remain in the right obverse field. NGC ID# 236K, PCGS# 38761 Base PCGS# 4472

- 3396 1803 JR-3, R.4, Fine 12 NGC.** Ex: Hilt Collection. Heavily cracked around the date and the eagle's left (facing) wing, characteristic of this variety. Areas of localized weakness occur on each side and around the rims, partially as a result of die fatigue but also characteristic of this die marriage. Many design elements are well-defined and sharply detailed for the grade. This piece shows original olive-gray and deep gold toning, with a few light marks scattered about. NGC ID# 236L, PCGS# 38764 Base PCGS# 4473

1803 Draped Bust Dime, AU Details JR-3, Ex: Hilt

- 3397 1803 JR-3, R.4 — Improperly Cleaned — NGC Details. AU.** Ex: Hilt Collection. JR-3 is the most often seen 1803 dime variety, but it is still scarce in absolute terms. This example is boldly detailed, with evenly struck, well-defined relief elements. Olive-gold and lavender-gray hues blanket lightly cleaned surfaces, yielding pleasing eye appeal for a Details-graded coin. NGC ID# 236L, PCGS# 38764 Base PCGS# 4473

BUST DIMES

1822 JR-1 Bust Dime, VG8 Scarce, Problem-Free Example

- 3398 1822 JR-1, R.4 VG8 NGC.** Ex: Hilt Collection. A well-circulated, two-tone coin with silver-tan patina on the raised devices set against rich, grayish-brown fields. Perhaps only a few hundred of this scarce dime survive from a stated production of 100,000 pieces, although some of the mintage may have been 1821-dated pieces. A single die pair produced the entire 1822 output. Elusive in all grades, this smoothly worn example would enhance any circulated Bust dime set. NGC ID# 236Z, PCGS# 38801 Base PCGS# 4497

- 3399 1830 Medium 10C, JR-8, R.3, MS63 PCGS.** Blue-green toning dominates but the portrait is light gunmetal-gray. Satiny and crisply struck without visible abrasions. The die crack through the hair curls is customary for the moderately scarce JR-8. NGC ID# 4FA4, PCGS# 38845 Base PCGS# 4516

- 3400 1832 JR-1, R.2, MS63+ PCGS.** The C in AMERICA is repunched, characteristic of the collectible JR-1 marriage. A lustrous pearl-gray dime with crisply struck stars and minor blending at the centers. No marks are noticeable, and the eye appeal is pleasing. NGC ID# 237C, PCGS# 38855 Base PCGS# 4521

SEATED DIMES

1837 No Stars Seated Dime, MS64 Large Date, F-101b

- 3401 1837 No Stars, Large Date, F-101b, R.2, MS64 NGC.** A sharply struck Choice example. Lustrous and lightly toned with an exceptionally clean obverse. An introductory design subtype issued for only two years. The Fortin subvariety with “pie-shaped die cracks” on the lower obverse but without the bold clash marks encountered on F-101c.

Ex: Charlotte ANA Signature (Heritage, 3/2007), lot 456, which realized \$3,450.

From The Stephen A. Walling Collection. PCGS# 537636 Base PCGS# 4561

- 3402 1839 No Drapery MS64 PCGS.** Light wheat-gold toning adorns this well struck, smooth, and semiprooflike near-Gem. The die marriage appears to be unlisted by Fortin. The obverse die is Fortin's #1, between F-103 and F-104. The reverse is uncracked and exhibits myriad delicate die polish lines. NGC ID# 237X, PCGS# 4571

- 3403 1846 F-101, R.4, VF25 PCGS. CAC.** The high points are stone-gray, but the fields offer colorful lime-green, peach-gold, and russet patina. All letters in LIBERTY are sharp and there are no noticeable marks. A key date with a lower mintage than the much-promoted 1844. PCGS# 537837 Base PCGS# 4588

- 3404 1853 Arrows MS65 PCGS.** Rich plum-red, jade-green, cobalt-blue, and golden-brown toning encompasses this well struck and unabraded three-year type coin. Despite a high mintage, the 1853 Arrows is scarce at the MS65 level. Housed in a first generation holder. NGC ID# 2398, PCGS# 4603

- 3405 1853 Arrows MS66 NGC.** A brilliant and beautiful high-grade representative of this popular three-year type. The strike is bold, and a lens reveals only trivial imperfections. Census: 43 in 66 (1 in 66+, 1 in 66 ★), 17 finer (8/15).

Ex: New York Signature (Heritage, 11/2003), lot 5969; Denver Signature (Heritage, 8/2006), lot 868, which realized \$2,645.

From The Stephen A. Walling Collection. NGC ID# 2398, PCGS# 4603

- 3406 1857-O Large O, F-101, R.4, MS65 NGC.** Large O. Medium powder-blue, autumn-gold, and plum-mauve shades adorn this coruscating Gem. Well struck and attractive with contact limited to a scrape in the reverse exergue and a pair of light obverse field marks. PCGS# 538107 Base PCGS# 4615

1863 Seated Dime, MS65 Just 14,000 Business Strikes Issued

- 3407 1863 F-101a, R.5, MS65 PCGS.** A rare business strike, from a year where proof examples are more available than circulation strikes. Just 14,000 pieces were struck for circulation, with few surviving in Mint State. Silver coinage in general was struck in small quantities due to concerns over hoarding, exportation, and melting. This Gem example displays occasional prooflike flash across the fields, with slightly cloudy lilac-gray and faint rose-gold patina. Sharply struck with frosted, well-defined central motifs. Population: 8 in 65, 4 finer (8/15). NGC ID# 239K, PCGS# 538200 Base PCGS# 4637

- 3408 1871-CC F-101, R.4 — Mount Removed — NGC Details. Fine.** The first Carson City dime issue had a minimal mintage of 20,100 pieces. None were set aside by collectors until decades later, and most survivors are well circulated with various problems, such as cleaning or corrosion. This example has a sharp LIBERTY, date, and mintmark. The central reverse has damage that affects most of ONE DIME, but the remainder of the stone-gray coin is attractive. PCGS# 538268 Base PCGS# 4654

- 3409 1873 Arrows, F-116, R.3, MS64+ PCGS. CAC.** Light golden-brown toning dominates both sides, although the borders display aquamarine blushes. Sharply struck except for Liberty's hair. The satiny surfaces show only a faint line on the left obverse field. PCGS# 538317 Base PCGS# 4665

- 3410 1874 Arrows, F-112, R.3, MS64 PCGS.** Blushes of dusky tan toning visit this predominantly stone-white near-Gem. A two-year type coin. Coruscating and unabraded with minor inexactness of strike on the wreath opposite the left corner of Liberty's rock. The reverse die is described as “perfect” on the Fortin website, although several delicate cracks are evident on both the plate coin and the present piece. Population: 56 in 64, 59 finer (8/15).

Ex: FUN Signature (Heritage, 1/2004), lot 5622, which realized \$1,207.50.

From The Stephen A. Walling Collection. PCGS# 538343 Base PCGS# 4668

- 3411 1875 MS66 PCGS. CAC.** More than 10.3 million pieces were struck, and Gerry Fortin's analysis of the different die pairs remains incomplete with such a large mintage. The obverse on the current example seems to match Fortin-121, the Chin Whiskers variety, with an unfinished area beneath Liberty's chin. The reverse is from a later die state, with numerous cracks along the right side of the wreath. This is a lustrous, frost-white Premium Gem with slight almond-gold accents and a sharp strike. Housed in a green label holder with CAC endorsement — just five examples are finer at PCGS. Population: 27 in 66, 5 finer (7/15). NGC ID# 23AC, PCGS# 4672

- 3412 1876-CC MS66 NGC. F-104.** An extensive network of fine die cracks through the obverse legends, Liberty's head, and the cap identify the Fortin variety. This impressive Premium Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces with outstanding eye appeal. Census: 22 in 66 (1 in 66+), 6 finer (8/15). NGC ID# 23AJ, PCGS# 4680

- 3413 1877-CC MS65 NGC. Fortin-Unlisted Type Two Reverse.** The obverse matches Fortin's Obverse 7 with 77 in the date repunched. Reverse C is clashed. Over 7.3 million dimes were struck at the Carson City Mint in 1877, and the date only becomes scarce in MS65. This lustrous Gem is darkly toned in gray and gold patina. The strike shows softness on the upper obverse and corresponding area on the reverse. NGC ID# 23AM, PCGS# 4683

**1877-CC Seated Dime, MS66+
Attractive Toning**

- 3414 1877-CC MS66+ PCGS. F-109, R.4. Type Two Reverse.** After 1874, the Carson City Mint's dime production increased dramatically. Coinage in 1877 amounted to 7.7 million pieces, making this issue readily collectible in most grades. This Premium Gem is conditionally scarce, however, and there are few finer coins known. Aside from trivial softness on Liberty's head, the motifs are well brought up. Frosty luster shows light golden centers, with deeper sea-green and cerulean-blue peripheries. Population: 51 in 66 (10 in 66+), 5 finer (8/15). NGC ID# 23AM, PCGS# 4683

- 3415 1880 F-102a, R.4, MS66 NGC.** Just 36,000 business strike dimes were produced in 1880, all at Philadelphia. This example shows frosted devices and prooflike reflectivity that may be seen on a proof, although this is a business strike from the proof dies as described in the Gerry Fortin reference. Minimally toned with generous eye appeal.
Ex: *FUN Signature* (Heritage, 1/2012), lot 5497. PCGS# 538644 Base PCGS# 4688

- 3416 1882 MS67 NGC.** This attractive, richly toned Superb Gem displays shades of violet, yellow, cobalt-blue, and sea-green patina. Wispy die cracks appear on both sides, particularly the obverse. Boldly struck and conditionally rare despite a production in excess of 3.9 million coins. Census: 28 in 67 (1 in 67 ★), 2 finer (7/15). NGC ID# 23AV, PCGS# 4690

- 3417 1883 MS66+ PCGS. CAC. F-101.** This high-end Premium Gem offers well-detailed design elements and ample mint luster, under attractive shades of pale gold and powder-blue toning. Population: 63 in 66 (2 in 66+), 13 finer (8/15). NGC ID# 23AW, PCGS# 4691

- 3418 1884-S MS64 PCGS. F-105, R.5.** Lustrous and lightly toned with a good strike. Well preserved aside from a small bright area on the field near the ST in STATES. The mintmark is always filled on F-105. Population: 17 in 64 (1 in 64+), 3 finer (8/15). NGC ID# 23AY, PCGS# 4693

**1889 Seated Liberty Dime, MS66+
Nice Luster, Pleasant Toning**

- 3419 1889 MS66+ PCGS. CAC. F-113, R.3.** An easily obtainable date overall, the 1889 Seated dime becomes scarce at the MS66 grade level, and finer coins are decidedly rare. This Plus-graded example displays heavily frosted luster beneath shades of olive, gold, and pale lavender toning. The strike is sharp and the surfaces are carefully preserved. Population: 28 in 66 (3 in 66+), 6 finer (8/15). NGC ID# 23B9, PCGS# 4702

- 3420 1890 MS66+ PCGS. Fortin-Unlisted.** The date position appears similar to Fortin-102a, but the reverse is extensively cracked around the periphery. As a type coin, this Premium Gem 1890 Seated dime is an outstanding choice. The strike is bold and the frosty surfaces reveal toning in shades of mint-gold, ocean-blue, violet, and amber-gray. A few tiny ticks in the upper-left obverse field are all that limit the grade. A small patch of mint-made planchet flaws appears in the central reverse. Population: 49 in 66 (2 in 66+), 5 finer (8/15). NGC ID# 23BB, PCGS# 4704

- 3421 1891 MS67 NGC.** Delightful forest-green and golden-brown toning endows the margins of this lustrous and immaculate Superb Gem. The strike is good and the eye appeal is undeniable. Census: 21 in 67 (3 in 67 ★), 1 finer (8/15). NGC ID# 23BD, PCGS# 4706

- 3422 1891-O MS66 NGC. F-104.** Fully brilliant and well-struck, this piece exhibits satiny luster that enhances the blemish-free surfaces. An excellent representative of the final year of production of this long-lived type. Census: 8 in 66 (1 in 66 ★), 2 finer (8/15). NGC ID# 23BE, PCGS# 4707

PROOF SEATED DIMES

**1858 Dime, PR65 Cameo
Only 300+ Proofs Struck**

- 3423 1858 PR65 Cameo NGC. F-101, R.5.** Pastel cherry-red, straw-gold, and navy-blue toning enriches this nicely struck and flashy Gem. Devoid of contact, but brief lint marks (as made) are noted near the cap and left ribbon loop. 1858 was the first year that proofs were available for purchase by the general public. The *Guide Book* suggests a mintage of 300+ pieces. NGC ID# 23CC, PCGS# 84747

- 3424 1859 F-101, R.4, PR64 NGC.** A trace of almond-gold toning overlies this nicely struck Choice proof. Only the lower reverse dentils lack a sharp impression. The motifs are lightly frosted and the fields are undisturbed except for unimportant hairlines.
Ex: Long Beach Signature (Heritage, 6/2004), lot 8059, which realized \$1,667.50.
From The Stephen A. Walling Collection. PCGS# 538999 Base PCGS# 4748

**1863 Dime, PR66 Cameo
Deeply Toned Throughout**

- 3425 1863 PR66 Cameo PCGS. F-101, R.4.** This is the only die pair for 1863 Philadelphia dime coinage, as it was also employed for the short 18,000-coin business strike production of that year. This high-end proof example shows deep teal and violet toning in the mirrored fields, while the devices show lighter hues of the same with the occasional golden accent. The strike is bold, and only a few faint hairlines, well-hidden by the rich patina, limit the numeric grade. Population: 5 in 66 (1 in 66+) Cameo, 1 finer (8/15). NGC ID# 23BS, PCGS# 84756

**1864 Dime, PR65 Deep Cameo
Rare So Starkly Contrasted**

- 3426 1864 PR65 Deep Cameo PCGS. F-101, R.4.** This popular proof issue is seldom seen in Gem condition, with or without cameo contrast. The present coin is a rare Deep Cameo, one of only four such coins certified by PCGS in all grades. This piece is boldly struck and shows just a hint of light golden toning. A few stray lines in the fields are not out of line for the grade. Population: 1 in 65 Deep Cameo, 3 finer (7/15). NGC ID# 23CM, PCGS# 94757

- 3427 1869 F-106, R.5, PR65 PCGS.** Orange-gold, jade-green, cherry-red, and cream-gray embrace this Reconstruction-era Gem. The strike shows incompleteness only on the upper left portion of the wreath. The mintage of 600 proofs was coined from three different die pairs, one with a Short Flag 1 and two with a Long Flag 1. PCGS# 539024 Base PCGS# 4762

- 3428 1870 PR65 Cameo NGC. F-103, R.5.** A fully brilliant Gem with luminous motifs and glassy fields. The strike is good and there are no detractors. Much scarcer than implied by the mintage of 1,000 pieces, since unsold proofs were melted by the Mint. The scarcer of the two proof Fortin varieties for the date. The pick-up point is the broken first S in STATES. NGC ID# 59UM, PCGS# 84763

- 3429 1884 PR66 Cameo PCGS. CAC. F-101, R.3.** The design elements of this spectacular Premium Gem are sharply detailed throughout and the deeply mirrored fields contrast boldly with the frosty devices. No mentionable distractions are evident and eye appeal is terrific. Population: 17 in 66 (1 in 66+) Cameo, 22 finer (8/15).
From The Stephen A. Walling Collection. NGC ID# 23D9, PCGS# 84781

**1884 Seated Dime, PR67 Cameo
Attractively Toned**

- 3430 1884 PR67 Cameo PCGS. CAC. F-101, R.3.** A boldly struck, deeply contrasted Cameo, this Superb Gem 1884 proof dime yields profound eye appeal that includes lavender-gold toning in the centers and vivid ocean-blue around the borders. A ribbon of blue also crosses the reverse margin from 9 to 6 o'clock. The preservation is outstanding. Population: 22 in 67 (1 in 67+) Cameo, 0 finer (7/15). NGC ID# 23D9, PCGS# 84781

- 3431 1888 PR65 Cameo PCGS. CAC. F-101, R.4.** A lovely Gem Cameo, showing deeply mirrored fields and bold design elements. Excessive die polishing appears in the recesses of Liberty's gown but has little effect on the level of detail. Both sides show soft lavender-gold toning, with the obverse also exhibiting a dash of teal-blue along the upper-right border. Population: 14 in 65 Cameo, 12 finer (7/15). NGC ID# 23DD, PCGS# 84785

BARBER DIMES

**1892 Barber Dime, MS67
Beautiful Original Colors**

- 3432 1892 MS67 NGC.** Beautifully iridescent jade-green, antique-gold, and rose toning gravitates to the borders. Faint die clashing can be seen to the right of the portrait. A comparatively liberal supply of Mint State representatives exist of this well-produced first-year issue, but few could compete with the surface quality and color of this sharp Superb Gem. Census: 21 in 67 (2 in 67 ★), 0 finer (8/15).
Ex: Long Beach Signature (Heritage, 2/2000), lot 5491; FUN Signature (Heritage, 1/2005), lot 4001; Long Beach Signature (Heritage, 9/2005), lot 2417. NGC ID# 23DK, PCGS# 4796

- 3433 1898 MS66+ PCGS. CAC.** A loupe reveals this frosty 1898 Barber dime to be virtually pristine, with no discernible abrasions. The strike is bold throughout. The centers show dusky olive-gray toning while the peripheral regions exhibit more vivid rose-gold and sea-green colors. Population: 50 in 66 (9 in 66+), 4 finer (8/15). PCGS# 4815

3434 1898-S MS64 PCGS. CAC. The lightly frosted, strongly lustrous surfaces of this S-mint Barber dime are largely silver-white with elements of peach and ice-blue. Well-struck with excellent eye appeal. The 1898-S is scarce at the MS64 level, and finer pieces are rarely seen. Population: 24 in 64, 18 finer (7/15).
Ex: *Houston Signature (Heritage, 11/2007)*, lot 60440. NGC ID# 23E8, PCGS# 4817

3435 1899-O MS64+ PCGS. CAC. Frosty swirling luster with silver interiors and peach-to-orange elements scattered at the borders. Though a few peripheral areas show design softness, including the knot in the wreath, the central strike is better, and the coin is of unquestionably high quality for the near-Gem range. PCGS has certified 20 finer examples (7/15).
Ex: *ANA Signature (Heritage, 3/2011)*, lot 3383. NGC ID# 23EA, PCGS# 4819

3436 1901-O MS64 PCGS. CAC. The 1901-O Barber dime had a mintage in excess of 5.6 million coins, but remarkably few examples have survived in Mint State. This Choice representative displays satiny luster with just a hint of light champagne toning. The right side of the wreath bow is weak, as is the corresponding point on the obverse portrait above Liberty's brow. The coin is otherwise well-struck and preserved. Population: 15 in 64, 17 finer (7/15). NGC ID# 23EG, PCGS# 4825

3437 1901-S MS64 PCGS Secure. CAC. Similar to its O-mint counterpart, the 1901-S Barber dime is scarce in all Mint State grades. This Choice example is boldly struck, with satiny luster and areas of semiprooflike mirroring in the fields. Near-brilliant centers deepen to amber-gold around the borders. Population: 12 in 64 (1 in 64+), 21 finer (7/15). NGC ID# 23EH, PCGS# 4826

3438 1902-OMS64PCGS.CAC. The 1902-O Barber dime is a scarce issue even though 4.5 million pieces were produced, and is rare above the MS64 grade level. This example exhibits silver-gray surfaces visited by touches of tan-gold. Minute marks on Liberty's cheek and neck limit the grade. Population: 29 in 64 (1 in 64+), 9 finer (7/15).
Ex: *Central States Signature (Heritage, 5/2005)*, lot 6638. NGC ID# 23EK, PCGS# 4828

3439 1902-O MS64 PCGS. CAC. An especially pleasing coin for the grade, this 1902-O Barber dime is well-struck and free of hazardous abrasions. A light olive-gold hue accents each side, with hints of mint and pale rose appearing when tilted beneath a light. Population: 30 in 64 (1 in 64+), 9 finer (8/15). NGC ID# 23EK, PCGS# 4828

3440 1905 MS66 PCGS. CAC. A mintage in excess of 14.5 million may not suggest it, but the 1905 Barber dime is one of the more challenging Philadelphia issues in the series, and examples are very rare in MS66. This fully struck piece is richly patinated with rainbow toning at the margins that yields to lighter centers. Population: 7 in 66 (1 in 66+), 4 finer (7/15). NGC ID# 24FX, PCGS# 4835

1907-O Barber Dime, MS66+ Original Toning

3441 1907-O MS66+ PCGS. CAC. This is a high-end Premium Gem example of the 1907-O Barber dime, a true condition rarity. The design elements are well-struck, illuminated by satiny luster. Each side shows a blanket of champagne toning with intermingled overtones of forest-green, russet, olive, and amber-red. Population: 17 in 66 (3 in 66+), 2 finer (8/15). NGC ID# 23F5, PCGS# 4844

3442 1911 MS66+ PCGS. CAC. The availability of this Philadelphia issue declines significantly at the MS66 grade level, and finer pieces are rarely seen. This coin is boldly struck and exhibits a tremendous degree of eye appeal, fueled by vibrant, frosty luster and outstanding preservation. Traces of light golden toning are almost unnoticed at first glance. There are 24 finer coins at PCGS (7/15). NGC ID# 23FJ, PCGS# 4857

1911-S Dime, Superb MS67

3443 1911-S MS67 PCGS. CAC. The rarity of Superb Gem 1911-S Barber dimes defies the availability of lower-grade examples, with these few finest-knowns being highly sought-after by Registry competitors. This piece is boldly struck with frosty luster. The peripheries show ocean-blue and amber-orange toning, the interiors lighter gold. Population: 9 in 67 (1 in 67+), 0 finer (8/15). NGC ID# 23FL, PCGS# 4859

PROOF BARBER DIMES

3444 1892 PR65 NGC. This introductory proof issue in the Barber dollar series has a mintage of 1,245 specimens. Deeply mirrored fields flash beneath mottled ice-blue, mint-green, and golden-amber patina. Every design feature is fully brought up, as one would expect of a proof. Good for type. NGC ID# 23G3, PCGS# 4875

3445 1892 PR66 PCGS. CAC. This high-end first-year proof has tremendous appeal as a Barber type coin. The strike is full and there is modest contrast on each side, despite a blanket of attractive rose, gold, and sea-green toning. A squiggly strike-through appears in front of Liberty's eye, and there is a thin, mint-made line across the cheek. Population: 38 in 66 (1 in 66+), 12 finer (7/15). NGC ID# 23G3, PCGS# 4875

3446 1893 PR66 Cameo PCGS. Tack-sharp motifs rise above fully mirrored fields on this Premium Gem proof Cameo. The centers are brilliant, while the margins display ocean-blue, mint-gold, and violet hues. The patina heightens the cameo contrast on the obverse. Population: 24 in 66 (1 in 66+) Cameo, 10 finer (8/15). NGC ID# 23G4, PCGS# 84877

3447 1895 PR66 Cameo NGC. Lush, attractive toning in shades of heather, ice-blue, amber, and magenta graces each side. Good device contrast with the shiny fields confirms the Cameo designation. A few contact marks on the cheek prevent an even higher grade. Census: 17 in 66 Cameo (1 in 66+ Cameo), 20 finer (8/15).
Ex: *Dallas Signature (Heritage, 10/2006)*, lot 771. NGC ID# 23G8, PCGS# 84879

1898 Barber Dime, PR67 Cameo
Visually Captivating and Conditionally Scarce

- 3448 1898 PR67 Cameo PCGS.** Although not as rare as the later proof issues from this series in Cameo condition, the 1898 is definitely scarce at the PR67 grade tier with Cameo surfaces, and rare any finer. This is a beautifully contrasted example with pinpoint strike definition and deep watery reflectivity in the fields. An essentially perfect, visually captivating Superb Gem proof. Population: 10 in 67 (1 in 67+) Cameo, 4 finer (8/15). NGC ID# 26KV, PCGS# 84882

1900 Barber Dime, PR67
Richly Toned, Conditionally Rare

- 3449 1900 PR67 PCGS.** A deep blanket of lavender-green patina covers each side of this infrequently encountered Superb Gem example. The motifs are struck with razor-sharp precision. When the piece is rotated beneath a lamp, the toning turns to lighter iridescent hues of apple-green, blue, and pastel-violet. A virtually perfect, conditionally rare specimen. Population: 11 in 67 (1 in 67+), 1 finer (8/15). NGC ID# 23GD, PCGS# 4884
- 3450 1901 PR66 PCGS.** Apple-green, fire-red, peach-gold, and stone-gray endow this precisely struck and flashy Premium Gem. A desirable representative of the proof production of 813 pieces. Encapsulated in a first generation holder. NGC ID# 23GE, PCGS# 4885
- 3451 1907 PR65 PCGS. CAC.** The obverse shows only a hint of peripheral gold toning, but the reverse is attractively patinated forest-green and plum-red. Nicely mirrored and fully struck. Only 575 proofs were issued. Encapsulated in an old green label holder. NGC ID# 23GM, PCGS# 4891
- 3452 1908 PR67 NGC.** Only 545 proof Barber dimes were struck in 1908. This spectacular Superb Gem displays razor-sharp definition on all design elements and deeply reflective fields that are blanketed in attractive shades of coppery-gold and cerulean-blue toning. Census: 18 in 67, 4 finer (8/15). NGC ID# 23GN, PCGS# 4892
- 3453 1908 PR65 Cameo PCGS. CAC.** Wisps of lavender accent a blush of champagne toning on each side of this Gem proof Cameo, a conditionally rare coin with such starkly contrasted devices. The strike is sharp and the fields are impressively reflective. Population: 3 in 65 Cameo, 13 finer (8/15). NGC ID# 23GN, PCGS# 84892

- 3454 1911 PR65 PCGS.** This is a boldly struck, well-preserved proof Barber type coin. A melange of deep multicolor hues in the fields enhances the field-device contrast, although the effect does not receive a Cameo designation from PCGS. Eye appeal is excellent. Population: 25 in 65, 43 finer (8/15). NGC ID# 23GS, PCGS# 4895

- 3455 1912 PR65 PCGS.** A razor-sharp almond-gold specimen with glassy fields and a hint of cameo frost on the portrait and wreath. Certified in an old green label holder. A mere 700 pieces were struck. NGC ID# 23GT, PCGS# 4896

- 3456 1913 PR65 NGC.** From a proof mintage of only 622 pieces, this Gem 1913 Barber dime displays modest field-motif contrast with deeply mirrored recesses and just a whisper of light golden toning overall. A few faint hairlines in the fields are all that preclude an even finer grade. Census: 21 in 65, 29 finer (8/15). NGC ID# 23GU, PCGS# 4897

MERCURY DIMES

- 3457 1916-D — Cleaned — ANACS. Fine 15 Details.** The main design elements are clear on this midlevel 1916-D Mercury dime, with a clear date a mintmark. Battleship-gray surfaces show an area of deeper plum color over the left obverse field. Light cleaning and scattered marks are detected with a loupe. NGC ID# 23GY, PCGS# 4906

- 3458 1918-D MS66 PCGS. CAC.** Sharply detailed in most areas, this delightful Premium Gem shows a trace of softness on the middle bands of the fasces. The flawless brilliant surfaces radiate vibrant mint luster and eye appeal is tremendous. Population: 10 in 66, 1 finer (8/15). NGC ID# 23H6, PCGS# 4918

- 3459 1918-S MS66 PCGS.** Pinkish-silver surfaces show glints of olive-green toning along the upper borders on each side. Liberty's hair and the central bands are mostly indistinct, while the motto is similarly incomplete — a consequence of widely spaced dies used to minimize resource consumption at the California mint. Population: 20 in 66 (2 in 66+), 1 finer (7/15). NGC ID# 23H7, PCGS# 4920

- 3460 1921 MS62 Full Bands PCGS.** The brilliant surfaces of this attractive MS62 example show a minimum number of contact marks for the grade, with vibrant mint luster and well-detailed design elements. Full Bands definition is evident on the fasces. NGC ID# 23HE, PCGS# 4935

- 3461 1923 MS67 Full Bands PCGS. CAC.** The Registry Set collector will appreciate the Superb Gem ranking of this 1923 Full Bands Mercury dime, which shows pristine, satiny luster with a blend of pale champagne and ice-blue toning. The horizontal and diagonal bands are sharply defined. Population: 74 in 67 (1 in 67+) Full Bands, 4 finer (8/15). NGC ID# 23HG, PCGS# 4939

1925-D Mercury Dime, MS65 Full Bands
Sharp Interiors

- 3462 1925-D MS65 Full Bands PCGS.** Gem Full Bands examples of this Denver issue are scarce, and finer pieces are rare. This coin is weakly struck around the outer edge of the peripheral legends, but the interior motifs are bold — this is characteristic of many Denver issues from the 1920s. This piece shows soft, satiny luster and golden toning, without any bothersome abrasions. Population: 34 in 65 (1 in 65+) Full Bands, 29 finer (8/15). NGC ID# 23HN, PCGS# 4951

3463 1925-S MS64 Full Bands PCGS. The scarcity of the 1925-S dime in Gem Full Bands condition heightens demand for high-end Choice examples. This boldly rendered coin displays glowing mint luster with just a hint of golden toning. A curving planchet irregularity on Liberty's cheek should not be mistaken for an abrasion, of which there are none noticeable. Both the horizontal and diagonal bands are well-defined. NGC ID# 5LX3, PCGS# 4953

3464 1928-D MS64 Full Bands NGC. Rose-gray and bluish accents enliven the surfaces of this lustrous and well-struck Denver dime. An affordable and attractive acquisition at this grade level, this piece shows bold detail on all reverse details. Census: 50 in 64 Full Bands, 37 finer (8/15). NGC ID# 23HY, PCGS# 4969

1931-S Dime, MS66 Full Bands Elusive in this Condition

3465 1931-S MS66 Full Bands NGC. This San Francisco issue is a fairly challenging date in Full Bands grades, particularly above the Gem level. The present MS66 Full Bands example is boldly rendered, with frosty luster that shows just a blush of light champagne toning. No significant abrasions interrupt the eye appeal. Census: 8 in 66 Full Bands, 2 finer (8/15). NGC ID# 23J9, PCGS# 4987

3466 1931-S Doubled Die Obverse, FS-101, MS65 Full Bands PCGS. Slight obverse die doubling is clearest on the date and IN GOD WE TRUST. This Gem example is boldly struck throughout the interior motifs and the peripheral legends. The surfaces exhibit softly frosted luster with traces of gold toning. No major abrasions are present. PCGS# 145444 Base PCGS# 4987

1935-D Mercury Dime, MS67 Full Bands None Finer at PCGS

3467 1935-D MS67 Full Bands PCGS. A sharply detailed Superb Gem, with Full Bands definition on the fasces, few examples can match the technical quality and eye appeal of this delightful specimen. Vibrant mint luster shines through shades of sea-green and magenta toning and the surfaces are impeccably preserved. Population: 29 in 67 Full Bands, 0 finer (7/15). NGC ID# 23JD, PCGS# 4995

3468 1939-S MS67 Full Bands PCGS. Cartwheel luster swirls over the entirely brilliant surfaces of this fully struck Superb Gem with complete band separation. This is the one finest examples available to Registry collectors, as PCGS reports only a single MS68 Full Bands coin. Population: 43 in 67 (3 in 67+) Full Bands, 1 finer (7/15). NGC ID# 23JT, PCGS# 5021

3469 1941-S Large S, FS-511, MS66 PCGS. Also known as the Trumpet Tail S, the Large S is much scarcer on 1941-S dimes than the usually encountered Small S. The present lustrous and lightly toned Premium Gem has smooth surfaces and minor incompleteness of strike at the centers and left borders. NGC ID# 23JZ, PCGS# 145469 Base PCGS# 5032

1945 Mercury Dime, MS63 Full Bands Elusive This Sharp

3470 1945 MS63 Full Bands PCGS. This Philadelphia issue is surprisingly scarce with Full Bands definition, and even lower-end Uncirculated coins bring a strong premium. This Select example is boldly struck on the horizontal and diagonal bands, and displays satiny golden-toned luster. A few light abrasions do not detract. NGC ID# 5A98, PCGS# 5057

PROOF MERCURY DIMES

3471 1936 PR66 PCGS. CAC. A gleaming Premium Gem from a mintage of 4,130 pieces, this coin is fully struck, with well-preserved brilliant surfaces and incredible visual appeal. PCGS has graded 65 numerically finer examples (8/15). NGC ID# 27DG, PCGS# 5071

3472 1938 PR68 NGC. Peripheral multicolored toning and predictably razor-sharp devices stand out on this proof. Immaculately preserved, as expected of the grade. Census: 43 in 68 (4 in 68 ★), 1 finer (8/15).

Ex: FUN Signature (Heritage, 1/2015), lot 3920. NGC ID# 27DJ, PCGS# 5073

1941 Mercury Dime, PR68 None Finer at Either Service

3473 1941 PR68 PCGS. CAC. A remarkably preserved Superb Gem proof, set apart from all others by a ring of fire-orange toning on the glittering obverse. The reverse displays lightly patinated fields — slightly iridescent at the margins — and a fully struck at the central motif. The silver-mirrored surfaces show the deepest imaginable mirrors on both sides, while the devices are pristine and fully brought up. There are no marks or even minor imperfections to mention. A Registry Set contender of the finest ilk. Population: 22 in 68, 0 finer (8/15). NGC ID# 27DM, PCGS# 5076

3474 1942 PR68 PCGS. A tack-sharp, brilliant proof type coin, showing full detail and a seemingly infinite depth of mirroring in the fields. The reverse shows modest cameo contrast, but the obverse shows slightly less of an affect. Population: 67 in 68 (2 in 68+), 1 finer (8/15). NGC ID# 27DN, PCGS# 5077

3475 1942 PR68 NGC. An attractively toned PR68 example, this coin sports shades of yellow, gold, and red, with a few tiny splashes of green present, as well. Pleasing luster adds to the eye appeal. The obverse displays a few tiny flyspecks. NGC ID# 27DN, PCGS# 5077

- 3476 1942 PR68 NGC.** A bold, gleaming example of this final proof issue in the Mercury dime series. The central regions show just a hint of champagne toning, while the peripheries exhibit more vivid amber-red, forest-green, and lavender hues. Census: 145 in 68 (2 in 68+, 13 in 68 ★), 2 finer (7/15). NGC ID# 27DN, PCGS# 5077
- 3477 1942 PR68+ NGC.** Just a brush away from perfection, this high-end PR68 type coin trails only two coins at NGC for finest certified (8/15). The design elements are beautifully full and the gleaming mirrors exhibit just a hint of light golden color. NGC ID# 27DN, PCGS# 5077
- 3478 1942 PR68 NGC. CAC.** Pale pink-champagne patina graces each side of this immaculate and highly reflective Superb Gem proof, a beautiful and mark-free coin. NGC has seen only two pieces finer (8/15). NGC ID# 27DN, PCGS# 5077
- 3479 1942 PR68 PCGS. CAC.** A brilliant, deep-mirrored proof with exquisite, iridescent rainbow colors surrounding glittering, razor-sharp central elements. Both sides are equally complex and compelling in their coloration over the glassy, unmarked surfaces. While only a few examples of the 22,239 proofs struck approach this level of beauty and preservation, it is doubtful many can claim an edge in eye appeal over this spectacular Superb Gem. Population: 67 in 68 (2 in 68+), 1 finer (8/15). NGC ID# 27DN, PCGS# 5077
- 3480 1942 PR66 Cameo NGC.** Ex: Highland Collection. The all-brilliant finish used on proof coins of this era seldom produced cameo examples, but the sharply detailed, frosty design elements of this impressive Premium Gem show definite elements of contrast with the deeply mirrored fields. Census: 5 in 66 Cameo, 4 finer (8/15). NGC ID# 27DN, PCGS# 85077

ROOSEVELT DIMES

- 3481 1948-S MS68 PCGS.** The virtually perfect surfaces of this magnificent Roosevelt dime are blanketed in vivid shades of violet and golden-brown toning, with vibrant mint luster underneath. Housed in a green label holder. Population: 2 in 68, 0 finer (7/15). NGC ID# 23KT, PCGS# 5090
- 3482 1949-D MS68 PCGS.** A Registry Set candidate, among the finest certified of the date. This Superb Gem 1949-D Roosevelt dime displays intense, frosty luster. The interiors are graced by just a hint of ice-blue and pale lavender color, while the peripheries — especially the obverse — display deep sun-gold, crimson, and forest-green hues. Population: 8 in 68, 0 finer (8/15). NGC ID# 23KV, PCGS# 5092
- 3483 1955 MS67 Full Bands PCGS.** An overall pale, ivory-gold patina adds a stately glow to the fully struck and unmarked surfaces of this Superb Gem dime. A conditionally rare Roosevelt ten cent, the present coin is supremely lustrous and intricately detailed throughout. Registry Set ready and a serious candidate by all the criteria. Population: 7 in 67 (1 in 67+) Full Bands, 0 finer (8/15). NGC ID# 23LE, PCGS# 85109
- 3484 1955-S MS67 Full Bands PCGS.** Fifty years have passed since the San Francisco Mint produced its last business strike Roosevelt dime. A mintage of 18.5 million pieces was delivered, yet a mere eight pieces vie for the top spot of PCGS-graded Superb Gems with Full Bands. This brilliant and entirely untuned example is a splendid Registry Set opportunity. Population: 8 in 67 Full Bands, 0 finer (8/15). NGC ID# 23LG, PCGS# 85111

TWENTY CENT PIECES

- 3485 1875-CC MS62 PCGS. BF-2, R.1.** Blue-green and dove-gray toning embraces this coruscating Carson City type coin. The borders are well struck although the centers show minor blending. A lens is required to locate minor surface imperfections. NGC ID# 23R6, PCGS# 5297

- 3486 1875-CC MS62 PCGS.** The 1875-CC twenty cent piece is the only collectible issue of this short-lived odd denomination from the Carson City Mint. This well-detailed MS62 example displays slightly subdued mint luster and lightly marked surfaces under delicate shades of lavender toning. NGC ID# 23R6, PCGS# 5297
- 3487 1875-S MS63 PCGS. BF-9, R.2.** A lustrous silver-gray Select type coin. The strike is generally sharp, and the scattered minor field grazes are unimportant relative to the third party grade. BF-9 is identified by its die chip or possible misplaced date digit on the dentils below the 8 in the date.
From The Stephen A. Walling Collection. NGC ID# 23R7, PCGS# 5298
- 3488 1875-S MS64 PCGS. BF-13, R.2.** The top of an 8 is misplaced in the dentils beneath the left side of the 8 in the date. The reverse exhibits several interesting cracks but lacks breaks. The smooth and coruscating surfaces display dusky straw-gold toning. Encapsulated in an old green label holder. NGC ID# 23R7, PCGS# 5298

1875-S/S Twenty Cent Piece, MS65 'Dollar Sign' Variety

- 3489 1875-S/S Misplaced Date, FS-302, BF-16, R.1, MS65 PCGS. CAC.** A nicely struck silver-gray Gem of the "dollar sign" variety, named for the extra pair of serifs on the repunched mintmark. In addition, the top of a 5 is embedded in the dentils beneath the 7 in the date. The fields show only incidental contact.
Ex: Long Beach Signature (Heritage, 6/2013), lot 3295, which realized \$3,818.75. NGC ID# 23R7, PCGS# 145009 Base PCGS# 5298

PROOF TWENTY CENT PIECE

1878 Twenty Cent Piece AU Sharpness

- 3490 1878 — Cleaning — PCGS Genuine. Proof, AU Details. BF-1, R.3.** This dusky cream-gray proof-only example shows little if any actual wear from circulation, but the fields are subdued and hairlined. The strike is sharp, and visible marks are confined to a tiny rim nick on the reverse at 12:30. Both sides exhibit a partial wire rim. NGC ID# 27H5, PCGS# 5306

EARLY QUARTERS

- 3491 1804 B-1, R.3 — Plugged — PCGS Genuine. VG Details.** Tompkins Die State 1/1. Plugged, and re-engraved with considerable skill, near the R in LIBERTY and opposite on the tail feathers. This slate-gray key date quarter has been cleaned and shows smoothing on the obverse field near star 4. Well defined for the VG level with nearly fully separated shield lines. NGC ID# 379C, PCGS# 38921 Base PCGS# 5312

1805 B-2 Quarter, XF40 Challenging Die Pair

- 3492 1805 B-2, R.2, XF40 NGC.** Tompkins Die State 2/2. Double die clashing on the reverse and weakness at R in LIBERTY confirm the die stage. Mottled iridescent colors cover both sides of this moderately circulated early quarter. A trace of mint luster remains in the recesses. The mintage of 121,394 pieces was a big improvement over the meager 1804 production, yet the 1805 date is challenging in terms of quality survivors for collectors. This example shows no major problems with honest wear defining the assigned grade. Census: 6 in 40, 70 finer (8/15). NGC ID# 23RC, PCGS# 38924 Base PCGS# 5313

- 3493 1805 B-3, R.1, VF30 PCGS.** Tompkins Die State 5/2. Many clashes and cracks add to the charm of this midgrade Draped Bust type coin. Lavender fields contrast with stone-gray high points. No abrasions are consequential. NGC ID# 23RC, PCGS# 38925 Base PCGS# 5313

- 3494 1806/5 B-1, R.2, VF25 NGC. CAC.** Tompkins Die State 2/3. A problem-free lavender-gray and tan-brown representative. Devoid of evident abrasions, although the curls exhibit wear commensurate with the VF25 level. One of only three VF25 examples certified by CAC. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

1806 Quarter, Pleasing XF40 Preferred Collector Grade, B-3

- 3495 1806 B-3, R.1, XF40 NGC. CAC.** Tompkins Die State 2/1. Attractive old-silver patina varies from steel-gray in the fields and at the margins to a golden tan on the high points of the devices. The surfaces are smooth and appealing, with only minor signs of contact. Slight softness on the eagle, shield, and the top-most hair strands is the result of a combination of wear and strike. The diagnostic die scratch exists from the bottom of R in AMERICA to the nearby leaf, while the shield lacks the damage seen on later die states. A CAC-endorsed, collector-grade coin of satisfying quality. NGC ID# 23RD, PCGS# 38929 Base PCGS# 5314

- 3496 1806 B-5, High R.4, VF25 NGC.** Tompkins Die State 4/5. A challenging variety interesting for a horizontal die crack that passes through Liberty's nose. A wheat-gold, apple-green, and dove-gray Draped Bust quarter. No marks are apparent except for a single hair-thin diagonal line on the shield. PCGS# 38931 Base PCGS# 5314

- 3497 1806 B-9, R.1, VF20 NGC.** Tompkins Die State 1/2. The obverse is lightly toned and the reverse is mostly peach-gold, but both borders display ocean-blue patina. A problem-free Draped Bust type coin that shows the usual inexactness of strike on the stars above the eagle's head. NGC ID# 23RD, PCGS# 38935 Base PCGS# 5314

- 3498 1807 B-2, R.3, VF20 NGC.** Light caramel-gold toning visits this nicely detailed and unblemished Draped Bust quarter. The usual die state with a "collar" clash on the bust and a radial crack at 8 o'clock on the reverse. A smooth, problem-free example with considerable appeal for the grade.

Ex: Mid-Winter ANA (Heritage, 2/1984), lot 939, flip included; New York Signature (Heritage, 3/2012), lot 3309.. NGC ID# 23RF, PCGS# 38941 Base PCGS# 5316

- 3499 1807 B-2, R.3, VF35 NGC. CAC.** Tompkins Die State 3/3. Deep cream-gray fields contrast with pearl-white high points. A well defined and lightly abraded collector-grade example. The scarcer of the two 1807 marriages; the 5 in 25 touches the tail feathers instead of the fletchings. NGC ID# 23RF, PCGS# 38941 Base PCGS# 5316

BUST QUARTERS

- 3500 1815 B-1, R.1, XF45 NGC. CAC.** A beautifully patinated Bust quarter. The fields are golden-brown and the margins offer lemon-gold, apple-green, and fire-red shades. A loupe fails to reveal any consequential contact. Luster fills design crevices. NGC ID# 23RG, PCGS# 38942 Base PCGS# 5321

1818/5 B-1 Quarter, AU53 Attractive, Visible Overdate

- 3501 1818/5 B-1, R.2, AU53 NGC. CAC.** One of two overdated varieties for the issue, both sharing the same obverse but with different reverses. The short "C" in the denomination on this Browning-1 example differentiates the die pair from Browning-3. Exceptional album toning and strong surviving mint luster provide great eye appeal, and the underdigit 5 is clearly visible within the top loop of the second 8 in the date. Sharp for the grade, with die clashing and some light abrasions but no significant die cracks that define the later die stages. CAC endorsed. NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323

- 3502 1818 B-2, R.1, XF45 NGC.** Tompkins Die State 3/4. A walnut-brown and stone-gray Choice XF example. Glimmers of luster illuminate the eagle's feathers, and relevant marks are confined to a thin line on the field between stars 4 and 7. NGC ID# 23RH, PCGS# 38943 Base PCGS# 5322

- 3503 1818 B-3, R.3, AU50 NGC.** Tompkins Die State 2/2. Technically an 1818/5 overdate, but in the present die state no hint of an underdigit is evident. Rich gunmetal-gray fields contrast with pearl-white high points. The reverse field is clashed, but no abrasions are readily apparent. NGC ID# 23RH, PCGS# 411648 Base PCGS# 5323

1818 B-4 Quarter, AU58
Original, Attractive Surfaces

- 3504 1818 B-4, R.2, AU58 NGC. CAC.** Tompkins Die State 4/2, where the dramatic “scarface” die crack runs vertically from the drapery, across the neck and cheek, extending upward through the cap to the rim. A second radial die crack near star 13 runs from the bottom rim to the curls. Original olive-gold, blue, and silver-gray toning with faint rose highlights blankets both sides. Soft mint luster shines through. A nearly Mint State coin, CAC endorsed, with light marks on the obverse. A solitary scrape beneath S and O of STATES OF is the sole significant abrasion. NGC ID# 23RH, PCGS# 38945 Base PCGS# 5322

- 3505 1818 B-5, High R.4, XF45 NGC. CAC.** Ocean-blue, golden-brown, and lavender toning encompasses this well defined and better variety Capped Bust quarter. Careful inspection reveals hair-thin field marks near the nose and fletchings. NGC ID# 379H, PCGS# 38946 Base PCGS# 5322

- 3506 1818 B-10, R.3, XF45 NGC.** The lower left serifs of both 1’s in the date are defective and the left scroll end is centered under the upright of D. This Choice XF example is lightly worn and lightly abraded, with highlights of lavender, gray, and amber toning. Census: 3 in 45, 1 finer (8/15). NGC ID# 23RH, PCGS# 38951 Base PCGS# 5322

1819 Quarter Dollar, AU58
Browning-1, Challenging Large 9 Variety

- 3507 1819 Large 9, B-1, Low R.5, AU58 NGC.** The base of the E in UNITED is above both the T and D, while the U is above N at the top. An impressively toned example — somewhat prooflike at the margins — with old-time album toning on display. Concentric rings of amber-gold, ocean-blue, and golden rose-gray cover the surfaces on both sides. The present coin is tied as the second-finest known B-1 coin, trailing only the Eliasberg coin — the sole Uncirculated B-1 quarter — that grades MS64. There are no other Uncirculated examples of the variety, making this impressive near-Mint coin of considerable importance to series specialists. Just a few random, small marks are visible under magnification, while sharp definition remains throughout. Census: 2 in 58, 0 finer (8/15). PCGS# 38956 Base PCGS# 5326

- 3508 1819 Small 9, B-3, R.1, VF35 NGC. CAC.** Tompkins Die State 4/3. Die cracks through star 11 and the first 1 in the date identify the late die state of Browning-3. A tan-brown and powder-blue Choice VF example. Refreshingly devoid of abrasions, and the plumage shows most of its initial detail. NGC ID# 23RK, PCGS# 402646 Base PCGS# 5325

- 3509 1820 Large 0, B-1, R.4 — Stained — NGC Details. AU.** This lightly circulated and better variety Bust quarter displays deep walnut-brown and cobalt-blue toning that conceals an area of smoothing on the left obverse field. The portrait is mildly granular.

- 3510 1820 Large 0, B-2, R.2, XF40 NGC. Gold CAC.** Autumn-brown borders and ocean-blue fields surround dove-gray devices. Liberty’s curls display light wear, but luster glimmers from design recesses. There are no noticeable marks, and the eye appeal is attractive. NGC ID# 379N, PCGS# 38961 Base PCGS# 5329

1820 Large 0 Quarter, B-2, AU55
Good Remaining Luster, Nicely Toned

- 3511 1820 Large 0, B-2, R.2, AU55 PCGS.** The more available of the two Large 0 varieties. Luster illuminates the legends, hair, and plumage of this pearl-gray and gunmetal-blue Capped Bust quarter. Nicely struck and impressive. Population: 0 in 55, 0 finer (8/15). Ex: *Chicago Signature (Heritage, 4/2012)*, lot 3929. NGC ID# 379N, PCGS# 38961 Base PCGS# 5329

1820 Large 0 Quarter, Unc Sharpness
B-2, Significant Eye Appeal Remains

- 3512 1820 Large 0, B-2, R.2 — Improperly Cleaned — NGC Details. Unc.** The cleaning was light and apparently long ago, judging from the golden-bronze toning that deepens at the margins on both sides of this Large 0 quarter. Glimpses of luster remain. The Browning-2 variety is an available die pair for the issue, and this technically Uncirculated piece retains its considerable appeal despite the net grade.

- 3513 1820 Small 0, B-4, R.2, AU53 NGC.** Fire-red, cobalt-blue, and cream-gray encompass this lightly circulated and unmarked Capped Bust quarter. The strike shows softness on the claws and left-side stars, but much of the design is well impressed. NGC ID# 23RL, PCGS# 38958 Base PCGS# 5328

- 3514 1821 B-2, High R.4, XF45 NGC.** Iridescent plum-red, caramel-gold, and aquamarine toning encompasses this unmarked and moderately circulated quarter. A very scarcer variety, Browning-2 is similar to the more available B-1 but has a small 5 in 25 C. NGC ID# 23RM, PCGS# 38964 Base PCGS# 5331

- 3515 1821 B-3, R.2, AU58 NGC.** Tompkins Die State 2/1. Clashed near Liberty’s ear, and die rust is apparent near the 2 in 25 C. Peripheral sea-green and autumn-brown toning frames stone-white fields and devices. A charming near-Mint example without any consequential contact. Luster shimmers across design elements. NGC ID# 4E8L, PCGS# 38965 Base PCGS# 5331

3516 1821 B-4, R.3, XF40 NGC. Tompkins Die State 4/4. Cracks through star 12 and the first A in AMERICA confirm the late die state. A gunmetal-gray quarter with apple-green and butter-gold undertones. Minimally abraded and attractive for the XF level. NGC ID# 23RM, PCGS# 38966 Base PCGS# 5331

3517 1822 B-1, R.2, VF30 NGC. CAC. Olive-green and cobalt-blue undertones emerge from the minimally marked dove-gray surfaces. A lovely midgrade type representative that exhibits substantial plumage and fully separated shield lines. NGC ID# 4E52, PCGS# 38969 Base PCGS# 5332

**1824/2 B-1 Quarter, Choice VF
Attractive Peripheral Patina**

3518 1824/2 B-1, R.3, VF35 PCGS. CAC. The sole 1824-dated die marriage. The notch and curl of the 2 underdigit are apparent below the base of the 4. The dies are perfect aside from faint clashes near the right (facing) claw. The borders show jade-green and peach-gold toning. The fields and motifs are stone-gray. A lightly abraded and appealing example. NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

**1824/2 B-1 Quarter, VF35
Solid, Original Example**

3519 1824/2 B-1, R.3, VF35 NGC. CAC. Reddish-gray toning with an overall glow of underlying golden luster provides a pleasing backdrop for the moderately worn, minimally marked elements of this overdated quarter. Well-detailed for a Choice VF coin, problem-free and CAC endorsed. Census: 6 in 35, 25 finer (8/15). NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

3520 1825/4/2 B-1, R.5, XF45 NGC. B-1 is the key 1825-dated variety, much scarcer than either B-2 or B-3. All three marriages exhibit underdigits, but B-1 shows prominent remnants of a 2, while the other two varieties show more delicate fragments. The present B-1 quarter has golden-brown centers and deep blue-green borders. No marks are of any significance. NGC ID# 23RS, PCGS# 38974 Base PCGS# 5337

3521 1825/4/(2) B-2, R.2 — Improperly Cleaned — NGC Details. AU. A moderately circulated representative draped in apple-green, stone-gray, and golden-brown toning. There are no consequential abrasions, but the surfaces appear somewhat luminous.

3522 1825/4/(2) B-3, R.3, XF45 NGC. Of the three 1825 — all of which are overdates — the Browning-3 variety shows the most prominent remnants of the underdigit 4, although any clear evidence of the overdated 2 is lost. The surfaces of this Choice XF example are semiprooflike free of any large marks, although a glass reveals microscopic lines in the fields. Golden toning with gunmetal-blue accents covers both sides. Sharp detail remains for the grade, with traces of mint luster still present. PCGS# 38973 Base PCGS# 5336

3523 1825/4/(2) B-3, R.3, XF45 NGC. NGC has certified this specimen as 1825/4/3 on the holder, but the issue is called 1825/4/2 by Steve Tompkins and has been referred to as simply 1825/4 in the past. This Choice XF specimen exhibits light wear on the design elements and the pleasing lavender-gray surfaces show only minor abrasions. PCGS# 38973 Base PCGS# 5336

3524 1828 B-1, R.1, XF40 NGC. CAC. Tompkins Die State 1/1. Rich dove-gray toning embraces unblemished and moderately circulated surfaces. Traces of dirt in design crevices confirm the originality. A quality Capped Bust type coin. NGC ID# 23RV, PCGS# 38976 Base PCGS# 5342

3525 1828 B-4, R.3, XF40 NGC. CAC. Rich cream-gray and walnut-brown toning blankets this moderately circulated early quarter. Traces of dirt in design recesses confirms the originality. No marks are apparent save for a slender line above star 4. NGC ID# 4E5B, PCGS# 38978 Base PCGS# 5342

3526 1831 Small Letters, B-1, R.3, AU58 NGC. This attractive near-Mint example shows just a trace of wear on the design elements and the lightly abraded surfaces are richly toned in shades of greenish-gold and lavender-gray. Census: 5 in 58, 8 finer (8/15). NGC ID# 23RW, PCGS# 38980 Base PCGS# 5348

3527 1831 Small Letters, B-2, R.2, AU58 NGC. Tompkins Die State 1/3. A lovely near-Mint type representative with attractive autumn-gold, powder-blue, and aquamarine peripheral patina. The fields and motifs are brilliant. Nicely struck, and perceptible marks are confined to a single brief line on Liberty's cheek. NGC ID# 23RW, PCGS# 38981 Base PCGS# 5348

3528 1831 Large Letters, B-6, R.3, AU55 PCGS. Light caramel-gold and ice-blue toning adorns this partly lustrous and crisply struck Bust quarter. Thorough rotation reveals minor hairlines, but there are no noticeable abrasions. NGC ID# 23RW, PCGS# 38985 Base PCGS# 5349

3529 1832 B-1, R.1, MS61 PCGS. Apple-green, ruby-red, and golden-brown embrace this well struck and semiprooflike Bust type coin. Minor marks are confined to the left obverse field. The usual die state with rust near the arrowheads and a die crack along the lower right obverse. NGC ID# 23RX, PCGS# 38987 Base PCGS# 5351

3530 1832 B-1, R.1, MS61 NGC. Tompkins Die State 3/3. Light straw-gold toning visits this well struck representative. The fields are moderately abraded, but no marks merit individual description. Only two die marriages known for the date, due to bank preference of the half dollar denomination. NGC ID# 23RX, PCGS# 38987 Base PCGS# 5351

3531 1834 B-1, R.1, AU58 PCGS. Tompkins Die State 3/5. The same Browning marriage as the O Over F variety listed in the *Guide Book and Cherrypickers'*, but a late, lapped die state with repunching no longer apparent. Rich autumn-brown, sea-green, cream-gray, and ruby-red toning blankets this lightly circulated representative. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

3532 1834 O Over F in OF, B-1, FS-901, R.1, AU58 PCGS. CAC. Tompkins Die State 3/5. The die state shows a single bar clash below the ear, and the A in STATES is filled. This popular *Guide Book and Cherrypickers'* variety shows the O in OF punched over an F. The surfaces are draped in golden-gray and olive tones with well-detailed design features and minor marks. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

3533 1834 O Over F in OF, B-1, FS-901, R.1, AU58 NGC. CAC. Tompkins Die State 1/3. The open fields are ocean-blue, while the borders and devices display golden-brown toning. The strike is precise, and a loupe fails to locate any mentionable marks. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

- 3534 1835 B-1, R.1, MS61 NGC.** Gunmetal-blue, chestnut-gold, and stone-gray toning embraces this richly detailed and lightly abraded Capped Bust type coin. Star 6 is repunched, and the lengthy descending crack above the eagle confirms the attribution. NGC ID# 23S2, PCGS# 38997 Base PCGS# 5354

**1835 B-1 Quarter, MS62
Fully Struck and Richly Toned**

- 3535 1835 B-1, R.1, MS62 PCGS.** The spaced-out alignment of the letters in STATES and a long, curving die crack around the eagle from ST in STATES to C in AMERICA verify the B-1 designation. Richly toned in deep-lilac and blue shades, this fully struck example is extremely sharp for the grade. Satiny luster covers both sides. Population: 25 in 62, 41 finer (8/15). NGC ID# 23S2, PCGS# 38997 Base PCGS# 5354

- 3536 1835 B-6, R.2, AU58 NGC.** Peach-gold toning adorns the borders of this fully struck and partly lustrous Borderline Uncirculated quarter. The sole mentionable mark is a faded thin horizontal field line near star 3. The conditionally scarce B-6 shows repunching on star 8 and the O in OF. NGC ID# 4FAG, PCGS# 39002 Base PCGS# 5354

- 3537 1836 B-2, R.2, AU55 NGC. CAC.** Tompkins Die State 7/4. Several lengthy die cracks on both sides allow prompt attribution. A pleasing stone-gray quarter with freckles of deeper gunmetal-blue toning near the rims. Minimally marked, and the strike is crisp except on stars 6 and 7. NGC ID# 23S3, PCGS# 39006 Base PCGS# 5355

- 3538 1837 B-1, R.3, MS61 NGC.** Tompkins Die State 3/2. A brilliant and unworn example without any remotely relevant abrasions. Luster dominates the borders, curls, and eagle. A distinctive variety due to bold cracks above the date and through most of STATES. NGC ID# 4CZX, PCGS# 39010 Base PCGS# 5356

**1837 B-2 Quarter, MS62
Original Toning, Attractive Example**

- 3539 1837 B-2, R.1, MS62 PCGS.** Golden-brown, lilac-gray, and aquamarine embrace this intricately struck and original Capped Bust quarter. Impressively free from abrasions, and luster illuminates the borders and devices. Lightly clashed near the chin and opposite along the left (facing) wing. Population: 21 in 62, 59 finer (7/15). NGC ID# 23S4, PCGS# 39011 Base PCGS# 5356

**1838 Bust Quarter, B-1, MS63
Unblemished and Lustrous**

- 3540 1838 B-1, R.1, MS63 NGC.** The centers are lightly toned, while the margins offer moderate chestnut-gold and steel-gray patina. Sharply struck save for a couple of stars. Well preserved and impressive. The end of the line for the Capped Bust design, replaced that year by Gobrecht's Seated type. Census: 26 in 63, 24 finer (8/15). Ex: *West Palm Beach Signature* (Heritage, 3/2006), lot 567, which realized \$2,760. From *The Stephen A. Walling Collection*. NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357

SEATED QUARTERS

- 3541 1839 No Drapery AU55 PCGS. Briggs 1-A.** Open Claws Reverse. Delicate gold toning visits the peripheries, but this unblemished and briefly circulated early Seated quarter is mostly white. Portions of the motifs are incompletely impressed, but the eye appeal is pleasing. NGC ID# 23SF, PCGS# 5392

- 3542 1840-O No Drapery, Briggs 1-A, MS62 NGC.** Large O. Repunched 8 in the date. Reddish-gold toning visits the peripheries of this otherwise brilliant representative. Unabraded aside from faint lines near stars 4 and 11. Soft luster fills the borders and motifs. The first New Orleans quarter issue, and the only issue of the denomination from the facility without drapery below the raised elbow. Census: 10 in 62, 11 finer (8/15). NGC ID# 23SG, PCGS# 5393

- 3543 1846 MS64 NGC.** Ex: Richmond Collection. A pleasing Mint State example of this conditionally elusive Seated quarter issue. The fields exhibit semiprooflike mirroring and are warmed by a light golden hue. Well-struck with minimal abrasions. Census: 11 in 64 (1 in 64+), 1 finer (7/15). Ex: *Richmond Collection, Part III* (David Lawrence, 3/2005), lot 1416. NGC ID# 4B6Z, PCGS# 5409

- 3544 1849-O VG10 NGC. Briggs 1-A.** Ex: Jules Reiver Collection. Only the L in LIBERTY is not legible, and this unmarked pearl-gray piece retains pleasing detail on the reverse shield. For whatever reason, the New Orleans Mint did not report a mintage for the 1849-O quarter. Presumably, the issue was struck in early 1850, and its production included in the reported 1850-O mintage. Briggs (1991) estimates a mintage of 16,000 pieces. A key date to the No Motto series, most survivors are in VF and lower grades. Census: 2 in 10, 29 finer (7/15). Ex: *Jules Reiver Collection* (Heritage, 1/2006), lot 21118. NGC ID# 23T3, PCGS# 5414

- 3545 1852 MS62 PCGS. Briggs 2-B.** Apple-green, powder-blue, rose-red, and sun-gold adorn the margins of this satiny and well struck representative. Scattered minor field marks determine the grade. A low mintage issue, since Seated coins were worth more than face value in 1852. NGC ID# 23T8, PCGS# 5419

3546 1853 Arrows and Rays MS62 PCGS. An important one-year type coin, this satiny Mint State piece has faint, grade-limiting hairlines on brilliant silver surfaces with a few splashes of deep golden-brown toning. Eye appeal is pleasing for the grade. NGC ID# 23U4, PCGS# 5426

3547 1853 Arrows and Rays MS63 NGC. This single-year type coin exhibits sweeping luster and a sharp strike. Untoned aside from a few obverse gray flecks. Minor field marks are of little import. Both sides display interesting clash marks.

Ex: Palm Beach Signature (Heritage, 3/2005), lot 5565, which realized \$1,495.

From The Stephen A. Walling Collection. NGC ID# 23U4, PCGS# 5426

3548 1854 Arrows MS64 NGC. Light tan-gold toning graces this lustrous and nicely struck two-year type coin. Impressively unabraded, but both fields exhibit shallow mint-made strike-throughs. Despite a sizeable mintage of 12,380,000 pieces, the 1854 is scarce as a near-Gem. Census: 72 in 64, 27 finer (8/15).

Ex: Palm Beach Signature (Heritage, 3/2006), lot 574, which realized \$2,012.50.

From The Stephen A. Walling Collection. NGC ID# 23U6, PCGS# 5432

3549 1857-O MS61 NGC. Briggs-Unlisted. Rich peach-to-pink overtones appear everywhere but the upper left and bottom right reverse, where the color is silver with a hint of blue. Softly swirling luster with few abrasions for the grade assigned. Census: 7 in 61, 11 finer (7/15). NGC ID# 23TF, PCGS# 5443

3550 1859 MS64 NGC. This Choice example is notably sharp, with satiny, near-brilliant luster. Abrasions are minimal, with none worthy of individual mention. The 1859 Seated quarter had a mintage in excess of 1.3 million coins, but high-grade survivors are seldom available. Census: 29 in 64 (1 in 64+), 10 finer (7/15). NGC ID# 23TL, PCGS# 5448

1859 Seated Liberty Quarter, MS65 No Motto Issue in High Grade

3551 1859 MS65 NGC. Briggs 3-C. A luminous example of one of the few No Motto quarter issues to be available in Gem condition, albeit as a rarity. Well-defined all-around, even on those stars typically found weak, this piece has only a few old marks laid over with charming silver-blue, slate, and rose-gray patina. Census: 9 in 65 (1 in 65+), 1 finer (8/15). NGC ID# 23TL, PCGS# 5448

3552 1860-O MS63 PCGS. Briggs 1-A. Pearlescent-white coloration flashes champagne-gold highlights amid generous, satiny mint luster. A well-produced New Orleans issue with few marks, pleasing eye appeal, and only the slightest hint of softness near the upper portion of the obverse stars. Scarce this nice, rare any finer. Population: 21 in 63, 12 finer (7/15).

Ex: Long Beach Signature (Heritage, 9/2005), lot 2652. NGC ID# 23TR, PCGS# 5452

Gem 1861 Quarter Smooth and Lustrous

3553 1861 MS65 PCGS. Type Two Reverse, as usually encountered for this popular Civil War issue. A carefully preserved Gem that provides potent luster and displays only a whisper of almond-gold toning. The strike is sharp except on the upper stars. Population: 39 in 65, 18 finer (8/15).

From The Stephen A. Walling Collection. NGC ID# 23TT, PCGS# 5454

1861 Seated Quarter, MS66 Concentrically Toned

3554 1861 MS66 NGC. The 1861 is the most available Seated Liberty quarter issue from the Civil War period, but the population thins considerably above MS65. This Premium Gem is carefully preserved with satiny luster and displays original olive-gold, aquamarine, and violet hues around warm champagne centers. Liberty's head and stars show crisp detail, while light clash marks appear in the fields on each side of the coin. Census: 11 in 66, 4 finer (7/15). NGC ID# 23TT, PCGS# 5454

3555 1871-S Fine 12 PCGS. Briggs 1-A. The 1871-S Seated quarter had a scant mintage of only 30,900 pieces and is scarce in all grades today. This midgrade example shows pleasing detail for the Fine level, with medium olive-gray patina overall. A problem-free collector-grade coin. Population: 2 in 12, 39 finer (7/15). NGC ID# 23UP, PCGS# 5480

**1874-S Arrows Quarter, MS65
Outstanding Type Coin**

- 3556 1874-S Arrows MS65 NGC. Briggs 1-A.** Forest-green and tobacco-brown toning accompanies the borders, but the fields and motifs are principally brilliant. A crisply struck and thoroughly lustrous Gem that boasts superior eye appeal for the grade. Census: 35 in 65, 29 finer (8/15).
Ex: William Waste Collection (Heritage, 9/2005), lot 2656, which realized \$3,220.
From The Stephen A. Walling Collection. NGC ID# 23VY, PCGS# 5495

1877 Quarter, MS67+

- 3557 1877 MS67+ NGC.** A wisp of gold toning visits this lustrous and fully struck Seated type coin. The reverse is essentially immaculate, and only delicate grazes on the left obverse field decide the grade. An available issue overall, but scarce in the present quality. Census: 40 in 67 (3 in 67+, 5 in 67 ★), 9 finer (8/15). NGC ID# 23V5, PCGS# 5504
- 3558 1879 MS66 PCGS.** A blaze-white, brilliant example from the first of the late-series, low-mintage quarters. Just 13,600 pieces were struck, although sharp-eyed dealers were well aware of the limited mintage and many coins were saved in high grades. This fully struck example is semiprooflike with strong contrast between the reflective fields and frosted devices. Not a whisper of toning exists anywhere on the coin. Only a graze on Liberty's cheek limits this Premium Gem from an even higher grade. Population: 35 in 66 (1 in 66+), 25 finer (7/15). NGC ID# 23VB, PCGS# 5511
- 3559 1889 MS64 PCGS. Briggs 1-A.** A wisp of tan toning visits this lustrous and splendidly preserved Choice quarter. The strike is bold except on star 8. The commercial mintage was only 12,000 pieces, since the Philadelphia Mint was kept busy striking silver dollars that year. NGC ID# 23VM, PCGS# 5522
- 3560 1889 MS65 PCGS.** Primarily known as a low-mintage issue struck at the end of the Seated series, the 1889 is also well-produced. This sharply defined example displays mostly brilliant surfaces with occasional dabs of faint russet patina around the margins.
Ex: FUN Signature (Heritage, 1/2015), lot 4584. NGC ID# 23VM, PCGS# 5522

- 3561 1891 MS66 NGC.** This brilliant final-year Seated type coin is pristine aside from a hair-thin mark through the D in DOL. Only the stars lack a precise strike. Census: 45 in 66 (1 in 66 ★), 14 finer (8/15).
Ex: Orlando FUN Signature (Heritage, 1/2004), lot 5996; Exclusively Internet #24034 (Heritage, 3/2004), lot 13467, which realized \$1,852.65.
From The Stephen A. Walling Collection. NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

- 3562 1859 PR63 PCGS.** Type One Obverse. Type Two Reverse. A razor-sharp Select proof bathed in golden-brown, aquamarine, and gunmetal toning. The moderately mirrored surfaces are attractive for the designated grade. NGC ID# 23WL, PCGS# 5555
- 3563 1867 PR63 Deep Cameo PCGS. Briggs 2-B.** A brilliant and fully struck specimen that demonstrates blatant contrast between icy devices and flashy fields. The obverse field shows scattered minor contact marks. As of (8/15), PCGS has certified just five 1867 proofs as Deep Cameo. NGC ID# 23WY, PCGS# 95566
- 3564 1868 PR65 NGC. Briggs 2-B.** The centers exhibit sun-gold and rose-red, while the peripheries are sea-green. Intricately struck and nicely mirrored with problem-free surfaces. Only 600 proofs were produced. NGC ID# 23WZ, PCGS# 5567

**1871 Quarter, Gem Proof
Iridescent Toning, Old Holder**

- 3565 1871 PR65 NGC. Briggs 1-A.** The orange-gold obverse field cedes to electric-blue and plum-red patina on the periphery and seated Liberty. The reverse is jade-green aside from glimpses of golden-brown. A sharply struck and exemplary Gem of this scarce proof issue. Certified in a pre-hologram holder. NGC ID# 23X4, PCGS# 5570
- 3566 1872 PR65 Cameo PCGS. Briggs 3-C.** Frosty motifs rise above glassy fields. A fully struck and well preserved Gem. Glimpses of peach patina are noted on the obverse margin at 12 and 1 o'clock. From the mintage of 950 proofs, cameos are surprisingly scarce. Population: 10 in 65 Cameo, 7 finer (8/15). NGC ID# 23X5, PCGS# 85571
- 3567 1873 Arrows PR63 PCGS. Briggs 5-D.** Brilliant and fully struck with substantial frost on the devices. The fields are flashy but mildly subdued. A scarce and briefly issued proof subtype. All 1873 Arrows proofs are Briggs 5-D with a die scratch on the reverse left shield border and a tiny rust pit on the crossbar of the 7 in the date. NGC ID# 23XR, PCGS# 5574
- 3568 1875 PR64 PCGS. Briggs 5-F.** The design elements of this attractive 19th century proof show razor-sharp definition throughout, with reflective fields that are blanketed in shades of golden-brown and violet toning. The obverse shows modest cameo contrast. Population: 36 in 64, 14 finer (7/15).
Ex: Long Beach Signature (Heritage, 2/2012), lot 3500. NGC ID# 23X7, PCGS# 5576

3569 1875 PR64 PCGS. Briggs 5-F. Type One Reverse. A fully struck and undisturbed near-Gem that exhibits golden-brown centers and blue-green borders. The proof mintage of 700 pieces was coined using at least three different die pairs. Certified in a first generation holder. NGC ID# 23X7, PCGS# 5576

3570 1876 PR65 PCGS. A nicely contrasted proof, although lacking the Cameo designation by PCGS. The sharply struck, frosted devices share the same gold- and blue-hued toning values as the surrounding mirrored surfaces. Proofs of the year were well-saved by the public as keepsakes of the country's Centennial year. This attractive Gem quarter is notably well-preserved. Population: 22 in 65 (1 in 65+), 15 finer (7/15). NGC ID# 3TWJ, PCGS# 5577

3571 1882 PR64 NGC. Briggs 2-B. A beautifully toned, deep-mirrored proof with a flashy, orange-red obverse paired with multicolor peach, violet, aquamarine, and honey shades on the reverse. Vibrant eye appeal radiates from the near-Gem surfaces, with fully struck motifs and only a few trivial hairlines in the right obverse field. A tiny planchet flaw at 7:30 on the reverse does not distract. NGC ID# 23XE, PCGS# 5583

1883 Seated Liberty Quarter, PR66 Rare Cameo Specimen

3572 1883 PR66 Cameo PCGS. Briggs 1-A. A light overlay of golden toning complements nicely contrasted surfaces on this Premium Gem Cameo proof 1883 Seated quarter, a high-grade survivor from the original production of 1,039 proof coins and 14,400 strikes for circulation. The strike is well-brought up on all the star radials, although the top of Liberty's gown is a tad soft. An appealing example of this late-series date, not easily improved upon. No mentionable contact mars the fabric. Population: 8 in 66 Cameo, 5 finer (8/15). NGC ID# 23XF, PCGS# 85584

1890 Quarter, Brilliant PR65+ Deep Cameo

3573 1890 PR65+ Deep Cameo PCGS. CAC. Gorgeous deep cameo contrast provides this high-end Gem quarter with an exceptional appearance. The coin displays brilliant, untoned surfaces. A few delicate hairlines appear in the right obverse field. Several tiny as-made strike-throughs are present on the reverse. Population: 7 in 65 (1 in 65+) Deep Cameo, 9 finer (8/15). NGC ID# 23XN, PCGS# 95591

1890 Quarter, PR66 Ultra Cameo Starkly Contrasted

3574 1890 PR66 Ultra Cameo NGC. Briggs 3-C. The proof 1890 quarter is rare in Ultra Cameo grades, although most such coins grade in the PR66 to PR67 range. This premium Gem example is fully struck and eye-appealing, with frosty mint luster on the devices and full mirroring in the fields. A hint of light golden toning warms each side, intruding from the rims. Census: 8 in 66 Ultra Cameo (1 in 66+ Ultra Cameo), 15 finer (7/15). NGC ID# 23XN, PCGS# 95591

BARBER QUARTERS

3575 1892 MS65 PCGS. CAC. Type One Reverse. This Gem 1892 quarter is a lovely first-year example of the Barber type. Satiny luster shows pale golden-gray color in the centers but warms to amber and violet around the peripheries. The eagle's right (facing) talons and the clutched arrow fletchings are a trifle soft, but the motifs are otherwise well-defined. NGC ID# 23XT, PCGS# 5601

3576 1892 MS66 PCGS. CAC. FS-801. Type Two Reverse. Light steel-gray toning graces the devices. The fields are golden-brown and cobalt-blue with blushes of lavender-red. Thoroughly lustrous and sharply struck. The reverse peripheral legends are lightly die doubled or tripled. NGC ID# 23XT, PCGS# 5601

3577 1892 MS66 PCGS. CAC. This is a radiant Premium Gem, an ideal Barber type coin. The strike is razor-sharp and the fields reveal a suggestion of prooflike mirroring when tilted beneath a light. Both sides are attractively toned in aquamarine and pale gold hues, with lavender and gray also present around the outer peripheries. PCGS lists 33 finer representatives (8/15). NGC ID# 23XT, PCGS# 5601

3578 1893 MS65 PCGS. CAC. The design elements of this impressive Gem are sharply detailed and some interesting die cracks connect the upper stars on each side. The lustrous surfaces are blanketed in shades of golden-brown and violet toning with outstanding eye appeal. Population: 31 in 65 (1 in 65+), 17 finer (8/15). NGC ID# 23XW, PCGS# 5604

3579 1894-S MS64 PCGS. A sharply detailed Choice example, with well-preserved surfaces under dusky shades of golden-brown, lavender-gray, and amber toning. Population: 58 in 64 (1 in 64+), 22 finer (8/15). NGC ID# 23Y3, PCGS# 5609

3580 1895-S MS64 PCGS. This impressive Choice example is richly toned in shades of lavender-gray and golden-brown, with sharply detailed design elements and frosty mint luster that peaks through gaps in the patina. Population: 17 in 64, 11 finer (8/15). NGC ID# 23Y6, PCGS# 5612

3581 1896-O MS63 NGC. The 1896-O Barber quarter is seldom seen in high grade. This attractive Select example offers sharply detailed design elements and lightly marked lustrous surfaces with a few hints of blue, pink, and golden-tan patina. Census: 6 in 63, 37 finer (8/15). NGC ID# 23Y8, PCGS# 5614

- 3582 1896-S VG10 NGC.** A pleasing VG10 example of this low-mintage key, with about half the letters in LIBERTY still legible and all other lettering and the date still bold. The dove-gray surfaces show no large or distracting abrasions, just honest wear. Census: 9 in 10, 89 finer (8/15). NGC ID# 23Y9, PCGS# 5615

**1897 Barber Quarter, MS66
Deep Peripheral Toning**

- 3583 1897 MS66 PCGS. CAC.** Fully struck throughout, the centers retain good portions of original mint brilliance while the margins are surrounded by deep golden-brown and Prussian-blue toning. A remarkably clean and well-preserved Premium Gem type coin. Population: 19 in 66 (2 in 66+), 4 finer (8/15).

Ex: *FUN Signature* (Heritage, 1/2001), lot 6947; *New York Signature* (Heritage, 11/2003), lot 6225. NGC ID# 23YA, PCGS# 5616

- 3584 1900 MS65 PCGS. CAC.** An attractive Gem specimen of this popular turn-of-the-century date, with well-detailed design elements and intense satiny mint luster, under shades of gray, magenta, and golden-brown toning. Population: 40 in 65, 18 finer (8/15). NGC ID# 23YK, PCGS# 5625

- 3585 1903-S MS65 PCGS. CAC.** The 1903-S Barber quarter is rare in MS65 condition and very rare in finer grades. This delightful Gem displays sharply detailed design elements and well-preserved lustrous surfaces. Population: 16 in 65, 12 finer (8/15). NGC ID# 23YX, PCGS# 5636

1904 Quarter, Lightly Toned MS66

- 3586 1904 MS66 PCGS. CAC.** Contrary to what its mintage of nearly 10 million coins would suggest, the 1904 Barber quarter is rare at the Premium Gem level. This is a common theme that runs throughout the series, making the Barber coinage seem somewhat underappreciated overall. The present coin is lustrous and lightly toned with sun-gold, lilac, and ocean-blue hues. The eagle's right (facing) talons are slightly weak, in contrast to the remainder of the design elements. Population: 10 in 66, 1 finer (8/15). NGC ID# 23YY, PCGS# 5637

1905-S Quarter, Lightly Toned MS64

- 3587 1905-S MS64 PCGS.** The lustrous surfaces of this attractive Choice specimen show only a few scattered, minor contact marks and the design elements are sharply detailed, aside from a touch of the usual softness on the arrow fletching and shield point. Eye appeal is quite strong. This San Francisco issue is seldom seen finer. Population: 33 in 64 (3 in 64+), 16 finer (8/15). NGC ID# 23Z4, PCGS# 5641

- 3588 1906 MS65 PCGS. CAC.** A spectacular Gem specimen, with sharply detailed design elements and vibrant satiny mint luster throughout. A few hints of pink toning are evident on the mostly brilliant surfaces, but no mentionable flaws are present. Population: 47 in 65, 26 finer (8/15). NGC ID# 23Z5, PCGS# 5642

- 3589 1906-O MS65 PCGS. CAC.** Softly lustrous with strong eye appeal for this O-mint issue. Subtle pink, blue, and gold-green toning graces the obverse, while more overt rose and orange patina covers the reverse. Population: 34 in 65, 30 finer (8/15). NGC ID# 23Z7, PCGS# 5644

- 3590 1908 MS65 PCGS. CAC.** An attractive Gem specimen, with well-detailed design elements and satiny mint luster under shades of golden-brown and silver-gray toning. Population: 34 in 65, 23 finer (8/15). NGC ID# 23ZC, PCGS# 5649

- 3591 1908-S MS63 PCGS. CAC.** The 8 in the date is lightly repunched, visible within the tops of the loops. Forest-green, walnut-brown, and cream-gray toning embraces this suitably struck and lustrous Select example. Void of detrimental marks. Population: 18 in 63, 41 finer (8/15). NGC ID# 23ZE, PCGS# 5652

**1909-S Quarter Dollar, MS66
Only Two Finer at PCGS**

- 3592 1909-S MS66 PCGS.** This highly lustrous Premium Gem 1909-S Barber quarter exhibits brilliant silver at the centers of the obverse and reverse, with lovely intermingled gold and lavender toning along the borders. Both sides have bold design motifs. Population: 23 in 66 (6 in 66+), 2 finer (8/15). NGC ID# 23ZK, PCGS# 5656

- 3593 1911-S MS65+ PCGS. CAC.** This high-end Gem offers well-detailed design elements and lustrous, well-preserved surfaces under a blanket of golden-brown, gray, and magenta toning. Population: 34 in 65 (1 in 65+), 52 finer (8/15). NGC ID# 23ZR, PCGS# 5661

- 3594 1912 MS66 PCGS. CAC.** Suitable for type purposes, this Premium Gem 1912 Barber quarter is conditionally rare with unabraded, frosty luster and a blend of lavender-gold, amber, and mint-green toning. The eagle's right (facing) wing junction is a trifle soft, but the strike is otherwise well-executed. Population: 26 in 66 (2 in 66+), 2 finer (8/15). NGC ID# 23ZS, PCGS# 5662
- 3595 1912-S MS65 PCGS. CAC.** Sharply detailed in most areas, this attractive Gem shows a touch of the usual softness on the eagle's claw and arrows. The lustrous surfaces display minimal signs of contact. Population: 19 in 65, 15 finer (8/15). NGC ID# 23ZT, PCGS# 5663
- 3596 1913-S Good 4 PCGS. CAC.** The 1913-S is an in-demand key date with the lowest mintage in the Barber quarter series (40,000 coins). Examples are usually heavily circulated from time spent in West Coast commerce. This lovely problem-free representative has attractive battleship-gray patina. The date and mintmark are bold, as are RIB and UN on the reverse ribbon. NGC ID# 23ZW, PCGS# 5666
- 3597 1913-S VG8 PCGS.** A low-mintage key issue, the 1913-S is prized by collectors in all grades and conditions. This well-worn example shows three letters still legible in LIBERTY and the date and legends remain bold. NGC ID# 23ZW, PCGS# 5666
- 3598 1914-D MS66 PCGS.** The surfaces of this satiny Premium Gem show dusky patina in shades of crimson, russet, violet, blue, and olive with flashes of brilliance at the central reverse. The 1914-D has an unremarkable mintage of 3 million coins, but examples are rarely offered at this grade level. Population: 10 in 66 (1 in 66+), 3 finer (7/15). NGC ID# 23ZY, PCGS# 5668
- 3599 1915-S MS65 PCGS. CAC.** Often beset by bagmarks, the 1915 San Francisco issue is scarce in full MS65 condition. This needle-sharp and lustrous Gem displays primarily brilliant and frost-white surfaces with glimpses of light honey-gold and lime-green accents. The fields and portrait are uncommonly free from contact. Population: 22 in 65, 18 finer (7/15). NGC ID# 2424, PCGS# 5672
- 3600 1916 MS66 PCGS.** Rich amber-gold toning combines with sea-green and blue shades to produce the lovely patination on this lustrous, final-year Barber quarter. A sharp strike on all of the elements gives this coin high marks both on the technical side and for eye appeal. Few coins are graded at this Premium Gem level, and finer examples are nearly unavailable. Population: 30 in 66, 4 finer (8/15). NGC ID# 2425, PCGS# 5673

PROOF BARBER QUARTERS

- 3601 1893 PR65 NGC. CAC.** Aquamarine, rose-red, and butter-gold adorn this razor-sharp Gem. Exemplary preservation ensures outstanding eye appeal. A decidedly lower proof mintage than the introductory 1892 issue. Certified in a prior generation holder. NGC ID# 2428, PCGS# 5679
- 3602 1897 PR65 Cameo NGC.** This is a sparkling Gem with bold black and white contrast between the gleaming fields and thickly frosted devices. Both sides are primarily brilliant, but with small areas of light golden color seen upon close examination.
Ex: FUN Signature (Heritage, 1/2004), lot 6127. NGC ID# 242C, PCGS# 85683
- 3603 1898 PR66 Cameo PCGS.** This gleaming Premium Gem Cameo shows stark white-on-black contrast, with just a suggestion of light golden color throughout. Star 11 lacks full centrils, but the remainder of the design elements are razor-sharp. A few stray lines in the obverse field are all that preclude an even finer grade. Population: 11 in 66 (2 in 66+) Cameo, 22 finer (7/15). NGC ID# 242D, PCGS# 85684

- 3604 1898 PR66 Cameo NGC.** This high-grade proof Barber type coin displays impressive white-on-black cameo contrast. The strike is full and the untoned surfaces appear flawless.
Ex: Exclusively Internet Auction #24032 (Heritage, 3/2004), lot 13326, which realized \$2,472.50.
From The Stephen A. Walling Collection. NGC ID# 242D, PCGS# 85684

1900 Barber Quarter, PR67 Attractive Toning

- 3605 1900 PR67 PCGS.** A rare Superb Gem example of this final 19th century proof quarter, showing razor-sharp detail and deeply mirrored fields. The obverse toning pattern is intriguing, exhibiting midnight-blue and lavender-gray hues in the center with olive-gold, russet, and amber around the periphery. The reverse displays the same colors but in a more dispersed format. Population: 8 in 67, 1 finer (8/15). NGC ID# 43VN, PCGS# 5686

1900 Barber Quarter, PR67 Elusive Cameo Example

- 3606 1900 PR67 Cameo NGC.** Cameo examples of the proof 1900 quarter make up only a small percentage of the surviving population, and such pieces are rare at the Superb Gem grade level. This representative is fully struck, with deep, glassy mirrors. Hints of champagne toning intensify the contrast on both sides. Census: 16 in 67 Cameo (2 in 67 ★ Cameo), 6 finer (8/15). NGC ID# 242F, PCGS# 85686
- 3607 1903 PR65 Cameo PCGS. CAC.** A fully struck Gem proof, showcasing stark cameo contrast beneath just a hint of light golden toning. A few stray lines limit the grade, but none are discernible to the unaided eye. Population: 15 in 65 (1 in 65+) Cameo, 32 finer (7/15). NGC ID# 242J, PCGS# 85689
- 3608 1904 PR66 PCGS.** A beautifully preserved proof with deep mirrors and boldly rendered motifs. Both sides show vivid straw-gold, teal, violet, and ocean-blue toning which precludes a Cameo designation from PCGS. Population: 32 in 66 (1 in 66+), 12 finer (7/15). NGC ID# 242K, PCGS# 5690

**1905 Barber Quarter, PR66
Bold Multicolor Surfaces**

- 3609 1905 PR66 PCGS. CAC.** The vivid, swirling colors on this Premium Gem proof Barber quarter seem to leap off the surfaces toward the viewer. The obverse showcases magnificent sun-gold, violet, pine-green, and ocean-blue hues, while the reverse displays more consistent champagne-gold color with peripheral accents of blue and amber. The strike is bold and close study with a lens fails to reveal any distracting hairlines in the deeply reflective fields. Population: 31 in 66 (1 in 66+), 13 finer (8/15). NGC ID# 242L, PCGS# 5691

- 3610 1906 PR65 NGC.** This proof 1906 quarter boasts full detail and deeply mirrored fields. Original toning blankets both sides in blended aquamarine and rose-gold hues, although the reverse maintains a hint of cameo contrast. Housed in a prior generation holder. NGC ID# 242M, PCGS# 5692

- 3611 1907 PR65 Cameo PCGS.** This near-brilliant Gem proof exhibits stark field-motif contrast and outstanding preservation. The right-hand side of the eagle and several of the corresponding obverse stars are weakly struck. Population: 15 in 65 (1 in 65+) Cameo, 28 finer (7/15). NGC ID# 242N, PCGS# 85693

- 3612 1908 PR65 Cameo PCGS.** The proof 1908 Barber quarter is rare in Cameo grades. This Gem example shows pleasing contrast and just a hint of light golden toning. Minor striking weakness appears on the eagle's right (facing) talons. Population: 5 in 65 Cameo, 4 finer (7/15). NGC ID# 242P, PCGS# 85694

**1910 Quarter, PR67+ Cameo
Bold Toning**

- 3613 1910 PR67+ Cameo NGC.** A high-end Cameo example, this Superb Gem proof 1910 quarter displays creamy-gold toning over much of each side, but with deeper violet, amber, and aquamarine hues in the fields which aid in the cameo contrast. The eagle's right (facing) talons show a touch of the usual weakness, but the remaining design elements are sharp. Census: 23 in 67 Cameo (2 in 67+ Cameo, 2 in 67 ★ Cameo), 11 finer (8/15). NGC ID# 254Y, PCGS# 85696

- 3614 1912 PR64 Cameo PCGS.** A brilliant Choice proof showing stark white-on-black contrast and deeply mirrored fields. There is a touch of weakness on the eagle's right (facing) talons and wing junction, but the overall sharpness of the frosted devices is satisfactory. Population: 15 in 64 (1 in 64+) Cameo, 25 finer (8/15). NGC ID# 242U, PCGS# 85698

- 3615 1913 PR66 Cameo PCGS.** Gleaming fields illuminate subtle lavender-gold toning on each side of this Premium Gem proof Cameo, accentuating the field-device contrast. A touch of the usual striking softness is present on the eagle's right (facing) talons and wing junction. Population: 12 in 66 (2 in 66+) Cameo, 9 finer (7/15). NGC ID# 242V, PCGS# 85699

- 3616 1914 PR65 Cameo PCGS.** Bold design definition and deeply mirrored fields accentuate the stark cameo contrast of this Gem 1914 proof quarter. The coin appears brilliant at first glance, but reveals traces of light golden toning when tilted beneath a light. Population: 7 in 65 (1 in 65+) Cameo, 13 finer (7/15). NGC ID# 242W, PCGS# 85700

STANDING LIBERTY QUARTERS

- 3617 1916 Standing AG3 PCGS Secure. CAC.** Many collectors might turn down this coin in favor of a higher-grade (and significantly more costly) example, but the beginning collector or the specialist on a strict budget will see the appeal of this well-circulated 1916 Standing Liberty quarter. The coin possesses virtually complete rims, despite the AG3 grade, and boasts original battleship-gray patina with deeper hues in the recesses. The date is mostly worn away, which likely contributes to the low grade assessment by PCGS. NGC ID# 43XR, PCGS# 5704

**1917 Type One Quarter, MS66+ Full Head
Attractive Toning**

- 3618 1917 Type One MS66+ Full Head PCGS. CAC.** A bold strike and luminous surfaces deliver excellent eye appeal on this high-end Premium Gem type coin. Both sides exhibit a touch of intermingled colors, including shades of lavender-gray and olive-gold, with deeper amber and bluish hues around the peripheries. Superb Gem examples of this Type One issue are elusive. NGC ID# 242Z, PCGS# 5707

**1917 Type One Quarter, MS67 Full Head
Lightly Toned Type Coin**

- 3619 1917 Type One MS67 Full Head PCGS. CAC.** A bold strike produces intricate detail throughout the relief elements of this Superb Gem Type One quarter. The luster is satiny and free of abrasions. Tinges of amber, olive, and teal toning decorate a pale champagne hue that covers each side of this outstanding coin. Although plentiful in lower grades, this Philadelphia issue is seldom seen in the Superb Gem category. Population: 78 in 67 (4 in 67+) Full Head, 0 finer (8/15). NGC ID# 242Z, PCGS# 5707

3620 1917-D Type One MS65 Full Head NGC. A sharply detailed Gem representative of this short-lived design type, with Full Head definition and complete shield rivets. The well-preserved surfaces display vibrant mint luster throughout. NGC ID# 2432, PCGS# 5709

3621 1917-D Type One MS66 Full Head PCGS. This sharp, satiny Premium Gem exhibits consistent nickel-gray toning, with tinges of olive, gold, and russet in the protected regions. This is about as fine as the 1917-D Type One is usually available with Full Head detail, as PCGS rates only 22 such coins numerically higher (8/15). NGC ID# 2432, PCGS# 5709

3622 1917-D Type One MS66 Full Head PCGS. CAC. A nearly unimprovable Type One coin, this piece shows bold detail on Liberty's head, the rivets, shield lines, and leading edge feathers. Golden rim toning encircles lightly patinated centers on the obverse, while the reverse shows a layer of gorgeous violet, rose, and russet coloration. PCGS reports 22 Full Head coins finer (7/15). NGC ID# 2432, PCGS# 5709

3623 1917-S Type One MS66 PCGS. Well-struck in most areas, but a trifle soft on Liberty's temple and on the upper portion of the date numerals. The surfaces are satiny and unabraded, showing a blush of light golden toning. Population: 19 in 66, 2 finer (8/15). NGC ID# 2433, PCGS# 5710

1917-S Type One Quarter, MS66 Full Head Bold Interior Devices

3624 1917-S Type One MS66 Full Head NGC. The scarcest of the three 1917 Type One issues in top grades despite a slightly higher production than its D-mint counterpart. This grainy-textured, intricately detailed Premium Gem is almost totally void of contact marks and has a slight pinkish-gray tint about the obverse margin. Census: 64 in 66 (1 in 66+ Full Head, 1 in 66 ★).
Ex: *Baltimore Signature* (Heritage, 7/2003), lot 7080. NGC ID# 2433, PCGS# 5711

3625 1917 Type Two MS66 Full Head PCGS. This well-struck Premium Gem displays frosty mint luster shining through lovely champagne toning on each side. Liberty's head is notably well-defined. Close inspection with a loupe reveals strong clash marks in the recesses of the obverse. Population: 80 in 66 (4 in 66+) Full Head, 11 finer (8/15). NGC ID# 2434, PCGS# 5715

3626 1917-D Type Two MS65 PCGS. The Type Two 1917-D quarter is a scarce issue with a sharp strike, but Gem examples are elusive with or without a Full Head. This piece displays frosty luster and pastel toning over the interiors, with deeper russet, olive, and amber-red hues around the outer peripheries. Liberty's head is soft, but the stars and shield show better than average definition. Population: 44 in 65 (1 in 65+), 23 finer (8/15). NGC ID# 3TWS, PCGS# 5716

1917-D Type Two Quarter, MS65 Full Head Seldom Seen Sharply Struck

3627 1917-D Type Two MS65 Full Head NGC. The Type Two 1917-D quarter is an elusive coin with Full Head detail, particularly in high grade. This is a satiny, near-brilliant Gem. The date, stars, and shield lines are razor-sharp, and the rivets and central gown lines are nearly as well defined. Liberty's head shows adequate sharpness. Census: 30 in 65 (1 in 65+) Full Head, 7 finer (8/15). NGC ID# 2435, PCGS# 5717

3628 1920 MS65 Full Head PCGS. CAC. Rich powder-blue and almond-gold toning encompasses this thoroughly lustrous Gem. Lustrous and well preserved with a consistent strike and imposing eye appeal. Housed in a first generation holder. NGC ID# 243E, PCGS# 5735

3629 1921 — Improperly Cleaned — NGC Details. Unc. A lustrous pearl-white representative. The sprig on Liberty's head is lightly brought up, but the overall strike is good. No marks or hairlines are readily apparent. A lower mintage date, due to the large-scale silver dollar coinage that year. NGC ID# 243H, PCGS# 5740

3630 1923-S — Improperly Cleaned — NGC Details. AU. This stone-gray semikey quarter exhibits parallel hairlines but retains ample luster. Field marks are confined to a faded field line above the eagle's tail. The center of Liberty's head shows moderate softness. NGC ID# 243K, PCGS# 5744

3631 1923-S — Improperly Cleaned — NGC Details. Unc. Although hairlined from an old cleaning, this key-date Standing Liberty quarter possesses an uncommonly sharp strike. Full head detail, a bold date, sharp toes, and well-defined stars are immediately apparent. The shield rivets are a trifle weak, but show above-average definition. The eagle is crisp. A remarkably pleasing coin for a Details-graded piece, retaining hints of luster beneath pewter-gray patina. NGC ID# 243K, PCGS# 5744

3632 1924 MS67+ NGC. The 1924 Standing Liberty quarter is a fairly plentiful issue overall, but the certified population thins considerably in MS66 or finer grades, with or without a Full Head designation. This stellar non-Full Head coin is beautifully preserved, with satiny luster shining through original champagne-gold toning that shows deeper olive, russet, and amber hues around the obverse margins. The stars and eagle's feathers are well-defined, as are the obverse shield rivets. Liberty's head is a touch weak at the temple, as usual. Census: 20 in 67 (3 in 67+), 5 finer (8/15). NGC ID# 3TWY, PCGS# 5746

3633 1924-D MS67 NGC. Ex: The Renaissance Era. The pristine surfaces of this spectacular Superb Gem display shades of golden-brown, violet, and amber toning, with most of the color on the reverse. The design elements are well-detailed and vibrant mint luster shines through the patina. Census: 43 in 67 (1 in 67+, 5 in 67 ★), 2 finer (8/15). NGC ID# 243M, PCGS# 5748

3634 1924-D MS64 Full Head PCGS. As the 1924-D is one of the more difficult dates in the Standing Liberty quarter series to find with Full Head detail, the sharpness of this Choice example is truly remarkable. The bold strike is in evidence on Liberty's head, the shield, and the leading edge of the eagle's right (facing) wing, all areas that are typically deficient on this Denver issue. The coin is essentially untuned and satiny. NGC ID# 243M, PCGS# 5749

3635 1924-S MS64 PCGS. The date and stars are uncommonly bold on this Choice 1924-S quarter, and Liberty's head shows above-average definition, lacking just slightly at the cheek. Minimally abraded, with satiny, gold-tinted luster. NGC ID# 243N, PCGS# 5750

3636 1927 MS66 Full Head PCGS. The 1927 is available in the Full Head category, but in Premium Gem condition it falls far behind the 1929 and 1930 issues in availability. This piece displays a sharp Full Head with above-average definition also on the shield rivets and stars. Satiny luster exhibits varying degrees of olive-gold toning in a woodgrain pattern. Population: 55 in 66 (4 in 66+) Full Head, 5 finer (7/15). NGC ID# 243U, PCGS# 5761

3637 1927-S XF45 PCGS. CAC. This key San Francisco issue is seen with frequency in VG and lower grades, but seldom comes available in the VF-XF range. This Choice XF example is well-detailed and displays original pewter-gray color. The level of definition remaining in the shield rivets even after brief circulation suggests an above-average strike was originally apparent. NGC ID# 243W, PCGS# 5764

3638 1927-S AU53 PCGS. CAC. A pleasing AU53 example of this low-mintage key, with light wear on the well-detailed design elements and lightly abraded surfaces, under shades of greenish-gold, lavender-gray, and amber toning. NGC ID# 243W, PCGS# 5764

3639 1928 MS66 Full Head NGC. This delightful Premium Gem exhibits a better-than-average strike, with a little softness on the shield rivets, but full definition on Liberty's head. The pristine surfaces radiate vibrant mint luster and show a few hints of lavender and amber toning. Census: 15 in 66 Full Head, 13 finer (8/15). NGC ID# 243X, PCGS# 5767

1928 Standing Liberty Quarter, MS66 Full Head Definition

3640 1928 MS66 Full Head PCGS. This spectacular Premium Gem displays sharply detailed design elements, with full definition on Liberty's head and just a touch of softness on a few shield rivets. The well-preserved brilliant surfaces radiate vibrant mint luster. Population: 49 in 66 (5 in 66+) Full Head, 7 finer (8/15). NGC ID# 243X, PCGS# 5767

3641 1929 MS66 Full Head PCGS. CAC. This delightful Premium Gem offers sharply detailed design elements, with full definition on Liberty's head and nearly complete shield rivets. The well-preserved lustrous surfaces display a few hints of champagne-gold and lavender toning. PCGS has graded seven numerically finer examples (8/15). NGC ID# 2442, PCGS# 5773

1929-S Quarter, Superb MS67+ The Sole Finest at PCGS

3642 1929-S MS67+ PCGS. CAC. This is the single finest non-Full Head 1929-S Standing Liberty quarter at PCGS, being the only one of just 12 Superb Gems with a Plus designation (7/15). Intense, frosty mint bloom glows on each side while the surfaces are virtually as-struck. Nearly complete head detail is a standout attribute, even amid the brilliant, eye-catching luster. NGC ID# 2444, PCGS# 5776

WASHINGTON QUARTERS

3643 1932-S MS64 PCGS. This is a frosty, well-struck example of this key San Francisco issue. Light champagne hues blanket the interiors, leaving tinges of deeper olive and amber around the peripheries. Remarkably few abrasions are present for the Choice grade level. NGC ID# 2449, PCGS# 5792

1935 Quarter, MS67+ Just One Coin Finer

3644 1935 MS67+ PCGS. This Philadelphia issue is readily available in most grades, but Registry-quality examples such as this Superb Gem are seldom seen. This coin is boldly struck with soft champagne toning over each side. Two small marks, one on Washington's jaw and the other on the forehead, are all that separate this piece from perfection. Only a single coin is finer at PCGS (8/15). NGC ID# 244D, PCGS# 5797

1935 Quarter, MS67+ Only One Coin Certified Finer

3645 1935 MS67+ PCGS. CAC. This Registry Set contender showcases virtually pristine surfaces that are aglow with satiny luster and lovely champagne toning. Boldly rendered motifs appear sharp even upon close examination, contributing to the outstanding eye appeal. Only a single coin is certified finer (8/15). NGC ID# 244D, PCGS# 5797

- 3646 1935-S MS67 PCGS. CAC.** The impeccably preserved surfaces of this impressive Superb Gem show hints of pale gold and amber toning, with well-detailed design elements and frosty mint luster throughout. Population: 41 in 67, 0 finer (8/15). NGC ID# 244F, PCGS# 5799

**1936 Washington Quarter, MS66
Doubled Die Obverse, FS-101**

- 3647 1936 Doubled Die Obverse, FS-101, MS66 PCGS.** The obverse of this impressive Premium Gem is strongly doubled, a feature most easily seen on the letters in the motto IN GOD WE TRUST. The design elements are sharply detailed and the well-preserved surfaces show highlights of golden-brown and amber toning. Population: 2 in 66, 0 finer (7/15). NGC ID# 244G, PCGS# 146091 Base PCGS# 5800

**1936-D Quarter, MS67
Among the Finest Certified**

- 3648 1936-D MS67 NGC.** An unabraded, Registry-grade example of this Denver issue is rarely encountered, making this an important opportunity for the competitive collector. The strike is sharp and the surfaces display frosty mint luster. A blush of light champagne toning blankets each side, while amber-red and russet overtones are also seen around the obverse periphery. Census: 12 in 67 (1 in 67+), 0 finer (8/15). NGC ID# 244H, PCGS# 5801

- 3649 1936-S MS67 PCGS. CAC.** A spectacular Superb Gem, with well-detailed design elements and frosty mint luster under delicate shades of lavender, gray, and golden-tan toning. Population: 40 in 67 (2 in 67+), 0 finer (8/15). NGC ID# 244J, PCGS# 5802

- 3650 1937-S MS67 PCGS.** A remarkable piece, among the finest 1937-S quarters certified. This Superb Gem is sharply rendered, with soft champagne luster that shows faint russet and olive overtones here and there. Population: 34 in 67 (2 in 67+), 0 finer (8/15). NGC ID# 244M, PCGS# 5805

- 3651 1939 MS67+ PCGS. CAC.** An eye-appealing Registry coin, this Plus-graded 1939 Washington quarter is sharply struck and free of bothersome abrasions. Lovely pastel hues in varying colors glow beneath a thin overlay of woodgrain olive-gold toning. Only eight coins are finer at PCGS (7/15). NGC ID# 44KU, PCGS# 5808

- 3652 1939 MS68 NGC.** A lightly toned alternative for Registry Set enthusiasts, with essentially flawless preservation and a whisper of iridescent shades and gold patina across the frosty surfaces. One of 14 pieces certified as MS68 by both services combined. NGC Census: 6 in 68, 0 finer (8/15). NGC ID# 44KU, PCGS# 5808

- 3653 1939-S MS67 PCGS. CAC.** A few hints of golden-tan and amber toning highlight the lustrous surfaces of this impressive Superb Gem. No mentionable distractions are evident, but an interesting die crack extends from the leaves in the left branch through the left (facing) wing. Population: 61 in 67 (1 in 67+), 0 finer (8/15). NGC ID# 244T, PCGS# 5810

- 3654 1941 MS67+ PCGS.** This high-end Superb Gem displays sharply detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces show highlights of greenish-gold and lavender toning, with outstanding visual appeal. PCGS has graded one numerically finer example (8/15). NGC ID# 27KL, PCGS# 5814

- 3655 1941-D MS67 ★ NGC.** Highly lustrous surfaces exhibit low intensity multicolored toning on the obverse, while the reverse displays a melange of vivid violet, lemon-gold, pine-green, and russet-red. Sharply struck, with pristine surfaces. A Registry-grade example, with none finer at NGC (8/15). NGC ID# 244Y, PCGS# 5815

- 3656 1941-D MS67 PCGS. CAC.** Splendid preservation allows vibrant, satiny luster to glow uninterrupted over each side of this Superb Gem Registry coin. The strike is sharp and each side shows light golden toning. Population: 44 in 67 (11 in 67+), 1 finer (8/15). NGC ID# 244Y, PCGS# 5815

- 3657 1941-D MS67 PCGS. CAC.** This Registry Set contender displays satiny golden-toned luster with hints of amber and olive around the borders. The strike is boldly executed and there are no bothersome abrasions. Population: 44 in 67 (11 in 67+), 1 finer (8/15). NGC ID# 244Y, PCGS# 5815

- 3658 1942-D Doubled Die Obverse, FS-101, MS62 PCGS.** All obverse legends are remarkably thick, and a lens confirms a prominent spread between hubbings. A lustrous representative with light honey-gold toning and pleasing preservation. Population: 1 in 62, 8 finer (7/15). NGC ID# 2452, PCGS# 145011 Base PCGS# 95818

**1943 Washington Quarter, MS67+
Only Two Finer at PCGS**

- 3659 1943 MS67+ PCGS. CAC.** The obverse of this high-end Superb Gem displays highlights of golden-brown and magenta toning, while the reverse is essentially brilliant. The design elements are sharply detailed throughout and vibrant mint luster radiates from both sides. PCGS has graded just two numerically finer examples (7/15). NGC ID# 2455, PCGS# 5820

- 3660 1943-D MS67+ PCGS.** Untoned and brilliant, this gleaming, frosted Superb Gem is at the top of its grade as designated by the PCGS Plus award. Both the strike and the mint luster are exceptional. Population: 8 in 67+, 1 finer (8/15). NGC ID# 2456, PCGS# 5821

- 3661 1946 MS67 PCGS.** The design elements of this magnificent Superb Gem are sharply detailed and the impeccably preserved surfaces radiate vibrant mint luster, with outstanding eye appeal. Population: 28 in 67 (3 in 67+), 0 finer (8/15). NGC ID# 245E, PCGS# 5830

3662 1948 MS67+ PCGS. CAC. This high-end Superb Gem displays virtually pristine surfaces with vibrant mint luster and a few hints of greenish-gold toning. The design elements are sharply detailed and eye appeal is exceptional. Population: 95 in 67 (8 in 67+), 1 finer (8/15). NGC ID# 245L, PCGS# 5836

3663 1950-S/D MS66 NGC. Caramel-gold toning adorns the fields, the portrait high points are stone-gray, and the obverse margin exhibits jade-green and golden-brown freckles. An exceptionally preserved example of this obvious overmintmark. The curve, stand, and serifs of the D emerge beneath a loupe. Census: 14 in 66 (2 in 66 ★), 7 finer (6/15). NGC ID# 245V, PCGS# 5845

**1951 Quarter, MS67+
None Finer at PCGS**

3664 1951 MS67+ PCGS. CAC. Registry Set collectors will find PCGS-graded 1951 quarters elusive in Superb Gem condition. This Plus-designated coin is tied for the finest seen by that service. The strike is bold and the satiny surfaces show mottled lavender-gray toning with olive-gold hues around the peripheries. Population: 61 in 67 (4 in 67+), 0 finer (8/15). NGC ID# 43WS, PCGS# 5846

**1951-S Quarter, MS68 ★
Eye-Catching Color**

3665 1951-S MS68 ★ NGC. A magnificent coin, among the finest 1951-S Washington quarters known. Star-designated eye appeal showcases vivid sun-gold, crimson, spruce-green, and russet toning over each side, with the brighter hues most prominent on the reverse. The strike is comparably bold. Census: 8 in 68 (3 in 68 ★), 0 finer (8/15). NGC ID# 245Y, PCGS# 5848

3666 1952-D MS67 PCGS. For all purposes unavailable any finer, this Superb Gem quarter holds its own against other top-notch toned examples. The satiny surfaces are essentially unmarked and richly toned on the obverse, with forest-green accents at the borders around coppery-gold central devices. The reverse displays ice-blue centers with a golden band at the rims. Tied for the finest at PCGS. Population: 15 in 67, 0 finer (8/15). NGC ID# 2462, PCGS# 5850

3667 1959 MS67 PCGS. A spectacular Superb Gem, with flawless surfaces that show a few hints of golden-tan toning and vibrant mint luster throughout. The design elements are sharply detailed and eye appeal is terrific. Population: 13 in 67 (1 in 67+), 0 finer (8/15). NGC ID# 246H, PCGS# 5866

3668 1962-D MS66+ PCGS. Light toning appears over mostly brilliant surfaces. This Denver issue features a sharp strike with few discernable marks. In spite of a mintage of over 127 million pieces, coins at Gem levels are elusive. PCGS has graded only 14 coins in 66+, with nine finer (6/14). NGC ID# 246R, PCGS# 5873

3669 1963-D MS67 PCGS. A spectacular Superb Gem, with sharply detailed design elements and impeccably preserved lustrous surfaces that show a few hints of greenish-gold toning. Population: 18 in 67 (1 in 67+), 0 finer (8/15). NGC ID# 44B3, PCGS# 5875

3670 1964-D MS67 ★ NGC. Type A Reverse, usual for the issue. Beautifully patinated in cherry-red, apricot-gold, jade-green, orange, and lilac shades. A lustrous and immaculate example of the final silver circulation issue from the Denver Mint. Census: 81 in 67 (11 in 67 ★, 1 in 67+★), 0 finer (8/15).
Ex: Long Beach Signature (Heritage, 5/2008), lot 8453, which realized \$373.75. NGC ID# 246V, PCGS# 5877

PROOF WASHINGTON QUARTERS

3671 1941 PR67+ PCGS. CAC. This Registry-grade proof is fully struck, with gleaming fields and satiny devices. Both sides display dusky lavender and light golden toning over the interiors, with areas of deep gold and russet around portions of the borders. PCGS lists five finer coins (8/15). NGC ID# 27HU, PCGS# 5980

3672 1956 PR69 Deep Cameo PCGS. This is an incredible coin, nearly perfect in every respect. Pristine surfaces display thickly frosted, sharp motifs that seem to float atop the watery mirroring of the fields. An untuned coin, unsurpassed both technically and aesthetically. Population: 43 in 69 Deep Cameo, 0 finer (8/15). NGC ID# 27J2, PCGS# 95988

**1974-S Quarter, PR70 Deep Cameo
Touch of Golden Color**

3673 1974-S PR70 Deep Cameo PCGS. This is one of just 20 1974-S proof quarters that have received the perfect PR70 Deep Cameo grade at PCGS (7/15), and is an essential Registry Set specimen. The design elements are razor-sharp and thickly frosted, set against fully mirrored fields. A blush of light golden toning warms the white-on-black contrast. NGC ID# 27JE, PCGS# 96006

End of Session One

SESSION TWO

COLONIALS

XF London Elephant Token Rare Diagonals Variety, Hodder 1-A

- 3674** (1694) London Elephant Token, Diagonals XF40 PCGS. CAC. Breen-185, Hodder 1-A. Breen considered this variety "Very Rare" in 1988 when he released his epic *Encyclopedia*, and it remains so today, in relation to the more often encountered No Diagonals variety (Hodder 2-B). In fact, six examples of this variety have been graded by PCGS; and previous prices realized reflect the rarity of the Diagonals type: a PCGS XF40 piece was sold for \$6,463 in January 2014; a PCGS AU50 coin was auctioned for \$25,300 in June 2006; and a Mint State example graded MS62 PCGS, sold in August 2012 for \$51,750.

The obverse die also differs, the tusks are further from the rim than on the usual Hodder 2 obverse, where the tusks nearly touch the dentils. This tan-brown example has moderate wear but the central diagonals are still obvious. Smooth overall with a couple of unimportant thin upper obverse marks. Listed on page 46 of the 2016 *Guide Book*. Population: 2 in 40, 3 finer (8/15). NGC ID# 2U3C, PCGS# 61

Rhode Island Ship Token, Wreath Below, MS63 Brass W-1740 Example

- 3675** 1778-1779 Rhode Island Ship Token, Wreath Below, Brass, Betts-563, W-1740, R.4, MS63 PCGS. The Wreath Below Ship variety was the final issue of this popular token, struck in brass, copper, and pewter. The pewter variant is the rarest, though the brass variety is a close second. PCGS has encapsulated 38 examples of the copper variety, 18 pewter pieces, and only 11 brass representatives in all grades; of the 11 brass pieces, this example is one of three in MS63 (one MS63+), and there are two MS64 pieces finer (8/15). The design elements are boldly struck, with substantial yellow-gold luster highlighting pale olive overtones. A few specks of deeper color are noted, but the surfaces are otherwise devoid of distractions. Listed on page 50 of the 2016 *Guide Book*. NGC ID# 2AUM, PCGS# 587

1785 Nova Constellatio, MS61 Brown Crosby 2-A, Pointed Rays, Small Date

- 3676** 1785 Nova Constellatio Copper, Pointed Rays, Small Date, Crosby 2-A, W-1885, High R.4, MS61 Brown NGC. 120.6 grains. In his December 2000 *Colonial Newsletter* article, Louis Jordan compares the obverse design to the famous American flag of 13 stars in a circular pattern that appeared in illustrations as early as 1779. Jordan writes: "The use of the circle of stars representing a new constellation was a uniquely American symbol."

Crosby identified six die varieties for the 1785 Nova Constellatio copper, composed of five obverses and five reverses. A seventh 1785 variety is listed by Bowers, and is thought by that author and Eric Newman to be a counterfeit of American origin. Crosby 2-A features the only use of both this obverse and reverse. This piece is indistinct on the all-seeing eye, as usual, but the combination of light coppery orange color and olive patina results in excellent eye appeal. Ranking this coin among other examples of the variety provides a challenge, although this coin clearly rates favorably among Crosby 2-A representatives. This piece also has the distinction of being the only Mint State example of the Small Date, Pointed Rays type at NGC (7/15). Listed on page 54 of the 2016 *Guide Book*. NGC ID# 2AZ4, PCGS# 823

1787 Fugio Cent, MS64 Brown
Pointed Rays, N. 13-X

- 3677** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, N. 13-X, W-6855, R.2, MS64 Brown PCGS. A coruscating near-Gem with deep mahogany-brown toning. Devoid of flan imperfections or visible marks. The vertical die crack at 6 o'clock on the reverse, and the clash marks from the chain links along the obverse margin, help to confirm the popular Bank of New York variety. Listed on page 87 of the 2016 *Guide Book*.
Ex: Essex Palm Collection (Heritage, 1/2007), lot 189. NGC ID# AX5E, PCGS# 883

1787 Fugio Cent, MS64 Brown
STATES UNITED, N. 12-X

- 3678** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64 Brown PCGS. N. 12-X, W-6820, R.3. The lustrous surfaces are primarily olive-green, but protected regions exhibit glimpses of mint red. Well struck save for minor blending along the left borders. Occasional minor flan flaws are present, but no marks are apparent. Likely from the Bank of New York holdings. Listed on page 87 of the 2016 *Guide Book*. NGC ID# AX5E, PCGS# 883

1787 Fugio Cent, Pointed Rays, MS66 Brown
N. 13-X, STATES UNITED

- 3679** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, N. 13-X, W-6855, R.2, MS66 Brown NGC. A Bank of New York Hoard variety, one of the more often seen in high grade. Newman 13-X falls into the popular Pointed Rays, Cinquefoils, STATES UNITED subtype, which is usually the type encountered when a high-grade Fugio cent is located. This Premium Gem example is tied with two others for the finest of this subtype at NGC, and is therefore among the finest certified examples of the Newman 13-X variety (8/15). Each side shows well-defined design elements and glossy, burgundy-brown patina. Some minor die fatigue is evident below BUSINESS on the obverse, and a vertical die crack appears on the reverse at 6 o'clock. An outstanding Fugio type coin and Newman 13-X representative. Listed on page 87 of the 2016 *Guide Book*. NGC ID# AX5E, PCGS# 883

1789 Mott Token, MS62
Thick Planchet, Engrailed Edge, Breen-1020

- 3680** 1789 Mott Token, Thick Planchet, Engrailed Edge MS62 Brown PCGS. CAC. Breen-1020, Rulau-NY 610. Most Mott Tokens are either plain edge, or thin planchet, or both. Rulau lists the engrailed edge variety as Rarity-8 but does not distinguish between thin and thick flans. The present token has an unusually thick flan and is essentially a piedfort. The die state is early, though the obverse field is buckled, typical for the issue. An impressive chocolate-brown example. Listed on page 74 of the 2016 *Guide Book*.
Population: 2 in 62 Brown, 0 finer (7/15). NGC ID# 2B5M, PCGS# 606

(1781) Libertas Americana Medal, MS62 Brown
Betts-615, Famous Symbol of American Liberty

3681 (1781) Libertas Americana Copper MS62 Brown NGC. Betts-615, Loubat-14. Obverse: bust of Miss Liberty facing left, with a Liberty cap on a pole, LIBERTAS AMERICANA above, 4 JULI 1776 below. Reverse: the goddess Minerva (France) protecting the infant Hercules (United States) from a rampant lion (Britain). NON SINE DIIS ANIMOSUS INFANS above, the dates of the battles of Saratoga and Yorktown below. Struck in bronzed copper.

The Libertas Americana medal was struck at the behest of Benjamin Franklin to commemorate the American victories at the battles of Saratoga and Yorktown. A sketch of the design was drawn by artist Esprit- Antoine Gibelin and the dies were engraved by Augustin Dupre. No more than 100-125 examples of the copper version survive today.

The present piece is an attractive MS62 example, with pleasing medium brown surfaces and razor-sharp definition on all design elements. A few minor contact marks are evident, none that detract materially from the outstanding visual appeal. The Libertas Americana medal is listed as number 1 among the *100 Greatest American Medals and Tokens*. Listed on page 90 of the 2016 *Guide Book*. Census: 5 in 62 Brown, 6 finer (7/15). NGC ID# BLK2, PCGS# 151815

HALF CENTS

1793 Half Cent, C-1, Fine 15
Pleasing Midgrade Type Coin

- 3682** 1793 C-1, B-1, High R.3, Fine 15 PCGS. The lower bust line is curved smoothly into the bottom hair strand on this first obverse. The reverse has a distinct period between the final A and the right stem end. This attractive representative displays pleasing dark brown surfaces with lighter tan highlights on the relief elements. A few tiny corrosion spots and several minor rim bruises are evident, but not sufficient to warrant a "no-grade" from PCGS. Our EAC grade VG7.

Ex: Houston Signature (Heritage, 11/2007), lot 60033.
From The Stephen A. Walling Collection. NGC ID# 2222, PCGS# 35003 Base PCGS# 1000

1804 C-13 Half Cent, MS64 Brown
Plain 4, No Stems

- 3683** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS64 Brown NGC. Manley Die State 2. Cohen-13 is a plentiful Plain 4 variety, often encountered in type collections. This Choice example is outstanding for the grade, showing smooth, glossy-brown patina and problem-free surfaces. A couple tiny marks around Liberty's eye contribute to the grade, but are undetected without a loupe. The obverse portrait is bold, the reverse is weak only around OF. The absence of distinct border dentils is diagnostic of the die state. Our EAC grade MS60. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

1806 Half Cent, MS64 Brown
Large 6, Stems, C-4

- 3684** 1806 Large 6, Stems, C-4, B-4, R.1, MS64 Brown NGC. Breen Die State II. The near-Gem obverse is particularly unmarked and well-produced, with only the usual weakness at the drapery folds. The Large 6 shows a hint of repunching and touches the drapery. True-to-form for the die state, the top of the legend and the highest leaves of the wreath are lightly struck from misalignment of the dies, where the reverse is rotated clockwise 15°. A few light marks appear on the reverse fields and wreath. Both sides display glimpses of natural orange mint luster and intermittent purplish-brown toning. Our EAC grade MS60. NGC ID# 222J, PCGS# 35200 Base PCGS# 1099

1809/6 Half Cent, MS64 Brown
C-5, Late Die State

- 3685** 1809/6 9 Over Inverted 9, C-5, B-5, R.1, MS64 Brown PCGS. Manley Die State 3. This is a late die state example, showing mild die erosion around the peripheries and loss of most of the denticles. The central portrait remains well-defined. This piece displays satiny amber-brown luster with a couple grayish overtones near Liberty's eye and in the left obverse field. This 9 over inverted 9 variety is seldom available in Mint State, being most frequently seen in AU grades. Our EAC grade AU55. NGC ID# 222N, PCGS# 35233 Base PCGS# 1126

LARGE CENTS

1793 Chain AMERICA Cent, VG Details Scarce S-2, B-2 Variety

- 3686** 1793 Chain, AMERICA, S-2, B-2, High R.4 — Environmental Damage — NGC Details. VG. The dark brown surfaces of this important first-year issue show extensive evidence of corrosion, with a few areas of olive patina. The Sheldon-2 is a scarce variety, identified by its wide date and fully spelled-out AMERICA reverse. A scrape through the date is the most serious distraction on this piece, which displays completely legible lettering and a bold chain. Our EAC grade AG3.

1793 Wreath Cent, Sharp VF20 Sheldon-8, Vine and Bars Edge

- 3687** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, VF20 PCGS. Horizontal stem parallel to the date. The bow is high and triangular. The existing detail reveals a sharpness grade of XF40, with light, evenly distributed porosity on both sides. Dark steel and greenish-brown color is accompanied by lighter brown on certain highpoints of the design. Housed in an old green label holder. The EAC and PCGS grades of this specimen are comparable. Our EAC grade VF20.
Ex: Long Beach Signature (Heritage, 9/2007), lot 75.
From The Stephen A. Walling Collection. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

1793 S-14, B-17 Liberty Cap Cent, VF35

Famous Bisecting Crack
The Eighth Finest Known

3688 1793 Liberty Cap, S-14, B-17, Low R.5, VF35 PCGS Secure. Breen Die State II with faint evidence of clash marks at Liberty's throat. This is the famous Bisecting Crack variety with a nearly vertical die crack from the top border through the E of LIBERTY to the top of Liberty's head, the ear, and the bust, grazing the right side of the 3 to the lower border. This die crack is constant on all 65 or so known examples.

The constant die crack suggests that the physical obverse die cracked during the hardening process before the die was used for actual coin production. That hardening process also stabilized the die crack throughout the usable life of the die. It is unknown if the die was merely retired once additional obverse dies were prepared, or if it shattered and completely fell apart at a stage in production.

There are six known die pairs of 1793 Liberty Cap cents that were employed to coin 11,056 cents. The four obverse dies and two reverse dies were prepared in late August or early September, and the entire mintage was delivered from Chief Coin Henry Voigt on Wednesday, September 18, the coldest day of the month. The engraver of these dies, Joseph Wright, died the previous week on September 13, 1793. It was a pleasant day with fair skies, the temperature recorded at 57 degrees in the morning and 72 degrees that afternoon. Wright was just 37 years old. His wife, the former Sarah Vandervoort, also succumbed to yellow fever that month.

This reddish-steel brown cent has slightly glossy surfaces with a few trivial marks, and microscopic corrosion that is only apparent with a glass. The surfaces are pleasing and the strike is exceptionally well centered. Graded VF30 in the 1970s, this piece carries a grade of VF30 in the Bland Census and VF25 in the Noyes Census. Both record-keepers consider this example the eighth finest of the variety. Our EAC grade VF25.

Ex: Henry C. Miller (Thomas L. Elder, 4/1917), lot 644; Henry C. Hines; Dr. William H. Sheldon; Sheraton Coin Co.; Dr. William H. Sheldon (4/19/1972); R.E. Naftzger, Jr. (New Netherlands, 11/1973), lot 336; First Coinvestors; Pine Tree Auctions (2/1975), lot 599; William R.T. Smith; Jack H. Beymer; Albert Ault; Alfred K. Nippert, Jr. NGC ID# 223L, PCGS# 35492 Base PCGS# 1359

**1794 S-30, B-12 Cent, MS60 Brown
Head of '94**

- 3689** 1794 Head of 1794, S-30, B-12, R.1, MS60 Brown NGC. Intermediate die state between Breen Die States II and III. Prominent clash marks are evident above the back of the head near the Liberty cap, and in the right obverse field adjacent to the upper part of the profile. The reverse has prominent clash marks inside the left branch of the wreath. Reverse die rust is evident, with a prominent die crack through the R of AMERICA to the right branch of the wreath. A nicely centered impression, this S-30 cent features lovely mahogany and golden-brown surfaces with a small nick on Liberty's neck and a few other trivial marks. The upper hair curls are bluntly detailed. Our EAC grade XF45. NGC ID# 223P, PCGS# 35555 Base PCGS# 901374

**1794 S-31 Cent, AU55
Glossy Reddish-Brown Color**

- 3690** 1794 Head of 1794, S-31, B-13, R.1, AU55 PCGS. The Second Marred Field variety, named for two prominent die chips in the lower left obverse field. The double lower hair lock is also nearly unique to S-31, found only on one other variety, S-30. This lovely chocolate-brown example is bold and glossy, and is unmarked aside from a few tiny ticks on the neck and a minor rim ding at 5 o'clock on the reverse. A charming piece that will highlight the quality of a specialized holding of 1794 cents. Our EAC grade VF30. Ex: *Dallas Signature* (Heritage, 12/2005), lot 39; *ANA Signature* (Heritage, 4/2006), lot 41. NGC ID# 223P, PCGS# 35558 Base PCGS# 901374

**1794 S-55 Cent, AU50
Pleasing Color and Detail**

- 3691** 1794 Head of 1794, S-55, B-47, R.2, AU50 NGC. Ex: Rasmussen Collection. Breen Die State II. This piece shows even, olive-brown surfaces with a mildly glossy glint when tilted under a light. Detail is reminiscent of a sharp strike, showing grade-consistent friction on the highest hair curls. The border dentils are complete, but the UN in UNITED is weakly defined. A small planchet flaw appears in the same location. Light granularity is seen tucked close around the relief elements and an old, brief scratch appears under the ED in UNITED. Our EAC grade VF30. From *The Stephen A. Walling Collection*. NGC ID# 223P, PCGS# 35627 Base PCGS# 901374

**1798 S-156 Cent, VG8
Important Reverse of 1796 Rarity**

- 3692** 1798 First Hair Style, Reverse of 1796, S-156, B-10, High R.5, VG8 NGC. Three 1798 varieties feature the Reverse of 1796 with single terminal leaves in both wreath branches. While this reverse is also known as the Reverse of 1795, the meaning is the same. Sheldon-156 with the First Hair Style and S-178 with the Second Hair Style are similarly rare, while S-155 is more frequently encountered. This pleasing piece, displaying trivial handling marks, exhibits olive and reddish-brown surfaces with good overall eye appeal. Our EAC grade Good 4. NGC ID# 2244, PCGS# 36005 Base PCGS# 1428

**1801 S-219 Cent, XF45
Die State IV, Three Errors**

- 3693** 1801 3 Errors, S-219, B-11, R.2, XF45 NGC. Breen Die State IV. An interesting and unusual example of the famous Sheldon-219 Three Errors variety, where a trio of Mint blunders include the erroneous 000 denominator, an absent left wreath stem, and an inverted, crudely corrected U in UNITED. Large cent specialists collect the S-219 by die state, with a progression of die clashing and die cracks that are equally spectacular as the renowned errors. The present coin seemed to be an anomaly, with an undocumented die crack from the edge through the denominator to the lower-most leaf. It is, however, a struck-through thread or large lint mark. The surfaces of this Choice example are smooth and nearly free of corrosion or granularity, with sharp definition on most of the elements. Weakness at LIBERTY and the fraction are characteristic of the variety and die state. Our EAC grade VF30. NGC ID# 224C, PCGS# 36272 Base PCGS# 1461

**1806 S-270 Large Cent
Choice About Uncirculated**

- 3694** 1806 S-270, B-1, R.1, AU55 NGC. Breen Die State II, with a faint die crack above the lowest curl. Deep, olive-brown color covers both sides of this sharply struck example. The surfaces are smooth and glossy except for an area of cloudy, granulation on the upper obverse beneath LIBERTY. Diagnostic bulges surround the date. Scarce in this About Uncirculated grade. Our EAC grade VF35. Census: 3 in 55, 11 finer (8/15). NGC ID# 224L, PCGS# 36436 Base PCGS# 1513

**1808 S-279 Cent, Choice AU
Conditionally Challenging Issue**

- 3695** 1808 S-279, B-3, R.1, AU55 PCGS. A lovely chocolate-brown representative of this conditionally rare variety. Examination beneath a loupe fails to find any significant marks, although a mint-made strike-through affects star 7. We note a small spot west of the wreath ribbon and a larger spot after the D in UNITED. A sharply struck example of the S-279 die pair, with 08 close in the date. Our EAC grade XF40. NGC ID# 224P, PCGS# 36463 Base PCGS# 1543

1810/09 S-281 Cent, MS62 Brown
Seldom Available in Mint State

- 3696** 1810/09 S-281, B-1, R.1, MS62 Brown NGC. Breen Die State II. A lustrous, medium-brown coin that exhibits traces of red around the borders. A rarity in Mint State, this overdated cent is tied with one other coin at NGC for second-finest certified, with a single MS64 coin graded finer. Bill Noyes suggests this is the tenth-finest example of the variety. The finely granular surfaces show virtually no marks from contact and no significant flaws, although faintness of strike suggests it was softly impressed from worn dies. A well-centered example, which is an important factor for this date as well as for the Classic Head type. Our EAC grade XF45. NGC ID# 224T, PCGS# 36469 Base PCGS# 1552

1812 S-288 Cent, MS61 Brown
Rare in Mint State

- 3697** 1812 Large Date, S-288, B-3, R.2, MS61 Brown NGC. Breen Die State II. The Large Date is defined by the 8 in the date, which is the script 8 style (thick center stroke) as opposed to the Small Date that features a block 8. LIB of LIBERTY is noticeably repunched. The strike is incomplete on some of the star centers and on certain high points of Liberty's hair. The lack of dentils and merging of a few letters into the rim is a function of die state rather than weakness of strike. Attractive deep, chocolate-brown surfaces are generally smooth and unbothered, although a short scrape is noted through UNI of UNITED. Our EAC grade XF40. NGC ID# 224W, PCGS# 36505 Base PCGS# 1564

1813 Cent, S-293, AU55
Advanced Die State

- 3698** 1813 S-293, B-1, R.2, AU55 PCGS. Dark surfaces, as usually seen on this scarce type, but with glossy features. There is slight porosity in the fields and significant die erosion blurs the peripheral legends in some areas. Elusive in the AU grade range and seldom seen any finer than the current level. Our EAC grade XF40. Population (both varieties included): 13 in 55, 17 finer (8/15).
Ex: Dallas Signature (Heritage, 11/2005), lot 112.
From The Stephen A. Walling Collection. NGC ID# 224X, PCGS# 36514 Base PCGS# 1570

**1824 N-2 Cent, MS64 Red and Brown
Rare Partially Red Example**

3699 1824 N-2, R.2, MS64 Red and Brown PCGS. Noyes Die State B; this is the later die state, showing light flowlines towards the peripheries and fading dentils on the reverse, but lacking the faint die crack between star 9 and Liberty's hair. The surfaces are free of bothersome abrasions, save for slight deepening of the patina on Liberty's cheek. The fields show significant coppery-red luster penetrating subtle auburn-brown overtones. Several stars are weak, but the interior motifs are sharp. A few scattered specks do not detract.

As a date, the 1824 large cent is elusive at the Mint State level. Pieces retaining enough original luster to grade in the Red and Brown or Red categories are rare. This is a highly important offering for the large cent specialist. Population (all varieties included): 6 in 64 (2 in 64+) Red and Brown, 2 finer (8/15). NGC ID# 225D, PCGS# 36770 Base PCGS# 1637

**1825 Large Cent, MS65 Brown
Among the Finest-Graded N-6 Examples**

3700 1825 N-6, R.3, MS65 Brown NGC. A chestnut-brown Gem, with reddish undertones and blue accents amid pleasing mint luster. BER-Y is doubled in LIBERTY, and CE is noticeably higher than NT of CENT to help confirm the N-6 die pair. The coin is sharply struck from an early die state, albeit weak at the left obverse star centers, which may be related to rotation of the reverse by 20° counterclockwise. Marks are limited to a few tiny ticks on Liberty's cheek and a short scrape across O in ONE. Otherwise, the fields are smooth and hard with no sign of granularity or corrosion. The diagnostic die rust exists beneath TE of STATES but does not distract from the appeal. Our EAC grade AU55. PCGS# 36796 Base PCGS# 1642

**1826/5 Cent, MS64 Brown
Popular N-8 Overdate**

3701 1826/5 N-8, R.2, MS64 Brown NGC. This sole overdated 1826 variety commands a large premium in Uncirculated grades with its own listing in the *Guide Book*. The 2 and the 6 in the date are much closer together than the other digits, and the remnants of an underdigit 5 exists within the top curve of the 6. The surfaces of this near-Gem example are visually pleasing with reddish-chocolate coloration and subtle mint luster beneath the toning.

While the strike is sharp overall, some peripheral weakness exists — most noticeably at the centers of stars 2 through 4 and at the opposing legend, where the denticles fade. The obverse is slightly off-center toward 7 o'clock. Finely textured surfaces show only a few tiny marks of any kind. An attractive and example the overdate, always in demand. Our EAC grade AU50. NGC ID# 225G, PCGS# 36835 Base PCGS# 1648

INDIAN CENTS

**1859 Indian Head Cent, MS66
One of the Finest Certified Survivors**

3702 1859 MS66 PCGS. James B. Longacre's Indian Head design was first implemented on the cents of 1859, and this is one of the finest survivors from that introductory issue. Lively mint luster cartwheels over light golden-amber surfaces, providing excellent visual appeal. The razor-sharp strike exhibits particularly bold definition over the headdress feathers, ribbon diamonds, and wreath elements. Close inspection fails to detect any noticeable impairments. Population: 27 in 66 (2 in 66+), 0 finer (8/15). NGC ID# 227E, PCGS# 2052

**1863 Indian Cent, MS66+
Among the Finest at PCGS**

3703 1863 MS66+ PCGS. The design elements of this high-end Premium Gem exhibit razor-sharp definition throughout and the impeccably preserved original red surfaces show a few hints of lilac patina, with vibrant mint luster on both sides. Eye appeal is extraordinary. Population: 50 in 66 (4 in 66+), 0 finer (8/15). NGC ID# 229D, PCGS# 2067

1872 Indian Cent, MS65 Red
One Finer Coin at PCGS

3704 1872 MS65 Red PCGS. CAC. The 1872 Indian cent claims a mintage of just over 4 million pieces. Many examples were struck from planchets made from remelted coins of earlier years and the quality of these blanks was uneven. Many examples show streaks due to improper alloy mix and the issue is often seen with a weak strike. Richard Snow believes the 1872 is the most difficult issue of the series to find in high grade, outside of the famous 1877.

This delightful Gem displays original red surfaces with vibrant mint luster on both sides. The obverse is sharply detailed, but the reverse shows a touch of softness on the wreath. No mentionable distractions are evident and eye appeal is outstanding. Population: 15 in 65 Red, 1 finer (8/15). NGC ID# 227W, PCGS# 2105

1873 Indian Cent, MS66 Red
Scarcer Closed 3 Variety

3705 1873 Closed 3 MS66 Red PCGS. CAC. The Closed 3 Indian cent of 1873 is somewhat scarcer than its Open 3 counterpart, and this is particularly evident in the Red color category. Closed 3 cents are scarce with original red luster, and are extremely rare with such finer than MS65 where PCGS and NGC combined have certified just six coins. This Premium Gem is truly among the finer-known examples and represents a rare opportunity for the advanced Indian cent specialist. The strike is sharp throughout the headdress feathers and diamonds, even if lacking just slightly on the crossbars of the reverse shield. Frosty surfaces yield deep coppery-orange and amber hues, free of bothersome carbon spotting. Population: 4 in 66 Red, 1 finer (7/15). NGC ID# 227X, PCGS# 2111

**1896 Indian Cent, MS66 Red
Deep Red Luster**

- 3706 1896 MS66 Red PCGS.** A conditionally rare Premium Gem with glowing copper-red luster and unabraded, frosty surfaces. The strike is bold and light clash marks appear in the fields on each side. A few tiny specks are barely discernible with a glass. This issue is deceptively plentiful in lower grades, causing high-end Red coins such as this piece to be overlooked by many novices. Population: 17 in 66 (1 in 66+) Red, 2 finer (8/15). NGC ID# 228R, PCGS# 2195

**1896 Indian Cent, MS66+ Red
Glowing Original Luster**

- 3707 1896 MS66+ Red PCGS. CAC.** A splendid type coin of a quality that will please even the most discerning collector. This 1896 Indian cent is boldly struck, with deep coppery-red luster that glows in thick, frosty hues. There are no bothersome abrasions, although light clash marks are seen in the fields upon close examination. A few microscopic specks do not detract from the immense eye appeal. Population: 17 in 66 (1 in 66+) Red, 2 finer (8/15). NGC ID# 228R, PCGS# 2195
-

1905 Gold Indian Cent, MS64
Breathtaking Gold Mint Error

3708 1905 Indian Cent — Struck on a Quarter Eagle Planchet — MS64 PCGS. Weight: 64.5 grains, the standard weight of a quarter eagle. Exactly five Indian cents are known on gold planchets, according to information available to us. Among them are three dated 1900, this piece dated 1905, and an example dated 1906. The Judd pattern reference lists 1900 and 1907 gold cents in the section on mint errors. However, Andrew W. Pollock, III, listed the 1900 gold Indian cents as P-1990 in the regular pattern section of his reference. Pollock writes: “Listed in Judd as a mint error, but it is difficult to imagine that a Mint employee would be so careless as to feed gold planchets into a coinage press fitted with one-cent piece dies.” Pollock suggests that these pieces may have been deliberately struck for one or more collectors.

The following Census of gold Indian cents and additional information about them is compiled from a variety of sources, including www.uspatterns.com, www.minterrornews.com, Donald Taxay's 1976 *Catalogue and Encyclopedia*, Andrew Pollock's 1994 *United States Patterns and Related Issues*, the Judd reference, and selected auction catalogs. Conversations with Fred Weinberg and Richard Snow provided additional background.

1900 MS65 PCGS. Col. E.H.R. Green; B.G. Johnson; John Beck (Abner Kreisberg Corporation, 1/1975), lot 609; Mike Byers; Auction '89 (Superior, 7/1989), lot 856; Bowers and Merena (8/1991), lot 4103; recently PCGS authenticated as a 1900 Indian cent struck on a gold \$2.50 planchet, and graded MS65. The 1991 ANA catalog gives a weight of 65.8 grains, 1.3 grains too much for a quarter eagle planchet.

1900 AU55. Heritage (8/1993), lot 8000. The 1993 ANA catalog gives a weight of 4.35 grams (67.12 grains), 2.62 grains too much for a quarter eagle planchet.

1900. Michael Hodder reported in a May 14, 1996 letter to Q. David Bowers that he had personally seen three different pieces, all with weights in the range of 65.8 to 67.1 grains. See Bowers' *A Buyer's and Enthusiast's Guide to Flying Eagle and Indian Cents*, p. 427.

1905 MS64 PCGS. Apparently unknown to the numismatic community prior to the offering in our 2010 FUN Auction. Weight: 64.5 grains, the standard weight for a quarter eagle planchet.

1906 AU58 NGC. Stack's (6/2004), lot 4097; Stack's (9/2009), lot 4299. Weight: 64.4 grains, within the 0.25 grain tolerance for a quarter eagle planchet.

1907. Listed in the Judd pattern book, and in Donald Taxay's *Catalogue and Encyclopedia [of] U.S. Coins*. The 1907 gold Indian cent is currently unlocated.

One example dated 1900 is also known in silver, from the identical dies as the 1900 gold Indian cents, suggesting they were all made at or near the same time. Rick Snow writes in *A Guide Book of Flying Eagle and Indian Head Cents* that “both the silver and gold examples are struck from the same dies, with light roughness on the reverse die, probably from die rust.” That all three 1900 pieces have higher weights suggests that they were specially made, perhaps without the knowledge of Mint officials. Fred Weinberg explained that “the weights vary because in all probability, they were on planchets that might not have been filed down to the proper weight spread.” Hand adjusting of individual gold planchets continued in the Mint until circa 1910. Those three pieces are almost certainly fancy pieces made for collectors, while the 1905 and 1906 examples, on correct weight planchets, are more likely pieces truly made in error, and substantially more important as such.

This example is slightly off-center toward 9 o'clock, the tops of UNITED STATES off the planchet. The strike is weak at the date, feather tips, RICA, the outer parts of the wreath, and the ribbon bow. The weakness seems counter to expectations of the soft gold, but the diameter is at least a full millimeter less than an Indian cent, meaning that the metal flowed out and was insufficient to accept the design from the deepest recesses of the dies. Both sides have bright yellow surfaces with frosty mint luster. A few faint hairlines on the cheek prevent a Gem grade assignment. This stunning gold Indian cent is one of the truly amazing error coins we have ever handled.

Ex: FUN Signature (Heritage, 1/2010), lot 2433.

**1909-S Indian Cent, MS66 Red and Brown
Bronze-Gold Patina**

- 3709 1909-S MS66 Red and Brown PCGS Secure.** This lustrous Premium Gem appears far more red than brown, although faint auburn overtones prevent a full Red designation. The surfaces are free of abrasions and a few small specks are lost in the woodgrain pattern of the light toning. Slight weakness occurs on the wreath bow and the top three headdress feathers, as is characteristic of this key San Francisco issue. Population: 5 in 66 Red and Brown, 0 finer (8/15). NGC ID# 2298, PCGS# 2239

**1909-S Indian Cent, MS65 Red
Final-Year Key**

- 3710 1909-S MS65 Red PCGS.** Fully brilliant obverse and reverse surfaces have satiny orange luster. This piece is nicely detailed, even though it is not a full strike. The 1909-S Indian cent represents a transitional year that is shared with the first Lincoln cents. This is a particularly attractive Gem example.
Ex: Long Beach Signature (Heritage, 9/2005), lot 7405; Central States Signature (Heritage, 5/2007), lot 1142.
From The Stephen A. Walling Collection. NGC ID# 2298, PCGS# 2240

**1909-S Indian Cent, MS66 Red
Conditionally Rare**

- 3711 1909-S MS66 Red PCGS.** The 1909-S is an underrated key to the Indian cent series, especially in Premium Gem or finer condition. This full Red example is well-struck with frosty luster and no bothersome carbon spotting. The obverse displays glowing golden-orange luster, while the reverse shows slightly deeper amber-red hues. Population: 20 in 66 (1 in 66+) Red, 1 finer (8/15). NGC ID# 2298, PCGS# 2240

LINCOLN CENTS

**1909 VDB Lincoln Cent, MS67+ Red
Vibrant Luster and Color**

- 3712 1909 VDB MS67+ Red PCGS Secure.** The initial Lincoln cent issues of the Philadelphia and San Francisco Mints in 1909 exhibited designer Victor D. Brenner's initials on the reverse near the 6 o'clock rim. The 1909-S VDB is regarded as the biggest key date in the series, while the Philadelphia variant is somewhat more available and better suited for type purposes. This Superb Gem is vibrantly frosted, with deep copper-orange luster in the centers and lighter bronze-gold hues around the borders. The strike is razor-sharp and there are no bothersome surface flaws. PCGS lists a single coin finer (8/15). NGC ID# 22AZ, PCGS# 2425

**1909 VDB Lincoln Cent, MS66 Red
Doubled Die Obverse**

- 3713 1909 VDB Die Doubled Obverse, FS-1101, MS66 Red PCGS. CAC.** The die doubling is most plain on the date and LIBERTY, although Lincoln's bowtie is also affected. This *Cherry-pickers'* variety is scarce throughout the Red grade range, and pieces as fine as the Premium Gem level are rare. This representative displays rich coppery-orange luster with a faintly matte-like texture. The strike is sharp and a few tiny specks are not bothersome. Population: 13 in 66 (1 in 66+) Red, 1 finer (8/15). NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425

**1909-S VDB Cent, MS66 Red and Brown
Uniformly Colored**

- 3714 1909-S VDB MS66 Red and Brown PCGS.** A high grade for this famous introductory and low-mintage issue. The obverse displays moderately faded orange-gold while the reverse shows glimpses of the initial red though more dominate forest-green shades. The lustrous surfaces are mark-free and devoid of spots. Fully struck, even on the VDB initials. Certified in a green label holder. Population: 40 in 66 Red and Brown, 0 finer (8/15). NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS66+ Red
Outstanding Quality, Few Finer

- 3715 1909-S VDB MS66+ Red PCGS. CAC. Garrett and Guth call this issue a "perennial favorite" in their *100 Greatest U.S. Coins*, third edition, and the issue is without a doubt one of the most sought-after coins in 20th century numismatics. It is available in the absolute sense, but does become elusive in MS66 and is rare any finer. This glowing coppery-orange Premium Gem is exalted above most of its peers by a Plus designation, denoting quality nearly that of a Superb Gem. In our ANA Signature sale (2/2014), an MS67 Red 1909-S VDB cent realized \$117,500. This high-end MS66 example is fully struck with matte-like luster that shows wisps of olive and is devoid of bothersome carbon spotting. PCGS lists only 12 MS67 Red coins finer (7/15). NGC ID# 22B2, PCGS# 2428
-

1909-S VDB Cent, MS67 Red
Tied for Finest Certified
Exceptional Color and Surfaces

3716 1909-S VDB MS67 Red PCGS Secure. The allure of Lincoln cent collecting has drawn countless collectors into the wider realms of numismatics in general. And the particular appeal of the 1909-S VDB cent is the “key” to that series, in every sense of the word. The Lincoln cent debuted on August 2, 1909. The various facilities where the new coins were being offered — the Philadelphia and San Francisco mints, the Sub-Treasury buildings in Chicago, Boston, New York, and St. Louis, banks, and the Treasury building in Washington, D.C. — saw long lines of collectors and ordinary citizens eager to acquire examples of the new cents. The new coins featured the initials of the designer, Victor D. Brenner, in small letters on the reverse. When coinage of the VDB cents was halted a mere two days later, a public furor ensued.

Carl R. Herkowitz writes in the article “The 1909-S VDB Lincoln Cent: A Tribute” from the November 1995 *The Numismatist*:

“In a swift departure from the past, the 1909-S VDB, more than any other coin or contributing factor, attracted the attention of the larger populace, and in so doing, made coin collecting a public pastime rather than an avocation for just a few. The S-VDB set the hobby’s course for the 20th century, increasing multifold the ranks of enthusiasts and leading to the enjoyment we know many examples were preserved from the inaugural low mintage, yet despite its unabated popularity the issue is not “truly rare” until it is in the finest Uncirculated grades. Among those exclusive few coins, this Superb Gem ranks as one of the elite. Brassy, yellow-orange patina emits vibrant mint luster, and a pinpoint-sharp strike exhibits a fully detailed shoulder and the all-important letters V.D.B. top-to-bottom strong. A glass reveals no significant marks or spots.”

A mere 13 coins have garnered the MS67 Red grade from PCGS and NGC combined, with no coins certified numerically finer at either service. Registry Set enthusiasts and the legions of high-grade specialists will find stiff competition for this example of one of America’s iconic “must-have” coins. Population: 12 in 67 Red, 0 finer (8/15). NGC ID# 22B2, PCGS# 2428

**1909 Lincoln Cent, MS67+ Red
Prime Registry Coin**

- 3717 1909 MS67+ Red PCGS Secure. CAC.** The Philadelphia Mint's Lincoln cent production consisted of about 28 million VDB coins, and nearly 73 million "plain" cents. Yet, the latter variety is by far the scarcer issue in high grade. This Red Superb Gem is among the finest certified. Glowing original mint luster consists of blended lilac, orange, and bronze-gold hues, with frosty surfaces that are virtually free of carbon. Razor-sharp and beautifully preserved. Population: 74 in 67 (7 in 67+) Red, 0 finer (8/15). NGC ID# 22B3, PCGS# 2431

**1911 Cent, MS67 Red
Lustrous and Pristine**

- 3718 1911 MS67 Red PCGS.** Tinges of peach and orange interrupt otherwise coppery-pink luster on each side of this Superb Gem Registry coin. The strike is sharp and the satiny surfaces are free of abrasions, with just a couple tiny specks noticed when scrutinized with a loupe. This Philadelphia issue is scarce in MS66 Red, and Superb Gems are significantly rarer and more sought-after. Population: 12 in 67 (1 in 67+) Red, 1 finer (8/15). NGC ID# 22B7, PCGS# 2443

**1911-D Cent, MS66 Red
Elusive This Fine**

- 3719 1911-D MS66 Red PCGS Secure.** The 1911-D was a workhorse coin in the economy, and few high-end full Red examples survive. This Premium Gem is conditionally rare. The strike is boldly executed and the satiny surfaces display soft coppery-orange luster. There are no obvious carbon specks. Population: 27 in 66 (1 in 66+) Red, 1 finer (8/15). NGC ID# 22B8, PCGS# 2446

**1913-D Cent, MS66 Red
Rare Registry-Grade Example**

- 3720 1913-D MS66 Red PCGS Secure.** The rarity of the 1913-D Lincoln cent in high grade is somewhat overlooked by novices who latch on to the more well-known 1914-D. In reality, the '13-D is a major rarity in grades finer than MS65. This Red Premium Gem is outstanding, showing bold detail and satiny mint luster in shades of coppery-rose, peach, and gold. A single, tiny speck is hidden near the bowtie. Population: 18 in 66 (1 in 66+) Red, 0 finer (8/15). NGC ID# 22BE, PCGS# 2464

**1914 Cent, MS66+ Red
Outstanding Quality**

- 3721 1914 MS66+ Red PCGS.** This remarkable coin is seemingly pristine, visually finer than is expected for the Premium Gem level. Close study with a glass reveals a few stray lines on Lincoln's cheek and in the right obverse field which explain the grade. Satiny surfaces glow with coppery-red luster and are largely free of carbon spotting. Population: 71 in 66 (4 in 66+) Red, 5 finer (8/15). NGC ID# 22BG, PCGS# 2470

**1914-D Cent, MS65 Red and Brown
Sharp and Lustrous**

- 3722 1914-D MS65 Red and Brown PCGS.** The reverse is only about 30% red while the obverse is perhaps 50:50 red and brown, but both sides show generous luster on problem-free surfaces with the typically bold strike that this key-date issue is known for. Given the expense of Gem Red examples of the 1914-D and some collectors' concerns about color stability, many owners of high-grade sets opt for a nice Gem Red and Brown representative. Their search may end here. Population: 48 in 65 (1 in 65+) Red and Brown, 0 finer (8/15). NGC ID# 22BH, PCGS# 2472

**1914-D Cent, MS65 Red
Seldom Offered This Fine**

3723 1914-D MS65 Red PCGS. CAC. Although the 1909-S VDB is considered *the* key date to the Lincoln cent series, its conditional rarity falls far behind that of many other dates, particularly in the finer Red grades. The 1914-D stands out in this regard due to its key-date status. It is many times scarcer in MS65 Red than the 1909-S VDB, and is prohibitively rare any finer; the 1909-S VDB remains collectible through MS66 Red. Auction appearances second the certified population data; the 1914-D is offered in MS65 Red only about one sixth as often as the 1909-S VDB. This sharply struck representative exhibits satiny luster in dusky copper-orange hues. A few tiny carbon specks are not bothersome. Population: 65 in 65 (4 in 65+) Red, 3 finer (8/15). NGC ID# 22BH, PCGS# 2473

**1915-D Cent, MS66 Red
High-Grade Survivor**

3724 1915-D MS66 Red PCGS. Generous luster coats each side of this well-struck semikey issue in the early Lincoln series, one of the finer-certified pieces at either PCGS or NGC. A couple of small grayish toning spots are scarcely visible without a loupe, and even with magnification, carbon is minimal. Population: 30 in 66 Red, 1 finer (8/15). NGC ID# 22BL, PCGS# 2482

**1917 Lincoln Cent, MS67+ Red
Incredible Luster and Color**

3725 1917 MS67+ Red PCGS Secure. CAC. Exemplary quality of strike, luster, and color deliver outstanding eye appeal on this high-end Superb Gem. Lincoln's bust and the wheat ears are razor-sharp, and are further accentuated by vibrant copper-gold, rose, and apricot hues. Matte-like surfaces are devoid of carbon and showcase unhindered radiance. Population: 17 in 67 (2 in 67+) Red, 2 finer (8/15). NGC ID# 22BS, PCGS# 2497

1917 Lincoln Cent, MS64 Red
FS-101, Doubled Die Obverse

3726 1917 Doubled Die Obverse, FS-101 MS64 Red PCGS Secure. Both the date and IN GOD WE TRUST show bold die doubling confirming the FS-101 variety — by far, the most dramatic doubled die of the early series and a highly sought variety by both Lincoln cent collectors and die variety specialists. Mint State examples are scarce-to-rare, especially when Choice such as this sharply struck near-Gem representative.

The doubling is clear on the entire Motto as opposed to some coins, which show the doubled lettering only on GOD WE TRUST. The doubled date is equally pronounced. Original salmon-orange patina covers both sides, with bright mint luster and nearly full details across both sides. A glass reveals a few light abrasions below IN GOD and an occasional carbon freckle, but no major marks or spots. Population: 5 in 64 (1 in 64+) Red, 8 finer (8/15). PCGS# 37675 Base PCGS# 92497

1918 Cent, MS67 Red
Registry Set Essential

3727 1918 MS67 Red PCGS. CAC. The number of surviving full Red 1918 cents declines significantly above the Gem grade level, and in MS67, such pieces are genuine rarities. This piece will appeal most strongly to Registry competitors, as it is numerically equal to the coin in the current highest-rated Registry Set and is one of only 11 MS67 Red examples with CAC approval. Glowing coppery-orange luster illuminates unabraded surfaces. As is typical of the issue, moderate die erosion is evident in the fields on each side and the sharpness of the reverse wheat ears is by extension weak. Nonetheless, eye appeal is outstanding. Population: 30 in 67 (3 in 67+) Red, 1 finer (8/15). NGC ID# 22BV, PCGS# 2506

1925-S Lincoln Cent, MS65 Red and Brown
Seldom Seen So Fine

3728 1925-S MS65 Red and Brown PCGS. CAC. The 1925-S is among the most elusive S-mint Lincoln cents in full Red Gem condition, and Gem Red and Brown pieces are not far behind on the collectibility scale. This is a highly appealing example that show generous luster on each side and intermingled red-tan and red-brown patina, not terribly far “over the border” and demonstrating a nice sharp strike, to boot. One of the 11 Gem Red examples certified at PCGS would cost well into the five figures. Population: 9 in 65 Red and Brown, 0 finer (8/15). This is one of only two in this grade with the CAC approval. NGC ID# 22CH, PCGS# 2565

1926-S Lincoln Cent, MS64 Red
Low-Mintage Condition Rarity

3729 1926-S MS64 Red PCGS. Only 4.5 million pieces were struck of the 1926-S, but the issue's key-date status derives not only from its low mintage. The issue is also a condition and “color rarity” with very few full Red, high-grade pieces certified. This is a particularly pleasing, well-struck example that has lovely copper-orange coloration, softly frosted luster, and few imperfections. A faint partial print on the lower reverse is the only mentionable blemish. Virtually unavailable in higher grades. Population: 70 in 64 (1 in 64+) Red, 2 finer (2/15).
Ex: Palm Beach Signature (Heritage, 3/2005), lot 5189. NGC ID# 22CL, PCGS# 2575

**1929-S Cent, MS66 Red
Registry-Quality Example**

- 3730 1929-S MS66 Red PCGS. CAC.** The 1929-S is one of the more challenging issues in the Lincoln cent series in Gem or finer full Red grades, and is rare at the Premium Gem Red level. This piece is tied with just 25 others as the finest at PCGS (8/15), and is numerically equal to the example represented in the current highest-rated Registry Set. Satiny copper-orange luster encompasses each side, while the design elements show above-average definition. A few tiny carbon specks are noted upon close examination, though the surfaces are otherwise beautifully preserved. NGC ID# 22CW, PCGS# 2602

**1933-D Lincoln Cent, MS67 Red
Warm, Luminous Surfaces**

- 3731 1933-D MS67 Red PCGS.** Glowing coppery-orange hues reside over satiny mint luster on each side of this Superb Gem Registry coin. Mild die erosion is detected in the peripheral regions upon close study with a lens, but the design sharpness is not noticeably affected. The Lincoln cent specialist will find a comparable example of this Denver issue difficult to locate. Population: 27 in 67 Red, 0 finer (8/15). NGC ID# 22D8, PCGS# 2632

**1933-D Lincoln Cent, MS67 Red
Among the Finest Certified**

- 3732 1933-D MS67 Red PCGS. CAC.** This magnificent Registry-grade 1933-D is among the finest full Red examples certified by either service. The strike is bold and the luster is satiny. Deep coppery-orange hues encompass each side, with a loupe showing a few faint plum tinges on the reverse. Population: 27 in 67 Red, 0 finer (8/15). NGC ID# 22D8, PCGS# 2632

**1934 Lincoln Cent, MS68 Red
Unsurpassed Quality**

- 3733 1934 MS68 Red PCGS.** A remarkable coin, one of only 11 1934 Lincoln cents at PCGS in this unsurpassed grade (8/15). The mint-fresh surfaces glow with deep coppery-orange luster that lightens to gleaming olive-gold and lilac around portions of the borders. Moderate die erosion is present, but the striking definition is not overly affected. There is no discernible carbon. NGC ID# 22D9, PCGS# 2635

**1950 Cent, MS67+ Red
Essential Registry Acquisition**

- 3734 1950 MS67+ Red PCGS.** This remarkable Superb Gem is tied for the finest 1950 Lincoln cent certified, and is one of only two PCGS coins that rate finer than the MS67 Red example in the current highest-rated Registry Set. This piece showcases a bold strike and frosty copper-orange and rose-gold hues. A spectacular coin worthy of the finest collection. Population: 38 in 67 (2 in 67+) Red, 0 finer (8/15). NGC ID# 22LA, PCGS# 2779

**1955 Lincoln Cent, MS64+ Red
Doubled Die Obverse**

- 3735 1955 Doubled Die Obverse, FS-101, MS64+ Red PCGS Secure.** This *Guide Book* variety is arguably one of the most sought-after Lincoln cents in the series, and full Red examples are far fewer in number than the vast collecting market demands. This high-end near-Gem is an outstanding coin with unusually few abrasions for the grade. Deep coppery-red luster rolls over frosty surfaces, with a few plum overtones also seen in the left obverse field and near the lower reverse rim. The finer details of the portrait are a trifle soft, as is characteristic of this issue. PCGS lists only 19 finer full Red examples (8/15). NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

PROOF LINCOLN CENTS

1909 VDB Lincoln Cent, PR66 Red and Brown First-Year Matte Proof Issue

3736 1909 VDB PR66 Red and Brown NGC. A small mintage of 1,194 matte proof Lincoln cents was reported in 1909, but experts suspect only 400-600 examples were actually distributed. The coins all featured the designer's initials prominently on the reverse, apparently a cause of much controversy when the coins were issued. This delightful Premium Gem exhibits broad, flat borders, with squared off edges and sharply detailed design elements. The original red surfaces have mellowed to light brown and magenta in many areas, but no mentionable distractions are present and the subtle matte luster remains strong. NGC ID# 22KR, PCGS# 3301

1912 Lincoln Cent, PR66 Red Tied for Finest Certified

3737 1912 PR66 Red PCGS. The 1912 is one of the best made issues in the matte proof Lincoln cent series, but it is seldom available in high grade and rarely with full Red color. This Premium Gem Red example is tied with just one other as the finest at PCGS; NGC contributes just three other PR66 coins in the Red color category, also with none finer (7/15). This piece shows razor-sharp detail and broad rims with deep matte luster that gives each side a soft, luminous appearance. Coppery-orange surfaces show overtones of rose-red and pale olive, accentuating the eye appeal. A couple tiny specks are barely perceptible with a glass, and there are no obvious contact marks. NGC ID# 22KV, PCGS# 3314

**1913 Cent, PR67 Red
Conditionally Rare**

- 3738 1913 PR67 Red PCGS.** Remarkably few matte proof Lincolns have achieved a Superb Gem grade, across all issues and color categories. The 1913 shows a PCGS population of just seven coins in PR67 Red, with none finer (8/15). Surprisingly, this paltry survival rate is among the higher for the grade in the matte proof series. The present coin is truly superb. Full definition appears on all design elements and the rims are broad and squared. Bronze-gold hues dominate the matte surfaces, but yield to overtones of violet-red, lilac, and olive. A few faint carbon specks are present, but there are no contact marks. NGC ID# 22KW, PCGS# 3317

**1977-S Cent, PR70 Deep Cameo
Registry-Grade Proof**

- 3739 1977-S PR70 Deep Cameo PCGS.** Well-struck with jet-black mirroring in the fields and bright, starkly contrasted devices that seem to float above the watery reflectivity. Carefully preserved and mark-free, with rich coppery-orange and cherry-red coloration. Population: 12 in 70 Deep Cameo, (8/15).
Ex: Dallas Signature (Heritage, 12/2004), lot 5444. NGC ID# 22M9, PCGS# 93452

TWO CENT PIECE

**1872 Two Cent Piece, MS65 Brown
Luminous Surfaces**

- 3740 1872 MS65 Brown PCGS. CAC.** This is a high-end example of the key date in the two cent series. The strike is bold and close study with a loupe finds Gem-quality surfaces. Mottled auburn and burgundy hues blanket each side of this piece, allowing hints of luster to penetrate, but subduing enough to warrant the Brown color designation. A small patch of specks in the central reverse is well-hidden by the patina. Population: 5 in 65 Brown, 0 finer (8/15). NGC ID# 22NG, PCGS# 3612

THREE CENT SILVER

**1851 Silver Three Cent, MS67
None Certified Finer**

- 3741 1851 MS67 PCGS.** The peripheral elements of this Superb Gem silver three cent type coin are far more bold than is typical, although the central shield still shows a touch of incompleteness. The frost-white luster glows uninterrupted, giving this first-year coin outstanding eye appeal. Population: 18 in 67 (1 in 67+), 0 finer (8/15). NGC ID# 22YX, PCGS# 3664

1851-O Silver Three Cent, MS67
One of the Three Finest Known

3742 1851-O MS67 NGC. The New Orleans version of the 1851 silver three cent piece characteristically portrays some combination of weak strikes and/or deficient luster. This is the only branch mint issue of the entire series, and its coinage was cut off at 720,000 pieces. The weakness of strike was a problem that plagued the Philadelphia issue, as well, stemming in part from the inherently thin planchets used for the denomination. Any non-proof three cent silver with full details is a rarity, regardless of date.

This 1851-O representative is a conditionally rare Superb Gem, tied with just two others as the finest at NGC; the finest at PCGS are two MS66+ coins (8/15). This representative displays beautiful, frosty luster, toned in pastel shades of champagne, lavender, and sky-blue. The aforementioned striking weakness persists on the high points of the shield, but the peripheral stars are surprisingly well-defined. An outstanding coin that grows on the viewer the longer it is studied. NGC ID# 22YY, PCGS# 3665

1867 Silver Three Cent, MS64+
Elusive in Business Strike Format

3743 1867 MS64+ PCGS. CAC. The obverse is noticeably prooflike (partially so on the reverse), while both sides display vibrant orange-gold toning with cerulean-blue at the borders. A swath of untuned, silver-gray coloration crosses the upper-right quadrant of the reverse. The strike is sharp throughout except for a few of the star centers, and the date shows strike doubling. Just 4,000 circulation strikes were issued, the first year in a series of low mintages leading to the end of the three cent silvers in 1872 for business strikes and in 1873 for proofs. Population: 14 in 64 (2 in 64+), 7 finer (8/15). NGC ID# 22ZH, PCGS# 3687

PROOF THREE CENT SILVER

1856 Three Cent Silver, PR67 Ultra Cameo
The Only 1856 Ultra / Deep Cameo Certified

3744 1856 PR67 Ultra Cameo NGC. This moderately toned Superb Gem Cameo Type Two proof three cent silver offers deeply reflective fields, and each side is covered with smooth dove-gray toning. The numerous field die polishing marks in the fields resemble hairlines but were created during die cleaning before striking at the Mint.

While the exact number of proof three cent silvers struck in 1856 is unknown, Breen estimated in 1977 that somewhere between 30 and 40 pieces survive today in all grades. Although we believe the number is somewhat higher, this is a rare coin in proof format, with possibly around 60 pieces known in all grades. This is the sole Ultra / Deep Cameo certified of this date at either service (8/15).

Ex: Palm Beach Signature (Heritage, 11/2004), lot 5715; purchased by Eugene Gardner from Pinnacle Rarities (1/2008). NGC ID# 27C3, PCGS# 93703

THREE CENT NICKELS

1873 Open 3 Nickel Three Cent, MS65+
Only Two Coins Finer at PCGS

3745 1873 Open 3 MS65+ PCGS. CAC. The 1873 Open 3 three cent nickel had more than twice the mintage of its Closed 3 counterpart (783,000 to 390,000 pieces), but is nonetheless equally as rare (if not more so) in Gem grades. This example displays frosty silver-gray luster, with faint hints of ice-blue and pale gold seen when turned in-hand. The wreath is somewhat softly struck, though the preservation is seemingly perfect. Population: 34 in 65 (2 in 65+), 2 finer (8/15). NGC ID# 22NR, PCGS# 3740

1883 Three Cent Nickel, Sharp MS66
Conditionally Rare

3746 1883 MS66 PCGS. CAC. The 1883 nickel three cent piece had a scant mintage of only 4,000 coins and a proportionately low survival rate in Mint State. Uncirculated pieces are scarce in all grades, with MS62 examples being the most frequently offered. Choice or finer coins appear at auction even less often than the small certified populations would suggest. This is only the sixth time in more than two decades that we have offered a Premium Gem example. The most recent such occurrence was in lot 5552 of our 2013 FUN Signature sale, where a PCGS coin realized \$16,450. This piece is every bit as eye-appealing and the technical quality is impressive, even for the MS66 grade. Bold design elements rise above semiprooflike fields with a warm golden glow. It may be several years before another coin of this quality is offered. Population: 5 in 66, 4 finer (7/15). NGC ID# 2765, PCGS# 3751

PROOF THREE CENT NICKELS

1865 Three Cent Nickel, PR65
Only 500 Examples Struck

3747 1865 PR65 PCGS. CAC. From a small proof mintage of just 500 pieces, this impressive Gem displays sharply detailed design elements and moderately reflective fields throughout. Pale shades of greenish-gold toning blanket the pleasing surfaces, with no mentionable distractions. Population: 47 in 65 (2 in 65+), 15 finer (7/15). NGC ID# 275K, PCGS# 3761

1865 Three Cent Nickel, PR66
Attractively Toned

3748 1865 PR66 PCGS. Although the circulation strike 1865 nickel three cent piece is readily available, the proof variant is fairly elusive, especially in high grade. This Premium Gem is fully rendered with frosty motifs, although mirroring in the fields is not quite deep enough to warrant a Cameo designation. Lovely lavender-blue and champagne hues blanket each side. Population: 14 in 66, 1 finer (8/15). NGC ID# 275K, PCGS# 3761

PROOF SHIELD NICKELS

1867 No Rays Shield Nickel, PR66+ Sole Finest at PCGS

- 3749 1867 No Rays PR66+ PCGS.** The first proof issue of the No Rays type, seldom seen in Premium Gem condition. This Plus-designated coin is the sole finest at PCGS (8/15). The strike is tack-sharp, with the relief elements rising boldly above deeply mirrored fields. Light champagne toning over each side reveals hints of pale rainbow color when tilted beneath a light. Population: 10 in 66 (1 in 66+), 0 finer (8/15). NGC ID# 4T4L, PCGS# 3821

1874 Shield Nickel, PR67+ Among the Finest Certified

- 3750 1874 PR67+ PCGS.** The mintage is estimated but undocumented at 700+ pieces, according to the 2016 *Guide Book*. The present fully struck and pristine piece is predominantly light caramel-gold with lovely golden-brown and lime-green toning across the reverse periphery. This high-end Superb Gem is among the finest of the issue at either service. Population: 10 in 67 (1 in 67+), 0 finer (8/15). Ex: Sacramento ANA (Heritage, 3/2011), lot 3207, which realized \$6,612.50. NGC ID# 276R, PCGS# 3828

1877 Shield Nickel, PR67 Cameo Essential for a Complete Date Set

- 3751 1877 PR67 Cameo PCGS.** This beautifully preserved Superb Gem Cameo proof offers moderate reflectivity and mild yet distinct contrast. The most prominent attribute is the patina — periwinkle, mint-green, and lemon-gold, with occasional flashes of magenta at the margins. Easily among the most visually appealing of the 13 Cameos certified at this numeric level.

The 1877, the more elusive of two proof-only issues in the Shield nickel series, is among the most important dates for this early five cent design. Mintage figures are speculative, but the generally accepted total is just 900 coins, making it among the lower-mintage proof issues of the entire series. Obviously, this issue is in high demand among date collectors. This piece is tied for finest with seven other Cameos at PCGS; NGC has also seen five Cameos in this grade (one PR67 ★) and none are numerically finer. Ex: FUN Signature (Heritage, 1/2008), lot 2726; Eugene Gardner Collection, Part III (Heritage, 5/2015), lot 98131. NGC ID# 276U, PCGS# 83831

LIBERTY NICKELS

1885 Liberty Nickel, Attractive MS66 Perennial Favorite Key Date

3752 1885 MS66 PCGS. The always-popular key-date Liberty nickel, represented by this attractive, largely untoned Premium Gem PCGS example. The strike is full on all star radials and on Liberty's hair, coronet, and floral crown, and on the reverse, the lower-left ear of corn shows considerable detail, if not quite to the kernel-counting level. Some light die cracks show around the reverse periphery. Two marks — one a shallow depression on Liberty's chin, the other a small indent behind her mouth — are the only mentionable flaws on this nicely preserved coin. Population: 27 in 66 (2 in 66+), 3 finer (8/15). NGC ID# 2773, PCGS# 3846

1885 Liberty Nickel, MS66 Sought-After Key Date

3753 1885 MS66 PCGS. From a low mintage of fewer than 1.5 million pieces, the 1885 Liberty nickel was ignored by contemporary collectors, who usually just updated their collections by purchasing proofs from the Philadelphia Mint each year. As a result, few high-quality examples were saved and the 1885 is the business-strike key to the Liberty nickel series.

The present coin is a remarkable Premium Gem, with well-detailed design elements and vibrant mint luster on both sides. Some interesting spidery die cracks show in the legends and stars and the well-preserved surfaces display shades of pale gold toning. Population: 27 in 66 (2 in 66+), 3 finer (7/15). NGC ID# 2773, PCGS# 3846

**1887 Nickel, MS66+
Attractively Toned**

- 3754 1887 MS66+ PCGS. CAC.** Few 1887 Liberty nickels achieve a Premium Gem grade assignment, and only a small portion boast the coveted Plus designation. This outstanding coin is impressively vibrant beneath warm multicolor toning. The strike is above-average, and the grade is limited only by a few insignificant marks on the cheek. Population: 24 in 66 (3 in 66+), 3 finer (8/15). NGC ID# 22PL, PCGS# 3848

**1903 Liberty Nickel, MS67
Intense, Frosty Luster**

- 3755 1903 MS67 PCGS.** A mint-fresh coin with vibrant, frosty luster reminiscent of that seen on high-end Carson City Morgan dollars. This ice-white Superb Gem type coin is devoid of mentionable abrasions and showcases above-average sharpness on the stars and wreath, particularly on the corn ear to the left of the bowknot. Population: 3 in 67, 0 finer (8/15). NGC ID# 277E, PCGS# 3864

**1908 Nickel, MS66+
Among the Finest at PCGS**

- 3756 1908 MS66+ PCGS. CAC.** This radiant Liberty nickel type coin displays intense, frosty luster with traces of light golden color. The corn ear to the left of the wreath bow is a trifle soft, but the obverse stars are sharply defined. This Plus-graded, CAC-endorsed Premium Gem is among the finest 1908 nickels certified by PCGS. Population: 27 in 66 (3 in 66+), 0 finer (8/15). NGC ID# 24FR, PCGS# 3869

PROOF LIBERTY NICKELS

**1901 Nickel, PR67 Deep Cameo
Tied for Finest Certified**

- 3757 1901 PR67 Deep Cameo PCGS.** The proof Liberty nickel collector's dream coin, this boldly contrasted, deeply mirrored Superb Gem is tied with one other for the finest honors as Deep Cameo representatives certified by PCGS; NGC has only encapsulated one Ultra Cameo coin, none are finer at either service (8/15). The design definition on this piece is as impressive as its preservation and eye appeal, and the surfaces are nearly brilliant, save for a faint golden hue that attests the originality of the surfaces. A beautiful example of this unexpected condition rarity, from a mintage of 1,985 coins. NGC ID# 278B, PCGS# 93899

**1905 Nickel, Superb Gem Cameo
Razor-Sharp Strike**

- 3758 1905 PR67 Cameo PCGS.** An exquisite, contrasted Superb Gem proof with full details on both sides and virtually no discernible imperfections. The strike is razor-sharp on the frosted central motifs and especially so on the oft-encountered, lower wreath trouble spots. Deep, glassy-mirrored fields are devoid of toning or hairlines. Rare in this high grade — neither service reports a finer Cameo example. Population: 4 in 67 Cameo, 0 finer (8/15). NGC ID# 278F, PCGS# 83903

BUFFALO NICKELS

1913 Type Two Buffalo Nickel, MS67 Among the Finest at Either Service

- 3759 1913 Type Two MS67 PCGS.** Unlike its plentiful Type One counterpart, the 1913 Type Two Buffalo nickel is rarely seen in Superb Gem condition. This MS67 example glows with warm mint-gold and reddish-amber toning that blankets soft mint luster and virtually undisturbed surfaces. The strike is a trifle soft on the bison's shoulder and the hair above the Indian's braid, but the overall eye appeal is nonetheless outstanding. Population: 24 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 22PZ, PCGS# 3921

1914-D Nickel, MS66+ High-End, Semikey Early Issue

- 3760 1914-D MS66+ PCGS. CAC.** The dual endorsements of the PCGS Plus designation and the CAC green label are not to be ignored when evaluating this Premium Gem nickel. Certainly, the exceptionally sharp strike and satiny, nickel-gray patina with lilac overtones convey impressive eye appeal. The lightly textured surfaces are for all purposes unmarked save for two or three inconsequential, microscopic spots. It is the technical quality that sets this piece apart from other candidates, as confirmed by the high-end grade — one of two nickels at this level to receive such an honor from PCGS. Population: 2 in 66+, 7 finer (8/15). NGC ID# 22R5, PCGS# 3925

1914-S Buffalo Nickel, MS66 Few Pieces Are Finer

- 3761 1914-S MS66 PCGS. CAC.** Only a handful of finer examples exist according to the population reports — the result of several factors including relatively low mintage, poorly spaced dies, die erosion, and few well-preserved coins. The dies were properly spaced when this Premium Gem was struck, since it possesses the crisp details of a sharp strike on both sides of the coin. The beginnings of die erosion appear as slight roughness near the margins, and several faint die cracks are visible near the borders. Otherwise, the coin is essentially mark-free and pleasingly lustrous. A hint of gold translucent toning enlivens the silver-lilac surfaces. Population: 36 in 66 (6 in 66+), 1 finer (7/15). NGC ID# 22R6, PCGS# 3926

1918/7-D Nickel, AU58
Scarce Overdate Issue, FS-101

3762 1918/7-D FS-101 AU58 NGC. The *Bowers Guide Book* estimates a production (not survival) of 100,000 coins for the 1918/7-D Buffalo nickel—an overgenerous number, in our view—but, nonetheless, it is an issue where the survival rate is less important than the condition of the survivors. Given that 13 years passed between the production and the first mention in an auction catalog (Barney Bluestone, 10/1931), most of the survivors today range from Very Good to Very Fine. Coins below Very Good make it difficult to distinguish the overdate feature. Most examples are struck from eroded dies, although a few sharply struck pieces exist. The great preponderance of examples also show a die break at the top the Indian's braid, which in the latest state extends to the mouth (as seen here). This is nondiagnostic, however, as some specimens lack the die break, and some 1918-D nonoverdate pieces also show a similar die break.

Light gray and golden patina cover each side with significant underlying mint luster. A few tiny specks of carbon can be found on the obverse, but all in all this is an attractive and unusually high-grade example of this scarce overdate. Census: 31 in 58, 48 finer (8/15). NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1918-S Nickel, MS65
Seldom Seen This High Grade

3763 1918-S MS65 PCGS. The 1918-S Buffalo nickel is known for its frequently weak strike, a characteristic which hinders the availability of coins worthy of a Gem grade. Choice Mint State coins are seen with mild frequency, but for the collector seeking high-quality, a few MS65 coins exist and are occasionally seen. This is such a coin. Immediately obvious is moderate weakness of strike on the central devices, but closer study with a lens reveals exceptional surface quality which denotes the grade. Somewhat opposite from usual, the reverse appears fairly fresh, while the obverse shows extensive die erosion in the fields. Nonetheless, the date and LIBERTY are bold. Eye appeal is heightened by a light golden hue overall. Population: 37 in 65 (3 in 65+), 1 finer (8/15). NGC ID# 22RK, PCGS# 3940

**1920-S Buffalo Nickel, MS64+
Challenging Issue in High-Grade**

3764 1920-S MS64+ PCGS. CAC. The 1920-S Buffalo nickel was not well-produced and the issue is one of the most challenging of the series in high-grade. This high-end Choice example offers well-detailed design elements, with just a touch of softness on the usual trouble spots, like the bison's shoulder and the hair above the braid. The well-preserved surfaces are lustrous and attractively toned in shades of champagne-gold and bluish-gray. PCGS has graded 22 numerically finer examples (8/15). NGC ID# 22RS, PCGS# 3946

**1921 Buffalo Nickel, MS67
None Certified Finer**

3766 1921 MS67 PCGS. The 1921 Buffalo nickel is an available date in the absolute sense, but Superb Gem examples are rarely seen. This magnificent MS67 coin is among the finest certified. The strike is bold, despite minor die erosion in the fields, and the satiny surfaces yield soft champagne-gray toning. Population: 23 in 67, 0 finer (8/15). NGC ID# 22RT, PCGS# 3947

**1920-S Nickel, MS65 ★
Richly Toned, High-End**

3765 1920-S MS65 ★ NGC. Most authorities on the Buffalo nickels are critical of the quality of 1920-S nickels, with both strike and luster given the proverbial thumbs-down. While the strike is not spectacular on the present Gem — and good luck finding a coin with such a strike! — the luster and toning more than make up any deficit in eye appeal. Liquid-frost luster is silver-to-blue in the centers with lush gold, orange, rose, and violet peripheral elements. Surface quality is excellent, as demanded of a Gem. One of only a small number of MS65 examples known to NGC, with few Premium Gems finer. Census: 15 in 65 (1 in 65+, 1 in 65 ★), 4 finer (8/15). NGC ID# 22RS, PCGS# 3946

**1924-D Buffalo Nickel, MS66
Extremely Rare This Fine**

3767 1924-D MS66 PCGS. The 1924-D Buffalo nickel draws a modest premium in the upper circulated grades, but its availability does not begin to significantly drop until the Gem level, where it is scarce; in MS66, this Denver issue is a major condition rarity in the series, and finer examples are unknown. This piece is one of only seven Premium Gems at PCGS, and NGC contributes only a single other example in this grade (7/15).

This unsurpassed representative shows surprisingly little evidence of die erosion for a branch mint issue from this period, although the hair above the Indian's braid and the bison's shoulder and head exhibit predictable striking softness. The surfaces are delicately preserved and display just a hint of light golden toning. The peripheral legends and mintmark are bold. NGC ID# 22RY, PCGS# 3952

1928-D Nickel, MS66+
Glowing Mint Luster

- 3768** 1928-D MS66+ PCGS. CAC. Few 1928-D Buffalo nickels claim quality worthy of a Premium Gem grade, and finer coins are virtually uncollectible. This Plus-designated piece is the sole finest at PCGS (8/15). The surfaces are lightly toned in pastel hues over luminous, frosty mint luster. The bison's shoulder exhibits a touch of softness, but the overall quality of this piece is far finer than most other examples of the issue. Population: 50 in 66 (1 in 66+), 0 finer (8/15). NGC ID# 22SC, PCGS# 3964

1937-D Three-Legged Nickel, MS63
Pastel Red and Gold Toning

- 3769** 1937-D Three-Legged, FS-901, MS63 PCGS. In his 1988 *Encyclopedia*, Walter Breen stated that a novice Mint employee named "Mr. Young" created the famous Three-Legged nickel when he lapped a reverse die to remove clash marks. We remain skeptical of Breen's assignment, since he does not list a source. The present example has satiny and unblemished rose-red, butter-gold, and olive-gray surfaces. The bison's back leg is granular, diagnostic for the key variety.
Ex: Orlando FUN Signature (Heritage, 1/2004), lot 5460, which realized \$4,600. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

JEFFERSON NICKEL

1942-D/D Nickel, MS65 Full Steps
D Over Horizontal D

- 3770** 1942-D/D D Over Horizontal D, FS-501, MS65 Full Steps PCGS. This *Guide Book* variety is the rarest in the series in high grade, and poses a significant challenge for the Registry Set collector. The mintmark is double punched, with the first impression rotated 90 degrees counterclockwise. This diagnostic feature is clearly discernible with low-power magnification. The present coin is tied with just four others as the finest at PCGS in the Full Steps category; only 23 Full Steps examples have been certified by that service in all grades (8/15). This representative is boldly struck and well-preserved — a thin mark in the field below the BU in PLURIBUS is the only mentionable abrasion. Satiny luster displays a thin champagne patina over each side with modest rose, blue, and mint-green underlying hues. NGC ID# 22TL, PCGS# 38496 Base PCGS# 84015

PROOF JEFFERSON NICKELS

1940 Jefferson Nickel, PR68 Reverse of 1938

- 3771** 1940 Reverse of 1938, FS-901, PR68 PCGS. Called an "extremely rare variety" in the *Cherrypickers'* reference, the Reverse of 1938 proof 1940 nickel is a high-demand issue, particularly among Registry Set variety collectors. A small number of coins are known in the PR64 to PR66 grade range, but this piece is one of only two PR68 coins at PCGS, with none finer (8/15). This variety is easily distinguished from its common Reverse of 1940 counterpart by examining the steps of Monticello. The 1938 hub shows the steps slightly indistinct with mild "wavy" appearance, while the 1940 hub shows the steps crisp and straight. This gleaming nickel-silver example is fully struck and shows mirrored, unblemished fields. NGC ID# 279Y, PCGS# 38540 Base PCGS# 94177

1952 Nickel, PR67+ Deep Cameo Registry Set Candidate

- 3772** 1952 PR67+ Deep Cameo PCGS. Remarkably few proof 1952 Jefferson nickels have been deemed worthy of a Deep Cameo designation, regardless of grade. This Plus-graded Superb Gem is one of only 15 Deep Cameos at PCGS, including 11 in this grade (two in MS67+) and three finer (8/15). Untoned surfaces yield frosty design elements and needle-sharp definition, with seemingly infinite depth of mirroring in the fields. NGC ID# 27A6, PCGS# 94184

1971 No S Nickel, PR69 Deep Cameo Rare, Tied for Finest Certified

- 3773** 1971 No S, PR69 Deep Cameo PCGS. This intriguing *Guide Book* variety is rare in Deep Cameo grades, with this nearly perfect example tied with just five others for finest at PCGS (8/15). Intricate definition of every detail is illuminated by frosty luster over the motifs, while the fields exhibit seemingly infinite depth of mirroring. NGC ID# 22YN, PCGS# 94204

EARLY HALF DIMES

1794 Half Dime, Choice XF
Rare V-2, LM-2 Die Marriage

- 3774** 1794 V-2, LM-2, R.5, XF45 ANACS. This piece is evenly struck, with strong central definition and complete dentils around each periphery. Deep gunmetal-gray patina blankets the surfaces. This issue is highly popular as the first half dime coinage of the United States Mint. Production is estimated to have totaled 7,756 coins struck during the first quarter of 1795. PCGS# 38582 Base PCGS# 4250

1794 Half Dime, V-3, LM-3, XF40
Excellent Color and Detail

- 3775** 1794 V-3, LM-3, R.4, XF40 PCGS. This is a remarkably attractive example of the first half dime coinage, evenly struck and well-centered with all major design elements remaining sharp. The surfaces exhibit lovely steel-blue and light gray patina without adjustment marks or bothersome abrasions. A small planchet void in the right obverse field near Liberty's neck is mint-made. A simply outstanding coin for the grade. NGC ID# 22ZT, PCGS# 38583 Base PCGS# 4250

1794 Half Dime, V-3, LM-3, AU58
Sharp and Attractive

- 3776** 1794 V-3, LM-3, R.4, AU58 PCGS. Collectors longing to acquire a piece of the United States Mint's first silver coinage will find silver dollars elusive and proportionately expensive. As an alternative, half dimes and half dollars dated 1794 are more available prospects, at least in lower grades. This Borderline Uncirculated 1794 half dime represents a seldom seen opportunity for the budget-conscious collector to acquire an upper-end example of the first half dime issue. The strike is exemplary, showing razor-sharp detail on the stars, portrait, and eagle's plumage. The border dentils are complete and grade-limiting wear is almost nonexistent. Golden-gray toning lightens toward the center on each side. Population (all varieties included): 15 in 58, 48 finer (8/15). NGC ID# 22ZT, PCGS# 38583 Base PCGS# 4250

1795 Flowing Hair Half Dime, MS66
Popular V-5, LM-8 Variety
Ex: Gene Gardner

3777 1795 MS66 PCGS Secure. CAC. V-5, LM-8, R.3. The two-year mintage figure of 86,416 pieces for the Flowing Hair half dimes reported in the *Guide Book* includes the far-rarer 1794 and the more available 1795 issue, some of those latter pieces dating back to an old hoard distributed in the 1880s by coin dealer W.E. Woodward. There are 10 known die varieties for 1795 and this coin represents the relatively available LM-8 variety, with star 1 quite close to the bottom curl, and the right edge of the upright of 1 centered over a dentil. On the reverse, the berries are arranged three left, four right, and there are no inner or outer berries underneath UN(ITED) and no berries under the wings.

The 1795 Flowing Hair half dime has been a popular issue with collectors since the earliest days of the hobby and examples began appearing at auction as early as the A.C. Kline Sale (Moses Thomas & Sons, 6/1855), lot 259. Of course, prices realized were modest in those early days, but recent sales have seen remarkable increases for this issue. The current prices realized record belongs to the MS67 Prooflike NGC coin in lot 5547 of the Chicago Signature (Heritage, 8/2014) that brought \$152,750.

The present coin is a great representative of the Flowing Hair design type. Both sides display slate-gray central coloration with iridescent blue, lilac, and rose toning in the fields and near the border areas. The strike definition displayed by this conditionally scarce Premium Gem example is remarkably bold, with isolated instances of weakness seen on Liberty's eye, the eagle's central wing feathers, and the wreath stem directly adjacent to T in UNITED. Recutting is evident on 795 in the date. There are no unsightly adjustment marks, planchet problems, pinscratches, or abrasions noted on either side of this marvelous specimen. We expect intense competition from series specialists and Registry Set enthusiasts when this lot is called. Population: 11 in 66 (2 in 66+), 2 finer (8/15).

Ex: Collections of Russell J. Logan & Gilbert J. Steinberg (*Bowers and Merena*, 11/2002), lot 1121; Eugene Gardner; *Gardner Collection, Part II* (Heritage, 10/2014), lot 98168, realized \$76,375. NGC ID# 22ZV, PCGS# 4251

1795 Half Dime, V-5, LM-8, AU58
Cracked Obverse

- 3778** 1795 V-5, LM-8, R.3, AU58 NGC. Light tan, lime, and rose colors enrich this impressively defined Flowing Hair half dime. No adjustment marks or abrasions are evident, which ensures the eye appeal. The eagle's breast is indifferently struck, as usual for the type, but the wings, hair, stars, wreath, and legends are all crisp. A lengthy and relatively light die crack bisects the obverse between the Y in LIBERTY and the 7 in the date.
Ex: Long Beach Signature (Heritage, 9/2005), lot 2237.
From The Stephen A. Walling Collection. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1795 V-5, LM-8 Half Dime, AU58
Logan-McCloskey Plate Coin

- 3779** 1795 V-5, LM-8, R.3, AU58 NGC. Though Logan-McCloskey describes this issue as being "available in all grades through mint state," their plate coin, formerly in the collection of Ed Price, is perhaps the nicest AU58 example imaginable. Powder-blue, ruby-red, lavender, and butter-gold patina drapes satiny surfaces that show minimal wear. As shown in the plate, the reverse displays a number of moderate adjustment marks (as made) that add charm to the coin.
Ex: Baltimore Signature (Heritage, 3/2009), lot 689, which realized \$6,900. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1795 Flowing Hair Half Dime, MS66
Only Two Numerically Finer at PCGS
Popular V-6, LM-9 Variety

3780 1795 V-6, LM-9, R.4, MS66 PCGS. CAC. The 1795 Flowing Hair half dime claims a mintage of 78,660 pieces, with 10 die varieties known for the date. A total of eight obverse and five reverse dies were combined to produce the 10 known varieties. This coin represents the LM-9 variety, identified by the low position of L in LIBERTY, with IB distant, and the reverse with one inner and no outer berries under the eagle's left (facing) wing. The LM-9 variety is scarce in absolute terms, but it is one of the three most "common" varieties of this date. The obverse die was used previously to strike the LM-8 variety of 1795. This was the only use of the reverse die.

The 1795 Flowing Hair half dime has been popular with collectors since the earliest days of the hobby. The issue began appearing at auction as early as the A.C. Kline Sale (M. Thomas & Sons, 6/1855), where an example was offered in lot 259. Philadelphia attorney and coin collector Harold P. Newlin published the first work on half dime die varieties in 1883, listing the LM-9 variety as his number 3 and noting, "This variety is scarce." The record price realized for a 1795 half dime was recently set by the spectacular MS67 PCGS LM-10 specimen in the Pogue Collection, which brought \$176,250.

The present coin is a delightful Premium Gem with sharply detailed design elements and vibrant mint luster throughout. Both sides show heavy clash marks and the obverse shows the characteristic die crack from the rim through Y and the bust, down through the top of 7 and back to the rim. A few light planchet adjustment marks show in the area of the eagle's legs. The well-preserved surfaces display attractive shades of lavender, blue, and greenish-gold toning and eye appeal is terrific. Population (all varieties): 11 in 66 (2 in 66+), 2 finer (7/15). PCGS# 38593 Base PCGS# 4251

1795 Half Dime, V-4, LM-10, AU58
Lovely Type Coin

- 3781 1795 V-4, LM-10, R.3, AU58 NGC. An appealing, sharply detailed Flowing Hair type coin, showing just the slightest brush of friction over the high points of the eagle and Liberty's hair curls. Faint adjustment marks appear along the lower-left reverse border, but the dentils are complete elsewhere. Both sides show lovely multihued toning in a mottled pattern. Housed in a prior generation holder. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251
-

1795 V-4, LM-10 Half Dime, Lustrous Gem

3782 1795 V-4, LM-10, R.3, MS65 PCGS. CAC. Late obverse die state, showing a considerable retained cud at the rim above TY and star 9 to the right. On the LM-10 variety, star 1 is joined to a tip of curl 2 on the obverse, and star 15 solidly connects with the front of the bust. The digit 1 touches curl 1, and the flag of the 5 connects to the underside of the bust. T and Y are close at the top. Stars 1 and 2 in particular, but most of the other left-side stars as well, show evidence of die lapping — the dies clashed early on this marriage and were subsequently lapped — and are markedly weaker than the right-side stars. The single outside berry between UN in UNITED is sufficient to attribute the reverse. The reverse die is rotated clockwise about 90 degrees with respect to the obverse die.

Splendid luster and surfaces that are problem-free are the calling cards of this Gem Flowing Hair dime, one of the more available die marriages from this two-year type (along with 1794) but quite a conditional rarity in so fine a grade. Glints of gold, aqua, and jade are more prominent at the rims on each side, with coin-gray centers and a bold strike throughout. Bold clash marks are more prominent on the reverse, along with a couple of large die cracks on the left side of the wreath.

The relative availability of the LM-10 die marriage will make this piece a potential key acquisition for type collectors. For the 1795 date, PCGS reports 11 in MS65, one in MS65+, and 14 submissions (but likely fewer separate coins) finer (8/15). This piece is one of only five in MS65 with the CAC green approval sticker. The aesthetics as well as the technicals should make the bidder cards fly high when this lot is called. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1796 Half Dime, AU53
V-1, LM-1, LIKERTY

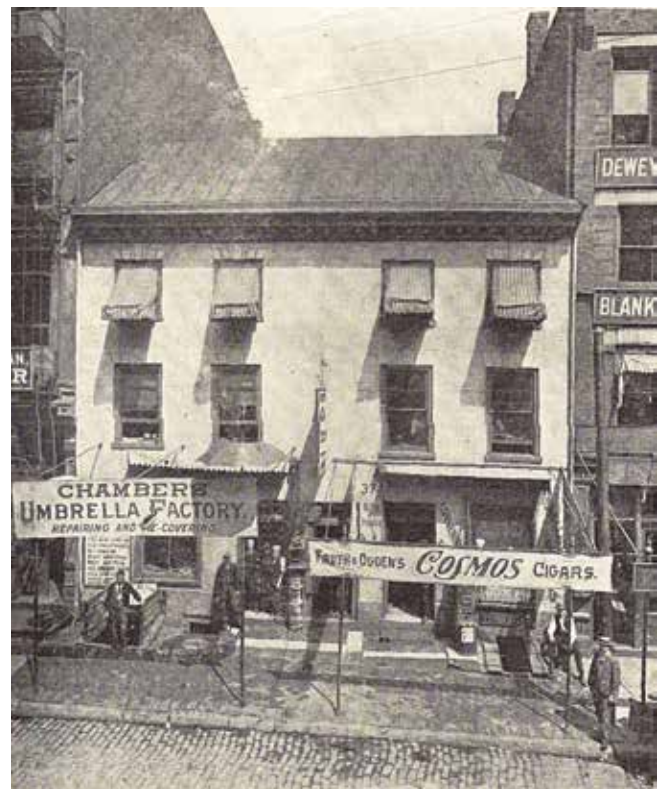

- 3783** 1796 LIKERTY, V-1, LM-1, R.3, AU53 PCGS. Ex: Troy Wiseman Collection. The motifs are expertly centered with sharp definition that is virtually unhindered by the light trace of wear across the highpoints. A shallow planchet void (as produced) is noted behind Liberty's head, but the dove-gray surfaces are free of unduly bothersome circulation marks. Both the surface preservation and the eye appeal are premium quality for the grade. When this coin was offered by Bowers and Merena in 1992, it was part of a remarkable 1796 type set, complete from half cent to gold.
Ex: *Witham and Sansoucy Collections* (Bowers & Merena, 9/1992), lot 1029; *ANA Signature* (Heritage, 8/2001), lot 5616; *Long Beach Signature* (Heritage, 9/2006), lot 1195.
From *The Stephen A. Walling Collection*. NGC ID# 22ZX, PCGS# 38596 Base PCGS# 94254

1797 15 Stars Half Dime, VF30
Midgrade V-2, LM-1 Example

- 3784** 1797 15 Stars, V-2, LM-1, R.3, VF30 PCGS. The obverse fields and to a smaller extent portions of the reverse field show deep blackish-blue patina with silvery high points, the reverse adding some reddish toning on the eagle. This piece shows much desirability in terms of moderate wear and would fit nicely into a midgrade type set to represent the Small Eagle Reverse type, or for a *Guide Book* variety collection. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

1797 15 Stars Half Dime, MS63
V-2, LM-1

3785 1797 15 Stars, V-2, LM-1, R.3, MS63 NGC. LM-1 is readily identified by its 15-star obverse. This was the first variety coined in 1797, struck with a head die which was likely prepared before Tennessee joined the Union in June 1796. The second obverse prepared for 1797 coinage had 16 stars surrounding Liberty, and the third and final head die shows the number of stars reduced to 13, representing the original 13 colonies, rather than the number of actual states in the Union.

Of the four die marriages for the 1797 half dime, LM-1 is the most frequently seen in Mint State. The present example is weakly struck on the eagle and the center of the obverse portrait. Such an anomaly is not unusual for the issue, and this piece makes up for it in that the surfaces display near-brilliant, satiny luster and are free of any major abrasions. Evenly struck with virtually complete dentils around each periphery. Census: 6 in 63, 7 finer (8/15). NGC ID# 222Z, PCGS# 38597 Base PCGS# 4258

1800 Half Dime, Choice AU
V-2, LM-3, LIBEKTY

3786 1800 LIBEKTY, V-2, LM-3, R.4, AU55 PCGS. The LIBEKTY variety, although undesignated as such on the PCGS holder. The R punch used to help enter LIBERTY was defective, missing the upper crossbar, and resembles (with some imagination) the letter K. This is a lightly toned and partly lustrous example with the usual die buckling beneath the eagle's beak and some softness of strike on the right (facing) wing opposite the obverse bust tip. Smooth aside from a small granular area right of the date.

Ex: Long Beach Signature (Heritage, 2/2009), lot 830.

From The Stephen A. Walling Collection. NGC ID# 2326, PCGS# 38603 Base PCGS# 4265

BUST HALF DIMES

1832 V-13, LM-10.1 Capped Bust Half Dime Multicolor, High-End Superb Gem

- 3787** 1832 V-13, LM-10.1, R.3, MS67+ PCGS. CAC. Faint die clashing at the throat and ear identify the LM-10.1 variety. Star 3 is lightly repunched, and the O in OF is broadly recut at the top (the Logan-McCloskey reference describes it as a Small O over a broken Large O). Three remarriages of the LM-10 dies plus the original pairing (LM-10.1) make this variety an interesting die study.

The obverse fields of the current example are prooflike, although the reverse is more frosted and negates a prooflike designation. Delightful multicolor toning covers both sides, with pink, blue, and peach-gold shades grabbing the most attention. The strike is razor-sharp. Among all Capped Bust half dimes, the 1832 is the second-most available date (behind the 1835 issue), yet in Plus-graded MS67 this coin is arguably the second-finest known. Population (all varieties): 10 in 67 (1 in 67+), 1 finer (7/15). NGC ID# 232E, PCGS# 38677 Base PCGS# 4279

1834 Half Dime, V-4, LM-4, MS67 Tied for Finest at Both Services

- 3788** 1834 MS67 NGC. V-4, LM-4, R.1. Low date. Star 7 points to the top of the headband, and the last S in STATES is somewhat right of the S in PLURIBUS. Silver-gray, walnut-brown, and mild aqua toning mingle over the surfaces of this sharply struck and exceptionally preserved Superb Gem late Capped Bust half dime. The central devices in particular, along with the fields, are free of mentionable defects or distractions. Census: 7 in 67 (1 in 67 ★), 0 finer (8/15). NGC ID# 232G, PCGS# 4281

1835 V-7, LM-10 Half Dime, MS67 Small Date, Small 5C

- 3789** 1835 Small Date, Small 5C, V-7, LM-10, R.1, MS67 NGC. An essentially brilliant Superb Gem. Coruscating and pristine with a sharp strike. LM-10 is distinctive for a misaligned date, die erosion near the profile, a floating upper berry, and a break within the upper half of the second S in STATES. This piece is among the highest graded examples, although an MS68 ★ coin appeared in our 2009 Central States Signature.
Ex: Long Beach Signature (Heritage, 2/2003), lot 6149. NGC ID# 232H, PCGS# 38719 Base PCGS# 4285

1836 Half Dime, Eye-Appealing MS66 V-6, LM-5, Small 5C

- 3790** 1836 Small 5C, V-6, LM-5, R.2, MS66 NGC. Ex: Hilt Collection. As a date, the 1836 half dime is scarce above the MS64 grade level, and is prohibitively rare finer than MS66. LM-5 is a fairly available variety, distinguished by recutting on star 1 and on the UN in UNITED. This piece is fully struck and incredibly well-preserved. Light golden toning shows tinges of russet and aquamarine around the peripheries. Census (all varieties included): 26 in 66 (2 in 66+), 4 finer (7/15). NGC ID# 232J, PCGS# 38728 Base PCGS# 4288

SEATED HALF DIMES

1837 No Stars Half Dime, Beautiful MS67 Early Die Impression

- 3791** 1837 No Stars, Large Date (Curl Top 1) MS67 NGC. V-1, Flynn-001, Misplaced Date. The date on this piece is recut at the dentils, with the 8 tripled. This is diagnostic of proofs and the earliest circulation strikes from the V-1 die pair. The present coin is unquestionably an early die impression, as evidenced by the tack-sharp detail and semiprooflike fields. Undoubtedly saved at the time of issue, this magnificent No Stars type coin is in a virtually perfect state of preservation — only a single tiny mark below the A in HALF is mentionable, and this just for the sake of accuracy. Both sides show original olive-gold, russet, and cherry-red toning that glows with satiny luster. Census (all varieties included): 17 in 67 (1 in 67 ★), 2 finer (8/15). NGC ID# 232M, PCGS# 4311

1838-O No Stars Half Dime, AU53 Famous New Orleans Issue

- 3792** 1838-O No Stars AU53 NGC. Ex: Hilt Collection. The 1838-O is a famous date in the Seated Liberty half dime series. It is the only mintmarked issue of the No Stars type and is also elusive in all grades, boasting a limited mintage of only 70,000 coins. This About Uncirculated example shows little wear, with original olive-gray, gold, and lilac toning over each side. There are no distractions and the eye appeal is outstanding. Census: 1 in 53, 21 finer (7/15). NGC ID# 232N, PCGS# 4314

1857 Half Dime, Stunning MS68 Sole Finest Certified

- 3793** 1857 MS68 NGC. Swirls of electric-blue, salmon-pink, and antique-gold iridescence occupy both sides of this stunning Superb Gem half dime, awash with strong luster. The design elements are sharply struck, save for the typical weakness in the dentils at the left borders. Immaculate preservation enhances the coin's eye appeal.

This high-mintage issue approaching 7.3 million pieces is a common date in the series. Even Gems can be located without much trouble. Premium Gems are scarce, and the date becomes rare in MS67. This is the sole finest example seen by either NGC or PCGS.

Ex: Long Beach Signature (Heritage, 2/2000), lot 5441. NGC ID# 233S, PCGS# 4365

**1860 'Transitional' Half Dime, MS66
Judd-267, Remarkably Toned**

- 3794 1860 Transitional MS66 NGC. CAC. Judd-267, Pollock-315, R.4.** This is the well-known "coin without a country" half dime, also known as a "transitional" variety, although it was a rarity created for the coin trade by Mint Director Snowden. On the regular issue 1860, the legend UNITED STATES OF AMERICA was moved from the reverse to the obverse. Judd-267 pairs the former obverse and new reverse, omitting the country name. The fields display heavy die striations and, of course, the diagnostic die scratch is present from the back of the rock to the nearby denticles. Weakly defined, as usually seen, each side shows light pastel iridescence. NGC ID# 2346, PCGS# 4373

PROOF SEATED HALF DIMES

**1859 Half Dime, PR66 Cameo
Paquet Obverse**

- 3795 1859 PR66 Cameo PCGS. CAC.** The 1859 proof half dime utilizes a modified obverse attributed to Anthony Paquet, which shows a slightly slimmer Liberty and stars with hollow centers. This Premium Gem Cameo displays these motifs to their full advantage. The obverse is lightly toned golden and exhibits stark cameo contrast, while the reverse shows deeper lavender-gray, amber, and blue hues. Population: 3 in 66 Cameo, 1 finer (8/15). NGC ID# 23CD, PCGS# 84438

**1866 Half Dime, PR67
One-Sided Cameo**

- 3796 1866 PR67 PCGS.** A mintage of 725 proof half dimes in 1866 was typical for the period, but the availability of survivors declines rapidly above PR64. In Superb Gem condition, the 1866 proof is a great rarity. This piece is tied with one other as the finest non-Cameo at PCGS (8/15). The strike is bold and the reverse displays stark field-device contrast amid warm champagne toning. The obverse is slightly subdued by dusky lavender-gray. NGC ID# 2363, PCGS# 4449

1869 Half Dime, Iridescent PR67

- 3797 1869 PR67 PCGS. CAC.** Rose-gray, violet, and sea-green iridescence colors the well-preserved surfaces of this Superb Gem proof half dime. The relief elements are lightly frosted and the fields are brightly reflective, but the rich toning inhibits bolder contrast. Nevertheless, this is a highly appealing example. Half dime production returned to pre-Civil War levels in 1869, with the Mint striking 208,000 coins for circulation. Proof production remained steady at 600 examples, the same as the previous year. PCGS reports only two other PR67s and none finer, while NGC has encapsulated 10 non-Cameo coins in PR67 (one PR67 ★) with one PR68 finer (8/15). NGC ID# 2366, PCGS# 4452

PATTERN

1792 Copper Disme, Judd-10, XF40
The 1914 ANS Exhibition Plate Coin
Ex: Wurtzbach-Partrick

3798 1792 Disme, Judd-10, Pollock-11, XF40 PCGS Secure. Ex: Wurtzbach, Donald G. Partrick Collection. 57.0 grains. Along with technical aspects of coinage, the Mint in 1792 experimented with visual representations of Liberty. Three distinct styles emerge. The Birch cents and the half disme present Liberty with loose and curly hair, while the Eagle-on-Globe quarters depict a neatly coifed and braided Liberty. Finally, the Silver Center cents, Fusible Alloy cents, and dismes adorn Liberty's head with straighter, flowing hair. All three approaches find similarities within contemporary art. The Liberty of the Eagle-on-Globe quarter compares favorably to that of Samuel Jennings' 1792 painting "Liberty Displaying the Arts and Sciences," today reposing in the reading room of the Library Company of Philadelphia. Liberty is virginal, slender, and personifies the association between learning and liberty. The painting is somewhat evocative of the motto LIBERTY PARENT OF SCIENCE AND INDUSTRY as books, scientific instruments, and symbols of artistic endeavor are placed at Liberty's feet, squarely within her dominion.

The Birch cents and the half disme reflect the fashion sensibility of the 1790s, a decade shifting in the direction of informality. "Hedgehog hair" is especially apparent on the G★W.P.T. Birch cent (Judd-6), while the other Birch cents, and the half disme, present Liberty surrounded with free flowing and curled hair. The informality did not reflect any less preparation. Diderot's Encyclopedia, well known among numismatists for its description of coining machinery, even included a plate depicting the construction of coiffure. The similarity of Liberty on the half disme and Birch pieces has led many writers to assume a common engraver. This is a plausible conjecture, but further evidence eludes researchers.

The Silver Center and Fusible Alloy cents, with the disme, present Liberty with straighter, flowing hair. The most obvious design source is Augustin Dupré's Libertas Americana medal, conceived and produced under the direction of Benjamin Franklin beginning in 1782. The Libertas medal was distributed throughout Europe and the United States and reproduced in various media. By 1792, the image was well known. The Libertas portrait faces west (signifying the New World), with the hair extended in the opposite direction. Franklin included an "Explication" with each medal, which indicated that the streaming hair was intended to convey the idea of "Liberty in action." The Libertas medal exhibits substantial texture in the hair not replicated in the American coinage, a reminder that the best engravers still resided in the Old World. Certain design elements of the 1792 disme carried forward to the 1793 half cent, including the left-facing Liberty with hair flowing to the right, Liberty's apple cheek, and recessed eye.

Roster of the 1792 Reeded Edge Copper Dismes (Judd-10)

The 1792 reeded edge copper disme is the most available of the 1792 patterns, but remains rare in an absolute sense. Fewer than 20 examples are traced, similar to the Getz silver half dollars of the same year. The population profile is similar to that of the silver half disme. A disproportionate number of high grade examples survive, yet, at the same time, a good number of coins exhibit signs of circulation. The following roster is based on work by Pete Smith, as part of research for the book *1792: Birth of a Nation's Coinage*, to be published, along with co-authors Joel Orosz and Leonard Augsburger, by Heritage Galleries.

1. **SP65 Brown PCGS.** 58.6 grains. James W. Ellsworth private sale (3/1923) to John Work Garrett; The Garrett Collection Part IV (Bowers and Ruddy, 3/1981), lot 2352, realized \$54,000; Marvin Browder; Alhambra Coin Center, private sale (1998); Hanks & Associates; Heritage (E-Fair Signature, 10/1999) lot 6187, not sold; Coin World ad 5/22/2000, listed at \$700,000; Rare Coin Wholesalers; Benchmark Ventures L. P.; Legend Numismatics; Bob Simpson.
2. **PR62 Brown NGC.** Dr. J. Hewett Judd; Abe Kosoff, 1962, Illustrated History lot 14; Stuart Levine private sale 3/26/2001; Ed Price; ANA World's Fair of Money (Heritage, 7/2008), lot 1406, realized \$690,000; Greensboro Collection; ANA National Money Show (Heritage, 10/2012), lot 366, realized \$587,500; Cardinal Collection Educational Foundation.
3. **Uncirculated.** ANA (Jess Peters, 8/1973), lot 1088, realized \$9000; Alan V. Weinberg.
4. **Uncirculated.** 58.8 grains. Mint Cabinet (T. L. Compartment 1914 catalog, #1494); Smithsonian Institution #87.060.28/29.
5. **AU58 PCGS.** Crosby plate X, 18; Allison W. Jackman (Henry Chapman 6/1918), lot 224; Loye L. Lauder (William Doyle Galleries 12/1983), lot 237, realized \$15,000; Stuart Levine and Anthony Terranova; Bertram Cohen; Dana Linett; David Henderson; Benson Collection (Goldberg's 2/2001), lot 152, realized \$109,250; Stuart Levine; Ed Price; Stuart Levine 10/4/2004; William H. LaBelle, Sr. (American Numismatic Rarities 7/2005), lot 604, realized \$175,000.
6. **SP55 PCGS.** 57.6 grains. Eric P. Newman Numismatic Education Society (Heritage 5/2014), lot 3042, realized \$499,375; Anthony Terranova.
7. **AU55 PCGS.** 60.2 grains. Hollinbeck (7/1954), lot 964; Norweb Collection Part III (Bowers and Merena, 11/1988), lot 3391, realized \$28,600; Andy Lustig; David Hall; 73rd Anniversary Sale (Stack's, 10/2008), lot 32, not sold; Rarities Night Auction (Stack's Bowers, 8/2011), lot 7481, realized \$362,250.
8. **AU50 PCGS.** Midwest Collector; Stuart Levine (privately 3/2001); Ed Price; Stuart Levine (3/2003); Liberty Collection.
9. **XF40 NGC.** 57.0 grains. Carl Wurtzbach (exhibited at ANS Exhibition of United States and Colonial Coins, 1914, plate VI); Sol Kaplan; Phillip E. Benedetti; Gary Fitzgerald; Donald Groves Partrick; Donald G. Partrick Collection, Part I (Heritage, 1/2015), lot 5509, realized \$211,500; **the present coin.**

10. **XF40 NGC.** Virgil M. Brand; New Netherlands (9/1953), lot 416, realized \$160; June Sale (Stack's, 6/1973), lot 879, realized \$10,000; Laird U. Park Collection (Stack's 05/1976), lot 203, realized \$18,000; Ellis Robison (Stack's 02/1982), lot 968, realized \$25,000; Allen Lovejoy Collection (Stack's 10/1990), lot 1; Andy Hain; Julian Leidman; Ed Price; Stuart Levine; Haig A. Koshkarian Collection (American Numismatic Rarities 3/2004), lot 300, realized \$101,200; Harry Laibstain and Rick Sear; Denis Loring and Donna Levin.
11. **XF40.** New England Rare Coin Gallery (11/1975), lot 383, realized \$21,000; ANA (Stack's, 8/1976), lot 131, realized \$19,000.
12. **VF30.** 52.82 grains. Byron Reed Collection; Omaha Public Library; The Durham Museum.
13. **VF25 PCGS.** 57.8 grains. Superior (2/1997), lot 2646; Stack's (5/1998), lot 108; Stuart Levine and Anthony Terranova, private sale (5/1998) to Ed Price; Stuart Levine; Pre-Long Beach Sale (Superior, 5/2001), lot 1046, realized \$45,425; New York Connoisseur's Collection (American Numismatic Rarities, 3/2006), lot 37, realized \$87,400; Coin Rarities Online; Park Avenue Numismatics; private collection; Americana Auction (Stack's Bowers, 2/2014), lot 2002, realized \$211,500.
14. **VF.** Colonel Mendes I Cohen (Edward Cogan, 10/1875), lot 378; Heman Ely (W. Elliot Woodward, 1/1884), lot 446, realized \$26; W. Elliot Woodward (5/1888), lot 1605; James Ten Eyck (B. Max Mehl, 5/1922), lot 566-A, realized \$73.50; Virgil Brand; Burdette G. Johnson; Michael F. Higgy (Abe Kosoff, 10/1943), lot 1397, realized \$167.50; Will W. Neil (B. Max Mehl, 6/1947) lot 1197, realized \$210; Abe Kosoff / Numismatic Gallery (8/1958), lot 37, realized \$650.
15. **F12 PCGS.** FUN Signature (Heritage 1/2007), lot 1200, not sold; FUN Signature (Heritage 1/2008), lot 3463, not sold.
16. **VG/Fr.** 52.33 grains. New England Rare Coin Galleries (10/1981), lot 334, realized \$5170; Stack's (05/1985), lot 51, realized \$4,400; Bill Subjack, private sale (1/1992), to Ed Price; Stuart Levine (3/2001); private collection.
17. **AG.** River Oaks Collection (Bowers and Ruddy, 11/1976), lot 937, realized \$3600; Stack's (1/1987), lot 515, realized \$7,150; Denis Loring, private sale (2/1988), to Kenneth Goldman.
18. **AG.** Frank H. Stewart; Congress Hall Collection; Independence National Historical Park, catalog #9267.
19. **P01 PCGS.** Bowers & Merena, c. 2000; John Dannreuther

Physical Appearance

Liberty faces left with hair flowing to the right. High relief showcases Liberty's cheek and forehead. There is patch of roughness at NT OF. Brighter color in the same area suggests that something may have rested on the coin for many years. The remainder of the obverse is evenly toned with lighter highlights in the lettering. The motto LIBERTY PARENT SCIENCE & INDUST[RY] is more strongly impressed on the left than right. The die alignment is 45 degrees (near medal alignment). The reverse exhibits light corrosion in the northeast quadrant, again suggesting that something may have rested on the coin for an extended period of time. NGC ID# 294H, PCGS# 11026

EARLY DIMES

1796 Draped Bust Dime, MS62
Popular First-Year JR-1 Variety

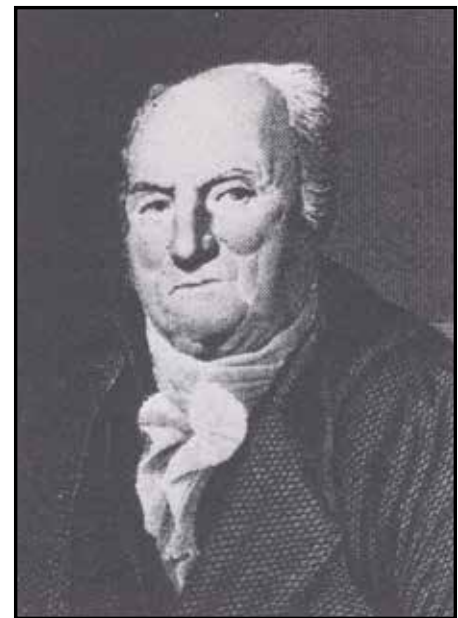

- 3799** 1796 MS62 NGC. JR-1, R.3. The variety is attributed by the die cud break at star 1, and the two leaf points under the left foot of the A in STATES. The silver-gray surfaces have just a touch of faint olive and violet color around the obverse borders, while similar colored toning that is a shade darker visits the right border of the reverse. Sharp detail is seen on most of the design elements, save for weakness on the eagle's breast and legs. The border dentilation is clear on both sides, and the design features are nicely centered on the planchet. Short adjustment marks (as made) are located in the lower portions of Liberty's hair. The surfaces are generally devoid of significant abrasions, but do display a somewhat subdued luster and restricted areas of light porosity and die rust. Census: 21 in 62, 58 finer (8/15).
Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 5655. NGC ID# 236B, PCGS# 4461

1796 Draped Bust Dime, JR-2, VF25
Highly Sought First-Year Issue

- 3800** 1796 JR-2, R.4, VF25 PCGS. Seven die marriages are known for the 1796 dime, the last one discovered after the JR book was published. The varieties are all scarce to rare, with the JR-2 variety a scarce R.4 but still among the most often-seen. The present example exhibits a high degree of detail for the grade, with notable definition among Liberty's hair locks and the reverse borders. The obverse displays pale pinkish-gray patina overall, while the reverse offers a steel-gray center with darker gray margins. Close inspection reveals some faint, old pinscratches on the obverse, primarily hidden in Liberty's hair locks, and some mint-made adjustment marks on the reverse above the eagle's head, but these are hardly noticeable to the unaided eye. A pleasing representative of this first type. NGC ID# 236B, PCGS# 38743 Base PCGS# 4461

Mint Director Elias Boudinot

**1796 Dime, AU50
Rare JR-3 Die Marriage**

- 3801 1796 JR-3, R.5, AU50 PCGS.** The JR reference suggests that only about 5% of all 1796 dimes are from the rare JR-3 die pair, which features an obverse with the first three digits of the date widely spaced, and the 6 squeezed close to the 9 and nearly touching the bust. The reverse shows a distinctive three-pronged die crack that runs from the edge along the top of the first T in STATES, as well as down along the left serif of T to the left branch and to the eagle's wing. A triangular cut above UN of UNITED is the result of a die chip that remained on the die, with the resulting cut now filled with dark build-up.

Sharp detail remains on both sides of this silver-gray example, with Liberty's hair strands boldly impressed and the eagle's breast feathers still visible. Faint golden-gray patina survives primarily at the margins. Fleeting glimpses of luster appear sparingly across both sides. A few stray lines and light marks exist primarily on the reverse. Housed in an old green label holder. NGC ID# 236B, PCGS# 38744 Base PCGS# 4461

**1798/7 Dime, JR-1, AU55
16 Stars Reverse**

- 3802 1798/7 16 Stars Reverse, JR-1, R.3, AU55 NGC.** From the same reverse die as the elusive 1797 quarter eagle. The surfaces show lead-gray color over each side, with strong undertones of steel-green. Weakly defined in the centers, especially on the reverse shield and the eagle's breast feathers. Modestly worn on the highpoints, with several shallow adjustment marks noted across the horizontal shield lines. Ex: FUN Signature (Heritage, 1/2008), lot 932. From The Stephen A. Walling Collection. NGC ID# 236F, PCGS# 38750 Base PCGS# 4468

**1800 Dime, JR-1, XF45
Attractive Type Coin**

- 3803 1800 JR-1, R.4, XF45 NGC. CAC.** JR-1 is the more plentiful of the two 1800 dime varieties, but it is still scarce in all grades; examples finer than this Choice XF coin are rare. This piece shows an even strike with only minor wear over the high points of the design. Blended gunmetal and lavender-gray patina blankets both sides, while the underlying surfaces are problem-free. Census (both varieties included): 11 in 45, 22 finer (7/15). NGC ID# 236H, PCGS# 38754 Base PCGS# 4470

**1805 Dime, Near-Mint
JR-2, Four Berries**

- 3804 1805 4 Berries, JR-2, R.2, AU58 NGC.** One of only two die varieties for this date, distinguished by the number of reverse berries. This is a pleasing near-Mint example that seems very close to Mint State, evincing minimal highpoint wear and no distracting marks on either side. Essentially untoned, save for trace amounts of peripheral color, and a few scattered specks on the reverse. Ex: ANA Signature (Heritage, 7/2008), lot 59. From The Stephen A. Walling Collection. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

1807 JR-1 Dime, MS61
Lightly Toned and Lustrous

- 3805** 1807 JR-1, R.2, MS61 NGC. An intermediate die state with "beard" clash marks beneath the chin, but no clash marks above the date. A lightly toned and lustrous Mint State example of the sole 1807 marriage. No marks merit discussion. A majority of the coin is well struck, although the left borders show incompleteness. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIMES

1814 JR-3 Dime, Lustrous MS64
Clashed Obverse, Shattered Reverse

- 3806** 1814 Large Date, JR-3, R.2, MS64 PCGS. A touch of gold runs through the stars on the obverse of this Choice example, with slightly deeper hues of the same on the reverse. The fields are lustrous, although there are some minor dark specks around the periphery of the obverse. Struck from a badly clashed obverse die, with the eagle's wings and the motto ribbon clearly defined in the fields of that die. The reverse die is shattered. An average strike for this issue, with softness on the uppermost curls of Liberty and on the talons of the eagle. Scarce so well-preserved, and free of distracting handling marks. Housed in a green label holder.
Ex: FUN Signature (Heritage, 1/2006), lot 1709.
From The Stephen A. Walling Collection. PCGS# 38775 Base PCGS# 4488

1827 JR-11 Bust Dime
Pleasing Near-Gem Example

- 3807** 1827 JR-11, R.2 MS64 PCGS. The JR-11 variety is confirmed by a disconnected upper arrow shaft and the top-most points of star 13 broadly repunched. Attractive mint-green, blue, and magenta toning appear on the lustrous obverse, while the reverse shows light reddish-tan patina with soft underlying mint luster. The central high points are not completely brought up, but the strike is otherwise sharp including most of the star centers. A popular type selection, seldom available any finer. Population (all varieties): 58 in 64 (2 in 64+), 16 finer (7/15). PCGS# 38821 Base PCGS# 4504

1832 Dime, JR-4, MS65
Outstanding Type Coin

- 3808** 1832 JR-4, R.3, MS65 NGC. Golden-brown, sea-green, and electric-blue colors bathe this satiny and gorgeously preserved Gem. Crisply struck, since only the eagle's neck and the curls below the ear lack exquisite definition. A slightly scarcer variety, as JR-2 is the most frequently encountered die marriage of the date in finer grades. This outstanding example would be a highlight of any advanced holding of Capped Bust dimes. Census (all varieties included): 9 in 65, 6 finer (8/15).
Ex: Dallas Signature (Heritage, 12/2004), lot 5706.
From The Stephen A. Walling Collection. PCGS# 38858 Base PCGS# 4521

1834 Large 4, JR-1 Dime, MS66
Intense Color

- 3809** 1834 Large 4, JR-1, R.1, MS66 NGC. This is a conditionally rare example, showing satiny luster and bold design elements. A colorful and lustrous patina blankets each side with green and blue-violet outer toning and plum and tan patina at the interiors, with the obverse showing a loosely concentric pattern. Census: 5 in 66, 7 finer (8/15).

Ex: *Long Beach Signature* (Heritage, 2/2010), lot 992. NGC ID# 237E, PCGS# 38873 Base PCGS# 4526

1835 JR-1 Dime, MS66
None Are Finer at Either Service

- 3810** 1835 JR-1, R.1 MS66 NGC. While examples of the 1835 issue are generally available in lesser grades, the populations at both services are quite limited in Premium Gem condition and the issue is unavailable any finer. The present coin is among the few finest, despite the fact that more than 1.4 million pieces were struck (not counting any additional mintages in 1836 and 1837 that were dated 1835 as suggested by die sequencing).

A rich, tangerine-gold patina covers the obverse of the current example, with a ring of cerulean-blue at the rim and uninhibited mint luster shining through. The reverse shows a ring of blue and amber-gold toning at the border surrounding a largely untuned, flashy silver center. A razor-sharp, full strike greets all of the raised devices, with full details at the star centers and on the central motifs. Neither PCGS nor NGC reports a numerically finer example of the issue, regardless of variety. Census (all varieties): 7 in 66, 0 finer (7/15). NGC ID# 237F, PCGS# 38879 Base PCGS# 4527

SEATED DIMES

1838-O No Stars Seated Dime, MS65
Fortin-101a, Two-Year Type

- 3811** 1838-O No Stars, F-101a, R.5, MS65 PCGS. CAC. The issue is important and appealing to collectors as the first dime struck at the New Orleans Mint as well as for its No Stars design, a two-year type. Struck from a late state of the dies, the 101a is the rarest variety of the 1838-O Seated dime according to Gerry Fortin.

The reverse shows the "huge O" mintmark repunched north, and diagnostic die cracks at the U of UNITED. Obverse die cracks further define the variety, with cudlike rim breaks at 2 and 4 o'clock, as well as a less-obvious one between 8 and 9 o'clock, somewhat hidden by the holder. Attractive golden-gray toning with sea-green highlights cover the frosted, lustrous surfaces. The coin is sharply detailed for the late die state, and the Gem surfaces are mark-free save for a small mark to the left of the date and a tiny nick near Liberty's shin. CAC endorsed. Population: 13 in 65 (1 in 65+), 0 finer (8/15). PCGS# 537644 Base PCGS# 4564

**1838 No Drapery Dime, MS67
Superb Type Candidate**

- 3812** 1838 No Drapery, Large Stars, F-113, R.4, MS67 NGC. The Large Stars, or, more accurately, “normal-sized stars.” Fortin-113 is one of two varieties that share this reverse which features an inchworm-like die flaw below the N in ONE. The scarcity of the No Drapery type in high grade heightens the importance of this Superb Gem 1838 example. The strike is bold throughout the stars, wreath, and Liberty’s figure. Close study with a lens fails to reveal any noteworthy flaws beneath the blended olive-gray and amber-gold toning. Census: 10 in 67 (2 in 67+), 2 finer (8/15). PCGS# 537660 Base PCGS# 4568

**1847 Seated Dime, MS64
Rare So Fine, Deeply Toned**

- 3813** 1847 F-101, High R.4, MS64 PCGS. The 1847 Seated dime is rare in all Mint State grades, and is extremely elusive above MS63. The Fortin-101, High Date variety is the scarcest circulation issue die pairing of this year. This Choice example displays bold detail with lavender-gold interiors and ocean-blue margins. Satiny luster fails to reveal any bothersome abrasions. The Seated dime specialist should not let this pre-1853 rarity pass by. PCGS# 537843 Base PCGS# 4589

**1849 Seated Dime, MS67
Sole Finest Known Example**

- 3814** 1849 F-102a, R.3, MS67 PCGS. Both our auction archives and the population reports indicate that this is the sole finest certified 1849 Seated dime of any variety by either service. It is a textbook example of the Fortin-102a variety — a late die state coin, with a thick date and a diagnostic die scratch from above the head to the rim. The reverse is interestingly cracked at the left and right wreath tops, where the die cracks intersect at the E of STATES.

This lustrous Superb Gem glows with steel-blue and russet toning at the margins on both sides, surrounding reddish-gold and silver centers. The coin is remarkably mark-free, with just a single faint abrasion in the right obverse field. The issue is always weakly struck to one extent or another at Liberty’s head, breast area, and the lower elements of the wreath, and they show some diagnostic softness on the present example. Even so, the quality is outstanding and unsurpassed by any other 1849 dime. Population: 1 in 67, 0 finer (8/15). NGC ID# 238G, PCGS# 537861 Base PCGS# 4591

**1853 Arrows Dime, Frosty MS67
Great Type Coin**

- 3815 1853 Arrows MS67 PCGS.** Beautifully preserved surfaces offer abundant mint frost on each side and a strike that is quite sharp, largely untuned save for a pale amber ring of patina more prominent on the obverse. Note the bold detail present throughout both sides, on Liberty's face, the star radials, and all reverse wreath elements. A great type coin. Population: 16 in 67, 4 finer (8/15). NGC ID# 2398, PCGS# 4603

**1871-CC Seated Dime, Fine 15
Elusive Carson City Product**

- 3816 1871-CC F-101, R.4, Fine 15 NGC.** The 1871-CC was the first dime coinage from the Carson City Mint, struck to the tune of 20,100 coins. This issue is scarce in all grades and many examples are cleaned or show other environmental impairments. This midgrade coin is more appealing than many of its peers, with medium pewter-gray color that lightens slightly over the relief elements. LIBERTY is complete and some detail remains in the recesses of the gown. Census: 2 in 15, 13 finer (8/15). PCGS# 538268 Base PCGS# 4654

**1875-CC Seated Dime, MS67
None Finer at NGC**

- 3817 1875-CC Mintmark Above Bow MS67 NGC. F-107.** One of the more plentiful CC-mint issues, though of course a condition rarity as a Superb Gem, this is a strong candidate for the high-end date enthusiast or Carson City collector. The design elements are well-detailed and the lustrous surfaces are impeccably preserved. Census: 4 in 67, 0 finer (8/15).
Ex: Bowers and Merena (5/2010), lot 1824; Gene Gardner; Gardner Collection, Part III (Heritage, 5/2015), lot 98248. NGC ID# 23AE, PCGS# 4673

**1890 Seated Dime, MS67+
Finest at PCGS, Pristine Surfaces**

- 3818 1890 MS67+ PCGS. CAC.** Blended ice-blue, purple, and sea-green hues cover the surfaces, lending exceptional eye appeal to this Superb Gem. Aside from minor softness on the lower wreath, the relief elements are sharply rendered, especially at the important head area, where Liberty is full featured with above-average hair definition. This coin is one of five with the numerical MS67 grade at PCGS, but the sole Plus designation as well as CAC endorsement lifts it a notch above the others. Population: 5 in 67 (1 in 67+), 0 finer (7/15).
Ex: Elite Coin Auction (Superior, 1/2003), lot 458; The Eugene H. Gardner Collection (Heritage, 5/2015), lot 98259. NGC ID# 23BB, PCGS# 4704

PROOF SEATED DIMES

1852 Seated Dime, PR65
Only Eight to 10 Proofs Believed Known

3819 1852 PR65 NGC. Fortin-113. The proof 1852 Seated dime is a great rarity with an unknown mintage. This is only the eighth different example we have handled, and it is likely that we have seen most, if not all of the existing population. The PCGS estimate is only six to eight coins, and Breen listed just four possible examples in his *Proof Encyclopedia*. The combined NGC and PCGS certified population counts 14 examples in all grades, a figure which we believe to be inflated by resubmissions.

This Gem example is one of four so-graded at NGC, where just a single PR67 coin is finer (8/15). A distinctive splash of olive and amber toning in the right obverse margin serves as a pedigree marker in the absence of contact marks, while the remainder of each side is essentially brilliant, but with a faint lavender hue. Fully struck, with modest mirroring in the fields. This proof rarity should not be overlooked. NGC ID# 23C8, PCGS# 4739

1855 Arrows Dime, PR64 Cameo
Important Proof Rarity

3820 1855 Arrows PR64 Cameo PCGS. Fortin-101. The proof 1855 Seated dime is a known rarity, but the number of surviving examples may actually be lower than generally thought. The PCGS estimate is 15 to 20 coins, a figure which is supported by the combined PCGS and NGC certified population of 31 submissions in all grades. In practice, however, this issue proves more elusive than is suggested by these figures. We have offered an example on 30 different occasions since our records began in 1993, but with only 11 individual coins represented. This piece makes 12 confirmed examples, and a 13th piece resides in the Smithsonian. Even if a few others are hidden somewhere, this proof Seated dime issue is a major rarity, with the total population likely residing near the low end of the PCGS estimate of 15 to 20 coins.

This piece is fully struck, with delightfully bright mirroring in the fields. Tinges of peripheral blue accent champagne interiors, delivering a high degree of eye appeal for the grade. Close study with a glass reveals faint marks in the mirrors, but none are discernible to the naked eye. The attractive toning pattern will have to suffice for pedigree purposes. Population: 2 in 64 Cameo, 0 finer (8/15). 11 NGC ID# 23CG, PCGS# 84744

1867 Dime, PR67 Cameo
Repunched Date, Low-Mintage Issue

- 3821** 1867 Repunched Date, F-103, R.5, PR67 NGC. The circulation strike mintage was low (just 6,000 coins struck), putting pressure on the moderate proof mintage of 625 pieces. This proof is struck from dies showing repunching on the 18 and 7 in the date — an unusual occurrence for proof issues. The present example is markedly contrasted between the frosted devices and the deeply mirrored fields. A touch of dappled multicolor toning is confined to the peripheral areas, while the remaining surfaces are fully brilliant. While most proofs from this issue are found with scattered contact marks, the current coin is nearly free of impairments. It is among the top five Cameo proofs at both services combined. NGC Census: 1 in 67 Cameo, 2 finer (8/15). PCGS# 539019 Base PCGS# 4760

1882 Seated Dime, PR67+ Cameo
Distinctive Toning

- 3822** 1882 PR67+ Cameo PCGS. CAC. F-101, R.3. The 1882 is a plentiful Seated dime proof issue, but only a small percentage of survivors reside in Gem or finer Cameo grades. This Superb Gem is a condition rarity, and is arguably among the finest examples that can be termed collectible. The strike is bold and the fields exhibit deep mirroring. Stark cameo contrast penetrates deep toning of teal-blue and violet. The reverse is completely encompassed in the patina, while the obverse shows a “river” of champagne-gold cutting through the lower center. Population: 8 in 67 (2 in 67+) Cameo, 1 finer (8/15). NGC ID# 23D7, PCGS# 84779

1882 Seated Dime, PR68 Cameo
Unsurpassed Technical and Aesthetic Quality
Sole CAC Example

- 3823** 1882 PR68 Cameo PCGS. CAC. F-101, R.3. The largely brilliant, silvery surfaces are tinged with deep golden and teal coloration around the obverse margin and just a hint of multicolor toning is seen on the lower reverse. The devices are nicely frosted and contrast starkly against the seemingly illimitable depth of reflectivity in the fields. Essentially flawless surfaces.

While the 1882 may not have an impressively low mintage with 1,100 proofs struck, there are few other coins that can equal the technical preservation of this remarkable piece. It is difficult to imagine that the other four PR68 Cameo coins could equal or exceed the eye appeal of this remarkable specimen. NGC shows four PR68 Cameo (including one PR68 ★ Cameo) and none are finer. This is the finest at PCGS. This is the sole PR68 Cameo of this issue with the CAC approval.

Ex: Long Beach Signature (Heritage, 9/2005), lot 2405; purchased by Eugene Gardner from Jason Carter (12/2005); Eugene Gardner Collection, Part III (Heritage, 5/2015), lot 98282. NGC ID# 23D7, PCGS# 84779

1887 Dime, PR67 Cameo
Bright Mirrors, Bold Contrast

- 3824 1887 PR67 Cameo PCGS. F-101.** An original band of gold and blue toning inhabits the margins and minimally intrudes into the centers on both sides of this otherwise brilliant, sharply struck Superb Gem proof. The glassy mirrors show remarkable depth, while the smoothly frosted motifs contrast boldly with the flashy fields. Each grading service reports a single finer example for a total of two numerically finer Cameo proofs. PCGS Population: 4 in 67 Cameo, 1 finer (8/15). NGC ID# 23DC, PCGS# 84784

BARBER DIMES

1894-O Barber Dime, MS64+
Semiprooflike Fields

- 3825 1894-O MS64+ PCGS Secure. CAC.** The 1894-O Barber dime is a challenging date in all Mint State grades, but is genuinely rare in MS64 or better condition. This Plus-designated Choice example displays partially prooflike fields with rose-gold and aquamarine toning over each side. The strike is sharp and there are no obvious abrasions. Population: 10 in 64 (1 in 64+), 11 finer (7/15). NGC ID# 23DU, PCGS# 4804

1899 Barber Dime, Colorful MS67+
Perfect for a High-End Set

- 3826 1899 MS67+ PCGS. CAC.** An assortment of rainbow colors including lime-green, ice-blue, violet, and orange combines with cartwheel luster to produce the tremendous aesthetic appeal seen throughout this Superb Gem. The technical quality is equally impressive with crisp design definition and virtually pristine surfaces. An unsurpassed condition rarity destined for a high-end type collection or Registry Set. Population: 4 in 67 (1 in 67+), 0 finer (8/15). NGC ID# 23E9, PCGS# 4818

1899 Barber Dime, MS68
Impressive Toning, Sole Finest Graded

- 3827 1899 MS68 NGC.** As the sole 1899 Barber dime certified by either service as MS68, this remarkable Superb Gem is the finest-known example from more than 19.5 million dimes struck by the Philadelphia Mint during the year. Both sides display amazing toning and mint luster that permeates the thickly frosted surfaces, with each side equally impressive. Central gold toning yields to vivid cobalt-blue and violet shades near the borders. The strike is pinpoint-sharp for the issue, with eye appeal that exceeds even the coin's considerable technical merit. For Registry Set purposes or for the most advanced collection, this exquisite dime is unsurpassed. Census: 1 in 68, 0 finer (8/15). NGC ID# 23E9, PCGS# 4818

1900 Barber Dime, Colorful MS67
Strong Eye Appeal, Registry Set Opportunity

- 3828 1900 MS67 PCGS. CAC.** This final-year 19th century issue typically comes sharply detailed with attractive luster, as displayed on this Superb Gem. A generous mintage of 17.6 million coins makes it a relatively available date up to and including Gem condition. Premium Gems are rare, and MS67 coins are extremely rare and highly coveted. This Superb Gem is immensely appealing with deep blue and rose peripheral toning, and lighter gold shading toward the centers. Blazing luster shines through the patina, illuminating essentially unmarked fields. Although the coin is tied with a small group for the finest certified, it must be considered among the finest of the lot because of its strong visual appeal. Population: 6 in 67 (1 in 67+), 0 finer (8/15).
Ex: FUN Signature (Heritage, 1/2002), lot 5927; FUN Signature (Heritage, 1/2005), lot 4024; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98291. NGC ID# 23EC, PCGS# 4821

1909-S Barber Dime, MS67
Attractive Rainbow Toning

3829 1909-S MS67 PCGS. The 1909-S dime (1 million coins struck) is another difficult-to-find issue, particularly in higher grades. Surprisingly for the San Francisco Mint, examples are often found with poor strike characteristics, making this well-defined Premium Gem all the more desirable. This coin is a delight to behold. The surfaces display resplendent rainbow hues on the right obverse and upper-left reverse. Light golden-orange tones occur elsewhere. Sharply detailed and well-preserved, this is certainly one of the most appealing of a small group that have earned this rarified grade. Population: 3 in 67, 0 finer (8/15).

Ex: *FUN Signature* (Heritage, 1/2005), lot 4057; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98304. NGC ID# 23FE, PCGS# 4853

1915 Barber Dime, MS67
One of the Two Finest Certified

3830 1915 MS67 PCGS. This single coin is the finest 1915 Barber dime in a PCGS holder, rivaling one other MS67 example at NGC for the finest known of the issue overall (8/15). Well-preserved surfaces display frosty luster with warm golden toning over each side. The design elements are well-struck and the overall eye appeal is outstanding. NGC ID# 23FW, PCGS# 4868

1916 Barber Dime, MS67+
Series-End Type Coin

3831 1916 MS67+ PCGS. The cap on the Barber dime series, the 1916 is a favorite for type purposes as made possible by its relative availability in Mint State. This Plus-graded Superb Gem is among the finest known and is conditionally rare as such. The design elements are boldly rendered and surface preservation is unsurpassed. Near-brilliant centers are in stark contrast to the deep aquamarine and russet toning of the margins. Population: 11 in 67 (2 in 67+), 0 finer (8/15). NGC ID# 23FY, PCGS# 4870

PROOF BARBER DIMES

1893 Barber Dime, PR68 ★
Memorable Multihued Toning

3832 1893 PR68 ★ NGC. The fields — especially so on the obverse — are bright and radiate mirroring that simulates backlighting through the golden-rose toning. The same colors are seen on the reverse, and each side displays a trimming of vibrant, deep blue at the margins. Obviously, the obverse is qualified for Cameo or Deep Cameo designation, while the reverse is more densely toned and less receptive to the mirrored effects of the proof fields. Even so, the blatant eye appeal is undeniable, as is the needle-sharp strike and overall technical quality. Census: 5 in 68 (2 in 68 ★), 1 finer (8/15). NGC ID# 23G4, PCGS# 4877

1893 Dime, PR67 Deep Cameo
Rare So Fine

- 3833 1893 PR67 Deep Cameo PCGS. CAC.** PCGS has seen only six proof 1893 Barber dimes that qualify for the Deep Cameo designation, including four in this grade and none finer (8/15). As might be expected for this lofty grade, the eye appeal of this piece is exemplary, produced by stark contrast and deeply mirrored fields. Both sides are razor-sharp and display a warm golden glow that accentuates the visual merit. NGC ID# 23G4, PCGS# 94877

1895 Cameo Barber Dime, PR68
Immaculately Preserved

- 3834 1895 PR68 Cameo NGC.** The 1895 proof dime is a key issue in the series, not only because of the low mintage of 880 proof pieces, but also due to the scarcity and low mintage of business strikes with only 690,000 pieces produced. As a result, there is additional date pressure on high-grade 1895 proofs. Pristine surfaces and boldly impressed design elements provide this PR68 Cameo example with tremendous eye appeal. A band of attractive toning, in rich shades of golden-orange, fuchsia, electric-blue, and teal, further enhances the appearance. A small piece of lint is housed within the holder to the left of the D in DIME as seen in the enlarged image. Census: 5 in 68 Cameo, 0 finer (8/15).
Ex: Greensboro Collection, Part III / Central States Signature (Heritage, 4/2013), lot 1856. NGC ID# 23G8, PCGS# 84879

MERCURY DIMES

1916-D Mercury Dime, AU53
Partial Golden Toning

- 3835 1916-D AU53 ANACS.** Silver-gray surfaces reveal olive and gold accents over generous portions of mint luster. Plenty of sharp strike definition also exists, an exception being flatness in Liberty's hair and the lower left wing of the cap. A moderate abrasion occurs on the cheek, and a less noticeable mark is to be found on the upper part of the fasces. An AU example of one of the most covered of all 20th century silver issues, and the undisputed key to the Mercury dime series.
Ex: New York Signature (Heritage, 7/2004), lot 5848.
From The Stephen A. Walling Collection. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, Unc Details
Fully Split Bands

- 3836 1916-D — Improperly Cleaned — NGC Details. Unc.** This 1916-D Mercury dime will appeal to many budget-conscious collectors. Immediately obvious is the incredible sharpness of the interior motifs, which includes crisp detail on Liberty's hair curls and full separation of the bands on the fasces. NGC notes light cleaning, as evidenced by faint lines hidden beneath mottled golden toning. More important are a few hair-thin scratches on Liberty's portrait which become apparent with a glass, but even these are trivial.

**1939 Mercury Dime, MS68 Full Bands
Tied for Finest Certified**

3837 1939 MS68 Full Bands PCGS. The Full Bands designation is particularly meaningful for the Philadelphia issue at the highest grades, since the mintage of more than 67 million pieces yields an abundance of Superb Gem coins without the Full Bands distinction. PCGS and NGC are stringent with the award, showing only a dozen pieces by both services combined.

This stunning MS68 example is fully detailed and imbued with satiny mint luster. Faint diagonal toning accents reveal occasional bands of pink, olive, and clear-gold hues over the smooth, bright-silver surfaces, confirming the coin's originality and adding exponentially to the eye appeal. The coin is mark-free except for three tiny, microscopic ticks — two on the cap, and a minuscule nick on the upper fasces, visible with a loupe but unseen in-hand. Population: 10 in 68 Full Bands, 0 finer (8/15). NGC ID# 23JR, PCGS# 5017

**1942/1-D Dime, MS64 Full Bands
Bold Throughout**

3838 1942/1-D FS-101 MS64 Full Bands PCGS. The overdate feature is bold and the mintmark is clearly defined. This piece shows sharp horizontal and diagonal bands, and is also fully rendered around the peripheral legends. The surfaces are light golden with satiny luster and reveal only a few minor abrasions in keeping with the grade. Population: 36 in 64 Full Bands, 31 finer (8/15). NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

PROOF ROOSEVELT DIMES

**1950 Dime, PR68 Deep Cameo
Tied for Finest Certified**

3839 1950 PR68 Deep Cameo PCGS. This magnificent Registry-grade coin is tied with four others as the finest of only 21 Deep Cameos certified by PCGS (8/15). The design elements are boldly rendered and crisply contrast with the glass-black mirroring of the fields. Virtually pristine and devoid of perceptible toning. NGC ID# 27EJ, PCGS# 95225

3840 No Lot.

TWENTY CENT PIECE

1874-S/STwenty Cent, MS64+
Misplaced Date

- 3841** 1875-S/S Misplaced Date, FS-302, BF-16, R.1, MS64+ PCGS. CAC. The well-known variety with repunched serifs on the mintmark and the top of a misplaced 5 within the dentils below the 7 in the date. The strike is essentially full except on stars 10 and 13. The dusky autumn-gold and silver-gray surfaces lack remotely relevant marks. NGC ID# 23R7, PCGS# 145009 Base PCGS# 5298

PROOF TWENTY CENT PIECES

1875 Twenty Cent, Toned PR65

- 3842** 1875 PR65 PCGS. A Gem example of the first proof issue in this short, underappreciated series. The design elements are boldly rendered and contrast with the mirrored fields. Deep olive-gray and rose-gold toning precludes a Cameo designation. Scarce this well-preserved. Population: 19 in 65, 13 finer (8/15). NGC ID# 27GZ, PCGS# 5303

1876 Twenty Cent, PR65 Cameo
Elusive in Gem Condition

- 3843** 1876 PR65 Cameo PCGS. Cameo contrast is obvious on each side of this Gem 1876 proof twenty cent piece. Traces of light golden and pale lavender toning appear on each side, but hardly impede the contrast. The strike is bold and only a few stray lines are seen when studied with a loupe. Population: 9 in 65 (1 in 65+) Cameo, 12 finer (8/15). NGC ID# 27H3, PCGS# 85304

EARLY QUARTERS

1796 B-2 Quarter, Fair 2
Classic Silver Type Rarity

- 3844** 1796 B-2, R.3, Fair 2 NGC. Struck for one year only, the Small Eagle quarter is among the rarest silver types. A meager 6,146 pieces were struck, and the denomination again slumbered until 1804, when the Heraldic Eagle was introduced. Bullion depositors at the Mint preferred silver dollars, the reason for the rarity of early quarters. The present silver-gray example has a bold date. Most of the stars are apparent, although faint. Liberty is nicely outlined. The reverse shows greater wear but portions of the wreath remain near 1:30 and 5 o'clock, and the upper curve of the right (facing) wing is also visible. NGC ID# 379B, PCGS# 38920 Base PCGS# 5310

1796 Quarter, B-2, Fine 12
Collectible Midgrade Example

- 3845** 1796 B-2, R.3, Fine 12 PCGS. The year 1796 is one filled with numismatic delicacies. At least one collector, "Mr. 1796" John Whitney Walter, made a specialty of collecting issues dated 1796. From the half cent through the eagle, every issue of the year has a special panache. The 1796 quarter occupies a unique niche, however, since it is the only silver coin of the year that is a one-year type. (The 1796 No Stars quarter eagle is also a one-year type among the gold series.) This piece offers pretty, original dove-gray toning in the centers, with some iridescent orange-gold and cerise at the rims, evidence of the untampered surfaces. This piece is well-centered, with all of the major types bold. A few light scrapes are noted, but there are no singular impairments, and the appeal is considerable.
Ex: Long Beach Signature (Heritage, 5/2007), lot 861.
From The Stephen A. Walling Collection. NGC ID# 379B, PCGS# 38920 Base PCGS# 5310

1796 B-2 Quarter, Fine 15
Original Patina With CAC Approval

- 3846** 1796 B-2, R.3, Fine 15 NGC. CAC. Tompkins Die State 1/1. This is the more available of two varieties for the date with a High 6. Only 6,146 quarters were struck in 1796, as demand for the denomination was low. The Spanish 2 reales largely satisfied commercial needs for coinage of that size, and depositors only requested additional quarters eight years later in 1804. By that point, the Heraldic Eagle reverse had replaced the Small Eagle found on the first-year coins. Consequently, the 1796 is popularly collected as both a first-year issue and one-year type.
The hallmark of this well-circulated example is its impeccable, unaltered surfaces. Each side offers a rich layer of steel-blue and violet-gray patina with gold hues near the recesses. The dentils are crisp, and a surprising amount of detail remains over the lower curls and the eagle's wings. This is one of only 45 CAC-approved examples across all grade levels (8/15). NGC ID# 379B, PCGS# 38920 Base PCGS# 5310

1804 B-1 Quarter, VG10
Low-Mintage Heraldic Eagle Issue

- 3847** 1804 B-1, R.3, VG10 NGC. Tompkins Die State 1/1. Browning-1 has a distinctive die scratch near star 9, as seen on this pleasing, problem-free example. Violet and steel-gray tones turn to lighter shades of golden-orange, rose, and blue near the centers and over the design elements. The legends and major design features are clear, with friction partially obscuring the lower reverse rim. One of only a few hundred survivors from this early federal quarter issue (6,738 coins struck). NGC ID# 379C, PCGS# 38921 Base PCGS# 5312

1804 B-1 Quarter, Fine 12
Collectible Problem-Free Example

- 3848** 1804 B-1, R.3, Fine 12 NGC. CAC. Tompkins Die State 1/1. The desirability of and sustained demand for the 1804 owes much to the legendary dollars bearing that date. However, only 6,738 quarters were struck in that year. Most coins entered into circulation and survive to a lesser extent than the first-year 1796 pieces. This well-worn example has steel-gray patina with lighter-toned areas over the high points and occasional glimpses of gold and lavender hues. The overall impression still shows good detail. NGC ID# 379C, PCGS# 38921 Base PCGS# 5312

1805 Quarter, B-1, AU53
Attractively Toned

- 3849** 1805 B-1, R.4, AU53 NGC. CAC. Tompkins Die State 2/2. Outstanding hues of sun-gold, mint-green, blue, violet, and amber form concentric bands around each side of this About Uncirculated Draped Bust type coin. The strike is even and well-executed, save for the eagle's head and surrounding stars which show mild weakness. Hints of luster remain in the fields. NGC ID# 4DEZ, PCGS# 38923 Base PCGS# 5313

3850 No Lot.

1806/5 Quarter, B-1, MS61
Deep, Multihued Patina

- 3851** 1806/5 B-1, R.2, MS61 NGC. Tompkins Die State 2/3. This popular *Guide Book* variety shows a bold overdate, with an underlying 5 evident within and to the left of the primary 6. The die was previously employed for the 1805 B-4 marriage, then overdated and used for 1806 coinage. The variety commands a premium over its regular-date counterpart — not only for the dramatic overdate, but also for its rarity in Mint State. This example shows soft luster with highlights of sun-gold, amber, and aquamarine seen amid deep lavender-gray toning over each side. The high points of Liberty's hair curls as well as the eagle's left (facing) talons are slightly soft, but the strike is otherwise pleasing. Grade-contributing abrasions are at a minimum. Census: 2 in 61, 8 finer (8/15). NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

BUST QUARTERS

1818 B-6 Quarter, MS64
Condition Census Representative

- 3852** 1818 B-6, R.4, MS64 NGC. CAC. Tompkins Die State 1/6. Repunching on star 9 and the beginning of the scroll positioned between ED in UNITED confirm the B-6 attribution. This is a very scarce die marriage, and Steve Tompkins reports an MS64 example atop the Condition Census (this may or may not be the same coin). This Choice Uncirculated representative displays magnificent blushes of lilac-gray, russet, jade-green, and cobalt-blue patina over frosty, minimally marked surfaces. Strongly struck with CAC-approved eye appeal to match. PCGS# 38947 Base PCGS# 5322

1818 B-9 Quarter, AU58
Rarest 1818 Variety
Likely Tied for Finest Known

3853 1818 B-9, High R.5, AU58 NGC. CAC. Die State a according to Rea, Peterson et al. The B-9 die pairing is the rarest of the 10 marriages known for the 1818 quarters, struck from five obverse and seven reverse dies. The obverse here shows a triple dentil under the first 1 in the date, and a short die line proceeds into the field from the innermost point of star 2. The reverse features a widely spaced 25 in the denomination, the 5 leaning right, and a double dentil below the C in 25 C.

This scarcely circulated coin shows great eye appeal over silvery surfaces with a dusting of rose and gold patina scattered about each side. There are heavy signs of die clashing at the upper obverse and lower reverse, along with a bold die crack from the rim through the N in UNITED and to the eagle's left (facing) wing. Smaller die cracks show under the left wing and from P in PLURIBUS. This piece appears about tied for the finest known according to the Rea-Peterson Condition Census in *Early Quarter Dollars*, another fantastic appealing and very rare quarter variety from this marvelous consignment. NGC ID# 23RH, PCGS# 38950 Base PCGS# 5322

3854 No Lot.

1821 Quarter, B-3, MS63
Smooth, Satiny Surfaces

3855 1821 B-3, R.2, MS63 NGC. With a mintage of 216,851 pieces, the 1821 quarter is a relatively available coin in lower (circulated) grades. That certainly does not hold true for Uncirculated examples, though. This is a sharply struck example with even gray-golden patina over each side. There are no reportable abrasions, just a mint-made grease stain located in the center of the obverse across the coronet and Liberty's hair curls. Select with elegant eye appeal. Census (all varieties included): 13 in 63, 30 finer (8/15).
Ex: Long Beach Signature (Heritage, 2/2005), lot 6520; FUN Signature (Heritage, 1/2007), lot 2876.
From The Stephen A. Walling Collection. NGC ID# 4E8L, PCGS# 38965 Base PCGS# 5331

1828 B-3 Quarter, VF25
25 Over 50C Guide Book Variety

3856 1828 25 Over 50C, B-3, R.5, VF25 PCGS. Tompkins Die State 1/1. The 25 in the denomination is clearly punched over 50. In writing *Early United States Quarters*, Steve Tompkins noted that "The B-3 is a rare and difficult die marriage to acquire ... " This is a well-circulated representative with blended hues of violet, russet, blue, and olive over each side. Much design detail remains despite expected merging over the highest points. Population: 4 in 25, 17 finer (8/15). NGC ID# 23RV, PCGS# 38979 Base PCGS# 5343

1831 Small Letters Quarter, MS65 Prooflike
R.5 B-3 Variety, Likely the Sole Finest Known

3857 1831 Small Letters, B-3, R.5, MS65 Prooflike NGC. This recently submitted 1831 B-3 quarter graded Gem Prooflike by NGC is perhaps the sole finest survivor of this rare die pairing. The obverse die is shared with the common (R.2) B-2 variety, showing star 7 pointing between Liberty's hair curls and the right foot of the last 1 in the date underneath the left edge of the bottom curl. Star 13 is farther from the rear curl than on the (somewhat similar) B-1 die, and its two points are equidistant from the curl. The Small Letters reverse shows a square base 2 with 25 high, and the eagle has a tongue. The arrowheads are narrow on the B-3.

In addition to being a notable rarity, this is simply a gorgeous example of this Reduced Size quarter type. The surfaces are highly reflective front and back, complementing spectacular patina with pale blue and violet, gold, and rose predominant. One would be hard-pressed to note any actual distractions on the surfaces, although for pedigree marks we note a couple of dark toning smudges on the exposed portion of Liberty's bustline. The strike is sharp throughout, and the preservation is uniformly pristine.

Where and how this rare-variety coin managed to survive in such pristine condition for so long a time is anyone's guess. The Col. Green-Eric Newman 1831 Small Letters quarter — the two coins show such similar patina that we suspected this was that piece until we confirmed the different die variety — was an MS67+ NGC example of the B-2, a far more available marriage, that brought \$117,500 in the Newman Part II Signature (Heritage, 11/2013), lot 33349.

While this coin is not quite in the same league as the Newman B-2 coin, it easily tops (by five grade points) the Rea-Koenings-Haroutunian Census published in *Early Quarter Dollars*. PCGS currently reports no Mint State examples of the B-3 at all in Mint State (much less MS65 Prooflike); its finest certified is an AU53. At NGC, this is the sole finest certified B-3 by 10 grade points; two examples of the B-3 are in AU55. Among Prooflike 1831 quarters, this piece is the sole finest certified of any variety, backed up by four examples (unspecified varieties) in MS64 Prooflike (8/15).

Any way one slices the data, this is a marvelous outlier Capped Bust quarter of stunning quality and equal rarity. Series specialists will place their most liberal bids. NGC ID# 23RW, PCGS# 38982 Base PCGS# 5348

1832 B-1 Quarter, MS62

Ex: Eliasberg

- 3858 1832 B-1, R.1, MS62 PCGS. CAC.** The October, 1947 Stack's auction of the H.R. Lee Collection was, by pseudonym, an offering of Louis E. Eliasberg's coins that were upgraded or, for some other reason, listed in the sale. Lot 392 describes an 1832 quarter as "Obverse tarnished. Reverse bright. Uncirculated." Logically, the present coin may be that lot, since there is no record of it in the later Eliasberg auctions. A gathering of deep olive-gray toning at the upper left obverse extends sparsely across the obverse, with silver luster shining through. The reverse is brighter, with a faint speckling of the same toning. This is a sharp, original "double green" coin — housed in a green label holder, with the green CAC endorsement label. NGC ID# 23RX, PCGS# 38987 Base PCGS# 5351

1834 Quarter, B-2, MS64

Pleasing Original Toning

- 3859 1834 B-2, R.4, MS64 PCGS Secure. CAC.** A boldly struck example of this scarce variety, this Choice 1834 quarter also exhibits satiny luster beneath original toning in shades of champagne, olive, and lavender-gray. No major abrasions are present. As a date, this issue is only marginally scarce in MS64, but it is rarely encountered finer. Population (all varieties included): 54 in 64, 11 finer (8/15). NGC ID# 23RZ, PCGS# 38993 Base PCGS# 5353
-

1838 Capped Bust Quarter, B-1, MS67
Single-Finest Certified Example
Registry Set Essential

3860 1838 MS67 NGC. B-1, R.1. A substantial mintage of 366,000 Capped Bust quarters was accomplished in 1838, with only a single die variety known for the date. The Capped Bust design was retired partway through 1838 in favor of Christian Gobrecht's beautiful Seated Liberty motif, which began production on September 29th of that year. The mintage of Capped Bust quarters was large enough to make the issue reasonably available in today's market, despite the shortened period of production.

It is remarkable that a single pair of dies was durable enough to strike such a large number of coins. By 1838, the Mint was accustomed to "hubbing" working dies from a nearly complete hub. Steve Tompkins suggests that there may have been more than one pair of dies used in the production run, but the dies were only distinguishable by minor variations in the placement of the last digit in the date. It is possible that sharp-eyed collectors will discover some new sub-varieties of this issue with more extensive study.

Remarkable reddish-gold, electric-blue, pale gold, and reddish-purple iridescence provides a visual feast over both sides of this exceptional Superb Gem. The coin's strike definition is impressive and nearly full on all elements except for some of the obverse stars. An intensely lustrous, impeccably preserved Capped Bust quarter with seemingly unimprovable eye appeal. This piece is the single-finest certified example at either of the leading grading services and we expect spirited competition from series specialists and Registry Set enthusiasts when this lot is called. (8/15). NGC ID# 23S5, PCGS# 5357

1838 Quarter, CAC-Approved MS63
Former Generation Holder

- 3861** 1838 B-1, R.1, MS63 NGC. CAC. This is the final issue in the Capped Bust quarter series, with a mintage of 366,000 coins. Golden and violet-gray toning dominates each side of this Select piece, featuring splashes of olive-green and cobalt-blue around the edges. The right obverse field and central reverse maintain partial brilliance. Strike softness is confined to the stars and olive leaves, while the other devices exhibit crisp detail. Housed in a former generation holder. Census: 26 in 63, 24 finer (8/15). NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357
-

SEATED QUARTERS

1853/4 Arrows and Rays Quarter, MS65
Sole Finest 'Overdate' at NGC

- 3862** 1853/4 Arrows and Rays, Briggs 1-A, FS-1301, MS65 NGC. An intriguing variety, recognized by NGC, PCGS, and the *Guide Book*. Briggs details the recutting of the date in his *Encyclopedia*. The 8 and 5 are recut right, and the 3 is punched over the remnants of what appears to be an errant 4. The right arrowhead is recut south, confirming the attribution. This variety is rarely seen in Mint State, and the present coin is the sole finest at NGC (8/15). However, this coin will appeal to more than variety enthusiasts. This one-year Arrows and Rays type is always in high demand, and Gem examples of the Philadelphia issue are rare overall.
- This outstanding piece is boldly defined and exhibits well-preserved, frosty luster. Traces of light golden toning are most noticeable on the reverse, attesting to the originality of the surfaces. An outstanding type coin and an unsurpassed Briggs 1-A representative. PCGS# 395931 Base PCGS# 5427
-

1857 Quarter, Toned MS66
Well-Preserved No Motto Type Coin

3863 1857 MS66 PCGS. Areas of luster emerge beneath the multicolor patina displayed by this Premium Gem example. Among the colors present are green, red, pink, orange, and gold. The reverse includes a splash of violet. Portions of the design exhibit an incompleteness of strike. Population: 37 in 66 (4 in 66+), 8 finer (8/15). NGC ID# 23TE, PCGS# 5442

1857 Quarter, Toned MS67
Tremendous Eye Appeal

3864 1857 MS67 PCGS. CAC. The 1857 Seated Liberty quarter claims a large mintage of nearly 10 million pieces and is usually available in most grades, making it a popular choice for type collectors. That said, the population thins considerably at the Superb Gem level where it becomes a notable condition rarity. Vivid shades of cerulean-blue, lavender-gray, golden-orange, and sea-green toning are the outstanding visual attributes of this spectacular example. The design elements are well-detailed and vibrant mint luster shines through the toning, enhancing the exceptional eye appeal. Population: 7 in 67 (1 in 67+), 1 finer (8/15). NGC ID# 23TE, PCGS# 5442

1860-S Quarter, XF45
Only One Finer at PCGS

3865 1860-S XF45 PCGS. Briggs 1-A. Struck on the eve of the Civil War in San Francisco, the 1860-S quarter saw a meager mintage of 56,000 pieces, although likely for reasons unrelated to that distant conflict. This frosty Choice XF example shows some scattered abrasions consistent with moderate circulation, but a long, lateral scrape from Liberty's knee is the only singular mark. Wear and strike weakness combine to soften the central details. Only one Mint State coin is reported on the certified population reports, an MS61 PCGS example, recently sold in lot 98372 of the Gardner Collection, Part II where it realized \$55,812.50. Population: 2 in 45, 1 finer (7/15). NGC ID# 442R, PCGS# 5453

1861 Seated Quarter, Gorgeous MS67
One of Few Superb Gem Survivors

3866 1861 MS67 PCGS. The 1861 Seated quarter is a high-mintage issue of more than 4.8 million coins, but this piece is among the few finest survivors at PCGS. Seated quarter mintages from Philadelphia would plummet in ensuing years as the Civil War-inspired hoarding of gold and silver coins made the production of large quantities of coins futile. This piece displays lovely patina in shades of pale blue-green, rose, and pearl-gray complementing vivid, rich cartwheel luster and a strike that is close to full throughout, save for a few of the right-side obverse stars. Population: 8 in 67 (1 in 67+), 0 finer (8/15).

Ex: Purchased by Eugene Gardner from Bill Nagle (9/2001); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98349. NGC ID# 23TT, PCGS# 5454

1874-S Arrows Quarter, MS67
Tied for Finest Certified of the Type

3867 1874-S Arrows MS67 PCGS. Briggs 1-A. The 1874-S is one of the most plentiful issues in the brief With Motto, With Arrows Seated quarter type, a favorite for type purposes, but the number of examples surviving in MS66 or finer condition is impressively minimal. This Superb Gem is tied with three others as finest at PCGS; likely including one or more resubmissions, NGC contributes another nine coins in this grade, also with none finer (7/15). This piece is boldly struck and possesses beautifully preserved surfaces. Some light die rust on the reverse contributes to the overall frosty glow of the luster, while each side is graced by light champagne toning. Several reverse die cracks suggest a late die state. This is one of the finest coins known of the With Motto, With Arrows type overall. NGC ID# 23VY, PCGS# 5495

**1876 Seated Quarter, MS67+
Unsurpassed Quality, Vibrant Luster**

- 3868 1876 MS67+ PCGS. CAC.** The 1876 ranks as one of the most plentiful Seated Liberty quarter issues in Mint State, and is a go-to issue for an affordable type coin. Yet, its availability is limited, and in Superb Gem condition the 1876 is a major condition rarity. This CAC-approved, beautifully lustrous example is tied for top honors at PCGS and NGC. The luster is vibrant and frosty, illuminating shades of amber, gold, and aquamarine on each side, with some prooflike mirroring seen in the reverse margins. A tiny tick on Liberty's right (facing) arm and another on the thigh appear to be all that limit the grade on this eye-catching Seated quarter type coin. Heavy die lines in the dentils appear around much of obverse periphery, giving the illusion of misplaced digits below the date. Population: 9 in 67 (2 in 67+), 0 finer (7/15). NGC ID# 23V2, PCGS# 5501

**1882 Quarter, Luminous MS68
Tied for Finest Certified**

- 3869 1882 MS68 PCGS. CAC. Briggs 1-A.** The luminous surfaces on this Superb Gem 1882 quarter shows largely gold and peach interiors accented by sky-blue at the rims, the latter color dominating the reverse except for the device high points. A few pale untuned streaks show in the obverse fields. Briggs lists only one variety for this year, showing a recut 18 in the date. This still can be seen on this coin from the extended base of the 1 to the left of that digit.

While Gene Gardner considered this coin "only average," most collectors would consider it a major acquisition and a top-notch addition to their collections, one of the few finest survivors from the low mintage of 15,200 circulation strikes. The finest known of the issue are five in MS68 at NGC and only one in this grade at PCGS (8/15).

Ex: Jason Carter (3/2003); Eugene Gardner Collection, Part III (Heritage, 5/2015), lot 98366. NGC ID# 23VE, PCGS# 5514

1888-S Seated Quarter, MS65+
Satin Luster

- 3870 1888-S MS65+ PCGS. Briggs-Unlisted. Golden-brown, forest-green, and lavender-red bathe this lustrous and well-struck Choice quarter. Smooth aside from wispy marks on the left obverse field. The mintmark location does not match any of the photographs in the Larry Briggs reference. A small die break atop the right end of the banner may be of interest to the specialist. NGC ID# 23VN, PCGS# 5521

1890 Seated Quarter, MS67
Intense Mint Luster

- 3871 1890 MS67 PCGS. Briggs 2-B. A conditionally rare Superb Gem example of this otherwise available late-series issue. This piece is incredibly vibrant and frosty, with splashes of olive-gold, amber, lilac, and sky-blue encompassing much of each side. The right-hand stars are a trifle weak, but the central motifs are well-defined. Eye appeal is exceptional. Population: 23 in 67 (3 in 67+), 1 finer (8/15). NGC ID# 23VP, PCGS# 5523

PROOF SEATED QUARTERS

1845 Seated Quarter, PR64 An Extreme Proof Rarity Only Seven Pieces Believed Known

3872 1845 PR64 PCGS. CAC. Briggs 5-E. The 1845 proof Seated Liberty quarter is a very rare issue, with no recorded mintage figure and an extremely small supply of surviving specimens. After a diligent search of auction records, only seven examples are known to us, including a piece in the Smithsonian Institution. Walter Breen believed there were six coins still available in 1977, a figure which Larry Briggs seconded. The certified population, listing 14 specimens at PCGS and NGC combined, is highly inflated by resubmissions. The PCGS estimate of four to six pieces known is obviously a trifle low by the current data.

The present coin is a delightful Choice example with razor-sharp definition on all design elements. The fields are brightly reflective under iridescent shades of antique-gold, lime-green, and blue-steel toning. The date shows the diagnostic doubling of the last three numerals, which were recut after being initially placed too far to the left. This lot combines absolute rarity, high technical quality, and intense historic interest. Population: 5 in 64, 0 finer (7/15).

Roster of Proof 1845 Seated Quarters

1. **PR66 NGC.** Menjou Collection (Numismatic Gallery, 6/1950), lot 715; John Jay Pittman; Pittman Collection (David Akers, 5/1998), lot 1711, as part of a complete 1845 proof set; Phil Kaufman Collection (Heritage, 1/2008), lot 3030; FUN Signature (Heritage, 1/2009), lot 3765; Chicago Signature (Heritage, 8/2013), lot 5589; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98394.
2. **PR65 NGC.** William Dickinson Collection (S.H. & H. Chapman, 3/1894), lot 387; J.M. Clapp; John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Collection (Bowers and Merena, 4/1997), lot 1437; Phil Kaufman; Rarities Sale (Bowers and Merena, 1/1999), lot 1112.
3. **PR64 PCGS.** ANA Signature (Heritage, 8/2015).
4. **PR64 PCGS.** George Earle Collection (Henry Chapman, 6/1912), lot 3088, as part of a proof set offered individually; Ryder Collection; Wayte Raymond; 49th Sale (New Netherlands, 6/1957), lot 1152; Long Beach Signature (Heritage, 2/2012), lot 3489; Central States Signature (Heritage, 4/2014), lot 5582. **The present coin.**
5. **PR64 NGC.** Eric P. Newman / Central States Signature (Heritage, 4/2013), lot 3904.
6. **PR63 PCGS.** Central States Signature (Heritage, 4/2015), lot 5030.
7. **Proof.** Smithsonian Institution.

Additional Appearances

- A. **Proof.** Randall Collection (W. Elliot Woodward, 6/1885), lot 617.
- B. **Proof.** Lorin G. Parmelee Collection (New York Coin & Stamp, 6/1890), lot 1165, which realized \$12.00.
- C. **Brilliant Proof.** Matthew A. Stickney Collection (Henry Chapman, 6/1907), lot 1174.
- D. **Proof.** Matthew A. Stickney Collection (Henry Chapman, 6/1907), lot 1789, as part of an original seven-piece proof set, which realized \$250.00.
- E. **Brilliant Proof.** Howard R. Newcomb Collection (Morgenthau, 2/1945), lot 614.
- F. **Proof.** Harmer Rooke (11/1989). NGC ID# 23W8, PCGS# 5539

**1858 Seated Liberty Quarter, PR67
Early Silver Proof Rarity
Ex: Eliasberg-Kaufman**

3873 1858 PR67 NGC. Briggs 5-E. The original mintage of 1858 proof silver coins is open to question. The long-estimated number struck is 80 pieces. However, this mintage figure did not originate with Mint records, but apparently with one of the Chapman brothers. Later estimates of the 1858 silver proofs rose to between 225 and 300 coins, based largely on David Bowers' research on the 1858 proof dollar for *Silver Dollars and Trade Dollars of the United States*. The 300-piece figure was extrapolated to the other 1858 silver proof denominations and found its way into the current *Guide Book*. Based on the certified population, it would appear their mintage was between about 80 and 200 specimens. In any event, 1858 proof quarters are rare in the Gem and finer levels of preservation.

This Superb Gem proof ranks high in the lineup of proof 1858 quarters, probably the finest known, and is the single finest NGC-certified specimen of its issue (8/15). The obverse has a few minor lint marks, similar to most proof quarters of the date. The fields are deep mirrors beneath pale champagne toning with intense peripheral gold, lilac, and blue near the borders, especially on the obverse. The central devices are dominated by champagne-gold. Both sides yield modest field-motif contrast when the coin is tilted ever so slightly beneath a light. A sharp strike is indicated by full design features and a high wire rim with bold dentilation over each side.

Ex: Louis E. Eliasberg, Sr. (*Bowers and Merena*, 4/1997), lot 1468; *The Phil Kaufman Collection of Early Proof Sets, Part One* (Heritage, 8/2007), lot 1800; *The Scott Rudolph Collection* (Heritage, 1/2009), lot 3770. NGC ID# 23WK, PCGS# 5554

**1859 Seated Quarter, PR65 Cameo
Popular Proof Issue**

3874 1859 PR65 Cameo PCGS. Briggs 2-B. Type Two Reverse. While 1859 proof quarters are generally available, specimens with the Cameo designation are more elusive. This Gem Cameo yields essentially untoned surfaces that exhibit boldly struck design features. A few unobtrusive handling marks are not bothersome. Population: 4 in 65 (1 in 65+) Cameo, 7 finer (8/15). Ex: Dallas Signature (Heritage, 10/2008), lot 668; FUN Signature (Heritage, 1/2009), lot 2385. NGC ID# 23WL, PCGS# 85555

**1865 Seated Quarter, PR66+
Splendidly Toned and Nicely Mirrored**

3875 1865 PR66+ NGC. CAC. Briggs 3-B. A splendidly patinated No Motto Seated quarter, this Premium Gem proof exhibits golden-brown centers that cede to plum-red and navy-blue borders. The resulting eye appeal is affirmed by the green CAC approval sticker. Fully struck, as one would expect of a proof, and nicely mirrored with undisturbed surfaces. A scant 500 proofs were manufactured, and a number from unsold sets were likely melted by the Mint. Census: 12 in 66 (1 in 66+), 5 finer (8/15). NGC ID# 23WT, PCGS# 5561

**1873 Arrows Quarter, PR66+
High-End Proof Type Coin**

3876 1873 Arrows PR66+ NGC. Briggs 5-D. With a low mintage of just 500 pieces, the 1873 Arrows proof quarter is a genuine rarity in Premium Gem and finer condition. This piece shows subtle contrast on each side, but a Cameo designation is withheld due to deep lavender and ocean-blue toning that uniformly blankets the mirrored fields. Census: 12 in 66 (1 in 66+), 4 finer (8/15). NGC ID# 23XR, PCGS# 5574

**1880 Quarter, PR67 Ultra Cameo
Tied for Finest Known**

- 3877 1880 PR67 Ultra Cameo NGC. Briggs 2-B.** The proof 1880 Seated quarter is typically regarded as a plentiful date, but in Ultra Cameo grades, this issue is undeniably rare. The present Superb Gem is tied with one other as the finest of just five Ultra Cameos at NGC (8/15). The strike is bold and the motifs are thickly frosted. A faint golden hue emerges from the peripheries and melts into the mirrored fields. NGC ID# 23XC, PCGS# 95581

**1883 Seated Liberty Quarter, PR67
None Finer at PCGS**

- 3878 1883 PR67 PCGS. CAC. Briggs 1-A.** Proof 1883 Seated Liberty quarters are popular among date collectors due to the relatively low mintage of business strikes (14,400 pieces). Few examples can match the technical quality and terrific eye appeal of this delightful Superb Gem. Peach-gold and cobalt-blue toning around the obverse margin frames lavender and violet-gray in the central area, while a medley of peach-gold, lavender, crimson, and yellow-gold around the reverse border accents cobalt-blue in the center. The design elements are sharply struck and both sides are nicely preserved. Housed in an old green label holder. Population: 10 in 67, 0 finer (8/15).
Ex: *Bowers and Merena* (11/1998), lot 136; *Gene Gardner; Gardner Collection, Part III* (Heritage, 5/2015), lot 98394.. NGC ID# 23XF, PCGS# 5584

**1890 Quarter, PR67+ Cameo
Brilliant Contrast**

- 3879 1890 PR67+ Cameo NGC. Briggs 3-C.** A brilliant, gleaming Superb Gem proof with stark white-on-black contrast and sharp design elements. A lack of hairlines in the fields delights the eye when studied with a loupe. This proof issue is rare in Superb Gem condition, particularly in the Cameo and Deep Cameo categories. Census: 13 in 67 Cameo (1 in 67+ Cameo), 7 finer (8/15). NGC ID# 27US, PCGS# 85591

BARBER QUARTERS

**1893-S Barber Quarter, MS65
Conditionally Elusive**

- 3880 1893-S MS65 PCGS.** This San Francisco issue is elusive in Mint State, but becomes a genuine rarity in Gem or better condition. This MS65 example is impressively sharp, with satiny luster that glows beneath russet-gold toning. A couple small marks on Liberty's portrait are all that preclude an even finer grade. Housed in a first generation holder. Population: 12 in 65, 4 finer (8/15). NGC ID# 23XY, PCGS# 5606

**1895 Barber Quarter, MS66
Few Known Finer**

- 3881 1895 MS66 PCGS.** The 1895 is an available date in the Barber quarter series, but seldom is a Premium Gem example encountered. This piece displays a bold strike, with light golden toning warming frosty, mint-fresh luster. A few insignificant ticks on the obverse portrait are not bothersome, and the eye appeal is outstanding. Population: 11 in 66, 3 finer (8/15). NGC ID# 23Y4, PCGS# 5610

**1895 Barber Quarter, MS66
Beautifully Preserved**

- 3882 1895 MS66 PCGS.** The 1895 Barber quarter is seldom seen at the Premium Gem grade level, and finer coins are extremely rare. This piece is fully worthy of the MS66 designation, showing satiny luster that is free of distracting abrasions. Uncommonly bold definition characterizes the devices and each side shows soft lavender-gray and champagne toning. Population: 11 in 66, 3 finer (8/15). NGC ID# 23Y4, PCGS# 5610

1896-O Barber Quarter, MS67
Tied With One Other for Finest Certified

3883 1896-O MS67 NGC. While most collectors, novice and advanced, recognize the 1896-S as an important rarity in the Barber quarter series, its New Orleans Mint cousin is every bit as elusive in top condition, especially with a sharp strike. In fact, David Lawrence, in *The Complete Guide to Barber Quarters*, second edition, gives the date an R.6 rarity rating in Mint State. This Superb Gem is a memorable coin that is tied with one other (a PCGS coin) for the finest certified of the issue (7/15). Nearly every design feature is boldly rendered, including the star radials, Liberty's hair strands, and the eagle's feathers; only the arrow fletchings near the eagle's claw show slight weakness. The central regions display creamy luster, complementing peripheral hues of gold, magenta, and electric-blue around the obverse and a narrower ring of the same color palette on the reverse. An impressively preserved example.

Ex: ANA Signature (Heritage, 8/2007), lot 1658; FUN Signature (Heritage, 1/2009), lot 3781; Baltimore Auction (Bowers and Merena, 11/2009), lot 743; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98412. NGC ID# 23Y8, PCGS# 5614

1901-S Quarter, Well-Preserved Fine 12

3884 1901-S Fine 12 PCGS. Three key dates lay claim to true series rarity — the 1896-S, 1901-S, and 1913-S — but in terms of grading events, the 1901-S is far and away the scarcest of the trio. The 1901-S was minted to the tune of just 72,664 pieces, virtually all of which entered circulation and have long-since bowed to attrition.

The present survivor is remarkably well-preserved for the assigned grade. Pleasing silver-gray color with traces of deeper toning around the devices provide the perfect old-silver look. Sharp rims join the upper portions of all the letters in LIBERTY and nice detail remains on the eagle's wings. E PLURIBUS UNUM is fully readable within the banner. A rare and desirable coin even in this well-circulated condition, because it is entirely problem-free. Population: 8 in 12, 84 finer (8/15). NGC ID# 23YR, PCGS# 5630

**1905-O Quarter, MS65+
Unusually Well-Struck**

3885 1905-O MS65+ PCGS. CAC. The 1905-O Barber quarter is scarce in Mint State, and rare above MS64. This high-end Gem is an outstanding example, showing frosty luster beneath natural lavender-gray, rose-gold, and sea-green toning. The eagle's right (facing) talons are a trifle weak, but the strike is otherwise exceptional for a New Orleans issue. Population: 11 in 65 (3 in 65+), 11 finer (7/15). NGC ID# 23Z3, PCGS# 5640

**1907-S Barber Quarter, MS66
Vibrant Luster, Exceptional Eye Appeal**

3886 1907-S MS66 PCGS. CAC. The multicolor hues span the breadth of the spectrum on both sides of this resplendent San Francisco quarter. Indigo-blue, rose, and sea-green are just a few of the prominent shades, but the nuances of other colors make this toned Premium Gem exceptional. The eye appeal alone trumps all other factors, although the strike is slightly incomplete on the eagle's right side. The obverse elements are sharply struck. Mint luster is especially vibrant throughout. Population: 7 in 66, 3 finer (7/15). NGC ID# 23ZB, PCGS# 5648

**1912 Quarter, MS67
Registry-Grade Quality**

3887 1912 MS67 PCGS. Few Barber quarter issues rival the 1912 for availability, but even this type-coin issue becomes rare at the Superb Gem level — exceedingly so, in fact. This magnificent coin is tied with one other for finest at PCGS (8/15). The frosty surfaces are attractively toned in sun-gold, amber, and olive-green hues around the borders with dusky lilac-gray in the centers. The right (facing) talons and the clutched arrow fletchings are a trifle weak, but the remainder of the devices are sharply defined. NGC ID# 23ZS, PCGS# 5662

**1914-D Quarter, MS67
Green - Newman Pedigree**

3888 1914-D MS67 NGC. Ex: "Col." E.H.R. Green / Eric P. Newman Collection. This is an uncommon coin in several ways. While the 1914-D is considered a common date among the later Barber issues, it barely exists in Superb Gem condition. This is a magnificently lustrous example that displays even gray-golden toning over each side. The strike is strong overall and, of course, no abrasions can be seen. The sole finest at NGC (8/15).
Ex: "Colonel" E.H.R. Green; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33219. NGC ID# 23ZY, PCGS# 5668

PROOF BARBER QUARTERS

1893 Barber Quarter, PR68 ★ Rich Old-Time Toning

- 3889 1893 PR68 ★ NGC. CAC.** This exceptional proof displays slightly deeper toning on the reverse than on the obverse, with the overall appeal of a coin from an old-time proof set. The mirroring in the fields is sufficiently deep to set off cameo contrast against the central obverse device, but the depth of color on the reverse makes this effect less obvious. Pale rose and patches of deeper blue are seen on the obverse, while the reverse displays deeper shades of the same rose color in the center and blue around the margin. As indicated by the staggeringly high grade, the surfaces are essentially perfect. Census: 10 in 68 (1 in 68 ★), 2 finer (8/15). NGC ID# 2428, PCGS# 5679

1894 Barber Quarter, PR68 ★ Cameo Gorgeous Rainbow Toning

- 3890 1894 PR68 ★ Cameo NGC.** The 1894 had one of the higher proof mintages of the period, and is proportionately available in grades through PR66. Finer pieces, however, are conditionally scarce and major rarities at the lofty PR68 level, with or without a Cameo designation. Fully defined design elements beautifully accent the deep mirroring in the fields on each side of this stellar coin amid vivid, concentric bands of rainbow toning. The relief elements are noticeably frosted with modest cameo contrast, despite the array of toning over each side. Census: 1 in 68 Cameo (1 in 68 ★ Cameo), 1 finer (8/15).
Ex: *Pre-Long Beach Sale* (Superior, 9/1999), lot 1186; *Eugene H. Gardner Collection, Part III* (Heritage, 5/2015), lot 98423. NGC ID# 2429, PCGS# 85680

1896 Quarter, Superb Gem Proof Plus-Graded with Cameo Designation

- 3891 1896 PR67+ Cameo PCGS.** One of just two Superb Gem Cameo Proofs to earn the PCGS Plus assignment. Barber quarter specialists will appreciate the nearly flawless surfaces and needle-sharp design definition that this piece possesses. Splashes of ocean-blue, lavender, forest-green, and amber-gold toning encompass each side, while the underlying fields exhibit a profound depth of mirroring. Population: 9 in 67 (2 in 67+) Cameo, 2 finer (8/15). NGC ID# 59JB, PCGS# 85682

**1899 Barber Quarter, PR68 Cameo
Tied for Finest Certified**

- 3892 1899 PR68 Cameo NGC.** This beautiful proof quarter displays razor-sharp strike definition and exceptional visual appeal. The design motifs are ice-white and intensely frosted, while the charcoal-black fields display impressive, seemingly boundless reflectivity. Both sides exhibit deep violet and cobalt-blue peripheral toning, contrasting against fully brilliant fields and centers. Wispy, raised die striations appear on Liberty from top to bottom, with a somewhat noticeable patch on the nose that might mistakenly appear to be a post-strike defect, to the unaided eye. There are no such defects to be found on either side of this magnificent specimen, even under inspection with a jeweler's loupe. Census: 4 in 68 Cameo, 0 finer (8/15).

Ex: Purchased Eugene Gardner from David Lawrence Rare Coins (10/1999); Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98433. NGC ID# 242E, PCGS# 85685

**1903 Barber Quarter, PR67
Elusive Cameo Example**

- 3893 1903 PR67 Cameo PCGS. CAC.** The Philadelphia Mint switched to an all-brilliant finish for proof coins in 1902, making specimens with cameo contrast elusive after that date. This sharply detailed Superb Gem displays unusually frosty design elements that contrast boldly with the deeply mirrored fields. The well-preserved surfaces are blanketed in shades of golden-brown, sea-green, and cerulean-blue toning. Population: 14 in 67 (2 in 67+) Cameo, 6 finer (7/15). NGC ID# 242J, PCGS# 85689

**1905 Quarter, PR67 Cameo
Pleasing Contrast**

- 3894 1905 PR67 Cameo PCGS.** As are most proof issues from this period, the 1905 Barber quarter is scarce with cameo contrast, regardless of grade. This Superb Gem example is boldly struck and deeply mirrored, with significant field-motif contrast. The centers are essentially brilliant, while the peripheries show deeper amber and ocean-blue toning. Population: 7 in 67 Cameo, 1 finer (7/15). NGC ID# 242L, PCGS# 85691

**1907 Barber Quarter, PR67
One-Sided Cameo**

- 3895 1907 PR67 PCGS. CAC.** This Superb Gem proof is fully struck and displays deep, seemingly flawless surfaces. The obverse showcases full cameo contrast with hints of lavender-gold around the rims, although the reverse is a little too deeply toned in lilac and mint-green to allow for a Cameo designation. CAC-approved in an old green label holder. Population: 11 in 67, 2 finer (7/15). NGC ID# 242N, PCGS# 5693

1909 Barber Quarter, Vividly Toned PR68

- 3896 1909 PR68 NGC.** Certified in an NGC old-style "no line fatty" holder, this stunning Superb Gem proof 1909 Barber quarter features a melange of iridescent patina in a range of bold color including golden-orange, fuchsia, pale lilac, jade, and saffron. The strike is full throughout both sides, and there are no mentionable distractions on this top-notch coin, among the finest survivors of the proof mintage of 650 pieces. Census: 12 in 68 (2 in 68 ★), 0 finer (8/15). NGC ID# 242R, PCGS# 5695

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, MS65 Uncommonly Lustrous and Eye-Appealing

3897 1916 Standing MS65 NGC. According to the official description, the Standing Liberty quarter depicts Liberty "stepping forward to the gateway of the country ... in the attitude of protection." The moniker "Standing Liberty" is a misnomer which originated in part with the descriptions in auction sales of the early 1920s; B. Max Mehl, for one, was fond of referring to the coin as the "New type with Liberty standing."

This issue is known as one of the three "renaissance" designs introduced in 1916, but it was not actually released into circulation until January 1917. The initial deployment consisted primarily of new 1917-dated coins, but a small group of 52,000 1916-dated pieces, struck the previous month in December, were also released at this time. Few examples of the 1916 issue survive in Mint State, and only a small percentage of those are as fine as this Gem. This is a luminous, well-preserved and well-struck example of the issue, with head detail that is very nearly strong enough to warrant a Full Head designation. Unabraded surfaces display subtle champagne and lavender toning, and the central design elements exhibit pleasing definition. Census: 25 in 65 (1 in 65+), 6 finer (8/15). NGC ID# 43XR, PCGS# 5704

1917 Type One Quarter, MS67 Full Head Unusually Intense Luster

3898 1917 Type One MS67 Full Head PCGS. CAC. Characteristically bold detail and uncommonly vibrant luster deliver exceptional eye appeal on this Superb Gem Type One representative. The surfaces are completely untoned and radiant, with no bothersome abrasions. This issue is often heralded for its reliable quality and availability, which is true in most cases, but pieces this fine are seldom seen. Population: 78 in 67 (4 in 67+) Full Head, 0 finer (8/15). From The Stephen A. Walling Collection. NGC ID# 242Z, PCGS# 5707

1918/7-S Quarter, Satiny MS62
Rarest Standing Liberty Quarter in Mint State

3899 1918/7-S FS-101 MS62 PCGS. Most collectors consider the 1918/7-S to be an essential acquisition before a Standing Liberty quarter date set can be called complete. The overdate is the only major variety in the PCGS Set Registry, and it is also — by far — the rarest *Guide Book* listing in the series in Mint State. PCGS lists 82 Uncirculated examples in all grades, Full Head and non. For perspective, this population falls far short of even the 1927-S, considered a high-grade key date with a Mint State population of 224 coins at PCGS. Moreover, we suspect the overdate certified population is inflated by resubmissions, a popular activity among collectors of better-date Standing Liberty quarters.

This Uncirculated example displays satiny luster with a blush of golden toning over each side. As is anticipated for the issue, Liberty's head, the shield rivets, and the central gown folds show moderate weakness — no fully struck examples of this issue are known. Slide marks over the design high points appear to be the chief grade-limiting factor, as no major abrasions mar the eye appeal. Population: 20 in 62, 49 finer (8/15). NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

1918-S Quarter, MS66 Full Head
Rarely Seen This Fine

3900 1918-S MS66 Full Head NGC. The San Francisco Mint produced more than 11 million Standing Liberty quarters in 1918, but there was nothing consistent about the strike quality of these pieces. Even within the Full Head category, there are wide variances in the sharpness of the secondary areas. The 1918-S is genuinely rare with a full strike throughout, and such a coin is almost uncollectible in high grade.

This Premium Gem is, first and foremost, a major condition rarity. There are few others certified in MS66 Full Head by either service, and finer representatives are almost unobtainable. The head detail on this piece is adequate, and vibrant mint luster further heightens the eye appeal. Close study of the central regions, namely the shield rivets, Liberty's torso, and the eagle's feathers, reveal characteristic softness, but the peripheral stars and date are well-defined. Both sides are boldly die clashed, with parallel die striae remaining from an attempt by the Mint to remove the clashing. This coin is free of major abrasions and displays just a hint of light golden toning. Census: 4 in 66 (1 in 66+) Full Head, 2 finer (8/15). NGC ID# 2439, PCGS# 5725

**1920-D Quarter, MS66 Full Head
Intense Luster, Lightly Toned**

- 3901 1920-D MS66 Full Head PCGS.** In Full Head, the 1920-D is somewhat underrated in the context of the series. Per the certified population data, Full Head examples are scarce in all grades, but the auction appearance rate of such coins is far lower than even the PCGS and NGC numbers suggest. When offered, Full Head 1920-D quarters typically grade just MS64 or lower. In more than two decades, our auctions have previously showcased only 13 Full Head Premium Gems, making the current coin a true rarity and an important acquisition for the advanced collector. Struck from lightly used dies, the surfaces display vibrant, frosty luster but without unsightly polish lines and clash marks; a single die crack runs through the date, which is usual the first place to show breakage. Liberty's head just makes the cut, but above-average sharpness is also seen on the shield rivets, stars, date, and eagle's feathers. There are no significant abrasions and each side displays a lovely champagne glow. Population: 11 in 66 (1 in 66+) Full Head, 4 finer (8/15). NGC ID# 243F, PCGS# 5737

**1924-D Quarter, MS66 Full Head
Impressive Surface Quality**

- 3902 1924-D MS66 Full Head NGC.** The 1924-D is a difficult date to locate in Gem and better grades, and particularly so with the Full Head designation. This piece is pleasing and displays frosty luster with virtually undisturbed surfaces. Near-brilliant overall, save for hints of rose-gold on the obverse and a few flecks of antique-gold on the reverse. The date shows slight (and typical) weakness, particularly on the 4, but this digit is still clear with a loupe. An outstanding example for the specialist. Census: 8 in 66 Full Head, 2 finer (8/15).
Ex: Palm Beach Signature (Heritage, 3/2005), lot 5651; Dallas Signature (Heritage, 11/2005), lot 1409; FUN Signature (Heritage, 1/2010), lot 2667. NGC ID# 243M, PCGS# 5749

**1924-S Quarter, MS65 Full Head
Advanced Die State**

- 3903 1924-S MS65 Full Head PCGS.** The 1924-S is a challenging issue to locate with Full Head detail, particularly in Gem or better condition. This MS65 coin displays crisp head detail and bold date numerals, although the central areas exhibit some of the characteristic softness. The surfaces are well-preserved and show frosty luster with intermingled lavender and champagne toning. The dies are severely deteriorated, showing scattered cracks and numerous striae as a result of aggressive lapping. Population: 34 in 65 (1 in 65+) Full Head, 10 finer (8/15). NGC ID# 243N, PCGS# 5751

**1926 Quarter, MS67
Conditionally Rare**

- 3904 1926 MS67 PCGS. CAC.** Without a doubt, this Superb Gem stands above almost every other known survivor of the conditionally elusive 1926 quarter. PCGS has seen only three non-Full Head coins in MS67 and none finer; the finest non-Full Head pieces at NGC are two coins each in MS67 and MS68 (8/15). This lovely piece exhibits satiny golden and sky-blue luster with small hints of olive, amber, and russet around the extreme outer peripheries. The strike is above-average for a non-Full Head coin, and the preservation is excellent. NGC ID# 243R, PCGS# 5754

**1949-D Quarter, MS68 ★
Superb Toning**

- 3907 1949-D MS68 ★ NGC.** The surfaces of this coin approach technical perfection and each side is covered with the most attractive toning imaginable. A rich interplay of emerald-green, rose, and lavender colors is seen with approximately the same weight and density of coloration on both obverse and reverse. This piece is among the finest known. Census: 3 in 68 (2 in 68 ★), 0 finer (8/15). Ex: *Central States Signature* (Heritage, 5/2004), lot 7269; *Long Beach Signature* (Heritage, 9/2005), lot 3002; *FUN Signature* (Heritage, 1/2008), lot 2063. NGC ID# 245R, PCGS# 5840

WASHINGTON QUARTERS

**1932-S Quarter, MS65
Attractive Key Date Example**

- 3905 1932-S MS65 PCGS. CAC.** This is an impressive Gem representative of the first-year key date with well-detailed design elements and vibrant mint luster. Hints of gold and russet toning provide color to the well-preserved surfaces. Although not quite as rare as its Denver Mint counterpart in high grade, the 1932-S claims the lowest mintage of the series. PCGS has graded only four finer coins (8/15). NGC ID# 2449, PCGS# 5792

PROOF WASHINGTON QUARTER

**1939 Quarter, PR68
Tied for Finest Certified**

- 3908 1939 PR68 NGC.** Gleaming fields and sharp, satiny devices thrive beneath subtle iridescent toning on each side of this high-end Superb Gem proof, but the coin's chief attribute is the unsurpassed technical quality. This magnificent Registry coin is tied with 17 others as the finest at NGC, while PCGS has just three coins in this grade with none finer (7/15). NGC ID# 27HS, PCGS# 5978

**1934-D Medium Motto Quarter, MS67
Lightly Toned**

- 3906 1934-D Medium Motto MS67 NGC.** The motto IN GOD WE TRUST is clear, neither faint nor conspicuously heavy. This Superb Gem's watery luster brims beneath a faint layer of patina that is largely silver-blue but shows touches of champagne, olive, and golden-brown closer to the rims. Neither NGC nor PCGS has graded an MS68 Medium Motto example (8/15). NGC ID# 244C, PCGS# 5796

EARLY HALF DOLLARS

1794 Half Dollar, O-101a, Fine 12 Pleasing Detail and Color

- 3909** 1794 O-101a, Tompkins-7, High R.3, Fine 12 NGC. Ex: Hilt Collection. The late die state variety of O-101, which corresponds to T-7 in the new Tompkins reference. This die pairing is the only 1794 half dollar variety that is marginally available, suitable for date purposes. This piece shows even wear, with bold rims and some detail remaining in Liberty's hair and the eagle's feathers. Both sides show medium olive-gray patina with gold and lilac accents seen upon close examination. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, O-101a, Fine 12 Midgrade First-Year Example

- 3910** 1794 O-101a, T-7, High R.3, Fine 12 ANACS. The late die state variant of O-101, showing a crack on the reverse through the F in OF. This example is evenly worn, but with grade-consistent detail remaining in Liberty's hair. The border dentils are complete around the reverse periphery, but grow weak along the lower-right portion of the obverse. Each side is heavily toned in mottled russet-gray and golden-brown hues. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, O-101a, XF Details Pleasing Peripheral Toning

- 3911** 1794 O-101a, T-7, High R.3 — Repaired — NGC Details. XF. Ex: Hilt Collection. Abrasions in the right obverse field have been smoothed out, leaving faint tool marks that interrupt the bright steel-gray interior surfaces. The margins show attractive toning in shades of lavender, aqua-blue, and greenish-gold. The rims are bold and the central devices exhibit significant detail, with minimal evidence of circulation. This die pairing is ideal for type representation, and the present example offers an affordable, yet, well-detailed acquisition for the budget-conscious collector. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, VF Details Rare Overton-105a Variety

- 3912** 1794 O-105a, T-3, R.6 — Repaired — NGC Details. VF. Ex: Hilt Collection. O-105a (and its early die state counterpart, O-105) is a rare die pairing. Examples are seen so infrequently that collectors seldom have the luxury of being picky about quality. This coin is actually quite pleasing to the naked eye. The obverse shows a bold rim and strong hair detail on the central portrait. The reverse is boldly defined around the borders, but shows considerable weakness over the upper interior due to die failure — characteristic of the late die state. A loupe reveals minor tooling in the obverse fields, but the evidence is hidden by medium olive-gray toning. NGC ID# 37NN, PCGS# 39207 Base PCGS# 6051

**1794 Half Dollar, VG8
Rare O-107 Die Marriage**

- 3913** 1794 O-107, T-5, R.6, VG8 NGC. Ex: Hilt Collection. Overton-101 is the only 1794 half dollar variety that is marginally available; all others are either rare or extremely rare, with O-107 being about in the middle of the latter range. This variety is almost always seen only in low grade, with VF coins among the Condition Census. This VG example is a rare opportunity for the Overton enthusiast. The obverse shows Liberty's portrait boldly outlined with the eye visible; the date and LIBERTY are clear, but the stars are slightly weak along the left and right borders where the rims are faded. The reverse shows bold denticles and rims, with slight weakness in the outline of the upper-right portion of the eagle; a few old marks are faded in the upper field. Both sides display dusky orange-gold and lavender-gray patina, with smooth surfaces and no visible adjustment marks. NGC ID# 24E6, PCGS# 39209 Base PCGS# 6051

**1794 Half Dollar, Fine Details
O-107, Rare Die Pairing**

- 3914** 1794 O-107, T-5, R.6 — Improperly Cleaned — NGC Details. **Fine.** Ex: Hilt Collection. Overton-107 is one of the rarer 1794 half dollar varieties. This piece shows detail worthy of a Fine grade, but evidence of light cleaning precludes a numeric designation from NGC. The surfaces show bright steel-gray color over the interiors, with deeper aqua-blue toning in the protected areas of the peripheries. Both sides show bold border denticles and strongly defined central devices. The reverse also exhibits the occasional adjustment mark, but none are obvious to the unaided eye. NGC ID# 24E6, PCGS# 39209 Base PCGS# 6051

**1795 Flowing Hair Half Dollar, VF35
O-109, Two Leaves**

- 3915** 1795 2 Leaves, O-109, T-16, R.4, VF35 PCGS. The O-109, Tompkins-16 variety is most easily distinguished by two berries on the inside of the right wreath below the eagle's wing, one of which is just a lump. Also, a die scratch protrudes from the topmost berry on the right. Light, even wear is seen over the highpoints of the devices and the surfaces are gray-lilac with golden accents around the design elements. A few light adjustment marks are seen on the reverse. Ex: Long Beach Signature (Heritage, 2/2005), lot 6906; Long Beach Signature (Heritage, 6/2005), lot 6206. From The Stephen A. Walling Collection. NGC ID# 24E7, PCGS# 39227 Base PCGS# 6052

1795 Half Dollar, Well-Detailed VF25
O-110, Two Leaves

- 3916** 1795 2 Leaves, O-110, T-21, R.3, VF25 PCGS. CAC. Deeply toned in russet-brown and cobalt-blue shades with lighter cream-gray on the highpoints. Careful inspection beneath a loupe locates only a few faded marks near the date. The devices display pleasing definition. A charming example of this popular introductory silver type.
Ex: *FUN Signature* (Heritage, 1/2011), lot 3532. NGC ID# 24E7, PCGS# 39228 Base PCGS# 6052

1795 O-110 Half Dollar, XF40
Sharp Flowing Hair Type Coin

- 3917** 1795 2 Leaves, O-110, T-21, R.3, XF40 PCGS. No evidence of obverse die cracks appear on this early die state specimen. The surfaces of this pleasing piece have intermingled light and medium gray with a few splashes of darker steel toning. The sole mentionable mark is an edge nick on the reverse at 4 o'clock. Moderate charcoal verdigris accompanies the wreath and the upper right obverse margin.
Ex: *Long Beach Signature* (Heritage, 6/2011), lot 3599, which realized \$7,762.50. NGC ID# 24E7, PCGS# 39228 Base PCGS# 6052

1795 O-110 Half Dollar, 2 Leaves, AU58

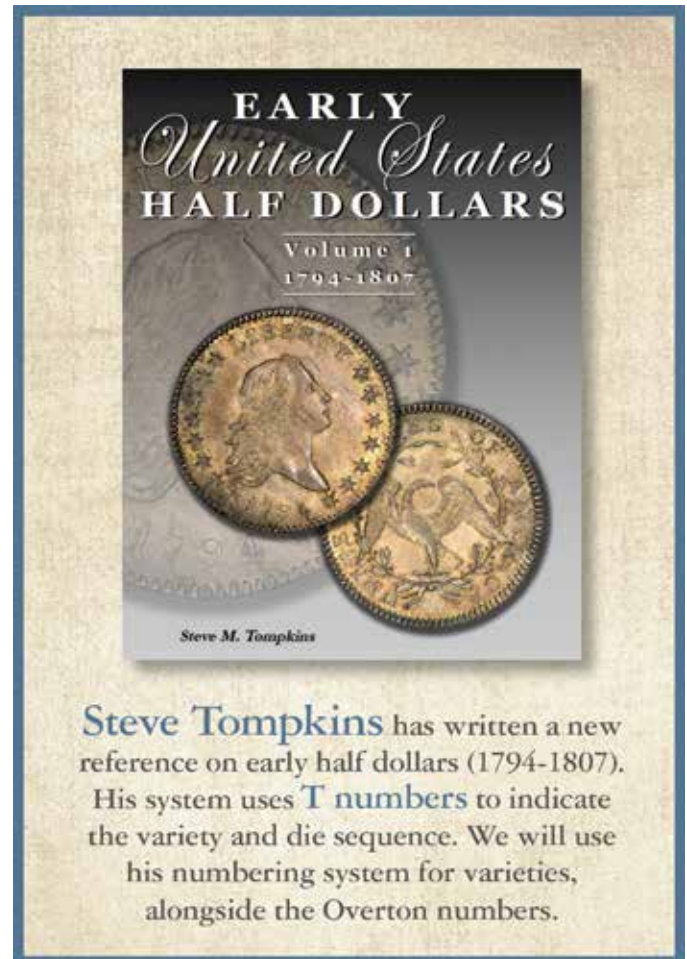

- 3918** 1795 2 Leaves, O-110, T-21, R.3, AU58 NGC. The recutting on star 5 and the loop of the 9 aid in attributing the obverse, as do the raised lines visible in the curls above star 2. The reverse shows two berries under each wing, all on the inside, none on the outside, with the overall berries arranged nine left, eight right. This is a relatively available variety, but the present AU58 example is far finer than usually seen and an excellent choice to represent the variety or the Flowing Hair type. There are scarcely signs of circulation showing on either side, in concert with the grade, but prominent planchet adjustment marks appear on the truncation of Liberty's bust and in her hair, forehead, and the upper obverse area at T(Y). Deep rose-violet patina lightens momentarily into gold, and the strike is nicely brought up overall (save for the eagle's claws) on a well-centered, problem-free planchet. A PCGS example of this variety in the same grade brought \$37,375 in our Denver Signature (Heritage, 8/2006), lot 5217 (although at the time the variety was rated R.4 rather than the R.3 ranking it is given today). This piece is probably about tied for sixth finest known of the variety. NGC ID# 24E7, PCGS# 39228 Base PCGS# 6052

1795 Half Dollar, XF40
O-117, Two Leaves

- 3919** 1795 2 Leaves, O-117, T-3, R.4, XF40 ANACS. Overton's "defect line" between the right arm and base of Y in LIBERTY identifies the die marriage. A caramel-gold and stone-gray representative of the short-lived and introductory Flowing Hair type. The reverse exhibits moderate adjustment marks, as coined, but post-strike abrasions are only incidental. Attractively defined, and protected regions show ample glimpses of luster.
Ex: Long Beach Signature (Heritage, 6/2011), lot 3600, which realized \$6,900. NGC ID# 24E7, PCGS# 39233 Base PCGS# 6052

1796 16 Stars Half Dollar, O-102, VF20 Details
An Acceptable Mid-Grade Type Coin

3920 1796 16 Stars, O-102, High R.5 — Damaged — ANACS. VF20 Details. Amato-218. The 1796 Overton-102 half dollar bears 16 obverse stars, unlike the three other varieties of this Draped Bust Small Eagle design type that consists of 15 stars. The 16 star variety apparently commemorated Tennessee's June 1, 1796 admission to the Union as the 16th state. While the 16 stars die was likely made prior to this date, Mint records indicate that all Draped Bust Small Eagle half dollars were delivered in 1797 (February 28, March 21, and May 26). Breen (1988) theorizes that 16 star examples were included in the March and May deliveries.

The 1796 16 Stars example offered in this lot does not exhibit the die crack from the milling through the first four stars that is visible on some pieces. Indeed, while previous numismatic literature contends that most known 16 star examples display this crack, our ongoing research on the Draped Bust Small Eagle half dollar series indicates that nearly two-thirds of the 65 halves with 16 stars that we have so far documented lack this crack.

Grayish-mauve toning dominates both sides, joined by splashes of cobalt-blue and faded yellow-gold. The design elements are nicely centered on the planchet, and the dentilation on both sides is bold. Relatively strong definition is apparent in Liberty's hair, and about one-half of the eagle's wing feathers show, along with nearly all of the tail feathers. The surfaces are quite clean for the grade, save for a mark to the right of Liberty's chin, and four moderate-size digs on the upper-right reverse quadrant, one of which partially obliterates the stand of the F in OF and the adjacent leaf. No adjustment marks are evident.

Despite the damage, which sounds worse than it really is, this piece will fit comfortably in a mid-grade type or date/variety collection. It must be remembered that about 35 percent of extant 1796-1797 half dollars reveal one or more impairments (plugs, extensive scratches, graffiti, harsh cleaning, planchet defects, re-engraved devices, smoothed surfaces, etc.), most of which are much more serious than seen on the present coin. Indeed, we expect spirited bidding on this rare two-year design-type representative.

Ex: Long Beach Signature (Heritage, 6/2006), lot 1588. PCGS# 39262 Base PCGS# 6058

1797 Half Dollar, O-101a, Fine 15
Claims to Very Fine Classification
The Peter Mougey Specimen

3921 1797 O-101a, T-1, High R.4, Fine 15 PCGS. CAC. Amato-442. The Draped Bust Small Eagle half dollar, with its minuscule production of 3,918 coins and bearing the dates 1796 or 1797, is perhaps the most desirable and sought-after type U.S. type coin. In fact, a type set of U.S. coinage is incomplete without the inclusion of this piece of Americana. Our research to date has accounted for only 281 extant specimens, an extremely small number when one considers the demand from not only type collectors but from date/variety specialists as well. It is little wonder that the 1796-1797 half consistently reveals a higher value than any other type coin (with the possible exception of the one-year types 1796 No Stars and 1808 quarter eagles) in most levels of preservation.

The Choice Fine example offered here pedigrees to the legendary Peter Mougey of Cincinnati, Ohio. Thomas Elder, cataloger of the Mougey Collection, wrote: "Mr. Mougey must be regarded as one of the wisest, if not, indeed, the most far-sighted American numismatists of his day. His coins come from notable sales, including Mickley, Winsor, Bushnell, Parmelee, Cleneay, and Maris."

This coin exhibits the reverse cracks in the upper-left quadrant that identify the later die state of the 1797 Overton-101 variety. Light gray hues are seen on Liberty and the eagle, which are highlighted against the darker gray-violet fields. The design elements display sharp definition for the designated grade, especially on the obverse where considerable detail is apparent on Liberty's hair, facial features, and drapery. In fact, these attributes indicate a Very Fine grade. Even the reverse may claim Very Fine classification, as the devices are quite strong. It is our opinion that PCGS downgraded the coin because of an old, unobtrusive, toned-over horizontal obverse pinscratch. Moreover, close inspection reveals no significant abrasions or Mint-made adjustment marks. This specimen retains considerable overall eye appeal, appropriately recognized by CAC, and will fit comfortably into any mid- to high-grade type or date/variety collection.

Ex: Peter Mougey Collection (Thomas Elder, 9/1910), lot 425; Joel Rettew Rare Coin Galleries fixed price list (Winter, 1976); ANA Signature (8/1995), lot 5170; William La Belle Collection (American Numismatic Rarities, 7/2005), lot 1148; Dick Osburn fixed price list (10/2005); Long Beach Signature (Heritage, (2/2006), lot 1146; Stack's (11/2007), lot 1077; FUN Signature (Heritage, 1/2009), lot 3834; Los Angeles Signature (Heritage, 7/2009), lot 1112.

From The Stephen A. Walling Collection. NGC ID# 24EC, PCGS# 39265 Base PCGS# 6060

1805 O-113a Half Dollar, Lustrous AU50

- 3922** 1805 O-113a, T-1, High R.4, AU50 PCGS. Certified in a PCGS green-label holder, this early-state 1805 half shows no evidence of the die cud that would later form above AM on the reverse. Star 9 is recut, and stars 1 and 13 are close to the second curl and bust. Five berries are on the reverse, the lowest two with short stems. The letters AME are close at their bases. This piece shows much luster remaining on silver and champagne-gold surfaces with good eye appeal. The obverse shows bold clash marks and a large area of planchet adjustment marks on the lower bust. NGC ID# 24EG, PCGS# 39288 Base PCGS# 6069

1806 Half Dollar, O-106, AU50
Scarce Knob 6, Small Stars Variety

- 3923** 1806 Knob 6, Small Stars, O-106, T-4, R.4, AU50 PCGS. Heavy die lines, one near the upper-right corner of the shield and the other from the fletchings to the tailfeathers, confirm the attribution. A fairly scarce Knob 6 variety, elusive in AU and finer grades. This piece is well-detailed in most areas, showing just minor softness on the upper-right reverse. Areas of aquamarine, violet, and silver-gray toning encompass each side, with the deeper colors most prominent on the obverse. Population: 2 in 50, 8 finer (8/15). NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

1807 O-102 Draped Bust Half, MS65
Finest in the Census for the Variety

- 3924** 1807 Draped Bust, O-102, T-8, R.2, MS65 NGC. A satiny, lustrous Gem, with original golden-gray toning on the obverse interspersed with lilac, rose, and pale-blue accents. The lustrous reverse shows silver-lilac shades with pale-gold undertones around the devices. Slight die clashing at Liberty's throat and through the field stars and clouds at OF on the reverse suggest a middle state of the dies, before die cracks for the later states develop.

The O-102 variety is known for narrow milling and slight incompleteness of strike at the centers, where Liberty's hair strands show blending and the eagle's head, neck, and scroll border are a bit weak. Some of the obverse stars on the left are diagnostically flat. These factors are easily outweighed by the mark-free surfaces and substantial eye appeal of this richly toned Gem. A single MS65 coin is listed for O-102 in three census references (Herrman, Parsley, and Tompkins) — presumably, it is this exact coin based on its previous appearance in a January, 2004 ANR auction. Gem-quality Draped Bust halves are always in short supply for those assembling high-grade date, variety, or type sets. PCGS and NGC combined show just three finer MS66 coins among all Draped Bust 1807 halves, regardless of variety. NGC Census (all varieties): 7 in 65, 2 finer (8/15). NGC ID# 24EM, PCGS# 39339 Base PCGS# 6079

BUST HALF DOLLARS

1814 Half Dollar, O-104a, MS64
Scarce This Fine

3925 1814 O-104a, R.2, MS64 NGC. This is the more frequently seen late die state variant of O-104, showing extensive peripheral cracks around portions of each side. The widely spaced denomination on the reverse confirms the attribution. This Choice example is lustrous and free of major abrasions, with consistent olive-gray and golden-brown toning over each side. The eagle's talons, left (facing) wing feathers, and obverse stars 4 through 6 show some of the usual striking weakness. Census(all varieties included): 29 in 64 (2 in 64+), 23 finer (7/15). NGC ID# 4G8D, PCGS# 39479 Base PCGS# 6105

1815/2 Bust Half, AU50
O-101, Attractive Overdated Issue

3926 1815/2 O-101, R.2, AU50 PCGS. The eye appeal is exceptional for this low-mintage half dollar, an issue that too often comes dull and lacking pizzazz. An abundance of coppery-gold mint luster remains beneath the lilac-gray toning throughout both sides. The overdate is clearly evident under low magnification, where the faint curl of the underdigit 2 nearly closes the gap between the flag of the primary 5 and its curved right side.

The fact that few coins of any denomination were struck in 1815 adds to the desirability of the issue. Just 47,150 half dollars were produced during the year, and the overdate simply adds to the considerable appeal. This example is housed in an old green label holder, with moderate wear and light die clashing visible on the reverse, but no serious marks. Always in demand — a prize for the Bust half collector. Population: 22 in 50, 59 finer (8/15). NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

1815/2 O-101a Half Dollar
AU Sharpness

- 3927** 1815/2 O-101a, R.3 — Improperly Cleaned — NGC Details. AU. Those who collect Capped Bust halves by date know that the 1815 is the stopper. All examples of that elusive issue were struck from a single die marriage, which shows the faint curve of a 2 beneath the flag of the 5. The present well-defined half dollar displays ample luster across moderately hairlined cream-gray surfaces. The late die state is confirmed by the ascending crack through 50 C, the arrowheads, and RICA. Both sides display at least three sets of clash marks. NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

1819/8 Half Dollar, O-104, MS64
Original Toning

- 3928** 1819/8 Large 9, O-104, R.1, MS64 PCGS. Bold recutting on star 4 is the giveaway for O-104, the only use of this overdated obverse. This piece is well-struck on the central devices, but a few stars and portions of the reverse peripheral legends lack full definition. No bothersome abrasions are present. Dusky lavender-gray and gold hues yield to deeper aquamarine color on each side, with satiny luster shining through. Population (all Large 9 overdate varieties included): 7 in 64, 6 finer (8/15). NGC ID# 24FC, PCGS# 39559 Base PCGS# 6119

1822/1 O-101 Half Dollar, MS63
Brilliant Surfaces, Condition Scarcity

- 3929** 1822/1 O-101, R.1, MS63 PCGS. Two varieties of the overdate exist, with this Overton-101 die pair slightly more available than its O-102 counterpart (although both varieties are conditionally scarce in Mint State). Sharply struck throughout, the coin is blaze-white, frosty, and extremely lustrous. A tiny scrape on the cheek and a few faint field scuffs are all that limit the assigned grade. Population: 3 in 63, 7 finer (8/15). NGC ID# 24FH, PCGS# 39604 Base PCGS# 6130

1822 O-106a Half Dollar, MS64
Beautiful Iridescent Toning

- 3930** 1822 O-106a, R.3, MS64 NGC. Beautiful orange, lemon-gold, ocean-blue, and lavender toning embraces this lustrous Choice Bust half. The strike is precise except on the first three stars, and marks are confined to a small field cluster below the beak. The late die state with spindly cracks on the reverse periphery. NGC ID# 24FG, PCGS# 39592 Base PCGS# 6129

1823 O-105 Half Dollar, MS65
High Condition Census

- 3931** 1823 O-105, R.1, MS65 NGC. Both the Parsley reference and Steve Herrman's census suggest a single MS65 coin exists at the top of the Condition Census for the variety. Accordingly, this satiny Gem joins the Eliasberg coin as the top examples for the variety, which is identified by a distinctive "Dot Dash" centering dot at the fourth shield azure. This lustrous and attractive coin is extremely well-preserved, with soft-blue and golden-rose toning evenly dispersed over satin-smooth, unabraded surfaces. The strike is sharp throughout. NGC ID# 24FJ, PCGS# 39608 Base PCGS# 6131

1831 Half Dollar, O-103, MS65
Lightly Toned Type Coin

- 3932** 1831 O-103, R.1, MS65 NGC. Plentiful in lower grades, the 1831 Bust half dollar becomes conditionally scarce at the Gem level and is rarely seen finer. This piece is sharp around the peripheries, with just a touch of softness on the eagle's left (facing) wing feathers and talons. Frosty and lustrous with a light golden hue. Census (all varieties included): 45 in 65 (4 in 65+), 13 finer (8/15). From The Stephen A. Walling Collection. NGC ID# 24FV, PCGS# 39839 Base PCGS# 6159

REEDED EDGE HALF DOLLAR

1838 Half Dollar, GR-2, MS64 Lovely Peripheral Toning

- 3933** 1838 GR-2, R.3, MS64 PCGS. A lovely example from this historic year that saw the opening of the nation's first branch mint in Louisiana, Georgia, and North Carolina, and the production of the 1838-O proof half dollars. This more affordable 1838 Philadelphia half boasts splendid peripheral toning in jade and saffron, with grayish centers and tons of eye appeal. Population: 57 in 64 (3 in 64+), 9 finer (8/15).
Ex: Central States Signature (Heritage, 4/2008), lot 1106.
From The Stephen A. Walling Collection. PCGS# 531081 Base PCGS# 6177

SEATED HALF DOLLARS

1852 WB-101 Half Dollar, MS64 Rare at this Level

- 3934** 1852 WB-101 MS64 PCGS. The low mintage of 77,130 pieces was a result of the high price of silver, and as a result the 1852 issue is scarce in all grades. This example displays a lustrous, pale-gold patina and a sharp strike with the exception of Liberty's head and surrounding star centers, which are compromised by horizontal roller marks both at the top of the coin as well as at the bottom through the date area. A few small marks are widely distributed and do not lessen the appeal of this near-Gem coin. PCGS reports just four finer pieces. Population: 5 in 64, 4 finer (8/15). NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

1866-S Motto Half Dollar, MS64 WB-104, Doubled Die Reverse

- 3935** 1866-S Motto, Doubled Die Reverse, WB-104, Die Pair 3, R.3, MS64 PCGS. The obverse die was dusted off and reused in a late die state to pair with the doubled die reverse, where the doubling is most visible on TRUST in the scroll as well as on the horizontal shield lines and within the eagle's right wing. Frosty silver-lilac surfaces exude soft mint luster. The strike is incomplete on several star centers amid numerous die cracks, with blending at Liberty's head and the eagle's left talon. All other motifs are bold. A few tiny marks visit the highest points, yet the fields appear wholly unabraded. Population: 4 in 64 (1 in 64+), 3 finer (8/15). NGC ID# 27SY, PCGS# 572176 Base PCGS# 6320

1870-CC WB-101 Half Dollar, Fine 15 Pleasing First-Year Carson City Issue

- 3936** 1870-CC WB-101, Die Pair 5, R.6, Fine 15 PCGS. Original silver-gray surfaces display occasional gold highlights over pleasing fields and devices for this first-year Carson City issue. While the issue is occasionally available in circulated grades, Uncirculated examples are extremely rare and even well-circulated pieces command much attention from collectors. This example shows strong motifs for the assigned grade, with four letters of LIBERTY visible and more than 70% of the wing feathers present. The rims and dentils are sharp for the Fine 15 level. Population: 9 in 15, 70 finer (7/15). PCGS# 572190 Base PCGS# 6328

1873 Seated Half, VF30 Scarce No Arrows, Open 3 Variety

- 3937** 1873 No Arrows, Open 3, WB-101, VF30 PCGS. The No Arrows, Open 3 half dollar is by far the rarest 1873 issue in all grades. Seldom is an example encountered and pieces grading finer than the VF level are rare. This is an above-average VF coin with original steel-gray patina that shows deep gunmetal hues in the protected areas. Liberty's gown and the eagle's plumage retain all major design details, and the overall eye appeal is excellent. Population: 3 in 30, 13 finer (8/15). PCGS# 572206 Base PCGS# 6337

1881 Half Dollar, MS65 Prooflike
Untoned WB-102, Snow-White Devices

- 3938 1881 Closed Bud, WB-102, MS65 Prooflike NGC.** A snowy-white Gem with excellent contrast between the reflective fields and the frosty motifs. The sharp strike and vibrant mint luster offset a few stray marks that visit the untuned surfaces. While prooflike examples of this briefly minted issue are not particularly unusual, just three finer pieces have been so-designated by NGC, as well as two prooflikes at the MS65 level. Census: 2 in 65 Prooflike, 3 finer (8/15).
Ex: Long Beach Signature (Heritage, 6/2004), lot 8407.
From The Stephen A. Walling Collection. NGC ID# 24KU, PCGS# 86363

PROOF SEATED HALF DOLLARS

1859 Seated Liberty Half Dollar, PR65
Attractive Toning, Full Strike

- 3939 1859 PR65 PCGS.** Mint records indicate 800 proof Seated Liberty half dollars were struck in 1859, but it is doubtful that so many coins were actually distributed. This impressive Gem displays sharply detailed design elements and reflective fields under natural shades of greenish-gold and powder-blue toning. Just three examples are numerically finer at PCGS. Population: 9 in 65, 3 finer (8/15). NGC ID# 27TJ, PCGS# 6413

1859 Seated Half, PR66
Just Two Examples are Finer at PCGS

- 3940 1859 PR66 PCGS.** The *Guide Book* reports a mintage of 800 proofs for the 1859 Seated half dollar, although many went unsold and were melted. The proofs were struck using at least three different die pairs, according to Breen. This Premium Gem proof shows some of the vertical shield lines from the first, fourth, and fifth lines extending upward into the horizontal stripes, but it is not an obvious match for these minor varieties. What is blatant is the tremendous eye appeal evident over pristine, fully struck surfaces. The incredible color includes shades of blue and rose with pinkish-gold and a bit of near-brilliance remaining. The strike is full throughout, another plus. A stunning example of this early proof Seated half. Population: 1 in 66, 2 finer (8/15). NGC ID# 27TJ, PCGS# 6413

1864 Seated Half, PR64+ Cameo
Few Are Finer at PCGS

- 3941 1864 PR64+ Cameo PCGS.** A combination of high eye appeal and scarcity in the cameo format make this Civil War issue of high appeal to collectors of proof Seated halves. Just 470 pieces were struck in the midst of anxiety over the war's outcome and a general economic malaise. The present near-Gem proof is sharply struck with attractive steel-blue and rich-gold target toning, offering glassy fields that contrast boldly with the frosted central motifs. A glass reveals only a few delicate, incidental lines. It is the sole Plus-graded PR64 Cameo at PCGS, with just three finer proofs reported. Population: 1 in 64+ Cameo, 3 finer (7/15). NGC ID# 27TR, PCGS# 86418

**1865 Seated Half
Glittering, Copper-Toned Gem**

- 3942 1865 PR65 NGC.** Vibrant, deeply mirrored surfaces are undiminished by the all-encompassing, clear-copper toning that blankets both sides. Occasional cerulean-blue overtones add to the exceptional eye appeal. Delicate, hair-thin lines are microscopic and well-hidden by the patina. The frosted devices display a full strike throughout. Census: 21 in 65 (1 in 65 ★), 16 finer (8/15). NGC ID# 27TS, PCGS# 6419

**1869 Half Dollar, PR67
Attractively Toned**

- 3943 1869 PR67 NGC.** Bold, softly frosted design elements are set against deeply reflective fields on each side of this Superb Gem proof, although the surfaces are toned a little too deeply to qualify for a Cameo designation. Mint-gold and plum peripheral hues surround ocean-blue and violet margins, with warm amber-gold toning in the centers. No contact marks or major hairlines are observed.

Proof half dollar production remained minimal in 1869; only 600 examples were struck. This continues the general pattern of many proof half dollar issues from this period, being marginally available in PR64 and lower grades but elusive any finer. The present Superb Gem is a significant condition rarity and an important acquisition for the proof Seated half collector. This is the only PR67 coin reported at NGC, with a single PR68 finer (8/15).

Purchased by Eugene Gardner from Ron Iskowitz (3/2000); Eugene Gardner Collection, Part III (Heritage, 5/2015), lot 98508. NGC ID# 27U4, PCGS# 6427

**1880 Half Dollar, Contrasted Proof
High-End Cameo Gem**

- 3944 1880 PR65+ Cameo PCGS. CAC.** A prominent die lump in the left (facing) wing suggests this deep-mirrored Gem proof was struck from dies also used for business strikes, with the reverse die featuring a closed bud. This is a sharply struck, contrasted proof with sharp eye appeal. The proof striking is fully detailed except for below the eagle's left leg, which shows a flat spot at the claw. Scarce this nice, where it is the sole Plus-graded Cameo proof at the Gem level. Population: 27 in 65 (1 in 65+) Cameo, 11 finer (8/15). NGC ID# 27UF, PCGS# 86441

1882 Half Dollar, Reflective PR66 Cameo

- 3945 1882 PR66 Cameo PCGS.** If it were not for the moderate ring of cinnamon-gold patina, this well-preserved Premium Gem proof 1882 half dollar might be near a Deep Cameo designation. The fields are deeply reflective and the devices thickly frosted. A single straight, diagonal mark is seen running through Liberty's torso from the left breast to right of the shield. Population: 7 in 66 (2 in 66+) Cameo, 4 finer (8/15). NGC ID# 27UH, PCGS# 86443

**1889 Half Dollar, Multicolor PR66+
Few are Certified Finer**

- 3946 1889 PR66+ PCGS. CAC.** From a mintage of 711 pieces, this late-series proof Seated half dollar showcases deeply mirrored fields with concentric toning of ocean-blue, violet, and orange-gold on each side. The devices are lightly frosted, though the beautiful patina precludes a Cameo designation. Still, this is an immensely attractive Premium Gem proof. Plus-graded by PCGS with CAC endorsement for its outstanding eye appeal as well as the technical quality of its strike. Population: 14 in 66 (2 in 66+), 3 finer (8/15). NGC ID# 27UR, PCGS# 6450

BARBER HALF DOLLARS

1897-S Barber Half, MS64 Elusive in Mint State

- 3947 1897-S MS64 PCGS. CAC.** This Choice example is pearl-gray with tan freckles and coruscating silver luster; a boldly struck and attractive near-Gem with impressive eye appeal. A better date coin that is likely headed to an outstanding date collection of Barber halves. Population: 17 in 64, 16 finer (7/15).
Ex: Central States Signature (Heritage, 4/2008), lot 1216; FUN Signature (Heritage, 1/2009), lot 2935. NGC ID# 24M2, PCGS# 6479

1898-S Half Dollar, MS64 Better S-Mint Issue

- 3948 1898-S MS64 PCGS.** This San Francisco issue is much scarcer in Mint State than might be expected. Choice examples are rarely seen and finer coins are exceedingly elusive. This piece shows satiny luster and is free of significant abrasions or areas of mentionable striking weakness. The reverse and right-hand obverse margin show medium aquamarine toning, while the remainder of the obverse is dusky gray with champagne highlights. Population: 15 in 64, 13 finer (8/15). NGC ID# 24M5, PCGS# 6482

1900 Barber Half, MS66 Tack-Sharp Type Coin

- 3949 1900 MS66 PCGS. CAC.** The fine details of this Premium Gem, namely the star centrils, leaf veins, and eagle's talons, are impressively well-defined. Satiny luster glows beneath mottled olive-gold toning and there are no bothersome abrasions. This popular date is conditionally rare this well-preserved. Population: 11 in 66 (1 in 66+), 2 finer (8/15). NGC ID# 24M9, PCGS# 6486

1900-S Half Dollar, MS65 Smooth, Lightly Toned Surfaces

- 3950 1900-S MS65 NGC.** This challenging San Francisco issue is scarcer in Mint State than its mintage of more than 2.5 million coins would suggest, and Gem examples are rare. This piece displays a bold strike and soft, frosty luster with traces of pastel toning overall. Extensively cracked around each periphery, characteristic of a late die state. Census: 5 in 65, 3 finer (7/15). NGC ID# 57PC, PCGS# 6488

1902-O Barber Half Dollar, MS64+ Eye-Appealing Strike Rarity

- 3951 1902-O MS64+ PCGS. CAC.** Originality and eye appeal are the defining attributes of this Choice O-mint Barber half dollar. The 1902-O is a well-known strike rarity, and David Lawrence (1991) notes: "Well struck coins are worth a premium ..." Liberty's forecurl shows excellent definition, as do stars 1 through 10. Only the eagle's head and the right (facing) talons and wing junction display incompleteness, while the remaining reverse motifs are crisply rendered. Multicolor toning is more prominent on the reverse, but underlying luster is radiant throughout. Population: 16 in 64 (1 in 64+), 7 finer (7/15). NGC ID# 24MG, PCGS# 6493

**1907-S Half Dollar, Attractively Toned
Rare Premium Gem Example**

3952 1907-S MS66 PCGS. CAC. A variegated pastel palette includes rose-gold and pale olive-gray toning with iridescent highlights, enlivened by glowing mint luster over both sides of this gleaming Premium Gem half. The strike is sharp (but not quite full) as usual for this underrated San Francisco date. The S mintmark is slightly repunched southwest.

A mintage of 1.25 million pieces suggests a greater number of Gem or finer examples should exist for the issue, but this is not the case. PCGS CoinFacts estimates a mere 50 coins in Gem or finer condition are available to collectors. This Premium Gem representative is among the finest, and it is destined for a fine collection. Population: 6 in 66, 3 finer (8/15). NGC ID# 24N3, PCGS# 6511

**1908-D Half Dollar, MS66+
The Amazing Norweb-Price Specimen**

3953 1908-D MS66+ PCGS Secure. CAC. Ex: Duckor/Price/Norweb. Pristine surfaces are frosty and brilliant, with full mint frost beneath delicate gold toning. Only a few trivial blemishes have prevented a higher grade. Slight weakness is evident at the arrow feathers and claw, with all other design definition bold. A few dark spots on the reverse provide pedigree identification.

The Norweb cataloger wrote: "Although the 1908-D is not one of the scarcest varieties in the Barber series, in this elegant preservation the piece must be deemed elusive." A decade later, David Akers wrote: "This is a fairly common issue that is easily obtained below the Gem level, but Gem quality examples are certainly very scarce."

Gem and finer examples of the 1908-D Barber half dollar are elusive but more available than most other issues. PCGS has graded 46 submissions of this issue in MS65 or finer, making it an ideal coin for the type collector. Population: 14 in 66 (3 in 66+), 4 finer (8/15). Ex: *Norweb Collection* (Bowers and Merena, 11/1988), lot 3645; *Dr. Thaine B. Price* (David Akers, 5/1998), lot 175.; *Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection / ANA Signature* (Heritage, 8/2010), lot 3224. NGC ID# 24N5, PCGS# 6513

**1908-O Half Dollar, MS66
O-Mint Type Coin**

3954 1908-O MS66 PCGS. CAC. A number of 1908-O half dollars are distributed through the Mint State grade range, but those in MS66 and finer levels are seldom seen. This piece displays satiny luster beneath light golden-gray toning. Design sharpness is better than average for a New Orleans issue from this period. Population: 19 in 66 (1 in 66+), 15 finer (8/15). NGC ID# 24N6, PCGS# 6514

**1910-S Barber Half, MS66
S-Mint Condition Rarity**

3955 1910-S MS66 PCGS. Despite a mintage more than four times that of the Philadelphia Mint production for the year, the 1910-S is considerably scarcer in Uncirculated grades than its Philadelphia brother and it is decidedly rarer in high Mint State condition. This example is a lightly toned Premium Gem, with pale orange-gold toning at the margins and lustrous, silver centers. The frosty surfaces reveal only a few minor abrasions, while the strike is extra-sharp for the issue. PCGS and NGC combined have seen just seven numerically finer examples. Population: 16 in 66 (2 in 66+), 4 finer (7/15). NGC ID# 24NC, PCGS# 6520

**1913-S Half Dollar, MS66+
Outstanding Surface Quality**

3956 1913-S MS66+ PCGS. CAC. The 1913-S Barber half dollar had a moderately low mintage of 604,000 coins, and is proportionately scarce in all Mint State grades. Examples are rarely seen as fine as the Gem level, and finer coins are usually only dreamt of. This issue follows a similar pattern as many other dates in the series, even Philadelphia issues. In fact, assembling a barber half dollar set in Gem or finer condition is an extremely difficult task, more so than even the financial expense would suggest.

This Plus-graded MS66 1913-S half is softly lustrous with a hint of light golden color. A faint reed mark at Liberty's throat is the only abrasion of note. The strike is moderately weak on the eagle's right (facing) talons and wing junction, but the obverse is well-defined. Population: 7 in 66 (1 in 66+), 1 finer (7/15). NGC ID# 24NM, PCGS# 6529

PROOF BARBER HALF DOLLARS

1892 Barber Half, PR67 Cameo
Bold Proof Type Coin

- 3957 1892 PR67 Cameo PCGS.** The novelty of the Barber design in 1892 produced a fairly substantial proof half dollar coinage of 1,245 pieces. The issue is popular for type purposes, but seldom is a Superb Gem seen with cameo contrast. This champagne-toned example is free of bothersome surface flaws, and displays stark field-device contrast. The eagle's right (facing) wing junction is a trifle soft, but the motifs are otherwise razor-sharp. Population: 7 in 67 (1 in 67+) Cameo, 0 finer (8/15). NGC ID# 24NU, PCGS# 86539

1901 Half Dollar, Superb PR68
Fully Struck Proof Type Coin

- 3958 1901 PR68 NGC.** This is a virtually perfect coin from any perspective. Gleaming fields and razor-sharp, frosty design elements mirror the quality of the preservation which holds true even upon close scrutiny with a lens. The uppermost portion of Liberty's cap is weakened by excessive die polishing, but this is hardly noticed. The obverse is modestly contrasted, the reverse more deeply toned. Each side exhibits hues of russet, gold, and olive, with some ambered and forest-green also seen around the reverse periphery. Census: 8 in 68 (1 in 68 ★), 0 finer (8/15). NGC ID# 24P5, PCGS# 6548

1910 Half Dollar, PR67
Modest Field-Device Contrast

- 3959 1910 PR67 PCGS.** This gleaming proof exhibits significant cameo contrast on the reverse, but the obverse is just a little to monotone to qualify for the designation. The design elements are well-defined and the preservation is notable. Each side shows a light glaze of champagne toning. Population: 13 in 67 (1 in 67+), 2 finer (7/15). NGC ID# 26A4, PCGS# 6557

WALKING LIBERTY HALF DOLLARS

1916-S Half Dollar, MS65
Elusive This Fine

- 3960 1916-S MS65 NGC.** This is the most elusive of the three first-year Walking Liberty halves, with its scarcity most obvious in Gem and finer grades. This piece is boldly struck, with matte-like luster and a hint of golden-gray toning. There are no bothersome abrasions. Census: 58 in 65 (1 in 65+), 14 finer (8/15). NGC ID# 24PN, PCGS# 6568

1917-D Half Dollar, MS65
Obverse Mintmark Variant

- 3961 1917-D Obverse MS65 PCGS.** All of the branch mint 1917 Walkers are scarcer than the 1916 issues in high grade, and pose a challenge for the collector seeking to complete a Gem set of this series. This Obverse Mintmark Denver coin is lustrous and lightly toned in champagne hues. The coin is well-struck and there are no major abrasions. Population: 79 in 65 (3 in 65+), 5 finer (8/15). NGC ID# 24PR, PCGS# 6570

1918-D Half Dollar, MS64
Scarce Any Finer

- 3962 1918-D MS64 PCGS.** The 1918-D half dollar is rare in Gem condition, making this Choice example appealing to a plethora of budget-conscious collectors seeking quality. The surfaces show few abrasions and display satiny golden-toned luster. A touch of the usual striking softness is seen on Liberty's branch hand and the eagle's trailing leg. PCGS lists 31 pieces finer (8/15). NGC ID# 24PW, PCGS# 6575

1918-S Half Dollar, MS65
Few Known So Fine

- 3963 1918-S MS65 PCGS. CAC.** In Gem condition, the 1918-S is one of the rarest early-series issues in the Walking Liberty half set, with only the 1919-D significantly scarcer. Pieces grading finer than MS65 are prohibitively rare, and the current Gem is among the finest examples we have ever offered. The auction record for this issue was claimed by an MS65 PCGS coin in lot 4882 of our 2013 FUN Signature sale, which garnered \$35,250. This piece is similar in eye appeal to that coin and every bit as well preserved. The surfaces show frosty luster with a hint of light golden toning. Liberty's branch hand shows nearly complete thumb separation and the overall sharpness is quite pleasing. Population: 34 in 65 (1 in 65+), 2 finer (7/15). NGC ID# 24PX, PCGS# 6576

1919-D Half Dollar, MS61
Bold Strike and Luster

- 3964 1919-D MS61 ANACS.** The 1919-D Walking Liberty half dollar is a prime condition rarity in the series, due to the prevalence of weak strikes and subpar mint luster. This attractive Mint State example displays the usual softness on the central devices, but peripheral detail is bold. The surfaces exhibit satiny mint luster and shades of green and blue toning at the rims.
Ex: Long Beach Signature (Heritage, 5/2012), lot 4048. NGC ID# 24PZ, PCGS# 6578

1919-S Half Dollar, Golden MS64

- 3965 1919-S MS64 NGC.** The 1919-S is a challenging issue in Mint State, particularly in MS64 and better grades. This Choice example shows sharp thumb separation on Liberty's branch hand and above-average detail on the eagle's plumage. Satiny luster highlights golden toning which grants pleasing eye appeal. A few light, scattered ticks limit the grade. Census: 50 in 64 (1 in 64+), 32 finer (8/15). NGC ID# 24R2, PCGS# 6579

**1919-S Half Dollar, Light Golden MS65
Scarce This High Grade**

- 3966 1919-S MS65 PCGS. CAC.** Although not quite as rare in high grade as its Denver counterpart, the 1919-S Walking Liberty half dollar is a notable condition rarity in its own right. At the Gem grade level, this date is about on par with the key date 1921, and it is genuinely rare any finer. Few high-grade examples of this issue were set aside early on, and those that were seldom showed a strong strike. This Gem example showcases a degree of preservation that is seldom seen, and also exhibits partial thumb separation on Liberty's branch hand. The head detail is a trifle soft, as is the eagle's trailing leg. The frosty surfaces show a blush of pale champagne toning, and the eye appeal is terrific. Population: 50 in 65 (6 in 65+), 11 finer (7/15). NGC ID# 24R2, PCGS# 6579

**1921 Half Dollar, MS63
Collectible Mint State Example**

- 3967 1921 MS63 PCGS.** A pleasing MS63 example of this key Philadelphia issue. This coin shows a few light abrasions which determine the grade, but the eye appeal is heightened by frosty luster and a faint hue of champagne. Partial thumb separation is product of an above-average strike, although the eagle's trailing leg exhibits persistent weakness. NGC ID# 24R6, PCGS# 6583

**1921-D Half Dollar, AU55
In an Old Green Label Holder**

- 3968 1921-D AU55 PCGS.** This key-date Walking Liberty half is well-detailed with just a brush of friction evident over the high points of the eagle and Liberty's torso. Pleasing satin luster remains in the fields and each side shows a hint of light golden toning. The 1921-D Walker is most often seen in either VF and lower grades or lower-end Mint State; XF and AU representatives are seldom encountered. Housed in an old green label holder. NGC ID# 24R7, PCGS# 6584

1921-D Half Dollar, MS64
Key Denver Issue

3969 1921-D MS64 PCGS. A full split thumb is just the start of many attractions on this superlative near-Gem key Walking Liberty half, certified in a green-label holder. Soft, satiny luster emanates from unperturbed silver-gray surfaces, with minimal abrasions for the grade, mostly on the high points of the eagle. The excellent strike, while not unusual for the issue, adds to the generous appeal. The 1921-D is the lowest mintage circulation strike issue of the series, since the Denver Mint was compelled to strike more than 20 million silver dollars that year. PCGS has certified 35 coins finer (8/15).
Ex: FUN Signature (Heritage, 7/2010), lot 3969. NGC ID# 24R7, PCGS# 6584

1921-S Half Dollar, MS62
Elusive in Mint State

3970 1921-S MS62 PCGS. From a low mintage of 508,000 pieces, the 1921-S Walking Liberty half dollar is the rarest date of the series in Mint State. The issue was overlooked by collectors at the time of issue, and few examples were saved. As a result, the 1921-S is also the second rarest Walking Liberty half dollar in high grade (MS65 or better) — only the 1919-D is rarer in Gem condition. The present coin is an attractive MS62 specimen, with original, satiny mint luster. The strike details are a bit soft on the central devices, as always seen on this issue. The surfaces display a minimum number of handling marks for the grade.
Ex: ANA Signature (Heritage, 8/2010), lot 3259. NGC ID# 24R8, PCGS# 6585

1923-S Half Dollar, MS64
Original Toning

- 3971 1923-S MS64 PCGS.** Sometimes overlooked in favor of lower-mintage issues, the 1923-S is a conditionally challenging date to locate above MS64. This Choice example is a collector-grade coin with frosty luster and prominent amber-red and russet toning. As is expected for the issue, there is minor weakness on the central high points. NGC ID# 24R9, PCGS# 6586

1928-S Half Dollar, MS65
Glowing Mint Luster

- 3972 1928-S MS65 PCGS. CAC.** Most Mint State survivors of the 1928-S half dollar are clustered around the MS63 and MS64 grades; Gem examples are seldom seen and anything finer is rare. This piece is awash in fresh mint luster and toned in original olive-gold, russet, and champagne hues, with a scattering of lavender specks on the reverse. The central high points show some of the usual softness, but the overall eye appeal is outstanding. Population: 58 in 65 (1 in 65+), 6 finer (7/15). NGC ID# 24RB, PCGS# 6588

1933-S Walking Liberty Half Dollar, MS67
None Numerically Finer at PCGS

- 3973 1933-S MS67 PCGS. CAC.** The 1933-S Walking Liberty half dollar is the last of the early series dates. It was a well-produced issue in general, but it is still very rare at the MS67 level, and finer coins are virtually unobtainable. This delightful Superb Gem displays vivid shades of sea-green and amber toning, mixed with lighter highlights of lavender on both sides. The design elements are well-detailed, with just a touch of separation between Liberty's thumb and finger on the wreath hand and some of the usual softness on the eagle's leg. Vibrant mint luster shines through the toning. Population: 13 in 67 (1 in 67+), 0 finer (8/15). NGC ID# 24RE, PCGS# 6591
-

**1939-S Half Dollar, Unequaled MS68
The Sole Finest Known**

- 3974 1939-S MS68 NGC.** This is the single finest 1939-S Walking Liberty half dollar (8/15). The Registry potential is unequaled and the technical quality is incredible. The coin is also minutely die doubled on the obverse, unlisted in the *Cherrypickers'* reference. A slight spread is discernible with 10x magnification on IN GOD WE TRUST, the date, LIBERTY, Liberty's face profile, and the upper leaves. The luster is frosty and lightly toned in lovely champagne and ice-blue hues, with deeper iridescence around the peripheries. There are no surface abrasions and the corresponding eye appeal is exemplary. This San Francisco issue is available in MS66 and lower grades, and MS67 pieces are only marginally scarce. This piece, however, is undeniably in a class by itself. NGC ID# 24RY, PCGS# 6608

**1942-S Walking Liberty Half, MS67
Short Set Condition Key**

- 3975 1942-S MS67 PCGS. CAC.** In the late-series short set of Walking Liberty half dollars (1941 to '47), there are no true key dates, but several issues are conditionally rare in high grade and pose a significant roadblock for the collector attempting to complete a set in Superb Gem condition. The 1942-S is one of these issues. PCGS has certified only eight examples at the MS67 level (one MS67+) and none finer; similarly, NGC shows only 10 coins in this grade with none finer (7/15). This piece showcases incredible, frosty luster and displays unabraded surfaces. There is no mentionable toning and Liberty's branch hand shows partial thumb separation. This lovely coin would be a highlight addition to a Registry Set or private collection. NGC ID# 24S8, PCGS# 6617

1945-S Walking Liberty Half, MS67
Among the Finest Certified

- 3976 1945-S MS67 PCGS.** This available late-series issue survives in quantity in grades through MS66, but becomes impressively scarce in MS67. This piece shows exceptionally preserved surfaces combined with above-average striking definition. A blush of gold toning lightens toward the center on each side, while the obverse also exhibits deeper sea-green and amber toning around the borders. Population: 29 in 67, 0 finer (8/15). NGC ID# 24SH, PCGS# 6626

1947-D Walking Liberty Half, MS67
Conditionally Scarce

- 3977 1947-D MS67 PCGS.** The availability of this final-year Denver issue dramatically plunges at the MS67 grade level, and anything finer is almost unknown. This piece showcases thick mint frost over unabraded surfaces. The design elements are boldly rendered. A hint of ice-blue graces the interiors while a frame of lemon-gold surrounds the peripheries. Population: 26 in 67, 0 finer (7/15). NGC ID# 5ESK, PCGS# 6631

PROOF WALKING LIBERTY HALF DOLLAR

1942 Walking Liberty Half, Exemplary PR69
One of the Finest Proof Walkers Known

- 3978 1942 PR69 NGC.** This final-year example is one of only a handful of proof Walkers known in the near-perfect PR69 grade level. For the entire seven-year series, NGC lists only seven PR69 proofs, including a 1939, a 1941, and five 1942 examples; the PCGS figure counts just a single PR69 coin, another 1942 (8/15). One of these finest-known proofs is an essential acquisition for the serious Registry Set enthusiast, and the pride of ownership is a feeling that only be truly appreciated when the coin is in-hand. This is a lovely specimen, showcasing deeply reflective surfaces with light frosting on both the obverse and reverse devices. Vivid crimson-red, emerald-green, and sun-gold color is seen around the peripheries. A Superb, virtually unimprovable specimen. Census: 5 in 69 (1 in 69 ★), 0 finer (8/15). NGC ID# 282G, PCGS# 6642
-

FRANKLIN HALF DOLLARS

1948 Franklin Half, MS67 Full Bell Lines Appealing Patina

- 3979 1948 MS67 Full Bell Lines NGC.** Few 1948 Franklin halves in the Full Bell Lines category match the sheer quality of this example, and only a single piece is seen finer (8/15). This boldly defined Superb Gem features frosty luster beneath rich gold, green, and iridescent toning on each side. Census: 6 in 67 (2 in 67 ★) Full Bell Lines, 1 finer (8/15).
Ex: Long Beach Signature (Heritage, 6/2011), lot 3811. NGC ID# 24SR, PCGS# 86651

1953-S Franklin Half, MS65 Full Bell Lines Conditionally Scarce Key Issue

- 3980 1953-S MS65 Full Bell Lines PCGS.** Any serious Registry Set collector of business strike Franklin half dollars should be mindful of this coin's outstanding Gem characteristics. The 1953-S is one of the key issues in the series, especially when examples with Full Bell Lines are discussed. Only 23 Gems with this important caveat have been designated as such by PCGS, and the company has graded just one finer piece as MS66 Full Bell Lines (3/14).

This lustrous, untuned Franklin half, with shimmering surfaces that exhibit outstanding preservation, is one of the most attractive examples of this San Francisco date that we have examined in recent years. Minimal marks exist on each side, and are fully in-line with the MS65 assessment by PCGS. Population: 23 in 65 Full Bell Lines, 2 finer (8/15). NGC ID# 24T8, PCGS# 86666

PROOF FRANKLIN HALF DOLLAR

1951 Franklin Half, PR67+ Cameo
Unknown in a Finer Certified Grade

- 3981** 1951 PR67+ Cameo PCGS. CAC. Both the 1950 and 1951 Franklin halves are notably scarce in brilliant proof Cameo format. 57,500 proof sets were issued in 1951, but few offered contrasted motifs and fewer still survived the flimsy packaging in Superb Gem condition. This high-end MS67 example is blaze-white and deeply mirrored. The frosted motifs are particularly white on the reverse. An immaculate Cameo, the 1951 is notably rare in this condition with none certified finer by either service. Population: 15 in 67+ Cameo, 0 finer (8/15). NGC ID# 27VB, PCGS# 86692

EARLY DOLLARS

1795 Flowing Hair Dollar, Fine 15
Rare B-3, BB-11 Variety

- 3982** 1795 Flowing Hair, Two Leaves, B-3, BB-11, R.5, Fine 15 PCGS. B-3 ranks among the rarest collectible Flowing Hair marriages. It is readily attributed, as the sole Bolender variety with an 8x8 berry arrangement on the wreath. This nicely defined olive-green and dove-gray example displays few marks, found beneath the beak, near star 9, and on the reverse rim at 3 o'clock. Certified in a green label holder. NGC ID# 4F6K, PCGS# 39978 Base PCGS# 6853

1795 Flowing Hair Dollar, XF45
B-4, BB-14, The 'Hidden Star' Variety

- 3983** 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4, XF45 NGC. Star 15 is positioned entirely under the point of Liberty's bust, the only such placement among all Flowing Hair dollar varieties, and a collector favorite as such. With Two Leaves on the reverse beneath each wing and the so-called Head of '94 portrait, the variety offers multiple reasons for series devotees to prefer the BB-14 die pair.
- This example displays a classic "old silver" patina with light-silver raised devices surrounded by slightly deeper-toned fields and recesses. The surfaces are nearly unabraded, showing only a few stray lines and small marks, none of which are distracting. There are no adjustment marks on either side. Nice definition remains for the Choice XF level, which matches the grade of a few other coins in the Bowers' list of Notable Specimens. NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853

**1795 B-7, BB-18 Flowing Hair Dollar, VF35
Mint Silver Plug**

- 3984** 1795 Flowing Hair, Three Leaves, Silver Plug, B-7, BB-18, VF35 NGC. Bowers Die State I. Three Leaves, Head of '94. The silver plug is best viewed in diffused light with the coin nearly upright in the hand, where a circular area of lighter toning is vaguely visible on the obverse. There is no overt outline to the plug; rather, a difference in the silver alloy between the plug and the coin gives away the location of the popular feature. Olive-brown, old-silver toning with golden accents covers both sides of this nicely patinated dollar. There are no serious marks and, as expected, no adjustment marks since the coin had the planchet weight within tolerance by virtue of the Mint-applied plug. Bold rims with well-centered devices make this Choice VF coin desirable with or without the silver plug (but certainly more valuable with it). NGC ID# 24WZ, PCGS# 39993 Base PCGS# 6854

**1795 Flowing Hair Dollar, Fine 15
B-1, BB-21, Choice Surfaces**

- 3985** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, Fine 15 PCGS. Remarkably smooth, tawny-gold toning is evenly distributed over both sides of this Choice Fine early dollar. The BB-21 variety displays the reverse with Two Leaves beneath each wing combined with the so-called Head of '95, a combination that many collectors prefer. The central motifs were rendered in high relief, and they quickly lost detail from circulation. As a result, the coin appears considerably more worn than the peripheral elements would indicate. Traces of iridescence gleam beneath the light and appealing patina. There are no adjustment marks or significant distractions of any kind for the assigned grade. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

**1795 Flowing Hair Dollar, VF35
B-1, BB-21, Two Leaves**

- 3986** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF35 NGC. Gunmetal-blue and caramel-gold embrace this nicely detailed Choice VF Flowing Hair dollar. Both sides are surprisingly unblemished except for a thin mark that crosses Liberty's jaw and exits beneath the chin. The upper reverse has a few minor mint-made adjustment marks.
Ex: Long Beach Signature (Heritage, 9/2007), lot 1857, which realized \$7,475. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

**1795 B-1, BB-21 Flowing Hair Dollar, VF35
Choice, Original Surfaces**

- 3987** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF35 PCGS. Bowers Die State The 7 in the date is punched over an erroneous 1, and the reverse shows the 9-10 berry pattern. Original, medium-gray patina shows reddish-gold undertones and blankets the remarkably clean surfaces evenly on both sides. All of the major design elements are clearly defined. This Choice dollar would make an excellent representative of the two-year Flowing Hair type.
Ex: Long Beach Signature (Heritage, 9/2009), lot 897. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

**1795 B-1, BB-21 Dollar, AU50
Popular Blundered Date Obverse**

- 3988** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, AU50 NGC. Ex: Pedram Collection. All known examples, and there are many, exhibit perfect dies according *The Encyclopedia of United States Silver Dollars, 1794-1804*. A thin die line below the bases of OF is not mentioned in that reference.

As the engraver, Robert Scot or one of his assistants, was working on this die, the digits were punched one at a time. Since the die is a mirror image, it is probable that the engraver worked left-to-right, punching the 5, the 9, the 1, and then ... a 7 over the erroneous 1, and finally the proper 1.

This nicely centered dollar has slightly reflective surfaces beneath medium gold and steel toning with microscopic handling marks. The overall appearance is excellent, making this an ideal candidate for the date or type collector. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

**1795 Flowing Hair Dollar, AU Details
Scarce B-6, BB-25 Variety**

- 3989** 1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3 — Obverse Scratched — NGC Details. AU.

Ex: Pedram Collection. A darkly toned and narrow horizontal depression on Liberty's cheek is the source of the NGC designation, although it is probably a mint-made planchet flaw instead of a scratch. The tan-brown and steel-gray surfaces are otherwise attractive despite a small tadpole-shaped mark on the reverse near 9:30. Satin luster accompanies design elements.

**1795 Flowing Hair Dollar, Fine 15
B-5, BB-27, Three Leaves**

- 3990** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 15 PCGS. Bowers Die State II. As always, the diagnostic "bar" near the uppermost curl quickly identifies the BB-27 variety, although the die state requires somewhat more investigation. This example is a relatively early state of the dies, with just the tip of an emerging die crack from the stem near UNITED and no evidence of a die crack from the second T of STATES to the olive leaves above the right (facing) wing. On early die states such as this, the hair detail on the portrait is always weak (as it is on this example). Original old-silver color shows golden undertones, and the only notable mark is a slight obverse rim bump at 6 o'clock. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 Flowing Hair Dollar, VF25
B-5, BB-27, Three Leaves**

- 3991** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF25 NGC. Autumn-gold and gunmetal toning embraces a majority of this nicely detailed Flowing Hair type coin. Impressively unabraded except for a faint and slender curved mark near Liberty's eye. Although examples of B-5 appear in every Heritage Signature auction, demand for the early large silver type has risen steadily over the decades. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 Flowing Hair Dollar, VF30
B-5, BB-27, Three Leaves**

- 3992** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF30 NGC. Early dollar collectors often bemoan the fact that the Flowing Hair design is but a two-year type (and for many specialists, it is a one-year type because the 1794 dollars are limited by price and availability). Fortunately, there are 19 varieties of the 1795 Flowing Hair dollars to maintain interest. Of these, the BB-27 variety is the most available. This example shows a crescent of steel-blue toning on the obverse above the golden-gray base toning, with complementary toning on the reverse. Golden luster peaks through when viewed in light. The smooth surfaces show only minor contact, the most significant being a pinpoint dig near star 11 and a minor rim nick in the same vicinity. Otherwise, the rims are perfect for the grade and nice detail remains for the VF level. There are no adjustment marks on either side. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 Flowing Hair Dollar, VF30
Sharp B-5, BB-27 Example**

- 3993** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF30 PCGS. Bowers Die State II. An attractive, original example of the often-encountered B-5, BB-27 variety — by far, the most available Flowing Hair dollar and the perennial favorite for Three Leaves type. This is a collector-friendly, mid-grade example with two-tone patina (lighter on the high devices, and richly toned a medium battleship-gray across the fields) with deeper accents around the raised elements. Sharp definition remains on the reverse. The obverse is equally sharp, although the exposed high-relief portrait shows smooth wear typical of the variety. The coin displays nearly unabraded surfaces with beautiful, high rims, nice centering, and no adjustment marks. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 B-5, BB-27 Dollar, XF40
Flowing Hair Type, Three Leaves**

- 3994** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF40 NGC. When encountering a 1795 Flowing Hair dollar, specialists look for a "bar" or slender line behind Liberty's uppermost neck curl. If the bar is present, the coin is immediately attributed as BB-27. The typical example grades VF or has been cleaned, which makes the present piece decidedly above average for the variety. The wings are well detailed and abrasions are inconsequential. A solitary diagonal adjustment mark (as made) is on the portrait below the ear. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Flowing Hair Dollar, XF45
Popular B-5, BB-27 Variety

- 3995** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF45 PCGS. The BB-27 variety is immediately identified by the diagnostic die line near the upper hair lock. This piece has a few minor scratches and abrasions in the fields, but its overall appearance is one of excellent aesthetics. Deep gray with hints of gold, blue, and iridescent toning over satiny luster. The reverse has a faint die crack from the left stem end down to the border. The 1795 Flowing Hair dollars are popular pieces for type collectors due to the rarity of the 1794 dollars. Among those 1795s that survive, the BB-27 is the most common variety, and is an excellent candidate for a type or date collection. Housed in a green label holder. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27 Dollar, XF45
Early Die State

- 3996** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF45 NGC. Bowers Die State II, with a short crack or die line from the left stem, extending about one-third of the distance to the border. The die states need further study to determine if that feature is indeed a die crack, or if it is a die line that occurred during the engraving process. The former would suggest that that feature strengthens in later die states. The latter would indicate the opposite, and that the line would weaken with continued die usage. This pleasing piece has delicate champagne and light gray toning on its silver surfaces with a shallow mark on Liberty's neck, and scattered handling marks on both sides. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Flowing Hair Dollar, XF45
Three Leaves, B-5, BB-27

3997 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF45 PCGS. The diagonal bar in the upper left obverse field immediately identifies the B-5, BB-27 variety. It is distinctive and plentiful, representing about one-third of the entire surviving population of 1795 Flowing Hair silver dollars. Housed in a green-label PCGS holder, this piece is far finer than the usually seen example of this variety, a coin close to the AU grade level. Plentiful detail remains in the centers of each side, including the major wave outlines in Liberty's hair. Planchet adjustment marks appear in the center and lower reverse. The surfaces are light blue-gray overall with traces of pale gold toning. One would do far worse for type purposes than to acquire this problem-free Flowing Hair dollar.

Ex: *Stamford Coinfest Signature* (Heritage, 10/2010), lot 3747. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27 Silver Dollar, XF45
Clashed Obverse Die

3998 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF45 PCGS Secure. This late die state has prominent clash marks at the upper obverse above the head and near the profile in the right obverse field. Scattered die rust is also evident. The upper reverse shows a prominent die crack through the terminal leaves, and also displays light die rust. The reverse also shows clash marks, flowlines, and a prominent die line from the left stem end to the border, clearly reaching the border and indicating a late die state. Traces of luster remain beneath the steel-blue toning that resides on the rich silver-gray surfaces. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27 Dollar, AU50
Middle Die State

3999 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, AU50 NGC. Ex: Pedram Collection. The common variety with the diagnostic die line behind Liberty's top hair curl. The die line from the left stem nearly reaches the border, with light flowlines and hints of die rust or spalling at the lower reverse. This is an intermediate die state like nearly all examples of this variety. There are no obverse clash marks on this piece. Faint evidence of a reverse die crack in its beginning stage appears at the upper reverse. The crack begins at the lower leaf of the top inside pair over the right wing to the terminal leaves and the second T of STATES. This piece retains considerable luster with light gold toning at the lower right obverse, and splashed on the reverse. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27 Dollar, AU53
Lovely Three Leaves Example

4000 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, AU53 NGC. Die State III. By far the commonest variety of early silver dollar, the B-5, BB-27 exists to the extent of probably several hundred to possibly a couple of thousand pieces. The variety is easily attributed, even by neophytes, due to the extra spur or tine of metal behind Liberty's head in the left obverse field, directly behind the topmost wave of hair. This piece shows the typically soft strike through the centers, along with some adjustment marks that appear (scarcely visible without a loupe) in the center obverse just behind Liberty's neck. There is little wear otherwise, however, and few bothersome marks. Both sides are a lovely, deep olive-gold coloration. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27 Silver Dollar, AU53
Three Leaves Reverse

4001 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, AU53 PCGS. This earlier die state has extremely faint evidence of the upper reverse die crack and scattered die rust on both sides. The reverse die line from the left stem end reaches the dentils and is extremely faint near the border.

An attractive example, this dollar retains considerable mint luster. The ivory surfaces display light russet and blue-steel toning on the obverse, with intense blue toning on the reverse. Light adjustment marks are noted on the motif at the central obverse, and the central reverse exhibits characteristic weakness always associated with adjustment marks. A pleasing and important example of this popular variety. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27 Dollar, AU53
Apparent Late Die State

4002 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, AU53 PCGS. The plentiful variety with the bar behind Liberty's upper hair curl, the B-5, BB-27 dollar seemingly represents about one-third of all known 1795 Flowing Hair silver dollars. The B-1, BB-21 Blundered Date variety is the second most common, and the two varieties might encompass half of all known 1795 Flowing Hairs. The other half includes 17 different die marriages. This example has the upper reverse die crack more prominently visible, suggesting a late die state. However, the obverse and reverse die rust is less evident. The conclusion is lapped dies. Natural light gray surfaces exhibit delicate steel-blue and gold toning on the obverse, and stronger gold and teal patina on the reverse. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Draped Bust Dollar, VF30
Off-Center Bust, B-14, BB-51

- 4003** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF30 NGC. A deep stone-gray midgrade Draped Bust dollar. Gunmetal and almond-gold tints emerge here and there. The fields have a few unimportant ticks, and the reverse rim has minute nicks at 7:30 and 11:30, but the eye appeal is undeniably attractive.
Ex: Baltimore Signature (Heritage, 3/2009), lot 2309, which realized \$4,743.75. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1796 B-4, BB-61 Draped Bust Dollar, VF35
Small Date, Large Letters

- 4004** 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF35 NGC. Bowers Die State I. More readily available than some of the other die pairs for the year, the BB-61 variety still receives considerable demand as the sole collectible example of the Small Date, Large Letters type. (The BB-64 die pair is the only other representative of the type, but only three examples are known.) The present example shows vestiges of storage in an old album, with sea-green toning at the obverse margins and patchy deep-gray toning on the reverse interspersed with silver accents around the raised elements. Nice detail remains throughout the central devices, although a few horizontal adjustment marks are hidden in Liberty's middle hair strands near the ear and neck. Census: 5 in 35, 26 finer (7/15). NGC ID# 3Y6P, PCGS# 40000 Base PCGS# 6860

1796 Draped Bust Dollar, VF35
Small Date, Large Letters, B-4, BB-61

- 4005** 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF35 PCGS. Bowers-Borckardt Die State I. The design elements of this pleasing Choice VF specimen retain much of their original detail, but the left side of the drapery shows some wear. The smooth lavender-gray surfaces are lightly abraded, with a small dig near Liberty's nose and a rim bruise at 4 o'clock on the reverse the only flaws of note. NGC ID# 3Y6P, PCGS# 40000 Base PCGS# 6860

1796 Dollar, B-5, BB-65, Choice XF
Late Die State

- 4006** 1796 Large Date, Small Letters, B-5, BB-65, R.2, XF45 NGC. Die State IV, with the reverse die lump overlapping portions of the I and C in AMERICA. This example is boldly struck and free of adjustment marks. Light wear appears on Liberty's head and shoulder, as well as the eagle's breast, but most details remain clear. Each side shows pleasing lavender-gray patina. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

**1796 Large Date, Small Letters Dollar
B-5, BB-65, Choice About Uncirculated**

4007 1796 Large Date, Small Letters, B-5, BB-65, R.2, AU55 ANACS. Bowers Die State IV. Mottled amber-gold toning punctuates the pale-gold and lilac base toning across the surfaces of this Choice AU dollar. The diagnostic die lump at IC of AMERICA bridges the space between the two letters, and extends more than halfway toward their bottom serifs. Die rust is visible on this high-grade example at ER.

Both sides exhibit sharp detail on the motifs. Liberty's hair strands and curls show nearly full details, with slight wear at the temple and above the ear. All but stars 9 to 11 have their full centers. The Large Date is double punched on the 6. The Small Letters reverse is sharp despite the low rims, with more than 60% of the breast feathers visible on the eagle. Mint luster remains prevalent and abrasions are minimal, with no adjustment marks on either side. Housed in an early generation ANACS holder. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

**1797 B-3, BB-71 Dollar, VF30
Large Letters, 10x6 Stars**

4008 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF30 PCGS. Bowers Die State III. Deep gunmetal-gray toning embraces this midgrade Small Eagle dollar. Lightly abraded overall, although Liberty's neck displays hair-thin parallel marks and the reverse rim has a recessed area near 1 o'clock. Granularity is limited to a small area near 5:30 on the reverse. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1797 Large Letters Dollar, VF35
B-1, BB-73; 9x7 Stars**

4009 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 VF35 NGC. Bowers Die State III. Pale ivory-gold toning covers both sides of this Choice VF early dollar, which shows diagnostic die cracks through the hair ribbon confirming the middle die state. The lack of a die crack through the second T in STATES suggests this coin was struck in 1797, and not from the remarriage of a later state of the dies in 1798. Marks are limited to slight field chatter, now minimized by moderate wear. This is a well-centered early dollar with full dentils and sharp definition on the devices showing high point wear, but no visible adjustment marks. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

**1797 B-1, BB-73 Dollar, XF40
9x7 Stars, Large Letters**

4010 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, XF40 NGC. Bowers Die State I. The die flaw adjacent to star 9 is clear. The fields and devices are pearl-gray, but the margins offer light aquamarine and golden-brown patina. Uncommonly free from abrasions, and luster emerges from the letters, curls, and plumage. Minor planchet striations are noted near the L in LIBERTY and the final A in AMERICA.
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 1759, which realized \$8,050. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

**1798 Small Eagle Silver Dollar, VF25
B-1a, BB-82, 13 Stars on the Obverse**

- 4011** 1798 Small Eagle, 13 Stars, B-1a, BB-82, R.3, VF25 PCGS. Bowers Die State III. The Small Eagle reverse die is the same one that was used to produce the 1797 BB-73 dollars, although some of the 1797-dated dollars were actually struck in 1798 after the BB-82 Small Eagle dollars were produced. The variety is always in demand by both early dollar and type collectors as the sole Small Eagle dollar with the standard obverse star count for the year. A blanket of original, old-silver toning covers both sides, with slightly lighter silver-gray toning at the high points. Marks are limited to a few faint lines on both sides, and faint adjustment marks at ES of STATES and across the eagle's legs and talons. NGC ID# 24X5, PCGS# 40006 Base PCGS# 6867

**1798 Bust Dollar, XF45
B-1, BB-82, Late Die State**

- 4012** 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, XF45 ANACS. Bowers Die State III. Although struck from a late state of the reverse Small Eagle die, die state analysis shows the 1798-dated 13-Star dollars were quickly followed onto the coining press by additional 1797-dated dollars using the same reverse. The early Mint was more concerned about getting maximum use from the dies than assuring that coins were dated in the year they were struck. A lightly mottled patina of silver-gray with gold and blue accents covers both sides of this Choice XF example. The smooth fields show only small marks and moderate wear. Housed in an early generation ANACS holder. NGC ID# 24X5, PCGS# 40006 Base PCGS# 6867

**1798 Heraldic Eagle Dollar, AU53
Four Berries, Pointed 9, B-8, BB-125**

- 4013** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, AU53 NGC. Bowers Die State I-II with a vertical crack beneath the hair ribbon but no crack through the TED in UNITED. B-8 is the sole Pointed 9, Four Berries variety, and thus receives its own *Guide Book* listing. A splendidly defined gunmetal-gray representative of the Large Eagle type. Both sides are only minimally abraded, although slight rim dings at 10:30 on the obverse and 5:30 on the reverse merit passing mention.
Ex: Tampa FUN Signature (Heritage, 1/2011), lot 3943. NGC ID# 24X6, PCGS# 40042 Base PCGS# 6873

**1799 Draped Bust Dollar, XF40
Close 17 Obverse, B-16, BB-158
Early Die State**

- 4014** 1799 7x6 Stars, B-16, BB-158, R.2, XF40 PCGS. Bowers-Borckardt Die State I. The obverse and reverse display a strong strike from perfect dies, with no evidence of die clash, die lapping, or die cracks. All of the berries are bold. This variety has a distinctive appearance with the stars at the left distant from the curls and almost equally distant from the L in LIBERTY. Stars at the right, however, are close to the bust and the Y in LIBERTY. The date numerals 1 and 7 are close together. This well-detailed, attractive example has smooth, silver-gray surfaces and lighter silver color on the devices, with a bit of iridescence in the fields. The coin shows no significant abrasions or circulation marks worth mentioning, and it is well-centered within boldly denticled rims. Housed in an old green label holder. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

1799 'No Berries' Silver Dollar, MS65
7x6 Stars, B-12, BB-160
Double Struck, Terminal Die State

- 4015 1799 7x6 Stars, B-12, BB-160, R.3, MS65 NGC.** The true rarity of Gem Uncirculated Heraldic Eagle dollars is often underestimated by even experienced collectors and series specialists, a function of the larger mintages and the longer duration of the series. Surprisingly, the “survival rate” of Gem or finer Heraldic Eagle dollars is significantly less than the other early dollar types:

Early Dollar Type	Combined Mintage	Total Gem or Finer Coins Certified**	Frequency of Gem or Finer Coins Per 100,000 Pieces Struck
Flowing Hair (1794 – 1795)	162,053	20	About 12 coins per 100,000 pieces struck
Draped Bust, Small Eagle (1795 – 1798)	165,434*	21	About 12 coins per 100,000 pieces struck
Draped Bust, Large Eagle (1798 – 1803)	1,064,255	40	Less than 4 coins per 100,000 pieces struck

*Based on 2016 *Guide Book* mintages, includes 35,000 1798 Small Eagle dollars

**As of 8/2015 PCGS and NGC combined grading events, MS65 or finer

As a result, we seldom have the opportunity to offer an MS65 Large Eagle dollar with the Mint-fresh appeal and pinpoint-sharp strike possessed this amazing B-12b, BB-160 “No Berries” example. At the same time, we can safely say we have never offered a Gem Large Eagle example, regardless of date or variety. Not only is this splendid coin struck from the latest state of the obverse die known, it is double struck over a previous impression of the same variety, with the evidence of the initial striking clearly discernible on both sides of the coin.

Operators of the screw press must have had a problem with the original strike, and rescued the misstruck planchet to feed it once again into the coin press. The coiners appear to have taken special care with the second strike, because the impression is remarkably full, despite the terminal state of the obverse die, with die cracks so advanced that all of the diagnostics of Bowers Die State IV are present, with multiple additional cracks as well.

Remnants of the understrike are clearly visible on both sides, with both the obverse and reverse showing the initial impression rotated approximately 120°. A clear image of the olive leaves and the berryless branch as well as the wing feathers and shield junction remains beneath the clouds and among the field stars of the second strike. The reverse denticles are boldly doubled, making for extra-wide borders. The denticles are also doubled on the obverse, with equally wide rims as a result. The left obverse stars from the first strike remain visible above BERT of LIBERTY, where the points appear in the dentils, and a clear ghost-image of the 1799 date remains behind stars 4 through 7. Confusing the picture is die clashing at the point of the bust, a further indication of the dire condition of the obverse die.

Extensive die breaks result in bulges visible at stars 10 through 13 and elsewhere along the obverse periphery. Despite all of these factors, the second strike is remarkably bold – all but obliterating the initial impression, and rendering exceptional detail on all the motifs for the second strike. Liberty’s hair strands are sharply delineated, as are the drapery folds and star centers. The eagle is fully struck including the breast feathers and talons.

The present coin has not been seen at public auction since May 1976, where it appeared in the Pine Tree Auction Galleries, Inc. as lot 314 of the John Carter Brown Library Collection. There, it was described as the finest known of the variety:

“Splendid, frosty, brilliant, glittering gem Unc., unusually sharp strike; delicate iridescent tone in the cooler range of the spectrum; broad planchet; rev. well centered, obv. less so. Double struck, the two impressions (first less accurately centered) about 120° apart, so that the berryless branch can be seen within ref. stars, left wingtip at tail tip, upper parts of STATES OF at left border, full date within 4th to 7th stars...”

“A most remarkable and unusual example, quite aside from the condition, which is surely outstanding for the variety and may be unsurpassed for any silver dollar of this date. ONE FOR PERFECTIONIST TYPE COLLECTORS — or for fanciers of ultra blue chip mint errors... Finest known! Ex Bolender, A.J. Ostheimer.”

While the exceptional Eric P. Newman Collection 1799 dollar is the finest of the date known (B-5, BB-157 variety, which realized \$822,500 in our 11/2013 sale), the current coin is not far behind it in terms of technical quality or eye appeal. Translucent golden toning covers both sides with faint amber-gold accents speckled about the boldly lustrous surfaces and on Liberty’s rounded cheek.

Unique in its double-struck, terminal die state condition and tied for finest of its variety — available at public auction for the first time in nearly 40 years — we expect vigorous competition when this outstanding early dollar crosses the block.
NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

1799 Draped Bust Dollar, MS63

B-11, BB-161 Variety

Ex: Queller

4016 1799 7x6 Stars, B-11, BB-161, R.3, MS63 ANACS. Bowers-Borckardt Die State III. The Obverse 4 of this variety was first used to strike the BB-156 die pairing (which shows clash marks), then the BB-161 through BB-164 varieties. The Reverse I was also used to strike several previous varieties, during which time two die lappings served to efface the berries from the branch on the reverse, leading to the No Berries reverse seen on the present pairing and the BB-160.

The present coin is a perfect demonstration of why some numismatists prefer the term “die stage” to “die state.” After all—and this truism persists to this day of modern high-speed coinage—*each blow of a die produces at least some change in that die, no matter how small or imperceptible.* At certain points, when enough changes are visible, coins struck from that die are said to be from a given die state—a discrete and frozen moment in time, a defined increment of a given size. But in between those defined increments are all the intermediate die stages, truly a continuum rather than a series of discrete steps.

Here is the Bowers-Borckardt *Silver Dollar Encyclopedia* description of Die State III (italics added for emphasis):

“Die State III: Cracks enlarge, and now crack from border goes through wing, star, eagle’s head, and now continues upward behind head. Crack from D to ribbon now continues downward along edge of eagle’s wing to shield (and is remarkably similar to a crack on 1799/8 BB-143). New crack goes from arrow feathers upward through UNITE to border. *This die state, or a slightly less advanced version of it, is the state most often seen for BB-161.*”

In the case of the present coin, while the cited crack extends to the eagle’s head, it does not yet extend upward behind the head, and yet the rest of the coin fulfills all of the “state” definition given by Bowers and Borckardt. Both sides of this strictly Mint State piece demonstrate lustrous, fairly prooflike surfaces, with light tinges of gold in the fields, deepening to sunset-orange near the rims, and with steel-blue on the obverse highpoints. This stunning coin is undoubtedly at or near the top of the Condition Census for the variety.

Ex: Stack’s (12/1998), lot 1405; David Queller; *The Queller Family Collection of Silver Dollars* (Heritage, 4/2008), lot 2053. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

**1799 B-10, BB-163 Dollar, MS61
Bold Strike, Flashy Fields**

- 4017 1799 7x6 Stars, B-10, BB-163, R.2, MS61 NGC.** Bowers Die State III-IV. A crack descends through the TES in STATES, but no radial crack is present through the O in OF. A crisply struck and unworn example with noticeably prooflike fields, although undesignated as such by NGC. The medium gunmetal-gray surfaces reveal aquamarine borders and straw-gold centers when the piece is rotated beneath a light. The upper right reverse displays moderate adjustment marks (as coined), prominent only the cloud beneath the F in OF. Both sides are uncommonly free from abrasions. The present lot ranks among the finest examples of BB-163. NGC and PCGS have each certified just one Mint State piece as BB-163, and both coins are graded MS61. Perhaps only the Eliasberg example (certified MS64 by PCGS) ranks above it within the Condition Census. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

**1799 7x6 Stars Dollar, AU50
B-8, BB-165**

- 4018 1799 7x6 Stars, B-8, BB-165, R.3, AU50 NGC.** Ex: Pedram Collection. Bowers Die State III. Rich orange-gold, sea-green, and russet-brown toning embraces this lightly circulated and satiny early dollar. The surfaces are refreshingly unabraded. Minor adjustment marks are noted near the upper right reverse stars, and were present on the planchet prior to the strike. The scarce late die state with numerous lengthy cracks. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

**1800 Draped Bust Dollar, XF40
B-12, BB-184, Ideal for the Grade**

- 4019 1800 B-12, BB-184, R.3, XF40 NGC. CAC.** Bowers Die State II. Moderate silver-gray toning reveals faint blue and gold overtones over attractive surfaces that show only scattered, tiny marks from time spent in circulation. Well-centered with prominent, broad rims (especially on the obverse), this sharply struck early dollar is ideal for the XF grade with plentiful eye appeal and blatant originality. The R in LIBERTY is broadly recut. NGC ID# 24X9, PCGS# 40070 Base PCGS# 6887

**1800 Bust Dollar, AU50
Rare B-5, BB-189, Scarce Variety**

- 4020 1800 B-5, BB-189, R.5, AU50 NGC.** Ex: Pedram Collection. Bowers Die State I. The variety is recognized by a die lump inside the lower upright of R in LIBERTY, more famously explained by M. H. Bolender, who said: "Look for the die dot." The reverse shows a similar anomaly, with a die flaw to the lower left of the second T in STATES. This attractive About Uncirculated example shows sharp remaining definition on the motifs, with pleasing olive-gold and silver-gray toning and traces of residual mint luster. NGC ID# 24X9, PCGS# 40075 Base PCGS# 6887

1800 B-10, BB-190 Dollar, AU53
Wide Date, Low 8 Variety

- 4021** 1800 Wide Date, Low 8, B-10, BB-190, R.3, AU53 NGC. Bowers Die State VI. The latest state of the dies, with die cracks between the arrows and left (facing) wing, and two parallel cracks through the ME in AMERICA among several others including a bold crack through U in UNITED into the arrows. The pearl-gray surfaces show remaining luster across the eagle's wingtips and other peripheral elements. A small planchet flaw is noted at 11 o'clock on the reverse, and faint thin marks are present beneath UNUM. Light abrasions are scattered across both sides, with moderate wear from the brief circulation.
Ex: *FUN Signature (Heritage, 7/2007)*, lot 1173. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

1800 AMERICA1 Dollar, XF40
B-19, BB-192

- 4022** 1800 AMERICA1, B-19, BB-192, R.2, XF40 NGC. Bowers Die State II. A popular *Guide Book* reverse distinguished by a mint-made die scratch after the final A in AMERICA. Blended sea-green and dove-gray encompass this attractive early dollar. The reverse has inconsequential rim dings at 4:30 and 7:30, and a slender and faint granular streak crosses the shield.
Ex: *Long Beach Signature (Heritage, 2/2010)*, lot 1137, which realized \$3,881.25. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

1800 Draped Bust Dollar, XF40
AMERICA1, B-19, BB-192

- 4023** 1800 AMERICA1, B-19, BB-192, R.2, XF40 PCGS. Bowers-Borckardt Die State III. The BB-192 variety is recognized by the famous AMERICA1 reverse and the position of star 1 relatively close to the hair. This impressive XF specimen shows light wear on the design elements and the lightly abraded silver-gray surfaces retain traces of original mint luster. The "wave" clash marks show at the date. Housed in a green label holder. The AMERICA1 variety is listed on page 219 of the 2016 *Guide Book*. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

1800 B-13, BB-193 Dollar, XF40
Very Late Die State

- 4024** 1800 B-13, BB-193, R.4, XF40 PCGS. Bowers Die State "V." An unlisted and very late die state with an arc-shaped field crack between obverse stars 8 and 11, and the reverse field buckled near the I in AMERICA. The cream-gray and tan-brown surfaces are nicely defined and display noticeable luster. We note a faded thin mark on the cheek and a delicately entered letter A on the obverse at 5 o'clock. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

1800 Dollar, B-14, BB-194, AU58
Dotted Date, *Guide Book* Variety

- 4025** 1800 Dotted Date, B-14, BB-194, R.3, AU58 NGC. Bowers Die State II. This is the usually seen die state with cracks and die breaks within and around the first 0 in the date. The Dotted Date's status as a major *Guide Book* variety ensures its perennial popularity among early dollar specialists. Dave Bowers comments in *The Encyclopedia of United States Silver Dollars 1794-1804*: "In Mint State, the issue is a major rarity, with just four specimens known." This AU58 example is tied for fifth place on the Condition Census with the Matthews and Queller specimens.

Surfaces toned in pleasing shades of violet, lavender, and gold offer boldly impressed relief elements with an unimportant trace of high-point rub. Partial mint luster issues from the protected areas of the design, enhancing the appeal of this carefully preserved early dollar. Census: 3 in 58, 4 finer (8/15). NGC ID# 24X9, PCGS# 40078 Base PCGS# 6889

1801 B-1, BB-211 Dollar, XF40
Partial Luster, Moderate Wear

- 4026** 1801 B-1, BB-211, R.3, XF40 PCGS. Bowers Die State IV-V. The field is buckled near the E in AMERICA but the letter remains distinct. A moderately abraded almond-gold and stone-gray representative with scattered minuscule ebony spots. Luster illuminates the borders, wings, and Liberty's hair. NGC ID# 24XA, PCGS# 40083 Base PCGS# 6893

1802 Narrow Date Dollar, AU50
B-6, BB-241, Ample Luster

- 4027** 1802 Narrow Date, B-6, BB-241, R.1, AU50 NGC. Bowers Die State III. The right base of T in LIBERTY is missing, diagnostic for the *Guide Book* Narrow Date variety. This pleasing dollar has pale grayish-gold surfaces with considerable luster. Small marks are present but are incidental for the grade.
Ex: Long Beach Signature (Heritage, 2/2009), lot 1581, which realized \$5,750. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

**1803 Draped Bust Dollar, AU50
Small 3, B-5, BB-252**

- 4028** 1803 Small 3, B-5, BB-252, R.3, AU50 NGC. Bowers-Borckardt Die State I. The BB-252 variety is recognized by the small, thin-top 3 in the date and a spur on the outside curvature of D in UNITED. Caramel-gold and pearl-gray toning embraces this partly lustrous and lightly circulated example. Tiny marks are distributed, but none singularly distract. Struck a couple of degrees off-center toward 2:30, with a wider rim present on the left than on the right. The Small 3 variety is listed on page 219 of the 2016 *Guide Book*.
Ex: FUN Signature (Heritage, 1/2009), lot 4312; Long Beach Signature (Heritage, 5/2009), lot 940. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

GOBRECHT DOLLARS

**1836 Gobrecht Dollar, Fine Details
Judd-60, Die Alignment I**

- 4029** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Edge Repaired — PCGS Genuine. Proof Fine Details. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). There is no angling die clash mark above the eagle's wing, but we cannot state definitively about its absence because of the heavy wear. The Edge Repaired disclaimer is somewhat of a mystery. Yes, we see slight filing over the denticles, most easily seen at 2 o'clock on the reverse; but if there is a problem on the edge itself we are not able to discern where. Deep blue-gray toning covers each side, and the only noticeable mark is located in the lower obverse field above the foot of Liberty. Even wear overall and actually a nice, lower-grade Gobrecht dollar. NGC ID# BLWV, PCGS# 11225

**1836 Gobrecht Dollar, PR35
Judd-60, Original, Die Alignment I**

- 4030** 1836 Name on Base, Original, Coin Alignment, Judd-60 Original, Pollock-65, R.1, PR35 PCGS. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the DO in DOLLAR). Struck in the first part of the final week of 1836 with the eagle flying upward. There is no die scratch above the eagle's wing on this piece, indicating it was one of the 400 coins struck before the dies clashed. A high percentage of these pieces were saved and survive today in PR60 or finer condition. This piece may have been circulated or it could have been carried as a pocket piece as the surfaces are evenly worn, and there are only slight, but numerous abrasions scattered over each side.
Ex: Long Beach Signature (Heritage, 6/2005), lot 6646. NGC ID# BLWV, PCGS# 11225

1836 Restrike Judd-60 Gobrecht Dollar, PR62
Die Alignment IV, Late Die State
Ex: Dr. Julius Korein

4031 1836 Name on Base, Judd-60 Restrike, Pollock-65, R.5, PR62 PCGS. Ex: Korein / 414.7 grains. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment IV (head of Liberty opposite OF after a medal turn). This is the Korein-59 coin, as listed in the 2009 Gobrecht dollar reference, based on Dr. Korein's extensive collection of Gobrecht dollars. Close examination shows this piece to be from the latest die state, showing all the die markers listed by the collaborative efforts of John Dannreuther, Saul Teichman, and Craig Sholley.

The fields are remarkably bright and reflective on each side, and the strike details are complete throughout. There are no mentionable flaws on the obverse or reverse, just a number of tiny contact marks that explain the grade. Only the slightest hint of golden-rose toning is noted. Overall this is a splendid Gobrecht dollar and a piece that will undoubtedly find its way into a first-class 19th century type set.

Ex: Sold on behalf of the American Numismatic Society to benefit the Chair of North American Coins and Currency of the ANS / FUN Signature (Heritage, 1/2014), lot 5289. NGC ID# 26YX, PCGS# 11227

SEATED DOLLARS

1842 Seated Dollar, MS64
Semiprooflike No Motto Type Coin

4032 1842 MS64 PCGS. Unlike many later issues which were apparently used solely in foreign trade or melted by bullion dealers, the 1842 Seated dollars did circulate to some extent in American commerce. This, combined with a mintage of more than 184,000 coins, makes this issue one of the more plentiful No Motto type coins in circulated grades. Mint State coins, by comparison, are scarce, but remain more available than such examples of most other dates from this decade. Still, the finest 1842 Seated dollars known fall short of Gem quality. This MS64 example is a condition rarity, and is among the finest certified of the date. Liberty's head and figure are sharp and the stars show complete radial lines. The eagle's talons and plumage are well-struck, although a touch of weakness appears at the upper edge of the left (facing) wing. A minimally abraded coin with semiprooflike fields and champagne-gray toning. Population: 19 in 64 (1 in 64+), 0 finer (8/15). NGC ID# 24YC, PCGS# 6928

1851 Silver Dollar, AU58
Appealing Rose-Gray Patina

4033 1851 AU58 NGC. The High Date feature, slanting downward left to right, and the shield point aligned with the left side of the top of the 1 in the date, aid in attributing this near-Mint State 1851 Seated dollar key as an Original striking. It is generally thought that all the Original pieces — struck to the extent of 1,300 coins — were produced as business strikes, and the few dozen or so Restrikes (made on more than one occasion, apparently) were intended as proof strikes. They feature a centered, level date, showing the shield point aligned with the right side of the top of the 1. Current wisdom holds that the Restrikes were made for the first time circa 1859-60 and a second time circa 1867. (The first Restrike period would have been under the administration of Mint Director James Ross Snowden, the second under that of Henry R. Linderman — it was not a help that both men were numismatists as well as coin-makers.)

This lightly circulated 1851 Seated dollar divulges its wear as slight color change on the high points of the central devices on each side, but there are no mentionable marks other than a small patch of short scrapes below the olive branch on the reverse. Appealing rose-gray patina invigorates surfaces that are attractive in every way. Census: 5 in 58, 19 finer (8/15). NGC ID# 24YP, PCGS# 6939

1857 Seated Dollar, MS63
Original Luster and Toning

4034 1857 MS63 NGC. The 1857 is a less often seen date in the Seated dollar series, scarce in all Mint State grades. This Select example is well-struck with satiny luster and a hint of reflectivity in the reverse fields, but the chief attribute is the blatant originality of the toning; both sides show a blanket of warm champagne color with mottled overtones of violet and ocean-blue. Light, scattered abrasions reside beneath the patina but pose little distraction. Census: 13 in 63, 18 finer (7/15). NGC ID# 24YW, PCGS# 6945

1859-S Seated Dollar, MS63
Conditionally Rare San Francisco Issue

- 4035 1859-S MS63 PCGS.** Medium gold toning covers the obverse and lighter champagne toning crosses the reverse of this fully lustrous piece. The underlying surfaces exhibit a trace of reflectivity in the fields with satiny luster on the devices, resulting in a mild cameo appearance.

Just 20,000 silver dollars were coined in San Francisco during 1859, the first of the Seated silver dollar denomination to be struck at that facility. During the few previous years of production, the young mint was concentrating on gold coins, and also producing limited quantities of fractional silver to answer the need for change in the gold region. The next meaningful production of silver dollars in San Francisco would have to wait until 1872, when another 9,000 pieces were coined. Of course, a small number of 1870-S dollars were minted with about a dozen known, and a few hundred 1873-S Seated dollars were also coined, but remain unknown today. Population: 7 in 63, 1 finer (7/15).

Ex: Long Beach Signature (Heritage, 5/2008), lot 919; Central States Signature (Heritage, 4/2009), lot 2579. NGC ID# 24YZ, PCGS# 6948

1869 Seated Dollar, MS63
Original Toning, Conditionally Scarce

- 4036 1869 MS63 PCGS.** This is an impressive example of an issue that is scarce in any Mint State grade, deeply toned with lilac, sea-green, and steel-blue color over both sides. The mintage of this issue was rather large, but many or most were exported to the Orient and elsewhere, thus leaving few in this country for collectors to hold and preserve. Both sides of this example are modestly abraded, as expected. Population: 10 in 63, 10 finer (8/15).

Ex: Central States Signature (Heritage, 4/2006), lot 2191.

From The Stephen A. Walling Collection. NGC ID# 24ZC, PCGS# 6962

1871 Seated Dollar, Attractive MS64
Beautiful Patina

- 4037 1871 MS64 PCGS.** Beautiful blue and magenta patina invigorates both sides of this nicely preserved late-series Seated dollar, showing some silver-gray color remaining in the central obverse. The sharp strike complements a relative paucity of abrasions, although some reeding marks appear on Liberty midsection and scattered smaller abrasions occur elsewhere. An extremely attractive example for type or date-set purposes. Population: 43 in 64 (1 in 64+), 7 finer (8/15). NGC ID# 5DNV, PCGS# 6966

1872-CC Seated Dollar, AU Details
Scarce Carson City Issue

- 4038 1872-CC — Improperly Cleaned — NGC Details. AU.** One of four Carson City issues in the Seated dollar series, and a recognized semikey in all grades with a mintage of only 3,150 coins. This piece is well-detailed, but shows unnaturally bright surfaces as a result of cleaning. Still, there are no other problems, and a degree of field reflectivity remains from the original surface. NGC ID# 24ZK, PCGS# 6969

**1873 Silver Dollar, MS65
Brilliant, Frosty Surfaces**

4039 1873 MS65 NGC. Upon enactment of what many called the “Crime of ‘73,” new legislation abolished the silver dollar and several other minor coinage denominations. Undistributed Seated dollars were melted to provide bullion for the newly enacted Trade dollars, which were specifically created for foreign trade — a role that had been unofficially filled by Seated dollars in previous years.

Almost without exception throughout the Seated dollar series, Gem examples are rare. The 1873 issue is particularly challenging with its low surviving mintage. This MS65 example is untuned and vivid-white with thick mint frost and brilliant silver luster. A few trivial marks and a some light abrasions in the right obverse field do not disturb the radiant eye appeal. The coin is sharply struck except at the highest points of Liberty’s hair. Census: 4 in 65, 2 finer (8/15). NGC ID# 24ZM, PCGS# 6971

PROOF SEATED DOLLARS

**1848 Seated Liberty Dollar, PR55
One of Just 12 to 15 Proofs Extant**

4040 1848 PR55 PCGS. This is a prime opportunity to acquire a very rare pre-1858 proof dollar. The estimated production for the 1848 stands at 25 to 35 proofs, of which only 12 to 15 examples are believed extant. This proof may have briefly served as a pocket piece or spent a short period of time in circulation before being set aside. Either way, the overall appearance is attractive with rich violet and blue patina. Light marks are of little consequence given the importance of this proof dollar. Population: 1 in 55, 5 finer (8/15) NGC ID# 24ZY, PCGS# 6989

**1858 Seated Dollar, PR63
Popular Proof-Only Date**

4041 1858 PR63 ANACS. As Dave Bowers puts it in his *Encyclopedia*, the proof 1858 silver dollar is to the Seated Liberty dollar series as the 1895 proof is to the Morgan series. With no supplemental circulation strike coinage, the proof 1858 experiences far greater demand than might otherwise be the case. The *Guide Book* lists its mintage as 300 coins, but this is actually an estimate, and the actual total may be slightly smaller. The combined PCGS and NGC population of 172 survivors likely includes a number of resubmissions. This Select example is outstanding for the grade. Impressive sharpness spans Liberty, the stars, and the eagle, and the fields exhibit complementary mirroring. Amber-gold toning warms each side, showing occasional glimpses of gunmetal-blue. A small field mark below the I in UNITED serves as a pedigree identifier. NGC ID# 252C, PCGS# 7001

1863 Seated Dollar, PR65 Cameo
Rare This Fine, Near-Brilliant

4042 1863 PR65 Cameo NGC. The bulk of surviving proof 1863 Seated dollars have little meaningful contrast and typically grade no finer than PR64. Gems are rare and Cameo examples are scarce; this near-brilliant representative combines these two elusive categories, making for a true condition rarity. The technical quality is excellent, including needle-sharp design elements and deeply mirrored fields. A few stray hairlines appear to be all that prevent an even finer grade.

This proof issue had a limited mintage of just 460 pieces, the lowest recorded proof mintage in the series after 1858. Widespread hoarding of silver coin during the Civil War period likely aided in this issue's survival, which seems more plentiful in the absolute sense than it theoretically should be. Nonetheless, we suspect the certified population reports reflect some resubmissions, particularly in the upper range where the difference in value between succeeding grades widens. Census: 5 in 65 Cameo, 3 finer (8/15). NGC ID# 252H, PCGS# 87006

1866 Seated Liberty Dollar, PR64
First-Year Motto Issue

4043 1866 Motto PR64 NGC. As the first year Motto proof issue, demand by both type and series collectors is strong. A mintage of 725 pieces was generally well-preserved, making the issue more available than some of the post-war dates. This untoned, gleaming white example is crisply struck with frosted motifs. A legitimate near-Gem proof, it is limited in grade by a few hair-thin lines that are visible with a glass — mostly on the reverse. Three pinpoint toning dots (two on the reverse shield and one on Liberty's knee) are tiny and do not distract. Census: 62 in 64, 24 finer (8/15). NGC ID# 5GDV, PCGS# 7014

1867 Silver Dollar, PR65 Cameo
Resplendent Mirrors, Lightly Toned

- 4044** 1867 PR65 Cameo NGC. According to numismatist Duncan Lee in the August 2006 *CDN Monthly Supplement*, the 1867 proofs can be distinguished from business strikes by the absence of repunching on the date. The present Gem is an obvious proof, as it has deeply mirrored fields, a razor-sharp strike, and noticeable cameo contrast. Medium honey-gold toning is prominent throughout, enhanced by a blush of powder-blue and lilac near the eagle's left (facing) wing. Thorough inspection beneath a loupe locates only a few faint obverse field hairlines. Only 625 proofs were issued, and a majority of certified specimens grade between PR62 and PR64. Census: 13 in 65 Cameo (1 in 65 ★ Cameo), 9 finer (8/15).
Ex: *ANA Signature* (Heritage, 8/2010), lot 3312. NGC ID# 252N, PCGS# 87015

1870 Seated Dollar, PR66 Cameo
Among the Finest Known Examples

- 4045** 1870 PR66 Cameo NGC. Despite the comparatively large proof mintage of 1,000 pieces, grading events reflect an unexpectedly low number of 1870 survivors, perhaps suggesting a net distribution of between 600 and 700 pieces. The current example ranks among the half dozen or so finest-known examples with cameo contrast.
A subtle golden hue covers both sides of this silvery Premium Gem. The central motifs are frost-white and stand out three dimensionally from the surrounding mirrored surfaces. Produced from dies that show a signs of rust at Liberty's right arm, the strike is nevertheless razor-sharp with virtually full details. A few widely dispersed delicate lines appear under strong magnification, along with one or two tiny lint marks below Liberty's neck, but in essence the surfaces are ideal. Census: 2 in 66 Cameo, 2 finer (8/15). NGC ID# 252S, PCGS# 87018

1871 Seated Dollar, PR64
Subtle Cameo Contrast

- 4046 1871 PR64 PCGS.** For the type collector, the 1871 Seated dollar is a go-to date that is available in Mint State; for the collector seeking a proof type coin, the 1871 is still an ideal candidate, although its nature as proof makes it scarce at high grade. This Choice example is boldly struck with light golden toning and deeply mirrored fields. Modest field-motif contrast is not quite strong enough to warrant a Cameo designation. Population: 49 in 64 (1 in 64+), 19 finer (7/15). NGC ID# 252T, PCGS# 7019

1871 Dollar, PR64 Cameo
Delicate Golden Toning

- 4047 1871 PR64 Cameo PCGS.** A thin dusting of cloudy, golden-gray patina floats on the glassy and reflective surfaces of this near-Gem proof dollar, but not to the extent of limiting the cameo contrast that remains starkly bold on both sides. The snow-white central motifs show a full strike and dramatic mint frost. A tiny line between the rim and star 13 is a break in the faint toning and does not affect the surface of the coin. NGC ID# 252T, PCGS# 87019

1872 Seated Dollar, PR65 Cameo
Impressive Visual Allure

- 4048 1872 PR65 Cameo PCGS. CAC.** A beautiful proof dollar with natural proof set toning and a razor-sharp strike on both sides. The obverse displays full cameo contrast between the frosted figure of Liberty and the deep-mirror fields. Dramatic tones of neon-blue and peach-gold shimmer with mint luster. The reverse is equally resplendent in shades of blue, violet, and gold.

While many toned proofs sacrifice reflectivity of the fields while acquiring layers of natural patina through the decades, this impressive example retains the glassy-mirrored charisma desired by all collectors of proof coinage. The vivid toning in no way diminishes the field-to-device contrast. Few proofs of any denomination — but especially Seated dollars with their wide-open fields — can equal the allure of this stunning cameo proof. Population: 7 in 65 Cameo, 2 finer (7/15). NGC ID# 252U, PCGS# 87020

TRADE DOLLARS

1875-S Trade Dollar, Vibrant Gem
Rare Type Two Reverse

- 4049 1875-S Type Two Reverse MS65 NGC.** Large S. This plentiful San Francisco issue becomes conditionally scarce at the Gem grade level, and such coins are highly popular for type representation. This piece is beautifully preserved, with frosty luster and clean fields. Subtle russet and amber-olive hues accent a touch of champagne toning over each side. The reverse is lightly struck, with vertical roller marks characterizing much of the interior. Examples with the Type Two Reverse are significantly rarer than their Type One Reverse counterparts. Census: 37 in 65 (1 in 65+), 5 finer (8/15). PCGS# 510102 Base PCGS# 7039

1877 Trade Dollar, MS66
FS-101 Doubled Die Obverse, None Finer

- 4050 1877 MS66 NGC. FS-101.** Die doubling occurs on stars 11, 12, and 13 as well as on the wheat stalks, LIBERTY, and IN GOD WE TRUST. With a production figure exceeding 3 million pieces, the 1877 must be considered a type coin, but its mintage nonetheless pales beside that of the 1877-S, where close to 10 million pieces were struck by the San Francisco Mint.

Deep pinkish-gray and blue patina prevails throughout both sides of this attractively toned Philadelphia issue. As expected at the Premium Gem level, essentially pristine and mark-free surfaces exist throughout. The strike leaves little to be desired — unusual for the issue — save for minor softness on the wheat sheaves and the hair around Liberty's ear. The reverse is also sharply defined, despite slight softness on the left (facing) claw. The present coin is the sole finest at NGC. Census: 1 in 66, 0 finer (8/15).

Ex: FUN Signature (Heritage, 7/2012), lot 3887; The Eugene H. Gardner Collection Part II (Heritage, 10/2014), lot 11627. NGC ID# 253C, PCGS# 7044

PROOF TRADE DOLLARS

1878 Trade Dollar, PR64 Deep Cameo Very Rare So Boldly Contrasted

- 4051 1878 PR64 Deep Cameo PCGS.** Trade dollar production at the Philadelphia Mint was limited to 900 proofs in 1878. The average survivor grades PR62 to PR64. Cameo coins are more challenging, but still somewhat available through PR64. Deep Cameo representatives are all very rare: There are only six submissions at PCGS and five grading events at NGC. This untuned Choice proof has outstanding white-on-black contrast between the deep mirrors and thickly frosted motifs. Lightly scattered contact marks appear over each side. Population: 3 in 64 Deep Cameo, 2 finer (8/15). NGC ID# 27YP, PCGS# 97058

1879 Trade Dollar, Sharp PR65+

- 4052 1879 PR65+ NGC.** Moderately deep patina on each side fails to conceal the considerable luster combined with a potent strike on this Gem proof 1879 Trade dollar. It requires a loupe to observe the sprinkled light ticks that determine the grade, most of them away from the high points. The 1879 issue was the first entry among the proof-only issues that conclude the series. This is a sharp and attractive representative of the date. Census: 47 in 65 (4 in 65+), 36 finer (8/15). NGC ID# 27YR, PCGS# 7059

1879 Trade Dollar, PR65 Cameo Flashy and Well-Preserved

- 4053 1879 PR65 Cameo NGC.** Fantastically flashy fields have blazing luster that surrounds the frost-white and solidly struck devices. Minor gold toning at the margins gives way quickly to silvery brilliance. A true Gem, with outstanding contrast for this popular issue from the first year in which all Trade dollars struck were proofs with the mintage limited to 1,541 pieces. Census: 23 in 65 Cameo, 50 finer (8/15).
Ex: Central States Signature (Heritage, 4/2010), lot 1072. NGC ID# 27YR, PCGS# 87059

1879 Trade Dollar, PR66 Cameo First Proof-Only Year

- 4054 1879 PR66 Cameo NGC.** While 1878 is the first proof-only Philadelphia Trade dollar issue, the 1879 is far more famous, as it is the first date for which only proofs were coined (both Carson City and San Francisco made business strikes in 1878, but Philadelphia did not). With a generous mintage of 1,541 pieces, the 1879 Trade dollar is available for a price in most grades, though at the PR66 Cameo level seen here, it is a rarity. Strong silver mirrors have a delicate layer of gold-tinged gray patina, and while the well-defined devices are lightly frosted, the contrast is undeniable. A few tiny lint marks appear on each side. Census: 22 in 66 Cameo (1 in 66+ Cameo, 3 in 66 ★ Cameo), 28 finer (8/15).
Ex: Houston Signature (Heritage, 12/2010), lot 3834. NGC ID# 27YR, PCGS# 87059

1881 Trade Dollar, PR64+ Cameo Deep Mirrors

- 4055 1881 PR64+ Cameo PCGS.** Near-brilliant, but with faint traces of gold mostly around the peripheries. The strike is razor-sharp, accentuated by frosty luster on the motifs and deep mirroring in the fields. A few stray lines are present, precluding a full Gem grade. This gleaming proof type coin is a pleasing example of this proof-only Trade dollar issue. Population: 35 in 64 (4 in 64+) Cameo, 38 finer (8/15). NGC ID# 27YT, PCGS# 87061

1882 Trade Dollar, PR64+ Cameo Deeply Mirrored Fields

- 4056 1882 PR64+ Cameo NGC.** CAC. Warm golden toning is deeper around the peripheries, leaving the central regions starkly contrasted with bold, frosty design elements and deep, glassy fields. A few faint hairlines in the recesses are all that preclude a full Gem grade assessment from NGC. Census: 40 in 64 Cameo (2 in 64+ Cameo, 1 in 64+ ★ Cameo), 48 finer (8/15). NGC ID# 27YU, PCGS# 87062

1882 Trade Dollar, PR65 Cameo
Brilliant, Glassy Surfaces

- 4057 1882 PR65 Cameo NGC.** A stunning Gem specimen from a proof-only mintage of 1,097 Trade dollars, this coin displays incredibly deep mirrors and richly frosted devices across its nearly untuned silver surfaces. The stark field-device contrast is confirmed by the Cameo designation. Struck for collectors but pursued by speculators, today the 1882 issue is scarce in PR65 Cameo. Census: 31 in 65 Cameo (4 in 65 ★ Cameo), 17 finer (8/15).
Ex: Long Beach Signature (Heritage, 2/2009), lot 1659; Long Beach Signature (Heritage, 9/2010), lot 4420. NGC ID# 27YU, PCGS# 87062

1883 Trade Dollar, Attractive PR66
Final Collectible Issue

- 4058 1883 PR66 NGC.** With the introduction of the Morgan silver dollar in 1878, the controversial and politically unpopular Trade dollar became the target of speculators, who touted the subsequent proof-only mintages. Meanwhile, millions of Trade dollars struck in previous years returned to the U.S. from foreign holdings. By 1883, the bloom was off the rose for Trade dollar proofs, and the series was on the brink of abolishment. Just 979 proofs were struck, some possibly melted, and as a result the issue is notably scarce today. This glittering Premium Gem example is untuned and sharply lustrous. The frosted central motifs contrast nicely with the deep-mirrored fields, with no significant distractions and a needle-sharp strike. Census: 30 in 66 (2 in 66+, 1 in 66 ★), 14 finer (8/15). NGC ID# 5DP8, PCGS# 7063

1883 Trade Dollar, PR65 Cameo
Warm Patina

- 4059 1883 PR65 Cameo NGC.** The 1883 Trade dollar boasts a proof-only mintage of 979 pieces and is the last collectible date of the series. The devices of the present coin have a startling, three-dimensional appearance that has earned the coveted Cameo designation. The fields are brightly reflective under wisps of green and blue toning. Census: 12 in 65 Cameo, 30 finer (3/10).
Ex: Boca Collection, Part II / Central States Signature (Heritage, 4/2010), lot 2632. NGC ID# 27YV, PCGS# 87063

MORGAN DOLLARS

1878 7TF Morgan, MS65 Deep Mirror Prooflike
Reverse of 1878

- 4060 1878 7TF Reverse of 1878, VAM-81, MS65 Deep Mirror Prooflike NGC.** The 'Polished Ear' long neck reverse variety, also showing star 1 recut. This is a gleaming cameo example, showing brilliant, deep mirrors and frosty motifs. The coin is sharply struck and the fields exhibit only a few trivial marks. Census: 10 in 65 (1 in 65 ★) Deep Mirror Prooflike, 0 finer (8/15). PCGS# 40244 Base PCGS# 97075

1879-CC Morgan Dollar, MS64
Better Carson City Issue

- 4061 1879-CC MS64 PCGS.** An especially attractive semikey-date example that is brilliant throughout. The fields show a faint glimmer of semireflectivity, and the striking details are nicely brought up in all areas. The fields are beautifully preserved, and Liberty's cheek has only moderate contact.
Ex: Long Beach Signature (Heritage, 5/2007), lot 1415; FUN Signature (Heritage, 1/2009), lot 4452. NGC ID# 253U, PCGS# 7086

**1879-CC Morgan, MS65
Brilliant and Untoned, Nearly Prooflike**

4062 1879-CC MS65 NGC. This is a sharply struck example of the Large CC "normal" mintmark variety. The scarcity of prooflike and deep mirror prooflike examples of this scarce Carson City issue make reflective coins such as this Gem dollar especially desirable. While a few intervening areas of mint frost preclude a prooflike designation, the untuned, silver-white surfaces are for the most part mirrored and contrasted with the richly frosted motifs.

The Carson City Mint was limited in its silver dollar production for the year by a lack of silver bullion. Collusion by silver producers and the railroads made silver more profitable when shipped to the San Francisco Mint than it was when transported to the local branch mint. As a result, only 756,000 silver dollars were struck in Carson City for the year and the issue is trails only the 1889-CC in scarcity among all Carson City dates. Census: 43 in 65 (2 in 65+, 1 in 65 ★), 2 finer (7/15). NGC ID# 253U, PCGS# 7086

**1879-CC Morgan, MS63 Prooflike
Capped Die, VAM-3**

4063 1879-CC Capped Die, VAM-3, MS63 Prooflike PCGS. CAC. A Top 100 Variety. Housed in a first generation holder, this Select example clearly displays the large over small CC as well as the doubled date. Scattered small splashes of golden toning are present, primarily at the outer edges. Population: 25 in 63 (2 in 63+) Prooflike, 30 finer (8/15). NGC ID# 253T, PCGS# 40776 Base PCGS# 7089

**1880 8/7 Ears Morgan Dollar, MS61
VAM-8, Finest Graded at PCGS**

4064 1880 8/7 Ears, VAM-8, MS61 PCGS. A Top 100 Variety. Two short "ears" from the top of the second 8 in the date suggest the horns of the top of an underdigit 7. A "checkmark" is also faintly present on the upper left loop of that 8, further confirmation of an overdate. Lustrous and untuned with a good strike and no obtrusive marks. PCGS has certified a total of 33 examples as VAM-8, but only the present piece has secured a Mint State assessment. Population: 1 in 61, none finer (8/15). NGC ID# 253Y, PCGS# 133873 Base PCGS# 41097

1881-CC Dollar, Flashy MS67

4065 1881-CC MS67 PCGS. This Carson City issue was released from the Treasury vaults in considerable quantity from the early 1960s through the 1970s and is, therefore, an available date despite a comparatively small mintage of 296,000 coins. However, demand for the 1881-CC undoubtedly exceeds supply in this remarkable grade. Each side is wholly brilliant with sharply struck devices. The frosty surfaces are virtually unmarked, save for a handful of minuscule grazes that do not detract. PCGS reports merely four coins finer (8/15). NGC ID# 2549, PCGS# 7126

**1881-CC Dollar, MS66 Deep Mirror Prooflike
Starkly Contrasted Cameo**

- 4066 1881-CC MS66 Deep Mirror Prooflike PCGS.** In the absolute sense, the 1881-CC Morgan dollar does not become truly elusive until the Superb Gem level, but Deep Mirror Prooflike coins are scarce in MS66. This piece is boldly struck, with a hint of light champagne toning over frosty design elements. Strong cameo contrast is the hallmark of the eye appeal, and the mirrored fields are free of the scattered marks that typically affect Deep Mirror Prooflike Morgans. Population: 52 in 66 Deep Mirror Prooflike, 1 finer (8/15). NGC ID# 2547, PCGS# 97127

**1883-S Silver Dollar, MS64+
Radiant Eye Appeal**

- 4067 1883-S MS64+ NGC.** The 1883-S Morgan is a recognized better date in Uncirculated condition, but it becomes a genuine rarity finer than MS64. This Plus-designated piece displays vibrant, frosty luster with minimal abrasions. Blue and golden peripheral toning frames each side, leaving the interiors brilliant. A touch of softness on the eagle's breast and the hair above Liberty's ear is not bothersome. NGC lists only 16 finer coins (8/15). NGC ID# 254K, PCGS# 7148

1883-S Dollar, Highly Lustrous MS64+

- 4068 1883-S MS64+ PCGS.** The 1883-S dollar had a substantial mintage of 6.2 million pieces, but most were distributed shortly after striking and only a few hundred were found in LaVerre Redfield's holdings. As expected, the mint luster is bright and frosted, and the interior of each side is brilliant. The margins display light golden patina. Sharply defined throughout. NGC ID# 254K, PCGS# 7148

**1883-S Silver Dollar, MS65
Major Condition Rarity**

- 4069 1883-S MS65 NGC.** Although heavily touted as a conditionally scarce date in Mint State, the 1883-S Morgan remains collectible in grades through MS64, and is frequently offered at auction in this range. It is the Gem grade level from where this issue draws its fame. In MS65, the 1883-S Morgan is a grand rarity in absolute numbers, and in the context of the series, is prohibitively rare. Including possible resubmissions, there are fewer than three dozen Gem or finer examples seen by the leading certification services. Our auction archives show just 23 previous appearances of a Gem representative, including many reappearances of previously offered coins. The most recent was in lot 5271 of our Central States Signature sale (4/2014), where another PCGS coin realized \$32,900.

This piece is well-struck, with frosty luster glowing beneath mottled olive-green, russet, amber, and champagne-gold toning. Close study with a loupe fails to reveal any bothersome abrasions hidden beneath the patina. An outstanding, conditionally rare 1883-S dollar. Census: 13 in 65 (4 in 65 ★), 3 finer (8/15). NGC ID# 254K, PCGS# 7148

**1884-S Silver Dollar, MS61
Upper-End for the Grade**

4070 1884-S MS61 NGC. The 1883-S and '84-S Morgan dollars are a popular pair, both better dates that are often perceived as similar in scarcity. In circulated grades, this is true. In Mint State, the 1884-S is far scarcer. Uncirculated examples of this issue are most often seen in MS61 and MS62, with anything finer being rare. Gem examples of this issue are major condition rarities in the series.

The present coin is a collectible Mint State representative, but with far fewer abrasions than the grade suggests. When studied with a loupe, the semiprooflike fields show faint lines which undoubtedly determine the grade. Yet, they are hidden on the obverse by a blush of golden toning. The strike is well-executed and eye appeal is outstanding for the grade. NGC ID# 254P, PCGS# 7156

**1886 Dollar, MS66 Deep Mirror Prooflike
Pronounced Contrast, Razor-Sharp**

4071 1886 MS66 Deep Mirror Prooflike PCGS. CAC. The stark contrast and incredibly deep mirroring in the fields of this Premium Gem 1886 Morgan dollar give the first-glance impression of proof. Strike quality and eye appeal of this caliber are genuinely rare on this issue. The design elements are fully brought up and possess thick mint frost. A blush of gold toning emerges from the peripheries and the fields are beautifully free of distractions. Population: 31 in 66 (1 in 66+) Deep Mirror Prooflike, 0 finer (8/15). NGC ID# 254V, PCGS# 97167

**1889 Morgan Dollar, MS66+
Virtually Uncollectible Finer**

4072 1889 MS66+ PCGS. CAC. The availability of this plentiful Philadelphia issue declines significantly at the Premium Gem grade level, and anything finer is prohibitively rare. This MS66+ coin showcases beautifully frosted and well-preserved luster, with a near-brilliant reverse and an obverse that shows olive-gold, blue, and amber-orange toning in the margins. Well-struck and eye-appealing. PCGS lists four coins finer (8/15). NGC ID# 2558, PCGS# 7188

**1889 Silver Dollar, MS66+
Extremely Rare Any Finer**

4073 1889 MS66+ PCGS. CAC. The availability of this Philadelphia issue declines somewhat at the Premium Gem grade level, and finer pieces are prohibitively rare. This Plus-graded coin shows incredibly well-preserved, frosty-white luster. Characteristic of the issue, there is a touch of softness on the eagle's breast and the hair above Liberty's ear. PCGS and NGC combined list only five finer coins (8/15). NGC ID# 2558, PCGS# 7188

1889-CC Silver Dollar, AU50
Some Luster Remaining

- 4074** 1889-CC AU50 PCGS. The 1889-CC is a high-demand issue; the date is a key in the general series and is the key to the Carson City short set. This is a collectible, yet, well-detailed representative with original golden-gray patina that shows glints of luster in the fields. This coin will appeal to many budget-conscious enthusiasts. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, AU53
Nice Luster Remains

- 4075** 1889-CC AU53 PCGS. Demand seems insatiable for the King of Carson City dollars. This About Uncirculated example shows a large amount of remaining mint luster for the assigned grade, with light friction and small abrasions but no serious marks. The sharp strike remains intact despite brief circulation. Light silver-gray toning combines with the bright silver luster for excellent eye appeal. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS61
Key Carson City Issue

- 4076** 1889-CC MS61 NGC. The resumption of coinage at the Carson City Mint in July of 1889 was not a simple matter. Both equipment and personnel was in disarray, and it was October before the mint resumed full operations. A slim output of 350,000 silver dollars was the best the Mint could manage.

Mint State examples of the issue are scarce both in an absolute sense and especially by virtue of collector demand. This untoned example is sharp for issue with a clean cheek on Liberty, although a few light die striations are visible with a glass. Actual abrasions and marks are few and far between on both sides, with a few light scuffs noted beneath the chin. Cartwheel luster remains across the frosted fields and devices. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS62
Elusive Branch Mint Key

4077 1889-CC MS62 PCGS. From a small mintage of 350,000 pieces the 1889-CC is far and away the most elusive Morgan dollar from the Carson City Mint. Even in lower Mint State grades, the 1889-CC is a scarce date, as many coins were released into circulation over the years and the issue was not well-represented in the Treasury Releases of the 1960s. Most examples seen exhibit below-average striking characteristics, insipid mint luster, and excessive bagmarks.

The present coin is an attractive MS62 specimen, with unusually sharp definition on the design elements. The brilliant surfaces show a mix of frosty mint luster and prooflike reflectivity at certain angles, with the minimum number of minor contact marks for the grade. Eye appeal is quite strong for this important key issue. NGC ID# 2559, PCGS# 7190

1889-CC Morgan, MS62 Prooflike
Deep Mirrors, High-End for the Grade

4078 1889-CC MS62 Prooflike PCGS. CAC. This key to the Carson City short set is seldom seen in any Mint State grade, with only a small portion of the population also showing prooflike fields. The present coin is a true rarity and possesses a degree of eye appeal that almost seems to belie the grade. The fields are deeply reflective around well-struck, satiny devices, with modest cameo contrast present. Both sides show lightly mottled antique-gold toning which attests to the originality of the surfaces. The scattered abrasions that are expected for the grade are, quite simply, barely present; this coin shows just trivial marks on Liberty's cheek and in the adjacent field, with eye appeal reminiscent of a finer grade. Population: 26 in 62 Prooflike, 37 finer (7/15). NGC ID# 2559, PCGS# 7191

**1890-CC Morgan, High-End MS64
VAM-4, Tail Bar**

- 4079 1890-CC Tail Bar, VAM-4, Top 100, MS64 PCGS.** A Top 100 Variety. The heavy die gouge below the arrow fletchings is seen even by the naked eye, making this one of the more popular VAMs in the Morgan dollar series. The present example appears finer than MS64, but there are a few light grazes in the left obverse field which limit PCGS' opinion. The coin is sharply struck and displays radiant, untuned luster. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

1891-O Morgan Dollar, Flashy MS65

- 4080 1891-O MS65 NGC.** The Gem grade of the present 1891-O Morgan dollar is seldom surpassed, save for a measly two examples at NGC. The untuned surfaces on this piece exhibit excellent eye appeal; Liberty's cheek shows some small grazes but no large marks, and the surfaces elsewhere show good preservation. Flashy cartwheel luster tops off the outstanding presentation. Census: 69 in 65 (2 in 65 ★), 2 finer (7/15). NGC ID# 255J, PCGS# 7208

**1892-CC Silver Dollar, MS65
Intense Cartwheel Luster**

- 4081 1892-CC MS65 PCGS.** In Gem and finer grades, the 1892-CC is a better date in the Carson City short set. This MS65 coin is awash in frosty mint bloom, showing light golden album toning only around the peripheries. A few faint grazes limit the grade, but allow for outstanding eye appeal. The central devices are notably sharp, something which is sometimes lacking on this issue. PCGS lists 30 finer coins (8/15). NGC ID# 255M, PCGS# 7214

**1892-O Morgan Dollar, MS65+
Extremely Rare Any Finer**

- 4082 1892-O MS65+ PCGS.** Ex: Gold River. The 1892-O Morgan dollar is usually absent from discussions of key and semikey issues, but its scarcity in Gem condition should not be ignored. We suspect a number of the reported coins in MS65 are actually resubmissions brought about by the desire to get them upgraded to MS66 — Premium Gem examples of this date are prohibitively rare. This is only the fourth Plus-designated Gem we have ever offered, and it is only the second such coin we have handled in a PCGS holder. The other PCGS coin in this grade appeared in lot 5859 of our 2014 FUN Signature sale where it garnered \$15,275. The last MS66 coin we offered was in lot 5010 of our 2009 FUN Signature sale and realized \$34,500. This high-end Gem is impressively vibrant and devoid of bothersome abrasions; a few faint grazes appear only when tilted at an ideal angle beneath a light. Although a trifle soft on the central high points, the striking definition is far above-average for this New Orleans issue, and the eye appeal is heightened by a hint of light golden toning. PCGS lists just six coins finer (8/15). NGC ID# 255N, PCGS# 7216

**1893 Morgan Dollar, MS65
True Gem Quality**

- 4083 1893 MS65 PCGS.** A frosty Gem example of this better Philadelphia issue, showing just a hint of champagne toning that emerges from the extreme outer peripheries. Some minor striking softness persists on the high points of the devices. A low mintage of 378,000 coins ensures the scarcity of the 1893 in MS65, and finer pieces are rarely seen, with just six certified by PCGS (8/15). NGC ID# 255R, PCGS# 7220

**1893 Silver Dollar, MS62 Prooflike
Rare with Mirrored Fields**

- 4084 1893 MS62 Prooflike NGC.** The Panic of 1893 — in part precipitated by the Sherman Silver Purchase Act of 1890 — wreaked havoc both in the financial markets and at the Mint. Just 378,000 silver dollars were struck as a result. Even the repeal of the untenable Sherman Silver Purchase Act in August of the year did little to restore financial stability.

Prooflike survivors of the 1893 mintage are extremely rare. Both services have seen just two examples in MS62, while NGC reports a single finer coin with prooflike surfaces. The present example displays pleasing russet and gold toning over the reflective fields and frosted central devices. A few faint lines are visible with a glass, but remarkably few marks or abrasions are seen on either side of the coin. A sharp strike shows minor blending at the talons, yet bold detail exists on the hair strands above Liberty's ear. Census: 2 in 62 Prooflike, 1 finer (8/15). NGC ID# 255R, PCGS# 7221

**1893-CC Silver Dollar, MS61
Semiprooflike Fields**

- 4085 1893-CC MS61 NGC.** The 1893-CC has always been a collectors' favorite due to its scarcity and its position as the final Carson City Mint coin of its denomination. In terms of availability in Mint State, David Bowers (1993) writes that "it is third rarest after 1889-CC (rarest) and 1879-CC." This piece displays faint tan color on portions of the Liberty and eagle motifs and around the rims. The fields are somewhat prooflike, and establish a mild contrast with the design elements. Strike weakness is apparent on the hair over Liberty's ear and on the eagle's breast. This relatively attractive coin would grade higher were it not for the luster grazes and scuffs on Liberty's cheek and neck and in the left (facing) obverse field. Ex: FUN Signature (Heritage, 1/2006), lot 6816. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS62
Notable Eye Appeal**

- 4086 1893-CC MS62 NGC.** While the final-year Carson City silver dollars were fairly well-saved by collectors, in general they are weakly struck and often quite abraded. This MS62 example exhibits just a bit of both characteristics, with blending over the ear and a gathering of small, ticklike abrasions across the obverse fields. On the "plus" side, the lustrous surfaces show considerable prooflike character and notable eye appeal for the assigned grade. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS62
Semiprooflike Fields**

- 4087 1893-CC MS62 PCGS. CAC.** The final Carson City issue in the Morgan dollar series is scarcer in Mint State than might be expected with its mintage of 677,000 coins. Unlike most other CC issues, the 1893-CC was almost unrepresented in the GSA sales of the early 1970s — only one coin is recorded from the dispersal. This lower-end Mint State example is vibrantly lustrous and brilliant, with scattered abrasions according to the grade. The central high points show moderate weakness. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, Semiprooflike MS63

- 4088 1893-CC MS63 PCGS.** Every 1893 Morgan dollar issue is a recognized key or semikey date, but the 1893-CC has the added distinction of the popular Carson City mintmark. This piece is semiprooflike on both sides, with frosty, untuned devices. Hints of gold toning appear around the outer peripheries. As is typical of the issue, the eagle's breast and the hair above Liberty's ear exhibit moderate weakness. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS63
Collectible Mint State Example**

- 4089 1893-CC MS63 PCGS.** As the final issue in the Carson City date set and one of the scarcer issues from this Mint, the 1893-CC Morgan dollar is in strong demand in pleasing Mint State condition. The present example shows a few light abrasions as the grade suggests, but eye appeal is heightened by vibrant luster and semiprooflike mirroring in the fields. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS63+
High-End for the Grade**

- 4090 1893-CC MS63+ PCGS.** Just a whisk away from a Choice grade, this MS63+ example possesses vibrant, frosty mint luster and unusually well-preserved surfaces. The extreme outer peripheries show tinges of gold, while the interiors are brilliant. The central high points are impressively sharp, considering the extent of the weakness seen on many other examples of the 1893-CC. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS63
Rich Peripheral Patina**

- 4091 1893-CC MS63 NGC. CAC.** Peach-red and forest-green toning adorns the borders of this lustrous and well struck semikey Carson City dollar. The toning is reminiscent of the 1893-CC Morgans in the Redfield holding, although the pedigree of the present coin is unknown. The fields are exceptionally free from contact. Liberty's cheek has a smattering of tiny marks. As of (8/15), CAC has stickered only 44 pieces at the MS63 level. Encapsulated in a prior generation holder. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS61 Prooflike
Deeply Mirrored**

- 4092 1893-CC MS61 Prooflike PCGS.** This final-year Carson City issue is seldom seen with prooflike reflectivity, and Deep Mirror Prooflike coins are genuinely rare in all grades. This Prooflike example is moderately abraded, although this is forgiven in light of the gleaming mirrors of the fields. A lack of significant toning allows for subtle cameo contrast, while the central devices show minor striking softness. Housed in a first generation holder. NGC ID# 255S, PCGS# 7223

**1893-O Silver Dollar, MS62
Appealing for the Grade**

- 4093 1893-O MS62 PCGS.** Light caramel-gold toning graces this lustrous and lightly abraded scarce date dollar. The centers exhibit typical O-mint incompleteness, and the cheek displays a few faint grazes. Struck from multiply clashed dies. The lowest mintage New Orleans Mint issue, struck to the extent of just 300,000 coins.
Ex: Long Beach Signature (Heritage, 6/2010), lot 1160. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, Semiprooflike MS64
Virtually Uncollectible Finer**

4094 1893-O MS64 NGC. All four 1893 Morgan dollar issues are key or semikey dates with low mintages. The 1893-O had a production of just 300,000 coins. This issue is marginally available in grades through MS63, but a drastic decline in availability occurs at the Choice level, and another at the Gem grade. The 1893-O is a truly scarce coin in MS64 and carries strong demand at this level; finer pieces are prohibitively rare and draw a price tag far beyond the reach of most collectors. The most recently, an MS64 coin realized \$13,512.50 in lot 5171 of our Central States Signature sale (4/2015); the last MS65 coin we offered was in lot 1604 of our Summer Fun Signature sale (7/2007), where it realized \$115,000.

This is a vibrantly lustrous Choice example with semiprooflike fields and just a touch of light golden toning overall. A few trivial grazes limit the grade but hardly impact the eye appeal. Some usual softness appears on the hair above Liberty's ear. Census: 32 in 64 (1 in 64+), 3 finer (8/15). NGC ID# 255T, PCGS# 7224

**1893-S Morgan Dollar, VF35
In an Old Green Label Holder**

4095 1893-S VF35 PCGS. This Choice VF coin is slightly sharper than the vast majority of 1893-S dollars that fall into the midgrade category, and will appeal to a vast number of budget-conscious collectors. Its residence in an old green label holder and its original golden-gray patina further contribute to the overall appeal. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, AU50
The San Francisco Key

4096 1893-S AU50 PCGS. Prior to the 1960s, many issues in the Morgan dollar series were scarce to rare, especially in high grade. The Treasury releases of the early 1960s drastically changed the landscape of the Morgan dollar series. Many dates thought to be rare were suddenly available in quantity. One exception, however, was the 1893-S. With its series-low mintage of 100,000 coins, this date was almost unrepresented in the Treasury vaults by the middle of the 20th century. Presumably, most of the mintage was released into circulation at the time of issue, explaining the volume of low-grade circulated pieces available today, while XF and AU coins are scarce. Uncirculated examples largely survived only by chance, and are rare in any grade.

This About Uncirculated representative displays bright surfaces with remnants of luster in the protected regions of the fields. Some semiprooflike mirroring is suggested on the reverse. Small flat spots on the eagle's breast and the hair above Liberty's ear define the grade, but other details remain sharp. A pleasing example of one of the "stoppers" in the Morgan dollar collection. NGC ID# 255U, PCGS# 7226

1893-S Dollar, AU Details

4097 1893-S — Improperly Cleaned — NGC Details. AU. The borders show a trace of gold toning, but most collectors would regard the present key date dollar as brilliant. Wear is chiefly confined to the centers. The reverse is only lightly cleaned, but the obverse displays myriad vertical hairlines. The cheek displays faded reed impressions, but no other bagmarks are noticeable. NGC ID# 255U, PCGS# 7226

1894 Silver Dollar, MS63
Semikey Philadelphia Issue

4098 1894 MS63 PCGS. This is the rarest Philadelphia issue Morgan dollar, save for the proof-only 1895, and its mintage of 110,000 coins is the second-lowest of any date in the series, trailing only the 1893-S. This Select example is well-struck, with frosty luster that shows golden toning around the peripheries. A few light grazes on Liberty's cheek limit the grade. NGC ID# 255V, PCGS# 7228

1894-O Morgan Dollar, MS63
Better New Orleans Issue

4099 1894-O MS63 PCGS. In his silver dollar *Encyclopedia*, published in 1993, Bowers wrote: "In Mint State, the 1894-O is rare. In MS-65 grade only a few exist, and the issue is one of the prime landmarks in the Morgan series." This Select Uncirculated representative is highly lustrous, and only shows minor bagmarks that seem typical for the grade. Striking softness is noted on the hair detail just above Liberty's ear, and a splash of champagne toning appears on the upper-left portion of the obverse. Ex: ANA Signature (Heritage, 3/2008), lot 1146; FUN Signature (Heritage, 1/2009), lot 4732. NGC ID# 255W, PCGS# 7230

1894-O Morgan Dollar, MS64+
Condition Rarity in Finer Grades

4100 1894-O MS64+ PCGS. From a smallish mintage of 1.7 million pieces, the 1894-O Morgan dollar was not a well-produced issue. Most examples seen are weakly struck, with lackluster surfaces and excessive bagmarks. The issue surfaced in small quantities in the Treasury releases of the 1960s, but these coins were met with little interest by contemporarcollectors. AsAs a result, the 1894-O is conditionally rare in grades above the MS64 level.

This high-end Choice example displays well-detailed design elements, with just the slightest softness on the hair above the ear. Vibrant frosty mint luster radiates from both sides and only minor signs of contact are evident. Eye appeal is terrific. PCGS has graded 11 numerically finer examples (8/15). NGC ID# 255W, PCGS# 7230

1894-O Silver Dollar, MS64+
Uncommonly Attractive Luster

4101 1894-O MS64+ NGC. CAC. Were this coin a little sharper on the central high points, it might have garnered a full Gem grade. The surface quality is outstanding, illuminated by vibrant, frosty luster and showing just a blush of champagne toning.

The 1894-O is a stopper for the collector seeking eye-appealing coins for their collection. In his *Guide Book of Morgan Silver Dollars*, fourth edition, Bowers writes: "... a great deal of searching will be needed to find an example that is decent or above average (but not sharp) in striking details and with attractive luster ..." The present coin is not sharp, but the outstanding luster and clean surfaces set its eye appeal far above the "wretched appearance" of most 1894-O Morgans. Moreover, only eight coins are finer at NGC (8/15). NGC ID# 255W, PCGS# 7230

1894-S Silver Dollar, MS66
Condition Rarity, Semiprooflike Fields

- 4102 1894-S MS66 PCGS.** The Morgan dollar issues of 1894 are collectively well-known as semikeys in the series, particularly in Mint State. Of the three, the 1894-S is the most plentiful in high grade, but its availability plummets sharply above MS64 and by MS66, this San Francisco issue is a major rarity. This Premium Gem example is among the finest examples of the date that most collectors will have a chance to acquire. The surfaces are beautifully preserved and showcase semiprooflike mirroring in the fields. The motifs are well-defined and exhibit frosty luster. Sun-gold toning in varying intensity blankets each side, attesting to the originality of the surfaces. Population: 13 in 66 (1 in 66+), 2 finer (8/15). NGC ID# 255X, PCGS# 7232

1895-O Silver Dollar, AU58
Seldom Seen Finer

- 4103 1895-O AU58 PCGS.** Mint State examples of the 1895-O Morgan are out of reach for most collectors, making high-end AU coins highly sought-after by a majority of collectors. This near-Mint representative displays satiny luster with traces of light golden color around the rims. The coin barely shows any wear, as most of the weakness on the devices is the product of a deficient strike. NGC ID# 255Y, PCGS# 7236

1895-S Silver Dollar, MS63
Better San Francisco Issue

- 4104 1895-S MS63 PCGS.** Light chatter on Liberty's cheek limits the grade in the absence of distracting abrasions. This 1895-S Morgan dollar is touched by light golden toning at the edges, but remains brilliant over the interiors. Some striking softness persists on the central high points, although definition is above-average for the issue. NGC ID# 255Z, PCGS# 7238

1895-S Dollar, Brilliant MS63

- 4105 1895-S MS63 PCGS.** A lustrous Select example of this better San Francisco issue, showing modest reflectivity in the fields. The eagle's breast and the hair above Liberty's ear show mild weakness, not unusual for the issue. Light, scattered abrasions determine the grade. The 1895-S Morgan dollar had a mintage of 400,000 coins, a fairly small total in the context of the series. NGC ID# 255Z, PCGS# 7238

1895-S Silver Dollar, MS63
Semiprooflike Fields

- 4106** 1895-S MS63 PCGS. CAC. The 1895-S Morgan is a better date in Uncirculated grades, due in part to its low mintage of only 400,000 coins. This Select example shows semiprooflike fields warmed by just a touch of light golden toning. Light chatter limits the grade, but no individually bothersome abrasions occur. The strike is a trifle soft on the eagle's breast and the hair above Liberty's ear, as usual. NGC ID# 255Z, PCGS# 7238

1895-S Silver Dollar, MS64
Excellent Surface Quality

- 4107** 1895-S MS64 NGC. A few truly trivial grazes on Liberty's cheek appear to be all that limit this piece from a full Gem grade. The obverse is brilliant and satiny, while the reverse shows similarly untuned but semiprooflike luster. The eagle's breast and the hair curls in the vicinity of Liberty's ear are a touch soft, but do not hinder the eye appeal. NGC lists only 14 finer examples of this conditionally elusive San Francisco date (8/15). NGC ID# 255Z, PCGS# 7238

1895-S Morgan Dollar, MS64
Modest Field Reflectivity

- 4108** 1895-S MS64 PCGS. CAC. Untoned with shimmering luster and a light coating of cloudiness in the fields. The design features are boldly rendered, save for minor softness on the hair detail just above Liberty's ear. Shallow marks on Liberty's neck and jaw, and near her mouth, prevent an even finer grade.
Ex: Baltimore Signature (Heritage, 3/2009), lot 1476. NGC ID# 255Z, PCGS# 7238

1895-S Morgan Dollar, MS64+
Few Known Finer

- 4109** 1895-S MS64+ PCGS. CAC. Few 1895-S dollars achieve grades finer than MS64, and such coins typically command strong premiums at auction. This Plus-graded Choice example balances a degree of affordability with above-average near-Gem quality. Semiprooflike fields illuminate nearly brilliant surfaces, with hints of light gold around the outer peripheries. A few scattered ticks appear on each side when the luster is allowed to roll around each side, but these pose little distraction. A touch of weakness on the hair above Liberty's ear is not unusual for this issue. Finer coins number just 40 pieces at PCGS (8/15), including possible resubmissions. NGC ID# 255Z, PCGS# 7238

**1896-O Morgan Dollar, MS63+
Challenging Issue Any Finer**

4110 1896-O MS63+ PCGS. From a mintage of 4.9 million pieces, the 1896-O Morgan dollar is one of the most challenging issues of the series in high grade. Production values were low at the New Orleans Mint during this time frame and most of the coins were weakly struck, with insipid mint luster. In addition, most of the mintage was released into circulation near the time of issue, and few high-quality examples were saved.

The present coin is a high-end Select specimen, with unusually well-struck design elements. Just the faintest touch of softness is evident on the hair above the ear, a trouble spot on all Morgan dollar issues. The lightly toned surfaces display unusually vibrant mint luster and only a scattering of minor contact marks prevents an even higher grade. PCGS has graded 32 numerically finer examples (8/15). NGC ID# 27ZU, PCGS# 7242

**1896-S Silver Dollar, MS64
Pleasing for the Grade**

4111 1896-SMS64 PCGS. A trace of caramel-gold toning denies absolute brilliance, but this lustrous and boldly struck Choice Morgan dollar lacks the obtrusive bagmarks seen on so many examples of this better San Francisco date. The center of the mintmark is affected by contact, but the center of the cheek is smooth.
Ex: ANA Signature (Heritage, 3/2010), lot 1617. NGC ID# 2564, PCGS# 7244

**1896-S Silver Dollar, MS65
Better San Francisco Date**

- 4112 1896-S MS65 PCGS.** Ex: Gold River. The 1896-S was once considered a major key date, and much of its scarcity remains even after the Treasury releases of the 1960s. Most Uncirculated examples show light to moderate abrasions. Gem-quality pieces are scarce and finer coins are extremely rare. Bowers notes difficulty in finding coins with attractive luster, a characteristic from which this magnificent piece is far removed. Through a light golden hue, each side of this vibrant cartwheel showcases radiant mint bloom with remarkably few surface marks revealed when rotated beneath a light. The eagle's breast and the hair above Liberty's ear are a trifle soft, but the overall eye appeal is superb. Population: 76 in 65 (4 in 65+), 4 finer (8/15). NGC ID# 2564, PCGS# 7244

**1897-S Morgan Dollar, MS67
Superior for the Issue**

- 4113 1897-S MS67 PCGS.** The 1897-S Morgan dollar is rare in MS67, more so than would be suggested by the variety of coins available just one tier lower in MS66. This Superb Gem is a lovely coin. The strike is sharp throughout and both sides show frosty luster. The obverse is warmed by dappled golden toning, while the reverse shows deeper hues of lavender-gray, drab-olive, and amber. Close study with a loupe finds the underlying surfaces nearly pristine. Housed in a first-generation holder. Population: 24 in 67, 2 finer (7/15). NGC ID# 2567, PCGS# 7250

1901 Dollar, Lustrous MS62

- 4114 1901 MS62 PCGS.** Among 20th century Morgans, the 1901 is a favorite for Mint State scarcity. This example is moderately abraded, as the grade suggests, but displays satiny cartwheel luster with hints of gold toning at the rims. The eagle's breast and the hair above Liberty's ear are predictably incomplete, but the overall sharpness of the coin is pleasing. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS62
Touch of Peripheral Toning**

- 4115 1901 MS62 NGC.** Light handling marks on Liberty's cheek account for the grade of this Mint State 1901 Morgan dollar, with no major abrasions in evidence. The coin is well-struck and satiny, with pale champagne toning over the interiors and deeper amber and blue around the peripheries. Finer examples will prove challenging to locate. NGC ID# 256J, PCGS# 7272

**1903-S Silver Dollar, MS64
Heavily Melted Issue**

- 4116 1903-S MS64 PCGS.** Large S. Pleasing luster issues from both sides of this near-Gem and a well-executed strike leaves strong definition on the design features. Silver-white surfaces reveal a few minute marks that deny Gem classification. David Bowers (2006) opines that hundreds of thousands of the 1.241 million coinage were probably melted under the 1918 Pittman Act and various later melts. Housed in a green label holder.
Ex: *Dallas Signature* (Heritage, 12/2005), lot 2629; *Dallas Signature* (Heritage, 11/2006), lot 1496; *Dallas Signature* (Heritage, 1/2009), lot 1105. NGC ID# 256T, PCGS# 7288

**1903-S Dollar, Radiant MS65+
20th Century Semikey**

- 4117 1903-S MS65+ PCGS. CAC.** The 1903-S Morgan dollar boasts semikey-date status in all grades, and is one of the most sought-after 20th century issues in the series. Mint State coins are seldom seen, and then almost always in MS64 or lower grades. Gems are scarce and finer pieces are rare. Potent luster adorns both sides of this lovely MS65 example, and a well-executed strike leaves strong definition on the design elements, including the hair over Liberty's ear and the eagle's breast feathers. A few minor marks are consistent with the grade designation. There are 40 finer submissions at PCGS (8/15), of which some are likely resubmissions.
Ex: *Long Beach Signature* (Heritage, 5/2008), lot 2707. NGC ID# 256T, PCGS# 7288

**1904-S Silver Dollar, MS64
Lightly Toned**

- 4118 1904-S MS64 PCGS.** The 1904-S Morgan dollar is a slightly better 20th century issue in the finer Mint State grades. This Choice example shows satiny luster beneath a thin veil of lavender-blue, mint-green, and champagne toning, with minimal abrasions. The eagle's breast shows a touch of striking softness, but other details are sharp. NGC ID# 256W, PCGS# 7294

**1904-S Silver Dollar, MS64
Better 20th Century Issue**

- 4119 1904-S MS64 PCGS.** The 1904-S is one of the Morgan dollar keys in the 20th century date range, and is seldom seen finer than MS64. This Choice example displays satiny luster with medium gold toning overall. Slight weakness appears on the high points of the central devices, not unusual for the issue. NGC ID# 256W, PCGS# 7294

**1921 Morgan, MS65 Deep Mirror Prooflike
None Certified Finer**

- 4120 1921 MS65 Deep Mirror Prooflike NGC.** This spectacular Gem represents the final year of the Morgan dollar design, making it an important issue for type purposes. The design elements are sharply detailed throughout and the devices display rich frosty luster that contrasts boldly with the reflective fields. The surfaces are devoid of mentionable imperfections and eye appeal is terrific. Census: 6 in 65 Deep Mirror Prooflike, 0 finer (7/15). NGC ID# 256X, PCGS# 97297

PROOF MORGAN DOLLARS

**1883 Morgan Dollar, PR65
Original Toning**

- 4121 1883 PR65 NGC.** The availability of the proof 1883 Morgan dollar declines at the Gem level, and finer coins are scarce, with or without a Cameo designation. This PR65 example is boldly struck, with deeply mirrored fields and no bothersome contact marks. Both sides show original rose-gold, ocean-blue, and dusky violet toning around the margins, with lighter lavender-gold in the centers. Census: 54 in 65 (1 in 65+), 37 finer (8/15). NGC ID# 2727, PCGS# 7318

**1889 Dollar, PR66 Cameo
Impressive Tab Toning**

- 4122 1889 PR66 Cameo PCGS.** The population data is revealing when it comes to the rarity of 1889 proof dollars with Cameo contrast. The Mint struck 811 proofs in 1889, and PCGS reports a total of 235 grading events. The breakdown by designation shows 179 non-Cameo proofs, 55 Cameo proofs, and a single Deep Cameo proof. Writing in *A Guide Book of Morgan Silver Dollars*, Bowers notes that examples typically have "Medium to low cameo contrast," a claim substantiated by the figures above.

This Premium Gem Cameo proof shows a half dollar-sized area of brilliance at the central obverse and a dime-sized region at the central reverse, suggesting the coins from the proof set rested against the surfaces of this dollar for many years. Surrounding the centers on each side are shades of violet, rose, orange, and blue toning that appear especially vibrant when rotated beneath a lamp. The fields are deeply mirrored and the central relief elements lightly frosted, generating noted contrast in spite of the rich patina. Population: 7 in 66 (2 in 66+) Cameo, 3 finer (8/15). NGC ID# 272J, PCGS# 87324

1900 Morgan Dollar, PR64 Cameo
Touch of Champagne Toning

4123 1900 PR64 Cameo NGC. Although plentiful in the absolute sense, the proof 1900 Morgan dollar is seldom seen with distinct cameo contrast. This Choice example possesses a wealth of eye appeal produced by sharp, frosty devices and deeply reflective fields. Light hairlines limit the grade, but are not apparent to the unaided eye. The coin is nearly devoid of toning, save for a blush of light golden color which emerges from the peripheries. Census: 12 in 64 Cameo, 54 finer (8/15). NGC ID# 3MNH, PCGS# 87335

PEACE DOLLARS

1927 Peace Dollar, MS66
Low-Mintage Issue

4124 1927 MS66 PCGS. The 1927 Peace dollar is a better date than many novices realize. It has the second-lowest mintage in the series at just 848,000 coins, and it is among the rarest dates in the set at the Premium Gem grade level. This piece is one of only 11 MS66 coins certified by PCGS, a must-have for the competitive Registry Set collector, with none finer; the NGC population in this grade is just three coins, also with none finer (8/15). The strike is sharply impressed, and the frosty surfaces exhibit excellent preservation. A radiant cartwheel effect illuminates a blush of light golden toning. NGC ID# 257S, PCGS# 7370

**1927 Peace Dollar, MS66
Among the Finest Certified**

- 4125 1927 MS66 PCGS.** As quickly as MS65, the 1927 Peace dollar becomes scarcer than most other Philadelphia issues in the series, and by MS66, this date is a genuine rarity. Since 1993, we have offered a Premium Gem example of this issue only 12 times at auction, including several reappearances of a previously offered coin. The most recent occurrence of a PCGS example was in lot 5614 of our ANA Signature sale (8/2014), which realized \$35,250. This golden-toned example is equally as impressive in terms of technical quality, showing smooth, satiny surfaces and well-struck design elements. When studied closely with a loupe, a few trivial surface grazes appear on the high points of the motifs, but there are none out of line for the grade. With no Superb Gems known, this piece is among the finest obtainable by anyone. Population: 11 in 66, 0 finer (8/15). NGC ID# 257S, PCGS# 7370

**1928 Peace Dollar, MS65
Uncommonly Vibrant**

- 4126 1928 MS65 PCGS. CAC.** The 1928 Peace dollar stands out with a scant mintage of little more than 360,000 coins, and is considered one of the series keys in all grades. This Gem example is refreshingly vibrant and frosty to an extent that is rarely seen on this issue. The surfaces are beautifully preserved and fully brilliant, with sharply rendered design elements. PCGS lists only 15 MS66 coins finer (7/15). NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65+
Vibrant Mint Luster**

- 4127 1928 MS65+ NGC. CAC.** The 1928 is arguably the most sought-after Peace dollar issue because of its low mintage of 360,649 coins. In lower grades the date is scarce relative to the demand for it, but in this high grade the 1928 is scarce in an absolute sense. Finer examples are very rare. This Plus-designated and CAC-approved Gem is lightly toned, though the frosty surfaces maintain a strong degree of brilliance. Small marks are mostly concealed within the well-struck design elements. NGC reports just four finer examples (8/15). NGC ID# 257V, PCGS# 7373

**1934-S Peace Dollar, MS64
Frosty Mint Luster**

- 4128 1934-S MS64 PCGS.** A subtle hint of champagne toning adds to the aesthetic appeal of this delightful dollar, with its brilliant silver surfaces and soft, frosty luster. Although soft at the centers, most design elements are sharply detailed. Kept from the Gem grade level by a few insignificant marks.
Ex: FUN Signature (Heritage, 6/2008), lot 1563. NGC ID# 257Z, PCGS# 7377

PROOF EISENHOWER DOLLARS

1974-S Eisenhower Dollar, PR70 Deep Cameo Registry Set Essential

- 4129 1974-S Clad PR70 Deep Cameo PCGS.** A majestic, technically perfect example that should be a welcome addition to the finest Registry Set, this coin is fully struck, with richly frosted design elements that contrast profoundly with the deeply mirrored fields. A few hints of pale gold toning add to the incredible eye appeal. Population: 9 in 70 Deep Cameo, (7/15). NGC ID# 258V, PCGS# 97432 Base PCGS# 999137

1976-S Eisenhower Dollar, PR70 Deep Cameo Type Two Example

- 4130 1976-S Clad, Type Two, PR70 Deep Cameo PCGS.** The Type Two Bicentennial Eisenhower dollars were struck in 1976 (rather than 1975, like their Type One counterparts) and feature thinner, more delicate lettering on the reverse. This technically perfect example offers razor-sharp, frosty design elements that contrast boldly with the deeply mirrored fields. Population: 18 in 70 Deep Cameo, (7/15). NGC ID# B77T, PCGS# 97435

GOLD DOLLARS

1853 Gold Dollar, MS66 Sharp and Frosty

- 4131 1853 MS66 PCGS.** A softly lustrous Premium Gem example of one of the collector-friendly Type One Philadelphia issues. This 1853 gold dollar is razor-sharp and frosty, with original golden patina. There are no bothersome abrasions. Conditionally scarce in this grade, and rarely seen finer. Population: 39 in 66 (2 in 66+), 11 finer (8/15). NGC ID# 25BU, PCGS# 7521

1853-O Gold Dollar, MS65 Rare New Orleans Gem

- 4132 1853-O MS65 PCGS. Variety 1.** This is last readily collectible New Orleans issue of the gold dollar series, struck to the extent of 290,000 coins. The 1853-O experienced more extensive circulation than its Philadelphia counterpart, and Gem Uncirculated examples are genuinely rare. This piece is an outstanding representative, showing bold detail and satiny yellow-gold luster that is free of major abrasions. Population: 6 in 65, 3 finer (8/15). NGC ID# 25BX, PCGS# 7524

1855-C Gold Dollar, XF45 Sole Type Two Charlotte Issue

- 4133 1855-C XF45 NGC. Variety 2.** In the context of the Charlotte gold dollar series, the 1855-C is moderately available with possibly as many as 350 coins extant, but as the only Type Two date in the series from this Mint, demand is significantly higher than for many other issues. Well-struck coins are extremely rare. This Choice XF example exhibits the soft detail that can be expected when seeking an example of this issue, and clash marks are further consistent with the majority. Actual wear is only slight. This coin shows olive-gold patina with a few hints of luster revealed when tilted beneath a light. NGC ID# 25C5, PCGS# 7533

1856-S/S Gold Dollar, MS64
Sole S-Mint Type Two Issue

4134 1856-S/S FS-501 MS64 PCGS. CAC. This attractive Type Two gold dollar shows the diagnostics of Breen 6045, the Doubled S variety, discovered by Walter Breen in 1959. Nearly half of the extra S, to the upper right of the primary S mint mark, is plain. A total of 24,600 pieces were struck of this issue, which is scarce in all grades, and decidedly rare at the Mint State level. The story of the 1856-S must have been the same as all other West Coast gold and silver struck in the early years of the San Francisco Mint: modest mintages, heavy usage in the channels of commerce, and few pieces set aside in high grades.

The present example is beautifully toned in two shades of pumpkin-orange, with accents of pale blue on the obverse. The surfaces are slightly reflective, as sometimes seen with this issue. The design elements are generally well struck, though the hair at Liberty's head is a touch soft. A couple of heavy die cracks show on the obverse, indicating a late die state. In fact, this is probably the terminal state for this obverse die. A few small, trivial marks are observed in the fields, specifically in front of Liberty's coronet, but these do not detract in the least from the overall eye appeal of this gorgeous specimen. The 1856-S is remarkably scarce in the better grades of Uncirculated. Our auction records shows that this is only the ninth time Heritage has offered an example in MS64 condition, with the other appearances in 2005 (2), 2006 (2), 2008 (1), 2013 (1), and 2015 (2). We believe these citations represent only three or four different coins. Population: 3 in 64, 0 finer (7/15).

Ex: Rod Sweet Collection; Palm Beach Signature (Heritage, 3/2005), lot 6813; Summer FUN Signature (Heritage, 6/2008), lot 1777. NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536

1883 Gold Dollar, MS67+
CAC-Endorsed Type Coin

- 4135 1883 MS67+ PCGS. CAC.** The availability of this date defies its small 10,800-coin mintage, much to the delight of type collectors seeking a Superb Gem. This Plus-graded example is bold throughout the relief elements, displaying satiny straw-gold luster and unabraded surfaces. PCGS has seen 12 finer submissions (8/15). NGC ID# 25DM, PCGS# 7584

1886 Gold Dollar, MS67
Among the Finest Certified

- 4136 1886 MS67 NGC.** By 1886 the gold dollar was on its way out, yet the few examples produced each year were treasured by-and-large. This Superb Gem is proof thereof, its yellow-gold surfaces shimmering and unmarred by post-striking abrasion. A few small copper alloy spots are noted on both sides, more obviously the reverse. Census: 15 in 67, 0 finer (8/15). NGC ID# 7HS8, PCGS# 7587

EARLY QUARTER EAGLES

1798 Quarter Eagle, AU50
BD-2, Five Berries Reverse

- 4137 1798 Five Berries, BD-2, R.5, AU50 PCGS.** Bass-Dannreuther Die State a. Even with only 45 to 55 examples believed extant, BD-2 is the more available of the two 1798 quarter eagle varieties. Two different obverse dies were used, but the varieties are most easily distinguished by their reverses: BD-1 shows four berries on the olive branch, BD-2 five. The BD-2 reverse was later employed for dime coinage, namely the JR-4 1798 and JR-1 1800 varieties. The exact mintage of the BD-2 quarter eagle variety is unknown, but at its greatest estimate, the total coinage was barely more than 800 pieces; the mintage for both varieties combined was only 1,094 coins.

This About Uncirculated survivor is evenly struck with complete dentils around each side. Central detail is a trifle soft, a combination of brief circulation and mint-made planchet adjustment with remnants of file marks still visible in the central reverse. Bright yellow-gold surfaces show deeper orange overtones on the high points of the devices. NGC ID# 25F5, PCGS# 45505 Base PCGS# 7649

1805 Quarter Eagle, BD-1, XF45
Remarkable Color and Eye Appeal

4138 1805 BD-1, R.4, XF45 ANACS. Bass-Dannreuther Die State b/a. This is a simply incredible coin, particularly in the view of a collector seeking an original, “crusty” Draped Bust type coin. Immediately apparent are vivid, uniform hues of bronzed orange which deepen to vivid violet and plum around the design elements. The high points of the motifs show medium honey-gold color. There are no bothersome abrasions and the overall eye appeal is incredible. The Choice XF grade is fully deserved in regards to detail remaining. The coin is evenly struck, with a few faint adjustment marks appearing briefly over the high points of the shield and clouds.

BD-1 is the only die variety for the 1805 quarter eagle, and it is scarce in all grades; likely only 100 to 150 examples survive, many of which have been cleaned or exhibit unsightly surface imperfections. This magnificent coin is a true rarity for its quality and eye appeal.

Ex: Central States Signature (Heritage, 4/2008), lot 3239.

From The Stephen A. Walling Collection. NGC ID# BFVV, PCGS# 45511 Base PCGS# 7653

1807 BD-1 Quarter Eagle, XF45
Outstanding Capped Bust Right Type Coin

4139 1807 BD-1, R.3, XF45 PCGS. Bass-Dannreuther Die State a/a. The 1807 quarter eagle issue is represented by a single die variety, with a survival of as many as 350 coins, per John Dannreuther. This is one of the most plentiful varieties in the Capped Bust Right type, a favorite for type purposes. This piece is in the usual early die state, with the uncracked obverse. The strike is evenly executed and wear is minimal. Significant detail remains in Liberty's hair curls and the eagle's feathers. Minor weakness on the vertical shield lines is due more to strike than circulation. The surfaces are free of adjustment marks and show primarily olive-gold coloration, with a few coppery-orange overtones in the peripheral recesses. NGC ID# BFVY, PCGS# 45514 Base PCGS# 7656

1821 Quarter Eagle, BD-1, AU50
Early Gold Rarity

- 4140** 1821 BD-1, R.5, AU50 NGC. Bass-Dannreuther Die State a/a. This attractive example displays a substantial degree of semiprooflike mirroring in the fields. The design features are well-struck for the issue, but with typical slight weakness noted on some of the obverse stars and on the eagle's leg feathers and talons, as well as on the vertical shield lines. Lime-gold coloration is imbued on the highpoints of each side with alluring accents of peach and rose. This was the first production of quarter eagles since 1808, and the mintage of 6,448 pieces was the highest for the new Capped Head to Left type (produced irregularly through 1834). However, survivors from this issue are rare, with an estimated 50 to 60 coins extant, per Dannreuther. Census: 3 in 50, 14 finer (8/15). Ex: FUN Signature (Heritage, 1/2008), lot 3070; FUN Signature (Heritage, 6/2008), lot 1796. From The Stephen A. Walling Collection. PCGS# 45516 Base PCGS# 7662

1831 Quarter Eagle, BD-1, MS62
Single Die Pair for the Year

- 4141** 1831 BD-1, R.4, MS62 PCGS. Bass-Dannreuther die state uncertain but likely c/c, shortly after the lapping to remove clash marks. A one-die-pair year that is very scarce regardless of condition, the 1831 quarter eagle poses a significant challenge to the *Guide Book* collector as well as the early gold specialist. This MS62 representative is pleasing for the date with surprisingly reflective sun-yellow surfaces that show traces of orange and overlying patina. Excellent detail, especially on the reverse, with generous all-around eye appeal. Population: 6 in 62, 24 finer (8/15). Ex: Palm Beach Signature (Heritage, 11/2004), lot 8088. NGC ID# BFWA, PCGS# 45525 Base PCGS# 7671

CLASSIC QUARTER EAGLES

1836 Quarter Eagle, MS63
Variety 11, Script 8, Late Die State

- 4142** 1836 Script 8, Breen-6143, Variety 11, R.2, MS63 NGC. This piece is in a late die state, showing the obverse crack through star 6 advanced well into the portrait and split, with one branch extending to the dentils between stars 12 and 13 and the other crossing Liberty's jaw. The reverse is peripherally cracked through STATES OF. As a type coin, this 1836 quarter eagle is frosty with yellow-gold luster and a few scattered abrasions. The highest hair curl of Liberty and the center of the reverse shield show slight weakness, as usual. Census: 53 in 63, 18 finer (8/15). NGC ID# 25FU, PCGS# 7694

1839-O Quarter Eagle, MS64
Variety 28, Close Fraction
Inaugural New Orleans Gold Issue

- 4143** 1839-O Low Date, Close Fraction, Breen-6153, Variety 28, R.4, MS64 NGC. The 1839-O quarter eagle is the first gold issue from the New Orleans Mint, and it is the only Classic Head issue in the entire New Orleans gold series, including half eagles. A mintage of 17,781 pieces was accomplished and a few hundred examples survive today throughout all grades. It is in Mint State that this issue becomes something of a rarity, and most such pieces are moderately abraded. Southern gold authority Doug Winter writes of this issue: "It becomes quite rare in MS63 ... In MS64 and above, the 1839-O is very rare." The certified population figures reflect the scarcity of Choice and finer coins, with NGC listing just six pieces in MS64 and one Gem finer (8/15).

This example is exceptionally sharp in the centers, and the only peripheral softness occurs on uppermost obverse stars which are only a trifle soft. Each side displays satiny yellow-gold luster and is free of bothersome abrasions. The reverse is rotated about 180 degrees, as is often seen with this die pairing. NGC ID# 25G7, PCGS# 7701

LIBERTY QUARTER EAGLES

1840-D Quarter Eagle, AU55
Far Finer Than Typically Seen
Late-State Dies

- 4144 1840-D AU55 NGC. Variety 1-A. Late die state. The mintmark leans left, and numerous die cracks show on the reverse, including through the mintmark and fraction bar, the rim to the second T in STATES, and between AM to the right eagle's wing. The obverse shows a rim-to-rim die crack bisecting the profile of Liberty from about 4 to 10 o'clock. The wheat-gold surfaces deepen around the rims to amber and reddish-orange patina. Light circulation wear and minimal marks for the grade, along with a decent strike, single out this piece as far finer than the typical example from the mintage of 3,532 coins. The 1840-D is the first Liberty Head issue from the Dahlonega Mint, and quite popular as such. NGC and PCGS combined reports only three grading events in Mint State, although those may not be all separate coins. Census: 10 in 55 (1 in 55+★), 6 finer (8/15). NGC ID# 54TT, PCGS# 7719

1842-D Quarter Eagle, Near-Mint
Early Low Mintage Dahlonega Issue

- 4145 1842-D AU58 NGC. Variety 3-F. A well struck Borderline Uncirculated example of this rare Dahlonega issue. Only 4,643 pieces were coined, and most remained in commerce until the Civil War. The microgranular almond-gold surfaces are essentially unabraded. A middle die state with little evidence of a repunched date, although the curve of an 8 is faintly visible beneath the left border of the prominent 8. Most Dahlonega coins have indifferent strikes or exhibit abrasions, which makes the present piece a superior candidate to represent the facility. Census: 9 in 58, 4 finer (8/15). NGC ID# 25GJ, PCGS# 7725

1851-C Two and a Half, MS61
Rare Uncirculated Example

- 4146** 1851-C MS61 NGC. **Variety 1.** The 1851-C quarter eagle is a scarce coin in all grades, with likely only 160 to 210 examples known. This Mint State coin is a major condition rarity. The eagle shows slight weakness, mostly on its left (facing) leg, but the obverse is well-defined. Each side shows bright yellow-gold luster with the appropriate abrasions for the grade. Census: 7 in 61 (1 in 61+), 5 finer (8/15). NGC ID# 25HM, PCGS# 7760

1855-C Two and a Half, Sharp AU58

- 4147** 1855-C AU58 NGC. **Variety 1,** the sole dies used to produce the 3,677 pieces reported struck of this quarter eagle issue. The average certified piece is about midway between AU50 and Choice AU, but this near-Mint State example is considerably finer yet. Attractive yellow-gold surfaces boast fulsome luster and show few marks, merely light signs of high-point wear but no mentionable distractions. A small mark between S and T in STATES on the reverse is a pedigree marker but unbothersome. The strike is a tad better than usually seen on this strike-challenged issue. Census: 16 in 58 (1 in 58+), 16 finer (8/15). NGC ID# 25J5, PCGS# 7775

1859-D Quarter Eagle, High-End MS60

- 4148** 1859-D MS60 NGC. **Variety 22-N,** the sole die marriage used for this last quarter eagle issue from the Dahlonega Mint, struck to the extent of 2,244 pieces. The surfaces on this piece are really quite lively and attractive for the grade, a reflective orange-gold throughout with thin, minor marks in the obverse field and on the portrait of Liberty that account for the grade — but a coin that nevertheless seems high-end. The strike is blunt on some of the hair details, the eagle's legs, and the dentils on the reverse from 9 to 12 o'clock.

Although this issue is more readily available in Mint State than might be surmised, this piece is one of a couple dozen separate pieces that have successfully crossed the divide between Almost Uncirculated and Uncirculated. NGC ID# 25JM, PCGS# 7789

1860-C Quarter Eagle, AU58
Attractively Original Patina

- 4149 1860-C AU58 PCGS. Variety 1.** The 1860-C quarter eagle had a small 7,469-coin mintage. Doug Winter estimates only 155 to 205 examples survive in all grades, and writes that "There are very few ... remaining that have not been cleaned or dipped." The present near-Mint example is a delightfully original coin with orange-gold luster and trivial evidence of wear over the well-struck design elements. Pieces this well-preserved are major rarities and command strong premiums among knowledgeable buyers. Population: 3 in 58, 4 finer (8/15). NGC ID# 25JT, PCGS# 7792

1879 Two and a Half, MS66
Lovely, Frosty Luster

- 4150 1879 MS66 PCGS.** A glowing rose-gold example with lilac and peach hues throughout. The strike is razor-sharp and the frosty luster is devoid of mentionable abrasions. Eye appeal is outstanding. The 1879 quarter eagle is available in Mint State grades through MS63, but it becomes scarce at the Choice level. This Premium Gem is a great rarity. Population: 8 in 66 (3 in 66+), 1 finer (8/15). NGC ID# 25L2, PCGS# 7830

PROOF LIBERTY QUARTER EAGLE

1891 Quarter Eagle, PR64 Ultra Cameo

- 4151 1891 PR64 Ultra Cameo NGC.** Splendid reddish-orange devices on jet-black fields are the hallmark of this remarkably contrasted 1891 near-Gem proof quarter eagle, a top-notch survivor from the mintage of 80 pieces. Even the circulation strikes of this date, like many of the series and era, saw low productions, 10,960 pieces in the case of the 1891 (quite an underrated date in higher grades itself). Only about 40%-50% of the proof mintage survives today, and this piece is certainly among the nicer examples we have seen in recent years. A few tiny contact marks determine the grade, but they are largely in the obverse fields, away from the focal points and totally undistracting. Census: 3 in 64 Ultra Cameo, 13 finer (8/15). NGC ID# 288E, PCGS# 97917
-

INDIAN QUARTER EAGLES

1909 Indian Two and a Half, MS65+ Sharp and Frosty

- 4152** 1909 MS65+ PCGS. CAC. Close study with a loupe and a lamp is needed to discern a few faint grazes which separate this outstanding type coin from a Premium Gem grade. The Plus designation will have to suffice to draw attention to beautiful, frosty luster and razor-sharp detail. This wheat-gold coin appears mint-fresh, with only 18 pieces finer at PCGS (8/15). NGC ID# 288Z, PCGS# 7940

1911-D Two and a Half, AU55 Old Green Label Holder, Gold CAC

- 4153** 1911-D AU55 PCGS. Gold CAC. Strong D. Even for the Choice AU grade level, this 1911-D quarter eagle is high-end, and thus the CAC gold label. The coin's residence in an old green label holder furthers its appeal and the perception of its quality. Upon close study with a loupe, the strike and mintmark are bold and the surfaces show still-lustrous orange-gold patina. Trivial high-point friction does not soften the detail. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS62 Appealing Strong D Coin

- 4154** 1911-D Strong D MS62 PCGS. A pleasing Strong D example, delivering the sharpness of Mint State details and the affordability of the MS62 grade without the heavy abrasions that are expected for this level. Only light chatter in the fields — undetected by the naked eye — precludes a finer designation. This coin shows honey-gold luster with a few deeper coppery overtones here and there. NGC ID# 7KR7, PCGS# 7943

1928 Quarter Eagle, MS66 Important Condition Rarity

- 4155** 1928 MS66 PCGS. Although a plentiful issue from a mintage of 416,000 pieces, the 1928 is an important condition rarity that is rarely encountered above MS64. This Premium Gem is tied for the finest that PCGS or NGC have certified. Combined, the two services have seen only 29 Premium Gem submissions, possibly including a small quantity of crackouts. Both sides of this beauty display brilliant, frosty yellow-gold luster with a few trivial copper spots, and some coppery-orange toning at the upper left reverse. Only a few widely scattered, trivial marks are present. Population: 11 in 66, 0 finer (8/15). NGC ID# 289E, PCGS# 7952

THREE DOLLAR GOLD PIECES

1859 Three Dollar Gold, MS64
Better Early Date in This Popular Series

4156 1859 MS64 PCGS. Surviving 1859 three dollar gold pieces are well distributed throughout the grading spectrum, from Fine to MS67. Better grade Uncirculated pieces are somewhat elusive. They may also be weakly struck on the 8 and 5 of the date and on the wreath bow. This near-Gem is well-defined in these areas, as well as on the remaining design elements. Glowing luster adorns yellow-gold surfaces that are accented with wisps of orange and light green. Light die striations are evident in the fields, indicating an earlier strike, and both sides are well-preserved.

Ex: *Long Beach Signature* (Heritage, 5-6/2007), lot 2281. NGC ID# 7K5K, PCGS# 7979

1861 Gold Three Dollar, Sharp MS64
Rarely Seen So Fine

4157 1861 MS64 PCGS. In their *Encyclopedia* (2008), Garrett and Guth write of the 1861 three dollar gold piece: "Mint State examples are ... rare, with a small cluster around the MS-62 to MS-64 grades." The certified population data confirms that this assessment remains true today, and the frequency of auction appearances supports the consensus. This Choice example is high-end for the issue, a conditional rarity. Its eye appeal is characterized by rich straw-gold luster with a suggestion of semiprooflike reflectivity in the fields, as well as the razor-sharp strike which is most impressive on the wreath bow. A few stray lines in the fields are the chief grade-limiting factor, as no individually significant abrasions occur. An appealing example of this popular wartime issue. Population: 10 in 64, 3 finer (8/15). NGC ID# 7K5N, PCGS# 7982

1874 Three Dollar Gold, MS65
Ideal Type Coin

- 4158 1874 MS65 PCGS.** From a mintage of 41,800 pieces, the 1874 three dollar gold piece is an available issue in most grades and a popular choice with type collectors. The issue is very rare in MS65 condition, however, and finer coins are virtually unobtainable. This delightful Gem exhibits well-detailed design elements, with just a touch of softness on the ribbon knot. The well-preserved yellow-gold surfaces radiate vibrant, satiny mint luster on both sides and show a few hints of green and rose at certain angles. Eye appeal is terrific. Population: 14 in 65, 3 finer (8/15). NGC ID# 7KDE, PCGS# 7998

1877 Three Dollar Gold, AU58
Rare Issue in High Grade

- 4159 1877 AU58 PCGS.** The 1877 three dollar gold is a key issue in the Indian Princess series, even rarer than its meager mintage of 1,468 pieces for circulation would indicate. The financial downturn that began in the United States in 1873 was, by 1877, exacerbated by a great strike nationwide among railroad workers and an ensuing collapse of the lumber market. Unemployment had been widespread for years, and the economic gloom deepened. Many of the people who might otherwise have been able to afford to squirrel away a nice current-year three dollar gold piece appear not to have done so. David Bowers, in his reference to the series, estimates that no more than 60 to 100 circulated coins are known.

This 1877 three dollar gold is one of nine submissions in this grade at PCGS, which shows 11 finer (8/15). The average certified survivor is AU55. This near-Mint State PCGS-certified representative shows top-notch eye appeal via its generous luster on surfaces ranging from orange-gold to yellow-gold. The minor circulation appears as a thinning of the luster in the fields rather than as notable contact marks. High-point wear is perceptible but slight. A nicer example would be difficult to find. Housed in a green label holder.

Ex: October Sale (Superior, 10/1990), lot 2047, envelope accompanies the lot. NGC ID# 25MY, PCGS# 7999

**1878 Three Dollar Gold, MS64
Shimmering Luster**

- 4160 1878 MS64 PCGS.** A wonderfully appealing representative of this popular type issue, well-defined with strong, swirling luster that graces wonderfully preserved fields. If not for a pair of small ticks on the portrait, this lovely near-Gem could lay claim to an even finer grade. Though the 1878 three dollar gold is available for a price in Mint State grades, attractive examples can prove elusive. Ex: *Central States Signature* (Heritage, 4/2008), lot 3392. From *The Stephen A. Walling Collection*. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS64+
Attractive Obverse Patina**

- 4161 1878 MS64+ PCGS. CAC.** Iridescent lime-green and rose-red toning visits the portrait and obverse field; unusual color for a Federal gold coin. The remainder of the coin is apricot-gold. Lustrous and carefully preserved with a good strike and pleasing eye appeal. The reverse has a wire rim between 11 and 3 o'clock. The reverse is lightly die doubled, apparent on the right border of the wreath near 1:30. NGC ID# 25MZ, PCGS# 8000

**1880 Three Dollar Gold, MS63 Prooflike
Stark Field-Motif Contrast**

- 4162 1880 MS63 Prooflike NGC.** With a mintage of only 1,000 pieces, there are many 1880 three dollar golds with reflective fields, but NGC has certified just 11 examples as Prooflike, including three pieces in this grade and five MS64 examples finer (8/15). This piece is boldly struck, with bright yellow-gold luster and modest cameo contrast. Light, scattered ticks limit the grade. NGC ID# 25N3, PCGS# 78002

**1886 Three Dollar, Well-Defined MS61
Mintage 1,000 Business Strikes**

- 4163 1886 MS61 PCGS.** Yellow-gold surfaces are semireflective, not uncommon for an issue of just 1,000 business strikes, with a streak of orange at the upper left obverse. Generally well-defined and pleasing despite a number of fine abrasions that combine to account for the grade. Population: 13 in 61, 39 finer (8/15). NGC ID# 25N9, PCGS# 8008

PROOF THREE DOLLAR GOLD PIECES

1876 Three Dollar Gold, PR60 Rarity Proof-Only Date

4164 1876 PR60 PCGS. The 1876 three dollar gold piece is a rare proof-only issue. Mint records show a mintage of only 45 coins, but it is believed that a small number of additional proofs were struck at a later date and were unrecorded. Most survival estimates suggest 35 to 45 examples of this issue are extant, a higher total than would be expected for an issue with 45 coins struck. Three pieces are in the Smithsonian Institution (two coins) and the ANS (one coin).

This is among the more affordable examples of the issue that are not affected by cleaning or other impairments. This coin is essentially problem-free, but scattered hairlines in the mirrored fields limit the grade. The strike is sharp throughout. Modest field-motif contrast is present amid the deep orange-gold patina. Housed in an old green label holder. Population: 2 in 60, 26 finer (8/15). NGC ID# 28AJ, PCGS# 8040

1886 Gold Three Dollar, PR65 Deep Cameo High-End Proof Rarity

4165 1886 PR65 Deep Cameo PCGS. Coinage of the proof 1886 three dollar gold piece amounted to 142 pieces, but as few as 75 coins are thought to survive. The combined PCGS and NGC certified population of 159 pieces — more than were struck — is highly inflated by resubmissions. Two of the known examples are in museum collections. Privately owned coins are rarely seen in Gem condition, and Deep Cameos are extremely elusive at this level. The present piece is only the second individual Deep Cameo Gem we have ever offered. The previous coin garnered \$38,187.50 in its most recent appearance as lot 4498 in our Central States Signature sale (4/2013). This piece is comparable in quality, with glowing orange-gold surfaces and boldly struck design elements. Cameo contrast is stark and a scattering of mint-made grease spots on the reverse serves as a useful pedigree identifier. Population: 7 in 65 (1 in 65+) Deep Cameo, 4 finer (8/15). NGC ID# 38LY, PCGS# 98050

EARLY HALF EAGLES

1795 Small Eagle Five Dollar, AU55 Rare BD-4 Die Marriage

- 4166 1795 Small Eagle, BD-4, R.5, AU55 NGC.** Bass-Dannreuther Die State d/a. The BD-4 obverse is shared with two other Bass-Dannreuther varieties, namely BD-2 and BD-3, on which it saw earlier use. Thus the earliest die state is die state c, the state of the latest BD-3. In this slightly later die state a crack runs from the rim through star 12 and slightly into the field, but star 1 just barely touches the lowest curl; later in this die state lapping separates the two. (Bass-Dannreuther note that, since this is the last use of this obverse, some pieces [which may have been melted hundreds of years ago] should exist in the terminal die state, presumably showing shattering of the die.)

The reverse of this die marriage, BD Reverse C, is unique to this variety and can be easily distinguished but because there are only three berries on the small wreath that the eagle holds in its beak — two outside and one inside.

It is estimated that just 60 to 75 examples of this variety exist, making the present coin an attractive potential acquisition for the variety or type collector. The charming surfaces of this Choice AU example show lovely orange-gold coloration, with a few minor surface ticks consistent with the grade. A small patch of adjustment marks appears from above stars 14 and 15 to below the tip of the bust. Much luster remains, and the overall impression is one of high quality, despite some striking softness on the eagle's head and neck that is usual for the variety.

Ex: Long Beach Signature (Heritage, 9/2008), lot 3574, which realized \$43,125; Long Beach Signature (Heritage, 2/2009), lot 2657; Los Angeles Signature (Heritage, 8/2009), lot 1247.

From The Stephen A. Walling Collection. NGC ID# 25ND, PCGS# 519853 Base PCGS# 8066

1803/2 Half Eagle, BD-1, AU Details Popular Gold Overdate

- 4167 1803/2 BD-1, R.4 — Tooled — PCGS Genuine Secure. AU Details.** Bass-Dannreuther Die State b/c. All 1803-dated half eagles were struck from unused overdated dies from 1802. The BD-1 variety is recognized by the imperfect T in LIBERTY and the star pointing to the upper beak on the reverse. This sharply detailed, lightly worn example offers bright orange-gold surfaces that show some evidence of tooling in the fields. Some light planchet adjustment marks are evident on the arrows. NGC ID# 25NY, PCGS# 504948 Base PCGS# 8084

1803/2 Half Eagle, BD-1, AU55 Sharp and Lustrous

- 4168 1803/2 BD-1, R.4, AU55 PCGS.** Bass-Dannreuther Die State b/c. Four die varieties of 1803-dated half eagles are known, and all are 1803/2 overdates. BD-1, -2, and -3 share a common obverse, while BD-4 employs a new head die. Based on past Heritage auction appearances, BD-4 appears to be the most available variety, with BD-3 close behind. This partly lustrous BD-1 representative shows light wear on the portrait, but there are no mentionable marks, and the strike is sharp aside from the eagle's left (facing) claw.
Ex: Long Beach Signature (Heritage, 2/2007), lot 4500.
From The Stephen A. Walling Collection. NGC ID# 25NY, PCGS# 504948 Base PCGS# 8084

**1808 Half Eagle, BD-4, MS64
Uncommon Quality**

- 4169 1808 Wide 5D, BD-4, High R.3, MS64 PCGS.** Bass-Dannreuther Die State c/a, obverse clashed, reverse perfect. BD-4 is readily identified by the wide spacing of 5D. on the reverse. This piece is in the usual early die state; a rare late die state shows heavy clash marks on the reverse. This tail die is later used for the single 1809 variety, an overdate. This obverse die was previously employed for the BD-3 1808 die marriage.

This BD-4 representative is sharply struck and impressively preserved. Few examples of this date regardless of variety achieve such a high numeric level. Since 1993, we have previously offered an MS64 example of this issue only 11 times. The most recent such occurrence was in lot 3351 of our 2013 Summer FUN sale, where a PCGS coin realized \$39,950. This piece is every bit as eye-appealing, awash in frosty yellow-gold luster. Light adjustment marks along the upper-right obverse rim are present in the absence of complete dentils. Population (all varieties included): 18 in 64 (1 in 64+), 3 finer (8/15). NGC ID# 25PA, PCGS# 507605 Base PCGS# 8102

**1809/8 Half Eagle, BD-1, AU58
Sharp and Lustrous**

- 4170 1809/8 BD-1, High R.3, AU58 PCGS.** Bass-Dannreuther Die State c/c. The diagnostic cracks of this believed terminal die state — from star 1 to the bust and the rim to the second S in STATES — are faint, but present. This is the only die variety for the 1809 half eagle, employing the reverse used for the BD-4 1808 issue. This piece shows barely perceptible friction on the upper edge of the eagle's left (facing) wing and on the highest points of Liberty's drapery, while the fields retain significant yellow-gold luster. The coin is well-struck, without adjustment marks or bothersome abrasions. NGC ID# BFXK, PCGS# 507603 Base PCGS# 8104

**1811 Half Eagle, Lustrous AU58
BD-2, Small 5**

- 4171 1811 Small 5, BD-2, R.3, AU58 NGC.** Bass-Dannreuther Die State d/a. BD-2 is slightly more available than BD-1, but neither die pairing is particularly plentiful. The two varieties are distinguished by their reverses, primarily the size of the 5 in 5D. Sharp design details and remarkable green and orange-gold color are hallmarks of this example. A few faint scratches and other insignificant imperfections are visible, as expected for the grade. Ex: ANA Signature (Heritage, 8/2007), lot 1907. From The Stephen A. Walling Collection. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

1813 Half Eagle, BD-1, AU55
Well-Detailed Type Coin

- 4172** 1813 BD-1, R.2, AU55 PCGS. Bass-Dannreuther Die State b/b, clashed. A common obverse was paired with two different tail dies for coinage of the 1813 half eagle. Of the two varieties, BD-1 is by far the more often seen and is a favorite for type purposes. This is a bright, partially lustrous Choice AU example with fewer bag marks than usual and showing portions of rich reddish-golden patina overall. An attractive first-year representative of this very elusive type. Ex: Dr. Douglas Roane Collection (Heritage, 9/2003), lot 7919; FUN Signature (Heritage, 6/2008), lot 1974. From The Stephen A. Walling Collection. NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

CLASSIC HALF EAGLE

1835 Classic Head Five, MS63+
McCloskey 1-A, Frosty Luster

- 4173** 1835 First Head, Breen-6504, McCloskey 1-A, R.2, MS63+ PCGS. The 1834 Plain 4 is the typically encountered issue in the Classic Head half eagle series. By comparison, the 1835 is several times scarcer in terms of survival and also by frequency of auction appearances. Uncirculated 1835 coins are seldom offered, and rarely in MS63 or better condition. The finest known is a single MS65 Prooflike NGC coin. The Smithsonian Institution contains four examples, the best of which grades MS64, per Garrett and Guth. This Plus-designated Select example is especially attractive, showing frosty green-gold luster that exhibits remarkably few abrasions for the grade. A sharp strike defines the eagle and obverse stars, with just a hint of softness on the hair curl above Liberty's ear. Population: 13 in 63 (2 in 63+), 11 finer (8/15). NGC ID# 25RV, PCGS# 8173

LIBERTY HALF EAGLES

1841-C Half Eagle, AU55
Popular Early Branch Mint Issue

- 4174 1841-C AU55 NGC. Variety 1.** Like most early series Charlotte half eagles, the 1841-C is seldom encountered in high grade condition. This attractive Choice AU specimen shows just a touch of wear on the well-detailed design elements and the pleasing yellow and rose-gold surfaces are lightly abraded. Census: 14 in 55, 20 finer (7/15). NGC ID# 25SP, PCGS# 8203

1845 Half Eagle, Attractive MS63
Rare This Fine

- 4175 1845 MS63 PCGS. CAC.** The 1845 is one of the few half eagles from the 1840s that can be acquired in Mint State without breaking the bank, not to make it sound more plentiful than it is; this issue is scarce in Uncirculated condition and pieces grading MS63 or finer are rare. This coin is fully struck. There are no immediately obvious abrasions, only some light lines in the fields that are noticed with a loupe. This coin shows honey-gold luster with attractive coppery-orange and violet overtones throughout. Population: 8 in 63, 8 finer (8/15). NGC ID# 25TB, PCGS# 8223

1846 Large Date Five Dollar, MS63
Semiprooflike with Original Luster

- 4176 1846 Large Date MS63 NGC. CAC.** The Large Date 1846 half eagle is more plentiful than its Small Date counterpart, but the difference is of little consequence in light of the fact that the Philadelphia issue as a whole is rarely seen in Mint State. This Select Uncirculated representative is among the finer-known examples of the 1846 half eagle. The strike is bold throughout, despite heavy cracking and clash marks on the reverse. The fields show semiprooflike mirroring and the surfaces are aglow with warm honey and copper-gold hues. Light, scattered abrasions pose little distraction and are not out of line for the grade. This lovely coin is CAC-endorsed in a prior generation holder. Census (both varieties included): 10 in 63, 6 finer (7/15). NGC ID# 25TF, PCGS# 8226

1855-S Half Eagle, AU58
Underrated in High Grade

- 4177 1855-S AU58 NGC.** The 1855-S half eagle is scarcer than might be expected, and is about on par with the Charlotte and Dahlonega issues of this year. High-end AU coins are rarely seen, and Mint State pieces are almost uncollectible. This Borderline Uncirculated coin shows bold detail with hints of orange-gold luster in the protected regions of the fields. A few abrasions on Liberty's cheek are the only surface flaws of note. Census: 16 in 58, 3 finer (7/15). NGC ID# 25UU, PCGS# 8265

1858-S Half Eagle, AU53
Scarce and Underappreciated

- 4178 1858-S AU53 PCGS.** We feel this San Francisco issue is somewhat underrated, particularly when compared to the Dahlonega and Charlotte fives of the same year. The 1858-S is scarcer than both of the Southern issues by a significant margin, with likely fewer than 100 coins extant in all grades. This AU representative displays well-detailed design elements with hints of luster remaining in the protected regions of the fields. A small nick in the rim below the date is the only mark of note. Population: 3 in 53, 11 finer (7/15). NGC ID# 4GUK, PCGS# 8279

1878 Half Eagle, MS65
Just Two Examples Certified Finer

- 4179 1878 MS65 PCGS.** A frosty and brilliant example, among the finest certified and rare as such. The design features are boldly and deeply defined including the obverse stars, all of which show their radials. The eagle's plumage and claw details are also sharp. Despite a fairly generous mintage of 131,740 pieces, David Akers, a pioneer in the study of 19th-century gold rarities, writes that the 1878 is "moderately scarce in strictly Uncirculated condition" and that "Gems . . . are seldom seen." This testimony is borne out by the population data for the issue which shows that MS65 examples rank as important condition rarities. Population: 4 in 65, 2 finer (7/15). NGC ID# 25X4, PCGS# 8345
-

1881/0 Half Eagle, MS64
High-End for the Variety

- 4180 1881/0 FS-301 MS64 NGC. The date numerals on this *Guide Book* variety are clearly punched over a previous 1880 date. The right loop of the earlier 0 is seen along the right side of the second 1, and the other three numerals are clearly recut north. This Choice example is sharply detailed, with satiny golden luster and minimal abrasions. Few examples of this variety are certified in Mint State, and pieces as fine as this Choice example are rare. NGC ID# 25XD, PCGS# 145714 Base PCGS# 8355

1895 Half Eagle, Frosty MS66
Conditionally Rare

- 4181 1895 MS66 NGC. The availability of the 1895 half eagle plummets at the Gem grade level; MS66 coins are decidedly rare and anything finer is almost unobtainable. This Premium Gem example displays rich, frosty luster in honey-gold hues with sharp design elements and outstanding preservation. Census: 8 in 66, 4 finer (8/15). NGC ID# 25YH, PCGS# 8390

PROOF LIBERTY HALF EAGLES

1875 Half Eagle, PR64 Cameo
Premier Series Rarity
Only Nine Proofs Believed Known in Private Hands

4182 1875 PR64 Cameo NGC. The 1875 half eagle is one of the classic gold rarities of the 19th century. The Philadelphia Mint struck only a token quantity of 200 circulation strikes that year, along with a paltry 20 proofs. Of the regular issue, fewer than 10 coins are believed to survive, and of the proof issue, only a dozen specimens are known to us, including two pieces in the Smithsonian Institution and a third in the ANS; neither museum collection contains an example of the circulation issue.

An extensive study of auction records and known private sales produces pedigrees for what we believe to be just nine different proofs still in private collections, including the present coin. We have been unable to record specific provenance for this coin prior to its current appearance, although it likely traces its origin to one or more of the auctions listed below under Additional Appearances. Since 1993, our auction archives show previous offerings of only three of these proofs, while the more actively traded circulation issue has appeared in our auctions six times during the same period. Although the circulation issue is more highly heralded, its proof counterpart is equally as rare on the market, and as can be seen by the current coin, usually possesses significantly higher aesthetic merit.

This proof is characterized by deep, gleaming mirrors and softly frosted motifs. A lack of complete definition on the arrow fletchings and the eagle's neck is characteristic of the proof issue, although this coin is otherwise razor-sharp. Rich honey-gold surfaces have a few trivial hairlines, as allowed by the grade, but lack any significant marks. Eye appeal is exceptional. This Choice proof Cameo will be a hallmark addition to a high-end Liberty half eagle collection.

Roster of Proof 1875 Half Eagles

Note: Plate matching is extremely difficult with this issue, as most examples show few pedigree markers and catalog images often lack explicit detail. We would not be surprised to learn some duplication is present in the roster below. It seems likely that some of these coins were included in the collections of "Colonel" Green and Virgil Brand at some time, but we have no specific documentation on that subject.

- 1. PR66 Cameo NGC.** Byron Reed; City of Omaha; Durham Western Heritage Museum; Byron Reed Collection (Spink-Christie's 10/1996), lot 174; Morrison-Licht Collections (Stack's, 3/2005), lot 1968; 70th Anniversary Sale (Stack's, 10/2005), lot 1246; possibly Baltimore Auction (Stack's Bowers, 11/2010), lot 5042, realized \$143,750. Note: NGC no longer lists any coin graded PR66 Cameo in its Census (4/15).
- 2. PR65 Ultra Cameo NGC.** Dallas and Newport Beach Sale (Heritage, 6/1987), lot 4432; Ed Trompeter; Heritage Auctions, circa 1998; private collection; ANA Signature (Heritage, 8/2015).
- 3. PR65 Cameo PCGS.** FUN Signature (Heritage, 1/1999), Lot 8145; Richard Genaitis Collection (Heritage, 8/2001), lot 7849; FUN Signature (Heritage, 1/2014), lot 5462, realized \$176,250.
- 4. PR64 Cameo NGC. The present coin.**
- 5. PR64 Cameo PCGS.** Rarities Sale (Bowers and Merena, 7/2002), lot 816.
- 6. PR64 PCGS.** Heman Ely, part of a complete gold proof set; W. Elliot Woodward; purchased by T. Harrison Garrett in 1883; Robert Garrett; John Work Garrett; Johns Hopkins University; Garrett Collection (Stack's, 3/1976), lot 454; Auction '90 (David Akers, 8/1990), lot 1776; Wes Rasmussen Collection (Superior, 2/1998), lot 3416; Pre-Long Beach Sale (Superior, 5/1999), lot 3538; Pre-Long Beach Sale (Superior, 9/2005), lot 1873.
- 7. PR64 PCGS.** Mumford-Kalbfleisch-Hayden Collections (New York Coin & Stamp, 4/1896), lot 543; John M. Clapp; John H. Clapp; Clapp Estate; purchased by Louis E. Eliasberg, Sr. in 1942, via Stack's; United States Gold Coin Collection (Bowers and Ruddy, 10/1982), lot 536; Dennis Mendelson Collection (Superior, 2/1991), lot 2804; Chicago Sale (Superior, 8/1991), lot 722.
- 8. PR64 PCGS.** Rarities Sale (Bowers and Merena, 7/1997), lot 369; Long Beach Signature (Heritage, 5/2001), lot 9039.
- 9. PR64.** King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 256; Abe Kosoff; Harold Bareford Collection (Stack's, 12/1978), lot 189; Auction '89 (David Akers, 7/1989), lot 1394.
- 10. PR64 Deep Cameo, per Garrett and Guth.** National Numismatic Collection at the Smithsonian Institution.
- 11. Proof.** R.C.H. Brock; J.P. Morgan; American Numismatic Society.
- 12. PR60, polished, per Garrett and Guth.** National Numismatic Collection at the Smithsonian Institution.

Additional Appearances

- A. Proof.** Lorin G. Parmelee Collection (New York Coin & Stamp, 6/1890), lot 1397, part of a complete minor, silver, and gold proof set split between four lots in the catalog.
- B. Proof.** Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 426, part of a complete gold proof set.
- C. Proof.** Major William B. Wetmore Collection (S.H. & H. Chapman, 6/1906), lot 158, part of a complete gold proof set; William Forrester Dunham Collection (B. Max Mehl, 6/1941), lot 2153.

- G. Proof.** William Cutler Atwater Collection (B. Max Mehl, 6/1946), lot 1696.
- H. Proof, impaired.** H.R. Lee Collection (Stack's, 10/1947), lot 1298.
- I. Proof.** Adolphe Menjou Collection (Numismatic Gallery, 6/1950), lot 1520. NGC ID# 28CC, PCGS# 88470

1880 Five Dollar, PR64+ ★ Cameo
Great Eye Appeal, Seldom Offered

4183 1880 PR64+ ★ Cameo NGC. The Cameo and Star designation on this coin are unquestioned, as the eye appeal is excellent and the field-device contrast verges on an Ultra Cameo designation. The grade might be as high as PR66 were the strike fuller on Liberty's forelock trailing down her neck, as well as the curls at her brow, with other small detractors in the form of scattered tiny — minor — toning flecks, and a small planchet indent near star 1. Elsewhere, rich auburn-gold surfaces show a slight orange-peel effect and overall top-notch appeal and collectibility. Die lapping has created the effect of Liberty with an open mouth, a small void showing between her lips. The reverse is nicer overall, despite showing a touch of strike softness on the fletchings. Only 36 examples were reportedly struck of this issue, and far fewer survive today. This issue is seldom offered in any grade. Census: 1 in 64 Cameo (1 in 64+★ Cameo), 5 finer (8/15). NGC ID# 3Z2T, PCGS# 88475

1905 Half Eagle, PR66 Cameo
Few Proofs Known So Fine

4184 1905 PR66 Cameo PCGS. The proof 1905 half eagle had a fairly low mintage for the period (108 coins), many of which have not survived. The PCGS population report estimates 75 to 100 examples are extant in all grades, but this number seems generous in light the fact that only 79 pieces have been encapsulated by the two leading services in all grades (8/15), including an unknown number of resubmissions. Most of the certified population is lacking in noticeable field-motif contrast, and Cameo examples represent only about 34 percent of the certified population. Overall, our archives show previous sales of only 17 coins in the past 20 years, the majority of which grade just PR64 or lower, with several impaired. That figure also includes reappearances of previously offered coins, so the auction rate of individual specimens is even lower. The Smithsonian Institution contains two pieces, neither of which grade finer than PR64, per Jeff Garrett and Ron Guth. Another example is out of collectors' hands in the American Numismatic Society.

This Premium Gem Cameo is among the finer-known examples of this 20th century proof. Both sides display deep honey-gold color and fully mirrored fields. The strike is sharp, and the satiny devices provide just enough contrast to warrant the appropriate designation from PCGS. No marks or bothersome hairlines are present, delivering incredible eye appeal. An important opportunity to acquire a high-end example of this elusive 20th century proof. Population: 2 in 66 Cameo, 1 finer (8/15). NGC ID# 3YDP, PCGS# 88500

INDIAN HALF EAGLES

1909-S Five Dollar, MS62
Deep Original Color

- 4185 1909-S MS62 PCGS.** The 1909-S Indian half eagle is one of the series' more elusive issues in Mint State, particularly finer than the MS62 level. This piece is sharply struck and beautifully toned in deep orange-gold and lilac hues. A few light abrasions in the fields and on the Indian's cheek limit the grade, but none are singularly bothersome. PCGS lists 48 finer submissions (7/15). NGC ID# 25ZL, PCGS# 8516

1911-S Half Eagle, MS63
Seldom Seen Finer

- 4186 1911-S MS63 PCGS.** As students of the Indian half eagle series well know, the MS63 grade level is about as fine as the 1911-S is typically seen. Finer coins exist in MS64 and a few in Gem or better condition, but these are rare. The budget-conscious collector will appreciate the quality which this Select example offers. The lower headdress feathers are a trifle soft, but the overall sharpness is excellent. Frosty green-gold surfaces reveal remarkably few noticeable abrasions. PCGS has seen 32 finer examples (8/15). NGC ID# 25ZM, PCGS# 8522

1911-S Half Eagle, MS63
Rarely Encountered Finer

- 4187 1911-S MS63 PCGS. CAC.** With a mintage of more than 1.4 million coins, the 1911-S Indian five is hardly a key date in the context of the series, but pieces grading finer than MS63 are surprisingly rare. This Select example shows relatively smooth surfaces with satiny bronze-gold luster. Slight weakness occurs on the lower headdress feathers, but the overall sharpness of the motifs is satisfactory. PCGS records 32 finer representatives (8/15). NGC ID# 25ZM, PCGS# 8522

EARLY EAGLES

1795 Eagle, BD-1, AU Details
Important First-Year Gold Issue

- 4188 1795 13 Leaves, BD-1, High R.3 — Holed — NGC Details. AU.** Bass-Dannreuther Die State a/a. Eagles were produced for the first time in 1795 and the BD-1 variety (star 11 near Y, leaf almost touches U) was probably the first die marriage struck. This lightly circulated specimen is from an early state of the dies and the design elements are strongly impressed, with just a trace of wear on the high points. The antique-gold surfaces are lightly abraded and the overall presentation is quite pleasing. The small hole at star 10 is the only problem noted.

**1799 Capped Bust Right Eagle, AU58
Very Rare BD-4 Variety**

- 4189** 1799 Small Obverse Stars, BD-4, R.7, AU58 NGC. Bass-Dannreuther Die State b/c. The 1799 Capped Bust Right eagle claims a mintage of 37,449 pieces, with 10 die varieties known for the date. This coin represents the very rare BD-4 variety, with star 9 touching Y in LIBERTY and star 13 away from the bust. On the reverse, a star point is inside the eagle's beak and O in OF is centered over the right part of a cloud. The surviving population of this issue numbers no more than 8-12 examples in all grades and the BD-4 probably accounted for 500-1,000 pieces of the reported mintage for the year. This was the first of three uses for the obverse die, which was later used to strike the BD-5 and BD-6 varieties of the date. The reverse die failed during this usage, after previously being used to strike the first three varieties of 1799.

The present coin is an impressive near-Mint example, with sharply detailed central devices and just a touch of softness on some of the stars. The bright greenish-gold surfaces show few signs of contact, with a small dig in the left obverse field the most useful pedigree marker. Prooflike reflectivity is evident in sheltered areas. We expect intense competition from series specialists when this lot is called. PCGS# 45727 Base PCGS# 98562

**1799 Irregular Date Eagle, BD-7
Appealing AU Sharpness Coin**

- 4190** 1799 Small Obverse Stars, Irregular Date, BD-7, R.3 — Reverse Damage — NGC Details. AU. Bass-Dannreuther Die State b/c, showing some crumbling and small rim cuds at the rim above and below star 1. The crazily canted, high 7 and high last 9 nearly touching the bust underside aid in attributing the obverse, as do the star 12 away from the beak and star 13 away from the ribbon on the reverse. Although the caveat "Reverse Damage" may put some collectors off, this is still a coin with lots of vivacious appeal on orange-gold surfaces with light to moderate wear. The reverse is stippled in extensive but minor ticks marks from an unknown source, duly noted but not terribly distracting. NGC ID# 2624, PCGS# 45730 Base PCGS# 98562

1799 Small Obverse Stars Eagle, MS63
BD-7, Irregular Date Variety

4191 1799 Small Obverse Stars, BD-7, R.3, MS63 PCGS. Bass-Dannreuther Die State f/d. This late die state shows a crack from star 1 through star 8, one from the rim through the E in LIBERTY to the forecurl, another through IBERTY and the right stars, and a short crumbling crack between star 12 and the rim. Variety BD-7 is attributed by an irregular date with 17 slanted dramatically to the right, the eagle's beak away from the star, and star 13 on the reverse away from the ribbon. Varieties BD-7 and BD-8 share a common obverse die (Obverse 5). Curiously, the die was initially employed to strike BD-7 coins with Reverse C, then paired with Reverse D to manufacture BD-8 eagles, and subsequently re-paired with Reverse C to produce additional BD-7 representatives. This particular late die state example was struck after the BD-8 coins.

The *Early U.S. Gold Coin Varieties* reference estimates that 10,000 to 15,000 BD-7 ten dollar gold coins were included in the 37,449-coin mintage of 1799. John Dannreuther adds that this die marriage "is the most available eagle up to this point and also one of the most available varieties of all early eagles. Only BD-10 of this year and BD-2 of 1801 are seen more often." Still, there are only about 250 to 300 examples extant in all grades, with this Select representative undoubtedly among the finest survivors.

Frosty luster shimmers over warm green and honey-gold surfaces. The stars are fully brought up, and Liberty's portrait is equally well-defined with a bit of softness over the ear. The wing feathers and shield lines are sharply detailed, while the clouds exhibit moderate strike incompleteness. Light ticks are scattered over each side, but the overall preservation of this phenomenal 18th century gold eagle is nothing short of impressive. Population for the variety: 1 in 63, 1 finer (8/15). NGC ID# 2624, PCGS# 45730 Base PCGS# 98562

1801 Ten Dollar, Choice XF
BD-2, Rare Perfect Die State

4192 1801 BD-2, R.2, XF45 PCGS. The rare early die state *without* a row of vertical die lines embedded in Liberty's cap. The die state is omitted from the standard Bass-Dannreuther reference. The die lines on the cap were caused by damage to the obverse die, similar to the 1804 "Spiked Chin" half cent. The present piece was struck before that damage occurred. Certified in a first generation holder, this Heraldic Eagle ten shows light wear on the curls, cap, and bust truncation, but nonetheless appears sharper than the designated grade. Luster fills protected areas, the strike is crisp, and relevant abrasions are confined to a few light hair-thin marks on the upper right obverse field. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1801 Eagle, BD-2, AU50
Well-Detailed Type Coin

4193 1801 BD-2, R.2, AU50 PCGS. Bass-Dannreuther Die State b/l. The 1801 BD-2 is the most plentiful of early eagles produced from 1797 to 1804. Star 8 has two points oriented toward Liberty's cap, and the eagle's beak nearly touches star 13 at its top. The two lowest left stars on the obverse are softly struck on this piece. This example shows still-lustrous canary-gold centers that deepen to amber-gold near the peripheries. A bit of highpoint rub is visible as a color change on the cheek and elevated strands of the hair, and a bit of light field chatter is consistent with the grade. A small dig is noted through the I in LIBERTY. An excellent choice for a type coin.
Ex: FUN Signature (Heritage, 1/2007), lot 3622; Central States Signature (Heritage, 5/2007), lot 2332.
From The Stephen A. Walling Collection. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

LIBERTY EAGLES

1839/8 Eagle, Type of 1838, AU58
Two-Year Design Type

- 4194** 1839/8 Large Letters AU58 NGC. The Liberty Head eagles by Christian Gobrecht debuted in 1838 with the new design carried over to some 1839-dated pieces. The 1839-dated pieces showing the 1838-style head are also called Large Letters, while the later pieces are called Type of 1840 or Small Letters. In point of fact, though, the size difference in the letters is minuscule; the Type of 1840 is actually an entirely different type that shows many variations from the Type of 1838. Chief among them are the mostly covered ear on the Type of 1838 — it is uncovered on the Type of 1840 — and a much sharper rear bust truncation that is over star 13 on the Type of 1838. As expected, this piece shows just a touch of high-point rub on Liberty's cheek and the reverse devices. Generous mint luster remains over rich reddish-gold surfaces with lots of eye appeal. A few scattered ticks are consistent with a short spell in circulation. Census: 25 in 58, 15 finer (8/15). NGC ID# 54XF, PCGS# 8576

1839 Liberty Eagle, AU50
Scarcer Type of 1840

- 4195** 1839 Type of 1840, Small Letters AU50 NGC. The design of the Liberty eagle was modified in 1839, with the new motif showing a slightly different hair style and less pronounced curvature in the bust truncation. This style remained largely unchanged until the Liberty design was retired in 1907. With only 12,447 examples minted, the new Type of 1840 is much more elusive than its Type of 1838 counterpart, especially in high grade.

This attractive AU specimen shows just a touch of high-point wear on the well-detailed design elements and the lightly abraded orange-gold surfaces display a few hints of rose. Census: 3 in 50, 19 finer (8/15). NGC ID# 54XJ, PCGS# 8580

**1844 Ten Dollar, AU55
Tied for Finest at PCGS**

- 4196 1844 AU55 PCGS.** Only 6,361 gold eagles were struck in 1844. This low mintage gives one a good indication of its rarity, but it is only part of the reason so few high-grade examples are known today. During hard economic times leading into the 1840s, gold coins were generally not set aside for numismatic purposes, and most were heavily circulated. The 1844 eagle survives to the extent of likely only 50 to 75 coins in all grades. Only a couple of coins are known in Mint condition and AU pieces are of the greatest rarity and importance. This piece shows bright green-gold surfaces with a slight overlay of reddish patina. This piece also has planchet depressions that radiate outward from Liberty and approach stars 2 and 12. An angling mark below the eagle's beak is noteworthy for pedigree purposes. Population: 4 in 55, 0 finer (8/15). NGC ID# 262S, PCGS# 8590

**1850 Liberty Eagle, MS60
Popular Large Date Variety**

- 4197 1850 Large Date MS60 PCGS.** Although the 1850 Liberty eagle with a Large Date is more available than its Small Date counterpart, examples in Mint State condition are still quite rare. This attractive MS60 specimen offers well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. Housed in a green label holder. Population: 1 in 60, 11 finer (7/15). NGC ID# 2637, PCGS# 8603

**1855 Ten Dollar, MS62
Rare in Mint State**

- 4198 1855 MS62 PCGS.** This satiny Mint State coin shows minimal abrasions for the grade, with soft yellow-gold luster setting each side aglow. A few of the lower stars show incomplete centrils, but the main devices are bold. The 1855 is one of the more plentiful ten dollar gold issues from this period, but Mint State examples are nonetheless rare in all grades. Population: 6 in 62, 5 finer (7/15). NGC ID# 263L, PCGS# 8616

**1862 Ten Dollar, AU50
None in Mint State at PCGS**

- 4199 1862 AU50 PCGS.** Bright yellow-gold surfaces show mild abrasions which are consistent with the grade, but retain some semiprooflike mirroring in the protected regions of the fields. Wear is slight, and most details are clear. This issue had a low mintage of 10,960 coins, few of which survive in AU or Mint State. Population: 12 in 50, 44 finer (8/15). NGC ID# 2649, PCGS# 8635

**1893-CC Ten Dollar, AU55
Final Carson City Eagle**

4200 1893-CC AU55 NGC. Variety 1. Any degree of availability for this issue ceases to exist at the Mint State level, making Choice AU coins such as this piece high on many collectors' want lists. This representative shows excellent detail with honey-gold patina. Tinges of luster remain in the protected regions of the fields. NGC ID# 2672, PCGS# 8726

**1903-S Eagle, MS66+
Swirling Mint Frost**

4201 1903-S MS66+ PCGS. CAC. The production of ten dollar gold coins reached 530,000 pieces at the San Francisco Mint in 1903. Although not as plentiful as the 1901 or 1901-S, the 1903-S remains one of the most collectible Liberty Head eagles in high grades. This marvelous, fully struck Premium Gem has rightfully been recognized by both PCGS and CAC for its technical and aesthetic quality. Swirling mint frost combines with light peach-gold color over each side. A couple of light grazes and microscopic ticks preclude a Superb Gem assessment, and two tiny copper alloy spots occur on the reverse. Rarely seen so well-preserved and nearly unobtainable any finer. Population: 20 in 66 (2 in 66+), 3 finer (8/15). NGC ID# 267X, PCGS# 8754

**1905 Ten Dollar, Radiant MS67
Among the Finest Known**

4202 1905 MS67 NGC. The 1905 eagle is available for the collector who seeks it, but the vast majority of Mint State examples reside in the MS63 and lower range. The certified population drops significantly in MS64, and Gem or finer pieces are genuinely rare. This is also illustrated by the coins in the National Numismatic Collection — in a sampling of five different pieces, the finest grade just MS63, per Garrett and Guth.

This is a magnificent Superb Gem and one of the finest examples known. The most recent appearance of an MS67 coin in our auctions was lot 4982 in our 2012 FUN Signature sale where it realized \$54,625. This NGC coin showcases intense, mint-fresh luster rolling over pristine surfaces and needle-sharp design elements. A true dazzler that catches the eye from a distance. Census: 7 in 67, 0 finer (8/15). NGC ID# 7LD3, PCGS# 8757

PROOF LIBERTY EAGLE

1905 Ten Dollar, PR63 Cameo
Rarely Seen in Proof Format

- 4203 1905 PR63 Cameo PCGS. CAC.** The 1905 is one of the scarcer proof eagle issues of the 20th century. Only 86 pieces were struck, and it is unlikely that more than 60 coins survive today in all grades, including two pieces in the Smithsonian Institution. The combined PCGS and NGC certified population of 65 coins is likely inflated by resubmissions. Field-device contrast is usually lacking on this issue, and Cameo examples are notably rare in all grades. This Select representative displays fully struck, frosty devices, with deep mirroring in the fields. The surfaces are largely yellow-gold, although a couple reddish alloy spots appear along the lower reverse rim. Light, scattered hairlines limit the grade, but are not obvious to the unaided eye. Population: 1 in 63 Cameo, 6 finer (7/15). NGC ID# 28GC, PCGS# 88845

INDIAN EAGLES

1907 No Periods Ten, MS66
No Motto Type Coin

- 4204 1907 No Periods MS66 NGC.** The majority of the No Motto Indian eagle type is represented by the 1907 No Periods issue. However, with availability comes immense demand from type collectors which fuels prices beyond what might be expected. As a result, Superb Gems are out of reach for most collectors. This Premium Gem example is a more affordable option for the Indian gold enthusiast seeking high quality without breaking the bank. The surfaces are devoid of bothersome abrasions and exhibit satiny orange-gold luster. There is trivial incompleteness on the hair over Liberty's ear, but the eagle's plumage is sharply defined. NGC lists only 31 Superb Gems finer (8/15). NGC ID# 28GF, PCGS# 8852

1911 Ten Dollar, MS65
Elusive in Finer Grades

- 4205 1911 MS65 PCGS. CAC.** A radiant straw-gold coin, CAC-endorsed in Gem condition, with smooth luster and sharp design elements. The 1911 Indian eagle is a plentiful issue through MS64, but its availability plummets at the Gem grade level. Pieces grading finer than the current example are seldom seen, with just 33 certified at PCGS (8/15). NGC ID# 28GT, PCGS# 8868

**1911 Ten Dollar, MS66
Conditionally Elusive**

- 4206 1911 MS66 PCGS.** The 1911 is a plentiful issue in the Indian eagle series, particularly when one considers the scarcity of its branch mint counterparts, both of which are recognized semikey dates. The Philadelphia issue is the ideal coin for date representation and is also suitable for general type purposes. Yet, the collector seeking a high-grade example will encounter a challenge. The 1911 is a scarce issue in Gem condition, and MS66 coins are rare by comparison. This frosty wheat-gold representative displays a bold strike and unabraded surfaces. Dashes of lilac and rose appear in the central regions, further boosting the eye appeal. Population: 24 in 66 (2 in 66+), 9 finer (8/15). NGC ID# 28GT, PCGS# 8868

**1913 Ten Dollar, MS65
Frosty, Well-Preserved Luster**

- 4207 1913 MS65 NGC.** In the context of the Indian eagle series, the 1913 is an available date, but seldom is a Gem example offered. This piece displays bold design elements illuminated by frosty yellow-gold luster that shows hints of rose and peach throughout. A loupe reveals are few trivial marks on the cheek, these being all that preclude an even finer grade from NGC. Just 17 Premium Gems are finer at that service (8/15). NGC ID# 28GY, PCGS# 8873

**1915-S Indian Eagle, MS62
Low-Mintage San Francisco Issue**

- 4208 1915-S MS62 PCGS.** The 1915-S Indian ten is one of the semikey dates of the series in Mint State, coming from a limited mintage of only 59,000 coins. This piece is well-struck and displays satiny honey-gold luster. There are no major abrasions, and we instead note just minor chatter in the exposed regions that limits the grade. NGC ID# 28H6, PCGS# 8879

1920-S Indian Eagle, MS62
Key Series Rarity
Especially Elusive in High Grade

4209 1920-S MS62 NGC. The 1920-S Indian eagle is one of the rarest issues in the series in absolute terms and high grade examples are particularly elusive. The recorded mintage was a reasonable 126,500 pieces but the survival rate was quite low, especially in grades above the MS62 level. No ten dollar gold coins had been struck in the previous three years, so there may have been some pent-up demand for eagles by 1920. As a result, a significant number of coins must have been released into circulation at the time of issue and the 1920-S is seen more often in circulated grades than Mint State today. Like many gold issues of the 1920s, the great majority of the coins were melted after the Gold Recall of 1933 and few have been found in foreign holdings over the years.

The elusive nature of the 1920-S was recognized at an early date and catalogers in the late 1940s mentioned its rarity whenever an example was offered. In lot 717 of the Charles W. Green Collection catalog, in the section on San Francisco eagles, B. Max Mehl described a coin that must have been similar to the piece offered here:

“1920 Originally purchased as uncirculated, and I believe that the coin has never been in circulation, but it has minute nicks on the obverse which are, undoubtedly, due to having been handled with other coins. These very slight defects are mentioned for the sake of accuracy, but hardly affect the appearance of the coin as they are hardly noticeable. The second rarest \$10.00 gold piece of this Mint. Record \$250.00 and certainly worth it. I bespeak for this coin a very bright future. Some day it will be rated among our real rarities.”

The lot realized a new record of \$265, validating Mehl's expectations for the coin. Currently, the record price realized for the 1920-S is a staggering \$1.75 million brought by the magnificent MS67 PCGS specimen from the Duckor Collection (Heritage, 3/2007), lot 2134.

This attractive MS62 example exhibits a better-than-average strike, but some softness shows on Liberty's hair, TY in LIBERTY, and the eagle's wing, areas that are always softly impressed on this issue. Some slight die bulging shows at the date. The bright yellow-gold surfaces radiate vibrant mint luster, with a minimum number of minor contact marks for the grade. Eye appeal is far above average for this rare issue. Census: 5 in 62, 14 finer (7/15). NGC ID# 28H8, PCGS# 8881

LIBERTY DOUBLE EAGLES

1850-O Double Eagle, VF25
Problem-Free Collector Coin

- 4210 1850-O VF25 PCGS. Variety 1.** This is a collector-grade example of the first-year double eagle from the New Orleans Mint, showing even wear and medium olive-gold patina. With a mintage of 141,000 coins, the 1850-O is one of the few twenty dollar pieces in the O-mint series that is marginally available overall, and is popular as a type coin. NGC ID# 268G, PCGS# 8903

1850-O Double Eagle, VF30
Collectible New Orleans Example

- 4211 1850-O VF30 PCGS. Variety 3.** The mintmark touches the tailfeathers and is lightly repunched inside the top loop. Only a handful of New Orleans Type One double eagles can be classified as collectible, and this introductory issue is one of them (141,000 coins struck). Each side offers orange-gold surfaces with uniform friction from time spent in the channels of commerce. The stars still show full centers, however, and the only flaw of note is a diagonal mark on Liberty's chin. NGC ID# 268G, PCGS# 8903

1852-O Double Eagle, AU50
O-Mint Type Coin

- 4212 1852-O AU50 NGC. Variety 1.** The 1852-O is the last readily obtainable double eagle from the New Orleans Mint. Although the San Francisco Mint did not take over large scale production until 1854, double eagle coinage at the Louisiana branch amounted to only 71,000 pieces in 1853, and that issue is significantly scarcer overall than the 1852-O, which was struck to the tune of 190,000 coins.

The 1852-O, however, is not a common coin, and the appeal of O-mint double eagles drives strong demand. Marginal numbers of the date are spread throughout the AU range, but with Mint State coins rare, these are usually the finest obtainable by the average collector. This About Uncirculated representative will please many enthusiasts. The design elements show little wear and the surfaces retain the medium yellow-gold hue of the California ore. The surfaces are smooth and hints of luster remain in the reverse fields. NGC ID# 268L, PCGS# 8907

**1854 Double Eagle, AU53
Scarce Large Date Variety**

- 4213 1854 Large Date AU53 PCGS.** The Large Date is significantly scarcer than its Small Date counterpart. All examples were struck from the same obverse die, distinguished by a lump on Liberty's lower neck near the shoulder curl. 1854 appears to be a year of Mint date logotype experimentation, since the 1854-O ten also has Large and Small Date varieties. This issue is rare in Mint State and scarce in circulated grades. Pleasing AU coins are the finest that are typically offered. The present wheat-gold example displays moderate wear but the legends and motifs retain some luster. A lens reveals occasional, unimportant abrasions. Population: 7 in 53, 25 finer (8/15). NGC ID# 268S, PCGS# 98911

**1855 Double Eagle, AU58
Conditionally Scarce**

- 4214 1855 AU58 NGC. CAC.** Few collectors pursued circulation issue double eagles until decades after their issue, by which time few examples of this Philadelphia issue were extant in high grade. About Uncirculated coins are scarce at the finer levels and Mint State pieces are rarely seen. This Borderline Uncirculated coin shows excellent detail and warm honey-gold patina. Tinges of luster remain in the protected areas of the fields. Census: 69 in 58 (1 in 58+), 17 finer (7/15). NGC ID# 268V, PCGS# 8914

**1856-S Double Eagle, AU58
Exemplary Quality**

- 4215 1856-S AU58 PCGS Secure. CAC.** Ex: Chicago Classics. From a glance, this glowing orange-gold 1856-S double eagle appears Mint State, although a loupe reveals trivial friction over the high points of the eagle and Liberty's hair curls. The strike is boldly executed and the highly lustrous surfaces are refreshingly smooth. Most of the high-grade 1856-S twenties known today originated from the S.S. *Central America* salvage, which yielded more than 1,000 coins. Population: 51 in 58, 49 finer (7/15). NGC ID# 2692, PCGS# 8919

1857-S Double Eagle, MS65
Blazing S.S. Central America Coin

1857-S Spiked Shield Twenty, Splendid MS65
With CAC Approval

4216 1857-S MS65 PCGS. CAC. Variety 20B. Ex: S.S. Central America, SSCA 1668. Bold S. The S.S. Central America yielded more than 5,000 1857-S double eagles, many in Mint State. This one cache is the origin of the vast majority of high-end Uncirculated examples of this issue. The salvaged coins possess an added aspect of collector appeal as historical relics of the most famous shipwreck in American numismatics, and command far more demand than such a high surviving population would otherwise generate. This Gem example is a beautifully preserved S.S. Central America survivor. The surfaces display intense, frosty luster with deep orange-gold peripheral hues that brighten to rose-gold in the centers. A couple small grazes on Liberty's cheek are insignificant. A truly incredible coin with razor-sharp detail, preserved for more than a century on the bottom of the ocean. NGC ID# 2696, PCGS# 8922

4217 1857-S MS65 PCGS. CAC. Variety 20A. Ex: S.S. Central America. SSCA 2732. Even though the popular Spiked Shield Central America double eagle variety is the most common one recovered among the thousands of 1857-S twenties aboard the doomed ship, the Gem grade is seldom bettered even in regard to this variety. The number of coins at the next-higher grade level, MS66, at PCGS is less than one-quarter of the number of Gems (8/15). CAC has stickered 90 in this grade and 37 finer. This piece shows a "typical" (meaning "splendid" in this context) appearance for a Gem of this issue, blazing luster on well-struck surfaces that are honey-gold around the rims and showing somewhat lighter color in the interiors. Simply a great coin, an assessment with which CAC agrees. NGC ID# 2696, PCGS# 8922

**1857-S Liberty Double Eagle, MS65+
Ideal for Type Purposes**

4218 1857-S MS65+ PCGS. CAC. The 1857-S Liberty double eagle claims a substantial mintage of 970,500 pieces. Like most Type One double eagles, the 1857-S was virtually unknown in Mint State grades before the recent salvage of period shipwrecks, beginning in the 1980s. More than 5,000 examples of the 1857-S were recovered from the wreck of the S.S. *Central America*, making it the most available Type One double eagle in high grade in today's market.

It is not possible to attribute this coin to the S.S. *Central America* definitively, but this piece shows the high technical quality and outstanding eye appeal that has come to be associated with that treasure. The impeccably preserved peach-gold surfaces display vibrant mint luster on both sides and the design elements are sharply detailed throughout. The 1857-S is mentioned among the *100 Greatest U.S. Coins*. Population: 48 in 65 (6 in 65+), 5 finer (8/15). NGC ID# 2696, PCGS# 8922

**1860 Twenty Dollar, MS61
Frosty Mint Luster**

4219 1860 MS61 NGC. This 1860 double eagle is scarce in Mint State, and becomes rare in MS62 or better condition. This MS61 coin is unusually appealing for the grade and might have garnered an MS62 assessment were it not for a couple small abrasions on Liberty's cheek. The surfaces exhibit frosty yellow-gold luster and the strike is boldly rendered. Census: 28 in 61, 18 finer (7/15). NGC ID# 269D, PCGS# 8929

**1860-O Double Eagle, XF Details
Scarce New Orleans Issue**

4220 1860-O — Cleaning — PCGS Genuine. XF Details. Variety 2. After the opening of the San Francisco Mint in 1854, gold deposits in New Orleans declined. As a result, double eagle production slid to a paltry levels; in 1860, only 6,600 twenty dollar gold pieces were struck. This date is scarce in all grades and only a single Mint State piece, heavily abraded, is known. This lightly circulated example shows bright yellow-gold surfaces with few obvious abrasions. Wear is minimal and the left-hand obverse stars show the only mentionable weakness, where it is slight. Some semiprooflike reflectivity remains in the protected fields around the reverse periphery. NGC ID# 269E, PCGS# 8930

**1861 Twenty Dollar, MS61
Ex: S.S. Republic**

4221 1861 MS61 NGC. Ex: S.S. Republic. The S.S. *Republic*, a sidewheel steamship first launched in 1853, sank following a hurricane on October 25, 1865. It was en route to New Orleans to deliver approximately \$400,000 in gold coin to rejuvenate the economy of the key Southern port city. The NGC Census (8/15) shows 348 1861 twenties pedigreed to the shipwreck, principally in AU58 to MS62 grades. The present sun-gold example is lustrous and well struck with scattered minor marks on both sides. From The Stephen A. Walling Collection. NGC ID# 269G, PCGS# 8932

1861-S Double Eagle, AU55
Lustrous Orange-Gold Patina

4222 1861-S AU55 PCGS. Unlike its Philadelphia counterpart, the 1861-S double eagle is rare in Mint State. This Choice AU example offers a slightly more affordable option to the budget-conscious collector while maintaining strong detail and areas of original luster. Light, scattered abrasions are as expected for the grade. NGC ID# 269K, PCGS# 8935

1864-S Double Eagle, AU58
Ex: S.S. Republic

4224 1864-S AU58 NGC. Ex: *S.S. Republic*. This bright, yellow-gold shipwreck coin displays significant luster for an AU grade, with surfaces that are better preserved than is often encountered on coins pedigreed to the *S.S. Republic*. The strike is sharp and trivial high-point friction is all that precludes a Mint State designation. NGC ID# 269T, PCGS# 8942

1863 Liberty Twenty, AU58
Lustrous and Colorful

4223 1863 AU58 NGC. The Philadelphia Mint in 1863 struck low totals of every denomination; due to the raging Civil War, hoarding of all coins was the order of the day, and large mintages would have been pointless. The 1863 double eagles saw a production of 142,790 coins, most of which nonetheless did circulate to some extent — our guess would be in the West, which operated by its own rules and kept its own counsel. The average certified survivor of the issue is a tad better than AU50, and only three dozen were recovered aboard the *S.S. Republic*, which sank in 1865. The golden-orange surfaces of this attractive near-Mint piece show generous luster and a light overlay of field chatter and scattered small marks that constitute the grade. Census: 36 in 58, 23 finer (8/15). NGC ID# 269P, PCGS# 8939

1865 Double Eagle, MS61
Better-Date Philadelphia Issue

4225 1865 MS61 PCGS. CAC. Although the 1865 Philadelphia twenty is not especially rare, its lower mintage distinguishes this issue from its San Francisco counterpart. Production of double eagles in San Francisco generally outpaced the Philadelphia Mint as western gold flowed to the more-convenient California facility. Original luster glows from the cheek and hair braids of this Uncirculated double eagle, and the obverse surfaces around the stars are smooth and frosty. The reverse is notably abrasion-free for the grade level, and the yellow-gold color is consistent throughout. Population: 11 in 61, 29 finer (8/15). NGC ID# 269U, PCGS# 8943

1865-S Twenty Dollar, MS65
Ex: *Brother Jonathan*

4226 1865-S MS65 PCGS. Ex: *Brother Jonathan*. The paddle steamer, *Brother Jonathan*, sank in July 1865 off the coast of California. Beginning in the mid-1990s, salvage efforts began recovering the vast amounts of gold that had been in the hold when the ship went down. Among the findings were more than 500 1865-S double eagles, mostly fresh from the San Francisco Mint. These account for a significant majority of the high-grade coins known today of this issue. However, Gems remain scarce, and finer pieces are rare. The present coin displays the thick, matte-like luster that is characteristic of the shipwreck coins, with deep orange-gold hues swirling in varying shades over each side. The strike is sharp and close study with a loupe fails to reveal any objectionable abrasions. Population: 22 in 65, 2 finer (8/15). NGC ID# 269V, PCGS# 8944

1870-S Double Eagle, MS61
Scarcely Saved S-Mint Issue

4227 1870-S MS61 PCGS. This is one of the more accessible Type Two double eagle issues in circulated grades. Many of the 982,000 coins struck served time in circulation, as gold and silver were the only acceptable mediums of exchange in the West Coast economy. The 1870-S becomes a formidable challenge in Uncirculated condition. Even the landmark Saddle Ridge Hoard only turned up a pair of coins in MS62 (plus several coins in XF to AU), representing some of the finest known examples of the date. Vibrant frost radiates from marvelous rose-gold surfaces. The devices are well-struck with a number of bagmarks over the obverse and a relatively clean reverse. Population: 40 in 61, 10 finer (8/15). NGC ID# 26A9, PCGS# 8959

**1871-CC Double Eagle, AU Sharpness
Rare Early Carson City Issue**

4228 1871-CC — Improperly Cleaned — NGC Details. AU. Variety 2-A, the scarcer obverse die, considered “rare,” of the two known for the issue, showing the left base of the first 1 aligned over a space between two dentils, while the right base of the last 1 is aligned over the right side of a dentil. Regardless of variety, only 17,387 pieces of this early Carson City Mint twenty were struck, and specialists eagerly pursue collectible examples such as this AU sharpness piece. The caramel-gold surfaces show the luster a bit dimmed from the noted cleaning, and scattered marks and light circulation wear determine the grade. A small area of darker toning shows on the reverse, but much appeal remains with a good strike and few overt marks. NGC ID# 26AB, PCGS# 8961

**1873-S Open 3 Twenty Dollar, MS61
Fresh, Frosty Luster**

4229 1873-S Open 3 MS61 PCGS. CAC. The Open 3 1873-S double eagle is significantly scarcer in Mint State than its earlier Closed 3 counterpart. The issue is extremely rare finer than MS61, and is unknown above the MS62 level. The Smithsonian Institution lacks an example in any grade. This MS61 coin is among the finest examples of this date that most collectors will have an opportunity to acquire. The strike is bold throughout, illuminated by frosty honey-gold luster that has occasional wisps of pale rose. Moderate abrasions limit the grade, but are evenly dispersed over each side with minimal distraction. Seldom is a CAC-approved Mint State example of this issue available at auction. Population: 29 in 61, 4 finer (7/15). NGC ID# 26AM, PCGS# 8979

**1875 Twenty Dollar, MS63
Delightful, Frosty Luster**

- 4230 1875 MS63 PCGS.** Original, frosty luster glows over each side of this Select 1875 double eagle, displaying beautiful rose, peach, and lilac-gold hues. There are no obtrusive abrasions, only scattered light grazes in the luster that prevent a finer technical grade. This Type Two Philadelphia issue is seldom seen in this condition, and finer coins are extremely rare. Population: 71 in 63 (1 in 63+), 3 finer (8/15). NGC ID# 2547, PCGS# 8973

**1875 Double Eagle, MS63+
Frosty, Outstanding Patina**

- 4231 1875 MS63+ PCGS.** This high-end Select example showcases thick, frosty luster with deep original hues of rose, amber, lilac, and olive spread over each side. A few faint, scattered surface grazes are almost forgotten amid the glowing cartwheel effect, and the design elements exhibit outstanding sharpness. This Type Two Philadelphia issue is elusive in MS63 and rare finer. Population: 71 in 63 (1 in 63+), 3 finer (8/15). NGC ID# 2547, PCGS# 8973

**1875-CC Liberty Double Eagle, AU55
Favorite Type Two Carson City Issue**

- 4232 1875-CC AU55 NGC.** In contrast to the many rare issues that make up a challenging subset of 19 double eagles from the historic Carson City Mint., the 1875-CC issue is obtainable in About Uncirculated and finer grades — moreso than any other Type Two CC date. This example shows considerable remaining luster beneath natural, honey-gold surfaces. Few abrasions exist for the grade, but a trio of dark alloy spots is noted at the upper-left reverse. NGC ID# 26AT, PCGS# 8974

**1875-CC Double Eagle, MS61
Impressive Quality for the Grade**

- 4233 1875-CC MS61 PCGS. Variety 1-B.** Type collectors needing a Type Two double eagle while having a preference for the Carson City mintmark have an excellent opportunity with this Mint State example, although competition will be stiff from series specialists. The mintage of 111,151 pieces makes the issue the most available CC twenty, yet demand still exceeds the supply of nice examples.

Attractive green and rose highlights enhance the radiant, sun-gold surfaces of this vibrant representative of the issue. The coin shows comparatively few abrasions for the grade, none of which are severe. Cartwheel mint luster dominates the frosted surfaces. Eye appeal alone suggests a finer grade, and the technical quality is equally impressive. NGC ID# 26AT, PCGS# 8974

**1876-S Twenty Dollar, MS63
Final-Year Type Two Coin**

- 4234 1876-S MS63 PCGS.** A popular S-mint issue, the 1876-S is also among the last of the Type Two double eagles with the denomination expressed as TWENTYD. This piece offers many attributes, including coruscating luster, light orange-gold color, bold strike definition, and excellent eye appeal. A great type coin, rarely seen finer.
Ex: *October Signature* (Heritage, 10/2009), lot 1737; *FUN Signature* (Heritage, 1/2015), lot 7521. NGC ID# 26AX, PCGS# 8978

**1877-CC Twenty, AU58
Impressive Eye Appeal**

- 4235 1877-CC AU58 PCGS. Variety 2-C.** The luster is virtually complete, although inspection beneath a glass confirms slight friction on the final letters in LIBERTY. Marks are unexpectedly minor, and the eye appeal is impressive, a byproduct of its brief stay in circulation. The mintage is less than half that of the 1874 to 1876 Carson City emissions. Much of the bullion mined near Carson City was shipped to San Francisco for coinage for depositors "to draw bank checks on their deposits rather than be faced with the transport of excess coinage" per Douglas Winter. Population: 52 in 58, 31 finer (8/15).
Ex: *Milwaukee ANA Signature* (Heritage, 8/2007), lot 3349. NGC ID# 26AZ, PCGS# 8983

1878 Liberty Twenty, Honey-Gold MS63

- 4236 1878 MS63 NGC.** A couple of scrapes on Liberty's neck and luster grazes in the right obverse field appear largely to account for the Select grade, but the eye appeal is quite high on honey-gold surfaces that are extremely well-struck and free of other mentionable impairments. Even though more than a half-million examples were struck, relatively few survive so fine as this example, and higher-graded pieces would entail an extremely long search. The last example at auction in this exact grade and service that we find was lot 12063 in the Stack's Bowers August 2014 auction, which brought \$11,163. Census: 25 in 63, 3 finer (8/15). NGC ID# 26B3, PCGS# 8985

**1878-S Double Eagle, MS62+
Sharp and Pleasing, Rare Any Finer**

- 4237 1878-S MS62+ PCGS.** This brilliant, borderline Select twenty shows remarkably few abrasions for the grade and lustrous, medium-gold surfaces with frosty olive-gold overtones. Struck in a year when the Bland-Allison Act shifted the Mint's focus from gold to silver, this is a particularly well-produced representative of the issue. The number of Select Uncirculated or finer coins preserved from the San Francisco issue is small indeed, with just nine examples certified higher than MS62 by PCGS. Population: 2 in 62+, 9 finer (8/15). NGC ID# 338K, PCGS# 8987

1882-CC Twenty Dollar, AU53
Some Luster Remains

- 4238 1882-CC AU53 NGC. Variety 1-A.** The 1882-CC remains a scarce date in Mint State even after the return of European hoard coins in the recent decades. This AU example is an attractive, affordable representative with sharp detail and remnants of yellow-gold luster in the protected regions of the fields. The obverse is lightly frosted, the reverse noticeably semiprooflike. NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, Choice AU

- 4239 1882-CC AU55 NGC. Variety 1-B.** A briefly circulated but nonetheless pleasing apricot-gold Carson City double eagle. Nicely struck with minimal high point wear. Only lightly abraded overall, with the sole conspicuous mark relegated to the reverse above the arrowheads. Fewer than 40,000 pieces were produced. NGC ID# 26BF, PCGS# 8997

1889-S Double Eagle, MS64
Conditionally Scarce

- 4240 1889-S MS64 PCGS.** The 1889-S double eagle had a substantial mintage of more than 774,000 coins, and is moderately available overall. However, most Mint State survivors are significantly abraded, residing only in MS62 and lower grades. Choice examples are positively scarce, and only a handful of finer coins are known. This piece shows frosty rose and honey-gold luster over largely undisturbed surfaces. Liberty's hair curls and the stars are well brought up, also contributing to the overall excellent eye appeal. A high-end example for the grade. Population (including Saddle Ridge Hoard coins): 74 in 64 (18 in 64+), 5 finer (8/15). NGC ID# 26BW, PCGS# 9012

1889-S Twenty, MS64
Smooth and Attractive

- 4241 1889-S MS64 PCGS.** The collecting landscape has changed considerably for this San Francisco date since the discovery of more than 300 1889-S double eagles in the Saddle Ridge Hoard. With the influx of several high-grade coins, the upper-end of the population report shows a number of new entries.

In our opinion, the current coin is not one of the Hoard coins. The deep, rich-gold color shows orange accents and deep-seated mint luster that rolls over the super-smooth, mint-fresh surfaces. A few tiny, wispy abrasions account for the near-Gem grade. The strike is full throughout. Population (includes Saddle Ridge coins): 74 in 64 (18 in 64+), 5 finer (8/15). NGC ID# 26BW, PCGS# 9012

1889-S Double Eagle, MS64
A Major Rarity in Higher Grades

- 4242 1889-S MS64 PCGS.** A total of 774,700 double eagles were struck within the confines of the Granite Lady in 1889. This incredible Choice representative was tied for the finest known for many years until the recent Saddle Ridge hoard came to light. It is still a remarkable example of this conditionally scarce issue. Frosty, yellow-gold surfaces show boldly struck motifs and a degree of semiprooflikeness in the fields. Minimally marked with a couple of alloy spots on the reverse. Population: 74 in 64 (18 in 64+), 5 finer (8/15).

Ex: *Summer FUN Signature* (Heritage, 7/2014), lot 4028. NGC ID# 26BW, PCGS# 9012

1889-S Twenty Dollar, MS64+
Eye-Catching Mint Bloom

4243 1889-S MS64+ PCGS. The availability of the 1889-S double eagle was significantly increased by the discovery of the Saddle Ridge Hoard in February 2013, but its conditional scarcity at the Choice grade level should not be written off. The Hoard about doubled the supply of MS64-graded coins at PCGS, though that service still only shows 74 examples in this grade (18 in 64+), and only five finer (8/15). The present coin, with noticeable semiprooflike mirroring and dazzling apricot-gold luster, rivals the Saddle Ridge Hoard coins in eye appeal, which is significant considering how the latter are among the most eye-appealing examples of this issue known to collectors. The strike is sharp and only a few tiny marks on the cheek preclude a full Gem grade. NGC ID# 26BW, PCGS# 9012

1889-S Double Eagle, MS64
Ex: Saddle Ridge Hoard

4244 1889-S Saddle Ridge Hoard MS64 NGC. In February 2013, on a private homestead located in what was once the gold hills of the California Gold Rush, more than 1,400 gold coins were literally unearthed in old, rusted cans, where they had been buried for more than a century. The cache, now dubbed the Saddle Ridge Hoard, is arguably the greatest buried treasure discovery in the recorded history of the North American continent, yielding some of the finest known examples of numerous 19th century San Francisco double eagles.

The 1889-S was represented by more than 300 coins, with many grading in Choice or better condition. This representative displays bold detail and radiant honey-gold luster. No significant abrasions are observed, and the eye appeal is exceptional. Census of all 1889-S double eagles: 34 in 64 (7 in 64+), 8 finer (8/15). NGC ID# 26BW, PCGS# 109012 Base PCGS# 9012

1889-S Twenty Dollar, MS64+
Radiant Saddle Ridge Hoard Coin

- 4245 1889-S Saddle Ridge Hoard MS64+ NGC. The Mint State availability of the 1889-S double eagle was noticeably affected by the discovery of more than 300 examples in the Saddle Ridge Hoard of February 2013, but the date remains scarce at the Choice level, and is distinctly rare in finer grades. The present example showcases vibrant honey-gold mint bloom and razor-sharp design elements. A couple tiny marks on Liberty's cheek preclude a full Gem grade assessment from NGC, though the impressive eye appeal beautifully displays the superior quality and preservation that contribute to the Saddle Ridge Hoard coins' immense popularity. Census of all 1889-S double eagles: 34 in 64 (7 in 64+), 8 finer (8/15). NGC ID# 26BW, PCGS# 109012 Base PCGS# 9012

1889-S Double Eagle, MS64+
Ex: Saddle Ridge Hoard

- 4246 1889-S Saddle Ridge Hoard MS64+ NGC. Many examples of the 1889-S double eagle were among the coins discovered in the Saddle Ridge Hoard, but the date's scarcity in Choice condition was only marginally affected. Even after the disbursal of the Hoard coins, NGC has encapsulated only 35 examples in MS64 (7 in 64+, 1 in 64+ Prooflike), and just eight Gems finer (8/15). The present coin must have just missed a Gem grade assessment, as the surfaces are largely devoid of imperfections and the fields display subtle semiprooflike mirroring beneath warm wheat-gold luster. The devices are boldly impressed, and the visual appeal is seemingly unmatched for the grade. NGC ID# 26BW, PCGS# 109012 Base PCGS# 9012

**1892 Double Eagle, AU53
Low-Mintage Philadelphia Issue**

4247 1892 AU53 NGC. The 1892 Liberty double eagle stands out from most other issues of the period with a scant mintage of only 4,430 coins. The date is scarce in AU, and Mint State coins are rarely seen. This About Uncirculated example displays sharp detail amid remnants of yellow-gold luster. A pleasing, problem-free example. Census: 16 in 53, 82 finer (7/15). NGC ID# 26C5, PCGS# 9019

**1892-S Double Eagle, MS64
Vibrant Cartwheel Luster**

4248 1892-S MS64 PCGS. Although not pedigreed as such on the holder, this 1892-S double eagle has the appearance of a Saddle Ridge Hoard coin with a crisp cartwheel effect and bright yellow-gold luster. Most examples of this issue discovered in the Hoard grade MS62 or MS63 by modern standards; Choice representatives were few, and just a handful of Gems were represented. PCGS lists 21 pieces finer, including Hoard coins (8/15). NGC ID# 26C7, PCGS# 9021

**1892-S Double Eagle, MS64+
Rarely Seen Finer**

4249 1892-S MS64+ PCGS. Only 13 1892-S double eagles have been certified finer than this piece by PCGS, and the numbers are even lower at NGC with just six finer coins seen (7/15). This Plus-designated Choice example is boldly struck and shows vibrant, frosty luster in original green and rose-gold hues. Slight contact on Liberty's cheek and in the adjacent field limits the grade. NGC ID# 26C7, PCGS# 9021

**1892-S Twenty Dollar, MS64
Ex: Saddle Ridge Hoard**

4250 1892-S Saddle Ridge Hoard MS64 NGC. A number of 1892-S double eagles were discovered in the Saddle Ridge Hoard, but few were in Choice or finer grades. This piece is sharply struck and awash in vibrant yellow-gold luster. A few faint grazes on Liberty's cheek appear to be all that preclude a Gem assignment from NGC. Including Saddle Ridge Hoard coins, NGC has certified 21 Gems finer (8/15). NGC ID# 26C7, PCGS# 109021 Base PCGS# 9021

**1898-S Twenty, Appealing MS65
Well-Struck and Well-Preserved**

4251 1898-S MS65 NGC. Glowing golden luster runs over each side of this lovely Gem 1898-S double eagle, a high-mintage issue of more than 2.5 million pieces and pleasingly available in Gem. No monkeyshines with overseas shipping or subsequent melting appear to have greatly impaired the supply of Gem specimens at both services. The few signs of contact are widely dispersed and distant from the focal points. Census: 98 in 65, 3 finer (8/15). NGC ID# 26CL, PCGS# 9034

1899 Double Eagle, Fully Struck MS65

4252 1899 MS65 NGC. An exceptionally well-produced and carefully preserved double eagle, with a radiant-orange glow beneath the frosted surfaces. Olive-gold accents flash with the rolling luster under direct light. The surfaces are smooth and unabraded, complemented by fully struck motifs. Just three coins are certified numerically finer by PCGS and NGC combined. Census: 77 in 65, 2 finer (8/15). NGC ID# 26CM, PCGS# 9035

**1905-S Twenty Dollar, MS64+
Excellent Eye Appeal**

- 4253 1905-S MS64+ PCGS.** As a 20th century issue with a mintage exceeding 1.8 million coins, the 1905-S double eagle falls through the cracks when seeking better dates. Yet, it does become more of a challenge at the Choice grade level and finer pieces are rarely seen. This Plus-graded MS64 example shows a sharp strike and radiant yellow-gold luster. A few faint grazes are not out of line for the grade. Just 12 coins are finer at PCGS (8/15). NGC ID# 26D3, PCGS# 9048

**1907-D Liberty Twenty, MS63 Prooflike
Rare With Mirrored Fields**

- 4254 1907-D MS63 Prooflike NGC.** The year 1907 was transitional for the double eagle design, but coinage at the Denver Mint remained of Longacre's Liberty head throughout the year. This final-year example is boldly struck and reflective, with minimal abrasions on the yellow-gold surfaces. NGC has certified only 18 coins as Prooflike, including four in this grade and four finer (8/15). NGC ID# 26D8, PCGS# 79053

PROOF LIBERTY DOUBLE EAGLE

**1904 Double Eagle, PR58
Accessible Proof Offering**

- 4255 1904 PR58 PCGS.** The *Guide Book* reports a mintage of 98 proof double eagles for 1904, a minuscule fraction of the 6.2 million business strikes manufactured in that year. PCGS estimates that only 55 to 65 proofs survive. This PR58 representative has deep reddish-gold coloration with jade-green hues in the fields and over the devices on the obverse. A touch of album friction accounts for the grade, but it is hardly detectible. An immensely desirable twenty dollar gold proof. Population: 3 in 58, 42 finer (8/15). NGC ID# 34UF, PCGS# 9120

HIGH RELIEF DOUBLE EAGLES

**MCMVII High Relief Twenty, MS63
Wire Rim Variant**

- 4256 1907 High Relief, Wire Rim MS63 PCGS.** While today Saint-Gaudens' High Relief double eagle is unequivocally lauded for its aesthetic and technical quality, a small number of contemporary collectors found fault with the new coins. Among the objections was the choice of a sculptor to design the new coinage rather than a medalist. Saint-Gaudens was at the pinnacle of his profession, yet some people argued he had neither the training nor experience to adequately take on the task of redesigning America's ten and twenty dollar gold coins. Looking back, such an argument seems utterly absurd in light of the acclaim given to the artist's 1905 inaugural medal for Theodore Roosevelt. Even the striking difficulties posed by the High Relief design were insufficient to sustain long-term objections. Today the criticisms have dissipated, and the highly coveted coins have taken on a legendary status.

This is a magnificent example of the Wire Rim variant. A few stray contact marks can be found if one looks for them, but the glowing mint luster outweighs any technical demerits of this coin. Light, even reddish patina is seen over each side of this impressive High Relief. NGC ID# 26F2, PCGS# 9135

1907 Flat Rim High Relief Twenty, AU58
Impressive Surfaces

PROOF HIGH RELIEF DOUBLE EAGLE

1907 Saint-Gaudens High Relief Twenty
Wire Rim, PR62

4257 1907 High Relief, Flat Rim AU58 PCGS. CAC. Even today, more than a century after his death, Augustus Saint-Gaudens remains the most famous artist to have been associated with American coins. Even lower-graded examples of his High Relief twenty dollar cannot fail to inspire those who view such coins. The forward-striding figure of Liberty remains a potent force for America at the dawn of what would prove to be "The American Century." Flat Rim coins are much scarcer than their Wire Rim counterparts, and this piece shows an almost complete absence of any extruded metal on the rim. This is an impressive example of this artistically inspired coin. The figure of Liberty shows only the slightest trace of friction and there are no singularly noticeable or mentionable contact marks on either side. Prominent reddish patina is seen throughout. NGC ID# 26F2, PCGS# 9136

4258 1907 High Relief, Wire Rim PR62 NGC. Proof High Relief twenties remain a controversial subject. However, we have recently received a list of diagnostics NGC looks for to determine these specially produced coins. The easiest identifiers are on the edge, these pieces were struck from the same collar as the Ultra High Reliefs. However, the holder for this coin does not allow examination of the edge. On the obverse, there is a heavy die line that runs through the base of the Capitol dome, and there are swirling die polish lines in the right field with two lines emerging prominently from the base of the branch. The reverse shows die lines that are visible within the raised portion of the rays of the sun, following the direction of the die recesses; there is also heavy die polish present in the negative space between the eagle's wing and neck and similarly heavy die polish seen along the left periphery, especially at 9 and 11 o'clock.

As one would expect, this is an impressive coin. Every design element is fully brought up, and the surfaces are especially well preserved for the grade with only one obvious mark that is located in the left obverse field. The bright, lustrous surfaces show slight reddish patina over the underlying bright yellow-gold. NGC ID# 28AX, PCGS# 9132

SAINT-GAUDENS DOUBLE EAGLES

1909/8 Double Eagle, MS63
Vibrant and Eye-Appealing

4259 1909/8 FS-301, MS63 PCGS. Deep orange-gold luster and subtle violet overtones are the chief visual attributes of this Select 1909/8 double eagle, although the eye appeal is further heightened by a noticeable lack of major abrasions. The motifs are well-rendered and much of the grade-limiting surface contact is restricted to the high points of Liberty's figure. NGC ID# 26FC, PCGS# 9151

1910 Twenty Dollar, MS65
Very Rare in Finer Condition

4260 1910 MS65 PCGS. Gem 1910 double eagles are scarcely encountered, and Premium Gems only appear on the market once every few years or so, drawing considerable attention from the most advanced series specialists. This reddish-gold representative offers bold central strike definition and glimmering mint luster. Minor marks turn up upon close inspection with a lens. An excellent example for a high-end date or Registry set. Only four submissions are graded higher at PCGS (8/15). NGC ID# 26FF, PCGS# 9154

1911-D/D Saint-Gaudens Twenty, MS66
Repunched Mintmark, FS-501

4261 1911-D/D FS-501 MS66 PCGS. The mintmark was repunched on this popular *Cherry-pickers'* variety, with the undertype D slightly right of the primary mintmark. This delightful Premium Gem displays sharply detailed design elements and vibrant mint luster throughout. The well-preserved yellow and rose-gold surfaces show only minor signs of contact. PCGS has graded seven finer examples (12/13). NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

1912 Double Eagle, MS65
Conditionally Elusive

4262 1912 MS65 PCGS. The 1912 is one of the more conditionally challenging Philadelphia issues in the Saint-Gaudens double eagle series at the Gem level. Such coins are scarcely seen, and demand surpasses the available quantity. As no branch mint twenties were coined in 1912, the Philadelphia issue is the only option for the date collector.

In 1912, New Mexico and Arizona joined the Union as the 47th and 48th states. The circle of stars around the obverse periphery of the double eagle was thus increased, with two new stars added below the date. This design change is little known to many novices.

This Gem 1912 boasts vibrant rose-gold luster and impressively sharp detail. Liberty's knee shows trivial stacking contact, but there are no other mentionable abrasions. A frosty cartwheel effect grants superb eye appeal. Population: 37 in 65, 5 finer (8/15). NGC ID# 26FM, PCGS# 9160

**1922-S Twenty Dollar, MS64+
A Former Prime Rarity in the Series**

4263 1922-S MS64+ PCGS. The 1922-S is one of the former major series rarities that was later found in significant numbers in (mostly) European holdings. Of the 2.6 million pieces minted, it is estimated that today some 2,100 coins exist. This is a remarkably vibrant, lustrous example that has uniform yellow-gold color. Only the slightest abrasions can be seen on each side. NGC ID# 26G4, PCGS# 9174

**1924-S Twenty Dollar, MS63
Better San Francisco Issue**

4264 1924-S MS63 PCGS. This San Francisco issue is seen far less often than its mintage of nearly 3 million coins would suggest. The present example is well-struck, and eye appeal is further heightened by frosty apricot-gold luster that cartwheels freely when rotated beneath a light. A few scattered abrasions are not obtrusive. NGC ID# 26G9, PCGS# 9179

**1926-D Double Eagle, AU58
Scarce, Near-Mint Opportunity**

4265 1926-D AU58 PCGS. Massive melting during the Gold Recall of the 1930s eliminated most of the Denver Mint's double eagle production for the year, and few coins actually circulated from the original mintage of 481,000 pieces. As a result, the issue is one of the keys to the series and it is notably scarce (and expensive) in all grades.

This nearly Uncirculated example offers an opportunity, with the eye appeal of a higher grade without the premium for full Mint State status. Frosty, orange-gold surfaces emit nearly complete remaining mint luster despite the brief circulation. A few small marks dot the surfaces, and the Capitol building is weakly struck, but both the branch and torch hands are full-fingered. The vibrant patina is terrific. NGC ID# 26GE, PCGS# 9184

1926-D Twenty Dollar, MS62
Attractive Luster

- 4266 1926-D MS62 PCGS.** The 1926-D double eagle is an elusive semikey date in the Saint-Gaudens series, with most of its 481,000-coin mintage destroyed under the dictates of Roosevelt's Executive Order 6102, the 1933 gold confiscation act. This Mint State example was likely among the trade coins which survived the gold melts via overseas vaults. There is no true wear, but scattered abrasions are characteristic of pieces which spent decades in loose bags. Unaffected, however, is vibrant, frosty luster in rose and orange-gold hues, giving this piece outstanding eye appeal for the grade. Moreover, the strike is slightly sharper than average for this Denver issue. An excellent opportunity for the double eagle collector to acquire a Mint State example of this scarce branch mint date. NGC ID# 26GE, PCGS# 9184

1926-S Twenty Dollar, MS64+
High-End Visual Appeal

- 4267 1926-S MS64+ PCGS. CAC.** While many examples of the 1926-S returned from foreign holdings over the past several decades, the vast majority of the coins returned in lower Mint State grades. The cachet remains for near-Gem and finer examples of this legendary San Francisco date, which after the gold melts of the 1930s was considered one of the true rarities in the series.

The present coin ranks among the few high-end MS64 examples with eye-catching visual impact and notable technical quality. The surfaces radiate blazing sun-gold luster from frosted, minimally abraded surfaces. The strike is sharp, but not full, with some weakness at the lower obverse periphery where die cracks intersect. PCGS reports just 36 finer examples of this popular branch mint issue. Population: 40 in 64+, 36 finer (7/15). NGC ID# 26GF, PCGS# 9185

**1928 Saint-Gaudens Twenty, MS66+
Lovely Orange-Gold Color**

4268 1928 MS66+ PCGS. CAC. Abundant in lower grades, the 1928 Saint-Gaudens double eagle becomes scarce above MS66. This well-detailed Premium Gem offers lustrous orange-gold surfaces with few signs of contact that are nearly undetectable to the naked eye. The frosty surfaces are especially vibrant and the overall eye appeal is outstanding. NGC ID# 34VK, PCGS# 9189

**1929 Double Eagle, MS63+
Heavily Melted**

4269 1929 MS63+ NGC. The 1929 Saint-Gaudens double eagle is among the late-series dates affected by the government gold confiscation of the mid-1930s. A significant majority of the more than 1.7 million pieces struck were destroyed in this manner, leaving only a small population of survivors in the hands of collectors. Almost all known examples are in Mint State grades, with a cluster of pieces in the MS63 to MS64 range; above this level the 1929 climbs out of reach for most collectors.

This Plus-graded MS63 representative combines satisfactory eye appeal and technical quality with a grade level that is moderately pursuable. The strike is bold and the design elements are illuminated by frosty orange-gold luster. Grade-limiting abrasions are light and pose little distraction, fully warranting the Plus designation. This piece is the only MS63 example with a Plus addition at NGC (7/15). NGC ID# 26GL, PCGS# 9190

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS67
Scarce This Well-Preserved

4270 1893 Isabella Quarter MS67 PCGS. CAC. The Isabella quarter, struck as souvenir for the World's Columbian Exposition held in Chicago in 1893, is the only quarter dollar in the classic commemorative series. It was struck to the extent of 40,023 coins (including 23 assay coins), but only 24,214 pieces were distributed; the remaining 15,809 coins were melted as unsold.

The Isabella quarter proved popular among collectors and many high-grade examples have survived as a result. Yet, the certified population thins considerably at the MS67 level and finer pieces are major rarities. This Superb Gem is beautifully preserved, showing vibrant luster and original rose-gold, amber, and aquamarine toning over each side. The reverse figure has trivial weakness on the hair curls around the face, but there are no other striking faults. Population: 44 in 67 (6 in 67+), 6 finer (7/15).

From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYJ9, PCGS# 9220

1893 Isabella Quarter, MS67+
Superb Condition, Rich Toning

4271 1893 Isabella Quarter MS67+ PCGS. CAC. Those who opposed the Board of Lady Managers and its chairperson, the wealthy Chicago socialite Mrs. Potter Palmer, also faced political pressure from Congress and the formidable Susan B. Anthony, who championed the cause. Ultimately, there was no stopping the Isabella quarter, although just 24,214 pieces were distributed from an authorized mintage of 40,000 pieces.

Rose and lilac toning covers the centers of this frosted and lustrous example, with aquamarine shades at the borders. A high-end Superb Gem, the strike is sharp on both sides and the eye appeal is tremendous. Population: 6 in 67+, 6 finer (8/15). NGC ID# BYJ9, PCGS# 9220

**1900 Lafayette Dollar, MS65+
Outstanding Concentric Toning**

- 4272 1900 Lafayette Dollar MS65+ PCGS. DuVall 2-C.** This is an available variety, recognized by repunching on the second S in STATES on the obverse. As far as Lafayette dollars go, this high-end Gem is astoundingly attractive. The vibrant luster is original, and abrasions are insignificant. Both sides are near-brilliant in the center, with gradually deepening peripheral bands of champagne, lavender, aquamarine, and mint-gold. Finer Lafayette dollars are seldom seen. NGC ID# BYKW, PCGS# 9222

**1900 Lafayette Dollar, MS65+
Attractive Type Coin**

- 4273 1900 Lafayette Dollar MS65+ PCGS. CAC. DuVall 1-B.** One of the more available varieties of this popular classic commemorative, but seldom offered in such condition as this Plus-graded Gem. The surfaces are satiny and unabraded, with olive-gold and champagne hues that yield to deeper amber and violet around the peripheries. The strike is bold and the luster is especially radiant. Regardless of variety, the Lafayette dollar is elusive in finer grades. *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# BYKW, PCGS# 9222

**1921 Alabama Half Dollar, Frosty MS66+
Few Known Finer**

- 4274 1921 Alabama MS66+ PCGS. CAC.** The Alabama Centennial half dollar is known both with and without a small 2x2 notation in the right obverse field. Both varieties are scarce in MS66 and are rare any finer. This example of the Plain variant boasts the coveted Plus designation for its exceptional Premium Gem quality — nearly fine enough to be considered for a Superb Gem assessment. The surfaces are frosty with just a hint of ice-blue toning. Minor striking weakness occurs on the central reverse. PCGS lists three MS67 coins finer (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# BYF2, PCGS# 9224

**1928 Hawaiian Half Dollar, MS65+
Sharp Motifs**

- 4275 1928 Hawaiian MS65+ PCGS.** A boldly struck, higher-end example of this key classic commemorative issue, showing surface quality nearly fine enough to warrant a Premium Gem grade. This Plus-designated MS65 coin is toned in uneven olive, amber, lilac, and russet hues with satiny underlying luster. Finer examples are seldom available. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS66
Excellent Surface Quality**

- 4276 1928 Hawaiian MS66 PCGS. CAC.** A boldly struck, carefully preserved example of this popular classic commemorative, this Hawaiian Sesquicentennial half dollar is awash in satiny luster that shows shades of mint-green, amber, and lilac-gold toning. The issue is scarce in this grade and is rarely seen finer, with only two Superb Gems certified by PCGS (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# BYGR, PCGS# 9309

**1924 Huguenot-Walloon Half, Beautiful MS67+
George T. Morgan Design**

- 4277 1924 Huguenot MS67+ PCGS. CAC. Ex: Bruce Scher.** The settlement of New Netherland (modern-day New York) in 1624 by Huguenots (Calvinist Protestants), was commemorated in 1924 with the issuance of the Huguenot-Walloon Tercentenary half dollar. The issue had a fairly large distribution of more than 140,000 coins, but few survive in Superb Gem condition. This piece is superbly struck and vibrantly lustrous. Both sides display blended sun-gold, olive-green, and lilac-blue toning, and close inspection of the surfaces fails to reveal any distractions. Population: 62 in 67 (10 in 67+), 2 finer (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# BYGT, PCGS# 9314

**1936 Long Island Half, Splendid MS67+
High Technical Quality**

4278 1936 Long Island MS67+ PCGS. CAC. The conjoined portraits of a Dutch settler and an Algonquin Native American symbolize the earliest days of Dutch exploration, colonization, and mutual cooperation between the two civilizations, 300 years before the mintage of the commemorative half dollars. The pearlescent surfaces of this Plus-graded and CAC endorsed example provide a splendid representative of the intended design.

Iridescent rainbow tones appear on the sloped margins, framing satiny, silver-gray fields and central devices. The surfaces are essentially smooth and sharply struck — both unusual attributes for the issue, which always exhibits some marks careless from a careless strike and handling. The Dutch sailing ship is bold, including the troublesome lower-middle sail. No examples are certified finer by PCGS. Population: 4 in 67+, 0 finer (8/15). NGC ID# BYGX, PCGS# 9322

**1921 Missouri Centennial Half, MS66
None Finer at PCGS**

4279 1921 Missouri MS66 PCGS. CAC. The Missouri Centennial half dollar is elusive at the Gem level and genuinely scarce in MS66. This piece is among the finest at PCGS. Frosty luster glows beneath an overlay of pale olive-gold toning that yields wisps of rose on the reverse. A hint of softness occurs on the high point of the frontiersman's coonskin cap, but the motifs are otherwise sharp. A few trivial marks appear on the cheek and in the adjacent field. Population: 42 in 66, 0 finer (7/15).
From *The Rolling Thunder 50 Piece Commemorative Collection*. NGC ID# BYH2, PCGS# 9330

**1936 Oregon Trail Half, MS68
Tied for Finest Certified**

4280 1936 Oregon MS68 PCGS. CAC. The Oregon Trail Memorial half dollar was the longest-running issue in the classic commemorative series. It was originally struck in 1926 at the Philadelphia and San Francisco Mints, and was then produced on a fairly sporadic basis through 1939 at the various operating mints. The 1938 and 1939 issues were sold in three-coin sets containing an example from each branch. This example of the 1936 Philadelphia product is among the finest known of that date. The satiny surfaces display iridescent champagne toning and the design elements are fully struck. Population: 7 in 68, 0 finer (7/15).
From *The Rolling Thunder 50 Piece Commemorative Collection*. NGC ID# BYHB, PCGS# 9345

**1915-S/S Panama-Pacific Half, MS67
Superb Surface Quality**

- 4281 1915-S/S Panama-Pacific, FS-501, MS67 PCGS. CAC.** Ex: Paul Denby. This is one of two repunched mintmark varieties known for this issue, showing the remnants of an errant S just right of the primary. Overall, this is an outstanding example of the Panama-Pacific half dollar. The surfaces are beautifully preserved and satiny, with iridescent champagne toning that deepens around the obverse periphery. The strike is sharp and the eye appeal is exceptional. Population: 94 in 67 (10 in 67+), 3 finer (7/15).
From *The Rolling Thunder 50 Piece Commemorative Collection*. NGC ID# BYHP, PCGS# 145748 Base PCGS# 9357

**1915-S/S Panama-Pacific Half, MS67
Excellent Luster and Toning**

- 4282 1915-S/S Panama-Pacific, FS-502, MS67 PCGS.** One of two *Cherrypickers'* varieties which show remnants of a repunched mintmark, this one seen in the field immediately above the primary S. As a type coin, this Superb Gem Panama-Pacific half dollar is conditionally scarce, and few pieces are known finer. The strike is well-executed and the surfaces display the soft, satiny luster that is common to this issue. Light champagne patina warms the interiors, leaving amber, violet, and teal overtones in the margins. Population: 94 in 67 (10 in 67+), 3 finer (8/15). NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

**1920 Pilgrim Tercentenary Half, MS67+
Incredible Eye Appeal**

- 4283 1920 Pilgrim MS67+ PCGS. CAC.** The bold strike and advantageous toning of this high-end Superb Gem deliver an appearance reminiscent of a miniature bas-relief plaque. The motifs are sharply brought up and the nearly pristine surfaces glow with luminous luster beneath complementary gold, rose, and champagne-gray hues. A jagged die crack runs like a tear through the *Mayflower's* mainsails, denoting a late die state. Population: 51 in 67 (8 in 67+), 1 finer (7/15).
From *The Rolling Thunder 50 Piece Commemorative Collection*. NGC ID# 26LD, PCGS# 9359

**1926 Sesquicentennial Half, MS65+
Rare Any Finer**

- 4284 1926 Sesquicentennial MS65+ PCGS. CAC.** The 1926 Sesquicentennial half dollar is one of the most elusive issues in the classic commemorative series in high grade, particularly above MS65. This Plus-designated Gem is boldly struck and largely unabraded. Medium lavender-gold toning has a few russet accents on the reverse. PCGS lists only eight MS66 coins finer (7/15).
From *The Rolling Thunder 50 Piece Commemorative Collection*. NGC ID# BYJ4, PCGS# 9374

**1925 Fort Vancouver Half, MS67+
One Coin Finer at PCGS**

- 4285 1925 Vancouver MS67+ PCGS. CAC.** The Fort Vancouver half dollar had a limited distribution of only 14,994 coins, including assay pieces. Examples survive in quantity in grades through MS66, but Superb Gems are scarce and almost unobtainable finer than MS67. This Plus-designated piece is boldly struck and vibrantly lustrous. Soft champagne toning exhibits glimpses of amber and olive-gold, with wisps of lavender throughout. Population: 56 in 67 (8 in 67+), 1 finer (7/15).
From *The Rolling Thunder 50 Piece Commemorative Collection*. NGC ID# BYJP, PCGS# 9399

**1927 Vermont Sesquicentennial Half, MS67
Exemplary Quality**

- 4286 1927 Vermont MS67 PCGS. CAC.** This is a beautiful Superb Gem Vermont half that boasts scintillating luster and attractive light autumn-gold patina. The strike is exemplary, and the obverse appears pristine. Only a solitary faint graze beneath the flank of the catamount denies perfection. Housed in a green label holder. Population: 37 in 67 (2 in 67+), 1 finer (7/15).
Ex: *Louis Bassano Collection / Los Angeles Signature (Heritage, 8/2009), lot 1502; Central States Signature (Heritage, 4/2012), lot 7174.*

COMMEMORATIVE GOLD

1904 Lewis and Clark Gold Dollar, MS66 Colorful, Lustrous Example

- 4287** 1904 Lewis and Clark MS66 NGC. The cartwheel luster is spectacular, and the bright canary-gold surfaces are virtually pristine. The portraits are well struck, and only the denticles exhibit noticeable weakness. A tiny rose alloy spot is noted on Lewis' cheek. NGC has certified 28 numerically finer examples (7/15). NGC ID# BYLF, PCGS# 7447

1905 Lewis and Clark Gold Dollar, MS65 Elusive Gold Commemorative

- 4288** 1905 Lewis and Clark MS65 PCGS. The 1905 Lewis and Clark gold dollar is considerably more elusive than its 1904 counterpart. This impressive Gem features sharply detailed design elements and lustrous, well-preserved orange-gold surfaces. Two tiny nicks in the reverse field, below OF, are the only discernible marks. NGC ID# BYLG, PCGS# 7448

1915-S Panama-Pacific Quarter Eagle, MS65 Vibrant Luster

- 4289** 1915-S Panama-Pacific Quarter Eagle MS65 NGC. From an authorized mintage of 10,000 pieces, only 6,749 Panama-Pacific quarter eagles were actually distributed. This impressive Gem displays sharply detailed design elements and vibrant mint luster on both sides. The bright orange-gold surfaces show only minor signs of contact and eye appeal is outstanding. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Fifty, AU55 Low-Mintage Octagonal Gold Commemorative

- 4290** 1915-S Panama-Pacific 50 Dollar Octagonal AU55 PCGS. The octagonal 1915-S Panama-Pacific fifty dollar gold pieces were struck as part of a five-coin program conceived by Farran Zerbe to commemorate the opening of the Panama Canal. The octagonal design was borrowed from the historic fifty dollar "slugs" issued by the U.S. Assay Office of Gold during the Gold Rush era. Sold at the Panama-Pacific International Exposition in San Francisco, only 645 examples were distributed.

The present coin is an attractive Choice AU specimen, with just a trace of wear on the high points of the well-detailed design elements. The pleasing orange-gold surfaces retain almost all of their original mint luster and show only a few minor abrasions. Housed in a green label holder. NGC ID# BYHP, PCGS# 7452

1915-S Panama Pacific Fifty, MS62
Venerable Octagonal Issue
645 Pieces Distributed

4291 1915-S Panama-Pacific 50 Dollar Octagonal MS62 NGC. CAC. The Panama-Pacific International Exposition was held in San Francisco in 1915 to commemorate the opening of the Panama Canal and the 400th anniversary of the discovery of the Pacific Ocean. The fair was held on 635 acres of Golden Gate Park and an estimated 19 million people attended during its run from February 20 to December 4, 1915. Prominent coin dealer Farran Zerbe conceived of an unprecedented program of five commemorative coins to be sold at the exposition, a silver half dollar, a gold dollar, a gold quarter eagle, and two fifty dollar gold pieces, one round and one octagonal.

Both the octagonal and round fifty dollar gold pieces were designed by New York artist Robert Aitken. Both coins featured the same basic design, with the goddess Minerva in a circle on the obverse with the date in Roman numerals and the motto IN GOD WE TRUST. Around the circle, the legend UNITED STATES OF AMERICA above, and FIFTY DOLLARS below. The reverse featured an owl standing on a branch of western pine, in a circle with the motto E PLURIBUS UNUM. Outside the circle were the legends PANAMA-PACIFIC EXPOSITION above and SAN FRANCISCO below. The octagonal shape of the fifty dollar piece was meant to remind viewers of the old fifty dollar slugs issued in the glory days of the Gold Rush era. Congress approved the striking of 3,000 fifty dollar pieces, evenly split between round and octagonal formats. Zerbe offered the fifty dollar pieces at \$100 each.

Unfortunately, the high price of the coins limited sales considerably and only 645 examples of the octagonal design were sold. The remainder of the mintage was later melted. This low distribution total makes the 1915-S Panama Pacific octagonal fifty dollar gold piece an elusive issue today, even though most of the coins issued are still extant.

The present coin is an attractive MS62 specimen, with bright lemon-yellow surfaces that show the minimum number of minor contact marks for the grade. The design elements are well-detailed, with just a touch of the usual softness on the central reverse. The fields exhibit the slight orange-peel texture often seen on gold proofs of the 19th century. Overall eye appeal is outstanding for this historic gold commemorative. NGC ID# BYHP, PCGS# 7452

MODERN BULLION COINS

1986 American Silver Eagle, MS70

- 4292 1986 Silver Eagle MS70 PCGS.** The American Silver Eagle program made its debut in 1986 with a mintage approaching 5.4 million coins. The branch mints at Denver, San Francisco, and West Point were responsible for the coins' production, though their mintmarks were omitted. This technically flawless example has frosty, brilliant surfaces without a single imperfection. The Weinman / Mercanti design is fully rendered. Population: 32 in 70 (8/15). NGC ID# 26J4, PCGS# 9801

1995-W Silver Eagle PR70 Deep Cameo

- 4293 1995-W Silver Eagle PR70 Deep Cameo PCGS.** Sold by the U.S. Mint only as part of a five-piece proof set including four gold coins, this issue was priced out of the range of most silver eagle collectors during 1995. Once the set was no longer available from the Mint, the low mintage of the 1995-W ensured it would become the series key. Most PCGS-certified examples fall short of the ultimate grade, but the present fully struck white-on-black specimen is essentially flawless. A tiny retained lamination between the RT in LIBERTY provides an identifier. Population: 87 in 70 Deep Cameo, (8/15). NGC ID# 28WZ, PCGS# 9887

1997 Tenth-Ounce Platinum Eagle, MS70 Important First-Year Issue

- 4294 1997 Tenth-Ounce Platinum Eagle MS70 PCGS.** From a first-year mintage of 70,250 pieces, this magnificent tenth-ounce Platinum Eagle is one of less than two dozen coins to receive the MS70 designation at PCGS. Fully struck and impeccably preserved, this spectacular coin offers incredible eye appeal. Population: 23 in 70 (7/15). NGC ID# 26S5, PCGS# 99754

TERRITORIAL GOLD

1851 Humbert Fifty, AU Details Lettered Edge, 880 Thous., K-2

4295 1851 Humbert Fifty Dollar, Lettered Edge, 880 Thous. — Tooled — NGC Details. AU. K-2, R.5. No "50" reverse. These historic fifty dollar "slugs" were issued under the auspices of the U.S. Assay Office in 1851. The name of the assayer, AUGUSTUS HUMBERT, and his official title, UNITED STATES ASSAYER OF GOLD CALIFORNIA, and the date 1851 were inscribed in the octagonal edge of the coins. The edge lettering was an incredibly labor intensive process, as each of the eight sides of the coin had to have the appropriate lettering punched into the surface in a separate operation. The Lettered Edge design was soon replaced by the Reeded Edge variety, which was much easier to produce.

Some slight evidence of tooling shows on the surfaces of this still-attractive specimen, which is brightly lustrous and exhibits few signs of actual wear. The pleasing orange-gold surfaces are also lightly marked for such a large gold coin. A majestic memento of this important era in American history.

1852 Assay Office Fifty, 887 Thous., AU53
K-13, Late-Generation Reeded Edge Type

4296 1852 Assay Office Fifty Dollar, 887 Thous. AU53 PCGS. K-13, Low R.5. Target Reverse, No 50 in Center. The Augustus Humbert/U.S. Assay Office fifty dollar octagonal gold pieces dated 1851 and 1852 are the foremost numismatic icons that today stand to memorialize the California Gold Rush which began in 1849.

From the 30,000-foot view, the 1852 Assay Office fifties are the fourth generation out of five broad types of fifty dollar octagonals. Numerous earlier assayers-coiners in California in 1849 and 1850 produced coins of one, two and a half, five, and ten dollar denominations and ingots of varying sizes. By spring 1850, however, the chaos of those first entities began to resolve into a semiofficial character. A state assayer, F.D. Kohler, was appointed in April 1850 by California Governor Peter H. Burnett; Kohler operated in that capacity from offices in San Francisco and Sacramento.

Yet of all the early coiners and ingot-makers, most issued products that were underweight, discredited, melted into oblivion, or thought substandard in one way or another — save for one firm, Moffat & Co. The first Moffat coins were five and ten dollar pieces and ingots made in 1849. By 1850, the first wave of coiners was gone, save for the well-thought-of Moffat & Co. In the fall of 1850, California joined the Union, and Augustus Humbert was named United States Assayer, contracting with Moffat & Co. to “assay and fix the value of gold on ingots and coins marked with the stamp of the United States.”

The first generation of Humbert fifty dollar octagonal coins were the cumbersome Lettered Edge pieces (Kagin-1 to K-4), struck only in 1851 in 880 and 887 finenesses. The second generation of Reeded Edge pieces, the Humbert fifties struck in later 1851 and 1852, were a vast improvement in terms of work economy over the labor-intensive Lettered Edge coins. The third generation was the Humbert Reeded Edge fifties dated 1852 and struck in 887 fineness (K-11). After George L. Moffat retired in 1852 and the firm was reorganized as the U.S. Assay Office of Gold under the remaining partners, the final two generations were struck, the 1852 Assay Office 887 fineness K-13 fifties (such as this example) and the federal-standard 900 fineness Assay Office coins.

This appealing caramel-gold Assay fifty bears the scattered ticks and light contact marks that indicate light and brief circulation — the weakness on the peripheral motto is a function of the strike, not wear — but there are no heavy abrasions, and the corners are free of the notable rim bumps that sometimes afflict these coins. There is one dig below the right scroll of the eagle and a small rim nick above the second T in STATES, and a dotlike indent left of OFFICE. The reverse also shows a few minor abrasions unworthy of singular mention. Listed on page 387 of the 2016 *Guide Book*. Population: 12 in 53, 13 finer (8/15). NGC ID# ANHG, PCGS# 10016

1849 Mormon Five, VF35
Elusive Territorial Gold Issue, K-2 Variety

4297 1849 Mormon Five Dollar, K-2, R.5, VF35 PCGS. CAC.

Beginning on September 28, 1848, returning Mexican War veterans began showing up at Salt Lake City with gold they had mined on the American River in California on their journey home. The gold dust was most welcome in the Mormon community, as virtually no hard currency was available in the region at that time. However, problems with inaccurate weighing and loss made gold dust less than ideal as a medium of exchange. A mint was soon established in Salt Lake City, under the authority of the Mormon Church. Dies were forged by blacksmith John Mobourn Kay and the first gold deposit was made on December 10, 1848. By 1849, the Mormon coinage program was in full swing, with coins issued in two and a half, five, ten, and twenty dollar denominations. The coins were readily accepted in the Mormon community, but outside assays found them underweight and of improper fineness, so they were only accepted at a steep discount outside the Salt Lake Valley. All the Mormon issues are scarce-to-rare today.

The present coin is a pleasing Choice VF example of the five dollar K-2 issue, with all lettering and the date bold and all major design elements complete in outline. The Mormon fives are always seen softly struck on parts of the eye and clasped hands, and even lightly worn specimens show little interior detail on these features. The orange-gold surfaces are lightly abraded and the overall presentation is quite attractive. NGC ID# 2BCE, PCGS# 10262

CALIFORNIA FRACTIONAL GOLD

(1853) Octagonal Gold Dollar, MS64
Undated BG-501 Variety

4298 Undated Liberty Octagonal 1 Dollar, BG-501, Low R.5, MS64

NGC. BG-501 is the only octagonal gold dollar variety bearing no date. It was struck by Frontier, Deviercy & Co. and shows on the reverse a majestic eagle reminiscent of the device used for the Humbert slugs. This no doubt aided in the issue's acceptance in commerce, as most of the known survivors are circulated. One of the earliest recorded auction sales of this issue was in lot 1694 of Woodward's November 1862 sale of the Finotti Collection. The coin was described as "a very rare type," and realized \$1.50.

This Choice Mint State example is the single finest of just six BG-501 examples certified by NGC; by comparison, PCGS has seen 46 examples of this issue, but with only 14 in Mint State and the sole finest another MS64 coin (8/15). This piece is well-struck on the central devices and displays bright yellow-gold luster. Semiprooflike fields are slightly more mirrored on the obverse. An outstanding example of this scarce Period One variety. NGC ID# 2BKW, PCGS# 10478

1876 Indian Octagonal Quarter
MS67 Deep Prooflike
Very Rare BG-799B, Three Known

- 4299** 1876 Indian Octagonal 25 Cents, BG-799B, R.8, MS67 Deep Prooflike NGC. On August 10, 1876, San Francisco jeweler Christopher Ferdinand Mohrig, was arrested by Secret Service agent Henry F. Fineglass. Fineglass seized hundreds of California fractional gold pieces, which were ultimately melted. Perhaps the incident explains the great rarity of BG-799B, a Mohrig issue. We know of only three examples, the present piece and two graded by PCGS, respectively as MS63 and MS65. This well struck sun-gold Superb Gem has mirrored fields and a pristine appearance. A small roundish strike-through on the jaw serves as an identifier. PCGS# 910628 Base PCGS# 10628

COINS OF HAWAII

1881 Hawaiian Five Cents, MS65
Medcalf 2CN-1 Pattern
Original 1881 Design

- 4300** 1881 Hawaii Five Cents MS65 PCGS. Medcalf 2CN-1. The presence of a cross at the top of the crown on the reverse of this pattern issue identifies it as one of the original 1881 strikes minted in Paris on behalf of the owner of a nickel mine in New Caledonia who offered to produce five cent pieces for the Hawaiian islands. The obverse inscription identifies King Kalakaua as the "King of Sandwich Islands," the European name for Hawaii. The reverse design had a spelling error in the Hawaiian motto. Perhaps this combination of errors was enough for King Kalakaua to reject the coinage proposal. This impressive Gem exhibits a bold strike with satin luster and reflective gray fields, showing a hint of cameo contrast. PCGS has certified 18 of these with a median grade of MS64. Population: 3 in 65, 2 finer (8/15). NGC ID# 2C53, PCGS# 10975

(1860) Waterhouse Token, AU58
Early Hawaiian Issue, M. 2TE-1

4301 (1860) Waterhouse AU58 PCGS. M. 2TE-1. John T. Waterhouse opened an import (mostly dry goods) business in Honolulu, Hawaii in 1851. It is believed that he issued the first tokens in the islands, circa 1855-1860. These large white metal pieces feature the likeness of King Kamehameha III, but the inscription reads Kamehameha IV. It seems likely that the token was designed during the reign of the first monarch, but only issued after his nephew assumed the throne in 1855. Changing the inscription was a simple matter, but changing the bust would have been problematic.

The Waterhouse tokens are scarce issues in today's market, rarely found in grades above the XF level. The soft white metal alloy caused prominent features, like the king's nose, to blunt easily, and almost all examples seen show some softness in this area. This attractive near-Mint example is sharply detailed in all areas except the nose, and the lightly abraded surfaces retain traces of original mint luster. Altogether, a handsome example of this sought-after early token. Listed on page 414 of the 2016 *Guide Book*. Population: 2 in 58, 2 finer (7/15). NGC ID# 2UBK, PCGS# 600500

1880 Wailuku Plantation Token, AU50
1 Real, M. 2TE-6

4302 1880 Wailuku Plantation Token, 1 Real, AU50 PCGS. M. 2TE-6. The Wailuku plantation was located on the island of Maui, but the tokens circulated throughout the islands. The denominations corresponded to early Spanish monetary units, with one real equaling 12 1/2 cents. This attractive AU example offers well-detailed design elements that show just a touch of actual wear, and lightly abraded, slightly granular, chocolate-brown surfaces. Listed on page 414 of the 2016 *Guide Book*. Population: 6 in 50, 3 finer (7/15). NGC ID# 2UBN, PCGS# 600512

PATTERNS

1863 Ten Dollar in Bronzed Copper
Judd-352, PR64 Red and Brown

4303 1863 Ten Dollar, Judd-352, Pollock-424, R.6, PR64 Red and Brown PCGS. CAC. Similar to the adopted design for the eagle with the addition of the motto GOD OUR TRUST directly onto the field above the eagle's head. Struck in copper and bronzed with a reeded edge. The Red and Brown designation indicates the underlying (non-bronzed) coin is full red, while the bronzing has added a layer of brown atop the underlying surfaces. One diagonal mark (planchet depression?) on the lower portrait of Liberty is all that separates this piece from an even higher grade. Housed in a first generation holder. PCGS# 70514

1877 Half Union, PR63
Very Rare Fifty Dollar Pattern
Judd-1549, Copper Gilt

4304 1877 Fifty Dollar, Judd-1549 Gilt, Pollock-1722, Low R.7, PR63 NGC. In their 1913 pattern reference, Edgar Adams and William Woodin wrote:

“1877. In this year was struck at the mint two of the rarest and most interesting pattern coins of the whole series. They were of a denomination higher than any coin of regular issue, being of fifty dollars value, and are regarded by all collectors as the most desirable coins ever issued at the United States Mint.”

The fifty dollar patterns, named half unions, were struck in both Large and Small Head varieties, both types using a common reverse. One specimen of each design was struck in gold (Judd-1546 and Judd-1548) and a small number of copper examples of each design were also produced (Judd-1547 and Judd-1549). Some of the copper coins, including the present Small Head Judd-1549 specimen, were gilt, but it is not clear if this was done at the Mint or later.

The idea for the \$100 union and \$50 half union gold coinage originated during the California Gold Rush in the 1850s. By the time the San Francisco Mint opened in 1854, most of the familiar Assay Office fifty dollar slugs (struck with semi-official status in 1851 and 1852) had either been exported to pay off large transactions or turned in to be melted for smaller denomination coins that were more convenient for everyday purchases. Since paper money was nonexistent in the California economy during the Gold Rush era, the need for larger denomination gold coins was keenly felt by merchants and bankers who conducted large transactions in the course of their business. These businessmen petitioned Senator William Gwin and Secretary of the Treasury James Guthrie to authorize the striking of fifty dollar gold coins of the same shape and fineness as the United States double eagle. Gwin introduced a bill to provide for the minting of large denomination gold coinage as follows:

“That there shall be coined and issued by the United States, or by such of the branch mints as the Secretary of the Treasury shall direct, a gold coin of the weight of 2,580 grains, of the value of one hundred dollars, and another of the weight of 1,290 grains, of the value of fifty dollars, each of which coins shall be of the standard fineness now prescribed by law for the gold coins of the United States.”

Gwin's bill passed in the Senate on June 16, 1854, but it failed in the House. The private San Francisco firm of Wass, Molitor & Co. struck large numbers of fifty dollar gold pieces in 1855 to serve the purpose the half unions were intended for and the large gold coins were never officially issued by the United States.

Many years later, in 1877, the half union patterns were struck at the Philadelphia Mint during the directorship of Henry Richard Linderman. Linderman was a clerk at the Mint in 1855, and may have remembered the half union proposal from his early days in government service. He had many patterns struck for unofficial reasons during his later terms as Mint Director and formed a spectacular collection of his own, mostly of pattern and restrike issues. The half unions were apparently a “pet project” of Linderman's, according to the editor of the 10th edition of the Judd reference, as there was no pressing need for the large gold coins in 1877.

Impressions from the dies for the half union were reportedly sent to Linderman on August 30, 1877, so the patterns must have been struck in late August. The two gold half unions weigh 1289.1 and 1287.3 grains respectively, in line with the specifications outlined in Gwin's 1854 bill. Mint correspondence of the time indicates that Mint personnel feared such large gold coins would be especially vulnerable to rim filing and being hollowed out and filled by base metal, such as lead. The project was soon abandoned as impractical, and the copper patterns were clandestinely marketed to favored collectors. Chief Coiner A. Loudon Snowden acquired the two gold half unions, which were supposed to be melted, by paying the Mint Director the bullion value and a charge for pattern pieces. He later sold these coins to William Woodin, future Secretary of the Treasury, with coin dealer John W. Haseltine acting as intermediary. A scandal ensued when the transaction was made public and a complicated series of legal maneuvers and under-the-table deals resulted in Woodin returning the half unions in exchange for a treasure trove of other patterns, presumably also acquired by Snowden during his tenure as Chief Coiner, and later Superintendent, at the Philadelphia Mint. The gold half unions are safely ensconced in the National Numismatic Collection at the Smithsonian Institution today. USPatterns.com suggests fewer than a dozen examples of Judd-1549 survive today, with one specimen in the Smithsonian and another in the Connecticut State Library. About half the known specimens are gilt.

The early history of the present coin is unknown, but it appeared in lot 2587 of the Royal Sale (B. Max Mehl, 3/1948), where it was part of the consignment of Dr. Christian Allenburger, of Columbus, Nebraska:

“1877 Fifty-Dollars. Beautiful head of Liberty with diadem inscribed LIBERTY. Thirteen stars, date below. Reverse, large eagle similar to the type on our Double Eagles; motto above. Legend, UNITED STATES OF AMERICA. FIFTY DOLLARS. Milled edge. Struck in copper and gilt. AW-1501. Only about fifteen specimens minted in all. Of highest historical interest and, of course, excessively rare. I doubt if more than two specimens have been offered at auction in the past more than thirty years. A beautiful and thrilling coin to own. Am informed that a specimen sold for over \$1,000.00 in the past two or three years, but its auction record is not that high. The last specimen I offered was in the great Olsen Collection of Pattern coins where a similar specimen brought \$525.00”

The coin was purchased for the fabulous collection of King Farouk of Egypt. When his government was overthrown in a military coup in the early 1950s, his collections were sold in a series of auctions that were a sensation at the time and still resonate today. Lot 2019 of the Palace Collections of Egypt (Sotheby's, 2/1954) contained both this coin and an example of Judd-1547, the Large Head half union in copper. The lot sold to U.S. collector Robert Schermerhorn, one of the few Americans to attend the sale in Cairo. This piece was later offered in lot 1352 of the 1979 ANA Auction by one of our predecessor companies, New England Rare Coin Auctions, passing through a few unknown intermediaries to our present consignor.

At two inches in diameter and 1/8 of an inch thick, the size of this marvelous coin is truly majestic. The star and letter punches are from the set used on double eagles, and they are dwarfed by the extensive fields of the half union, appearing quite tiny around the peripheries. The design elements exhibit razor-sharp definition throughout, and the well-preserved surfaces are smooth and evenly colored. Like most gilt coins, the luster is a little flat and matte-like, rather than vibrant. The gold plating has worn thin in a few spots on the rim, and there is a small smudge in the left obverse field. Two tiny lintmarks, one touching Liberty's curls about level with star 3, and another touching the curl slightly above star 1, act as pedigree markers. Eye appeal is tremendous. Beautifully preserved and rarely offered, this lot represents an important opportunity for the advanced pattern specialist. Census: 2 in 63, 2 finer (8/15).

Ex: Dr. Christian Allenburger; Royal Sale (B. Max Mehl, 3/1948), lot 2587; King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 2019; Robert Schermerhorn; Mail Bid Auction Sale (Ruth Green, 7/1954), lot 89; possibly James Sloss; Dr. Henry Jarecki; St. Louis ANA Auction (New England Rare Coin Auctions, 7/1979), lot 1352, unknown intermediaries, Long Beach Signature (Heritage, 9/2014), lot 3583. NGC ID# 2AEY, PCGS# 61894

1879 Morgan Half Dollar in Silver
Judd-1601, PR65

4305 1879 Morgan Half Dollar, Judd-1601, Pollock-1796, High R.6, PR65 PCGS. CAC. Morgan's bust for the 1878 silver dollar appears on the obverse, reduced here in scale for the half dollar denomination. E PLURIBUS UNUM and the stars have a layout similar to the Morgan dollar obverse. The reverse features a perched eagle sans wreath. The eagle clutches an olive branch with seven leaves, and three arrows with large arrowheads. IN GOD WE TRUST is widely spread and in tiny letters. Struck in silver with a reeded edge. More than a dozen examples are known in both silver and copper, according to USPatterns.com. This is a magnificent piece with heavily frosted devices set against the deeply reflective fields. The center of each side is untoned while the margins show golden-russet and deep blue rings of color. PCGS# 61979

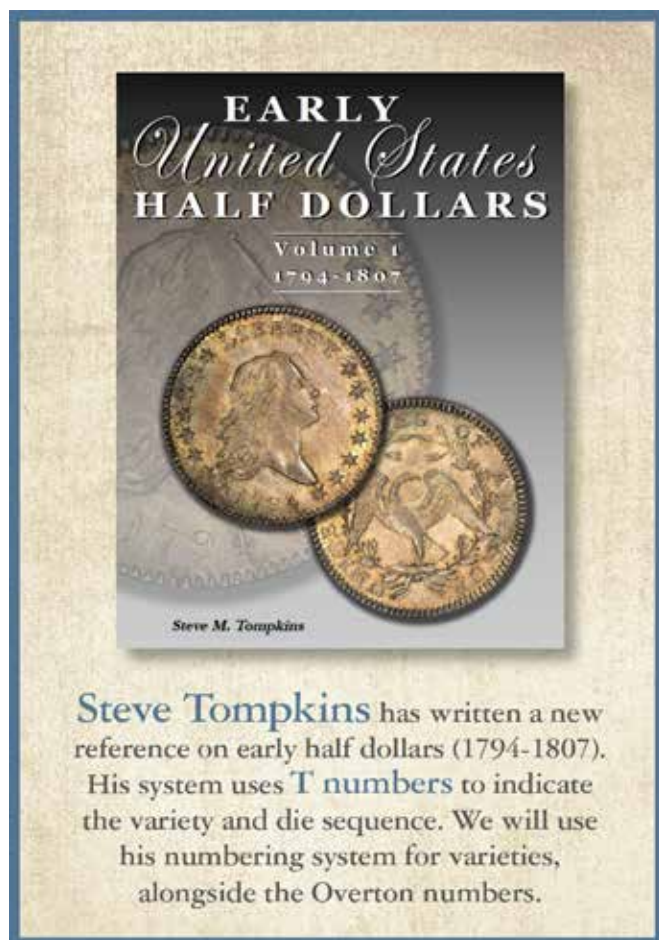

End of Session Two

SESSION THREE

EARLY HALF DOLLARS

- 4306** 1795 2 Leaves, O-104, T-24, R.4, Good 6 NGC. A slate-gray Flowing Hair half dollar that exhibits bold legends. The wreath and portrait are clearly outlined. Only the stars near 3 o'clock are faint. Slight edge dings are noted at 8 o'clock on the obverse and 4 o'clock on the reverse, but there are no other mentionable marks. NGC ID# 24E7, PCGS# 39219 Base PCGS# 6052
- 4307** 1795 2 Leaves, O-105, T-25, High R.3, Fine 12 NGC. CAC. A pleasing olive-gray Flowing Hair half, the toning not too deep with light-gray contrasting color on the high points of the raised elements. Star one shows two points firmly embedded in the first curl, and the reverse displays 10 berries on the left side of the wreath with seven berries on the right. Tiny circulation marks are visible with a glass, but in-hand the coin appears smoothly worn and attractive. CAC endorsement. NGC ID# 24E7, PCGS# 39220 Base PCGS# 6052
- 4308** 1795 2 Leaves, O-108, T-17, R.4 — Scratch — PCGS Genuine. VF Details. A slender but fairly deep mark is noted on both the left and right obverse field. The portrait exhibits moderate slide marks. Otherwise, this golden-brown and gunmetal-gray example will satisfy many early type collectors. NGC ID# 24E7, PCGS# 39225 Base PCGS# 6052
- 4309** 1795 2 Leaves, O-109, T-16, R.4 — Obverse Repaired — NGC Details. VF. An area of smoothing in the right obverse field is the apparent reason for the NGC net grade, perhaps from the removal of graffiti or some other such marks. Otherwise, the coin displays light silver-gray surfaces and sharp definition on the motifs for the assigned grade, and it retains substantial appeal despite the noted handiwork. NGC ID# 24E7, PCGS# 39227 Base PCGS# 6052

1795 Half Dollar, O-110a, Fine 12

- 4310** 1795 2 Leaves, O-110a, T-21, R.3, Fine 12 PCGS. CAC. Dual arc-shaped cracks across the upper right obverse identify the Overton variety. This unblemished gunmetal-gray half dollar exhibits partial plumage and hair definition. All legends are bold except for the base of the date. Very scarce in the present grade with a CAC seal. NGC ID# 24E7, PCGS# 39229 Base PCGS# 6052

1795/1795 Flowing Hair Half Dollar, O-111, VG10

- 4311** 1795/1795 3 Leaves, O-111, T-19, High R.4, VG10 NGC. This Guide Book variety corresponds to T-19 in the new Tompkins variety reference. O-111 shows the date boldly recut with three leaves below the eagle's wings. A heavy die break at 10 o'clock on the reverse weakens STATES, but this example retains bold interior motifs. Wear is even over each side and the patina includes gunmetal-blue and golden-gray hues. A few faint adjustment marks remain along the lower-right portion of the obverse border. NGC ID# 24E7, PCGS# 39245 Base PCGS# 6053

1795/1795 Flowing Hair Half, O-112, Fine 12

- 4312** 1795/1795 2 Leaves, O-112, T-20, R.4, Fine 12 NGC. Ex: Hilt Collection. The date is widely repunched over a lower 1795, an obverse shared with the well-known Three Leaves Overton-111 variety. Here, the obverse die is paired with a Two Leaves reverse. In addition to the dramatic doubled date, the B in LIBERTY is broadly repunched at the right and the E is less noticeably repunched. This example shows deeply iridescent toning with olive-gray, gunmetal-blue, and gold shades covering the old-silver surfaces. The rims are nearly full with a minor indent at 4 o'clock on the reverse and slight weakness at OF in the top legend. This is a pleasing collector-grade example of the always in-demand variety. NGC ID# 24E7, PCGS# 39246 Base PCGS# 6055

**1795/1795 O-112 Half Dollar, AU Details
Two Leaves, Widely Recut Date**

4313 1795/1795 2 Leaves, O-112, R.4 — Repaired — NGC Details. AU. O-112 is one of two die marriages that employ Obverse 6, which is famous for its widely recut date. This variety is not particularly rare in the absolute sense, but it is conditionally scarce in AU or better condition. This briefly circulated piece shows the bold late die state crack on the obverse, downward between the ER in LIBERTY, to the lower edge of the bust above the 9 in the date. The central devices and border dentils are sharp and show just a brush of friction. The left obverse field shows tool marks, mostly hidden by the rich olive-gray patina. Both sides are lightly die clashed. NGC ID# 24E7, PCGS# 39246 Base PCGS# 6055

4314 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, VG10 PCGS. CAC. A over E in STATES. Struck from a late state of the dies, with prominent die cracks at the top of LIBERTY and numerous die lumps around stars 13 and 14. Faint die cracks branch out from the diagnostic patchy die lump between 5 of the date and star 15. Golden-brown toning on the motifs stand out against deep, slate-gray fields. The rims and dentils are ideal for the grade. A double green label coin, housed in a green label holder with the green CAC endorsement sticker. NGC ID# 24E7, PCGS# 39254 Base PCGS# 6052

4315 1795 2 Leaves, O-119, T-1, R.4, VG10 NGC. Ex: Hilt Collection. A diagnostic die lump above star 15 is the most recognizable identifier of the Overton-119 variety, which utilizes a reverse die that was likely left over from 1794 according to the new Steve M. Tompkins reference (which assigned the number T-1 as the first die pair in the emission sequence for the 1795 Flowing Hair halves). Warm-gray toning covers the fields of this smoothly worn half, with rose-gray devices for a two-tone look. A few mild adjustment marks are seen along the reverse border. The coin retains nice detail for the assigned grade. NGC ID# 37SC, PCGS# 39236 Base PCGS# 6052

4316 1795 2 Leaves, O-125, T-13, R.4 — Improperly Cleaned — NGC Details. Fine. Ex: Hilt Collection. An original-looking silver-gray patina shows gold toning accents in protected areas — possibly the result of a previous cleaning — but not particularly distracting on the present coin. VF detail remains on the motifs. Several light adjustment marks run vertically across the reverse. Even so, this example retains considerable appeal for the assigned grade.

4317 1802 O-101, T-1, R.3, VG10 PCGS. Only one pair of dies was used to strike the 29,890 half dollars produced in 1802. This pleasing example retains all letters in the legend intact, but with some wear. The central devices are complete in outline and retain some interior detail. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

4318 1803 Large 3, Small Reverse Stars, O-101, T-1, R.3, VF35 PCGS. CAC. Golden-brown and gunmetal-blue toning graces this moderately abraded Draped Bust half dollar. Glimpses of luster emerge from the curls and shield, although portions of E PLURIBUS UNUM are faint. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

**1803 Half Dollar, Choice XF
O-101, Large 3, Small Stars**

4319 1803 Large 3, Small Reverse Stars, O-101, T-1, R.3, XF45 PCGS. Blended dove-gray and chestnut-gold toning embraces this minimally abraded, evenly struck, and partly lustrous half dollar. A small strike-through (as made) is located on the bust truncation near the curl. The reverse border exhibits minor die rust, as made. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

4320 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, XF40 PCGS. Overton-103 is the sole 1803 die marriage that combines a Large 3 in the date with a Large Stars reverse. An attractive and problem-free steel-gray half dollar. E PLURIBUS UNUM is sharp, and both sides retain glimpses of luster. NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066

**1806 Draped Bust Half, Fine 15
Seldom Seen O-110, Pointed 6, Stem**

4321 1806 Pointed 6, Stem, O-110, T-10, R.6, Fine 15 PCGS. A seldom-seen variety, missing from many advanced collections and one of the rarest and most desirable 1806 varieties — not to mention for the entire series. A heavy obverse die crack extends from the edge between stars 10 and 11 to Liberty's mouth, with a branch crack extending up to the nose. The area between these cracks is slightly elevated. The reverse is characterized by five stemless berries. Early break-up of the obverse die explains the rarity of the variety. This is a smoothly worn, deeply toned example with deep, gunmetal-blue fields and contrasting light-tan toning on the high points of the motifs. Sharp detail remains for the grade. Diagnostic weakness at the field stars and scroll above typifies the variety. We have offered only three or four examples of this die pair in the past 15 years. PCGS# 39312 Base PCGS# 6071

4322 1806 Pointed 6, Stem, O-115, T-17, R.1, VF35 PCGS. CAC. A cream-gray and tan-brown type representative. The letters in PLURIBUS are faint but readable. Marks are absent aside from two tiny field ticks near the chin and a slight edge bump near the IC in AMERICA. NGC ID# 24EJ, PCGS# 39317 Base PCGS# 6071

4323 1806 Pointed 6, Stem, O-116', R.7, XF40 NGC. This variety shows recutting on TY in LIBERTY and five berries on the olive branch. Die cracks connect the date and first two stars, while the reverse is in a very rare early state without any cracks. Late die state examples of O-116 are only rated R.3. Deep gunmetal toning dominates with pearl-gray patina over the high points. The devices are well-struck. Remarkably unabraded. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

4324 1807 Draped Bust, O-102, T-8, R.2, XF40 ANACS. Iridescent cherry-red, lemon-gold, and cobalt-blue patina encompass this well defined and luminous early half dollar. Remaining luster is extensive for the XF40 level. Certified in a small-sized holder. NGC ID# 24EM, PCGS# 39339 Base PCGS# 6079

4325 1807 Draped Bust, O-102, R.2, XF40 NGC. CAC. Autumn-brown and jade-green accompany the borders, but the majority of this Draped Bust type coin is toned dove-gray. Moderately circulated and problem-free. Double-clashed below the chin, customary for Overton-102. NGC ID# 24EM, PCGS# 39339 Base PCGS# 6079

4326 1807 Draped Bust, O-105, T-4, R.1, VF35 PCGS. The leaf below 1 points below the space between I and C, a diagnostic feature of this available Draped Bust die pair. Housed in a green-label PCGS holder, this example has light gray and faintly iridescent toning over surfaces that show a few light lines and minor marks. Sharp details on the devices remain on this Choice representative of the VF level. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

BUST HALF DOLLARS

**1807 Capped Bust Half, AU55
O-112, 50 Over 20 Reverse**

4327 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU55 PCGS. One of two die pairings which comprise the 50 over 20 Guide Book variety. O-112 is differentiated from O-111 by studying the 1 in the date, which on this variety has both bottom serifs and on O-111 is missing the left. This Choice AU O-112 example retains most details and a significant portion of its original luster. There are no bothersome abrasions and each side displays a touch of light golden toning. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

4328 1811 Small 8, O-105a, R.2, AU55 PCGS. The usual late die state with a crack across most of the reverse border. A tan-brown half dollar with glimpses of olive-green near the rims. The partly lustrous surfaces are unabraded and exemplary for the grade. NGC ID# 24EU, PCGS# 39428 Base PCGS# 6097

4329 1811 Small 8, O-105a, R.2, AU55 PCGS. CAC. Gunmetal-gray motifs rise above olive-gray fields and chestnut-gold borders. An unblemished and original example. O-105a has small die breaks within the upper shield and a long die crack across the reverse periphery. NGC ID# 24EU, PCGS# 39428 Base PCGS# 6097

4330 1811 Small 8, O-106, R.3, AU53 PCGS. CAC. A pleasing dusky dove-gray half dollar. No marks are apparent on either side, though a small spot is present beneath the S in PLURIBUS. A late die state with double-clashed fields and the stars drawn toward the edge. NGC ID# 24EU, PCGS# 39429 Base PCGS# 6097

1813 Half Dollar, O-106, Lustrous MS61

4331 1813 O-106, R.2, MS61 PCGS. Uncirculated, with a hint of champagne toning over satin luster. Light, scattered abrasions limit the grade. This O-106 representative is characteristically weak on the bust tip and lower-left stars, as well as the corresponding portion of the reverse margin. The central hair curls and eagle's talons are nonetheless sharp. NGC ID# 24EZ, PCGS# 39465 Base PCGS# 6103

**1821 O-102 Bust Half, MS63
Attractive, Surprisingly Scarce**

4332 1821 O-102, R.2, MS63 NGC. Recognized by the joined ME at the top of AMERICA and by die lumps beneath the I in UNITED, the Overton-102 variety is available in circulated grades but scarce in Uncirculated condition. This Select example is tied for third in the Condition Census for the variety according to both the Parsley and Herrman listings. Remarkably, we believe this is the finest example of the die pair we have ever offered at auction. Lustrous and sharp, gunmetal-blue accents enrich the bronzelike patina. The surfaces are free of all but the most trivial marks. A better date and a conditionally scarce variety despite the modest R.2 rating. NGC ID# 24FF, PCGS# 39577 Base PCGS# 6128

4333 1821 O-104a, R.2, AU58 NGC. Die polish lines near Liberty's throat attribute the present partially lustrous and nicely struck Bust half. Light straw-gold and blue-green toning visits the margins. Minimally abraded and attractive. NGC ID# 24FF, PCGS# 39581 Base PCGS# 6128

4334 1826 O-104a, R.3, MS62 NGC. Rich lilac, caramel-gold, and lime-green toning encompasses coruscating and unmarked surfaces. Die cracks through the left-side stars and the C in 50 C serve to identify this moderately scarce Overton pairing. NGC ID# 24FM, PCGS# 39671 Base PCGS# 6143

4335 1826 O-110, R.2, MS63 NGC. The fields and devices are stone-gray, but orange-red toning outlines the eagle, and the borders display forest-green. Lustrous and nicely struck with minimally abraded fields and centers. The obverse margin shows distributed tiny marks. NGC ID# 24FM, PCGS# 39679 Base PCGS# 6143

4336 1826 O-114, High R.4, MS62 NGC. A better Overton variety often attributed by the partly filled N in UNITED. Sea-green, walnut-brown, and lavender toning embraces this satiny and moderately abraded half dollar. A late die state with peripheral elements drawn toward the rims. NGC ID# 24FM, PCGS# 39685 Base PCGS# 6143

4337 1826 O-120a, Low R.4, MS63 PCGS. Two lengthy reverse die cracks confirm the scarce Overton variety. Wheat-gold and cobalt-blue encompass this fully struck and satiny representative. Relatively unabraded, although a small spot below the N in UNUM serves as an identifier. NGC ID# 24FM, PCGS# 39695 Base PCGS# 6143

4338 1827/6 O-101, R.2, MS62 PCGS. Traces of an underdigit and lengthy reverse peripheral die cracks combine to attribute this lightly abraded Capped Bust half. Golden-brown luster accompanies design elements. The high points are steel-gray and the fields are untoned. NGC ID# 24FF, PCGS# 39751 Base PCGS# 6147

4339 1827 Square Base 2, O-105, R.3, MS62 NGC. The flag of the 5 in the denomination is recut. A pearl-gray piece with good luster and smooth surfaces. Well-struck in the centers and on the left borders, although the right-side stars are soft.
Ex: *FUN Signature* (Heritage, 1/2007), lot 4394; *Central States Signature* (Heritage, 5/2007), lot 738; *Long Beach Signature* (Heritage, 9/2011), lot 3979. NGC ID# 24FN, PCGS# 39697 Base PCGS# 6144

1827 O-135 Half Dollar, MS64
Condition Census Quality
Square Base 2

4340 1827 Square Base 2, O-135, R.3, MS64 PCGS. Light golden-brown toning graces the borders of this lustrous and lightly abraded half dollar. The stars are softly brought up but the rest of the coin is sharp. The "Rotated A in STATES" variety with minor repunching apparent on AT. An early die state example with full dentilation. Possibly the single finest 1827 O-135. Herrman records the Condition Census (excluding the present piece) as 64-63-63-62 with the MS64 appearing sans photo in a September 1997 Stack's auction. NGC ID# 24FN, PCGS# 39734 Base PCGS# 6144

1830 Large O Half Dollar, MS64
Scarce O-121 Variety

4341 1830 Large O, O-121, R.3, MS64 PCGS. The fields are golden-brown and orange, while the borders display forest-green and lavender. Satiny and minimally abraded with pleasing eye appeal. The strike is good despite blending on a few stars and the RI in PLURIBUS. O-120 closely resembles the more available O-121, and the two varieties share the same reverse die. On O-120, the 8 is centered between dentils, while on O-121, the 8 is centered over a dentil. NGC ID# 9KXX, PCGS# 39832 Base PCGS# 6157

4342 1834 Large Date, Small Letters, O-105, R.1, MS62 PCGS. The 4 in the date and ATES are recut. Golden-gray hues lightly grace surfaces that show considerable mint brilliance remaining. The impression is strong with minor blending over stars 1 to 4, the hair curls, and the eagle's left (facing) wing feathers. The is the scarcest of three 1834 varieties. NGC ID# 24FY, PCGS# 39909 Base PCGS# 6165

4343 1835 O-102, R.3, MS61 NGC. Deep dove-gray and golden-brown toning embraces this satiny and refreshingly unabraded Bust half. The right-side stars are lightly brought up, but the strike is generally bold. NGC ID# 24FZ, PCGS# 39928 Base PCGS# 6168

4344 1836 Lettered Edge, O-104a, R.3, MS63 PCGS. Dusky dove-gray toning blankets the obverse, while the equally original reverse displays blended sea-green, gold, and aqua-blue. A satiny and unmarked example with a crisp strike and obvious eye appeal. Housed in an old green label holder.
Ex: *Milwaukee ANA Signature* (Heritage, 8/2007), lot 826, which realized \$1,782.50. NGC ID# 24G2, PCGS# 39942 Base PCGS# 6169

4345 1836 Lettered Edge, O-114, R.2, MS61 NGC. A thin skin of golden toning covers the lustrous silver surfaces of this Brilliant Uncirculated Lettered Edge half. The Overton-114 variety is confirmed by recutting on star 7 between the upper points, as well as recutting on the 5 of the denomination with faint remnants showing to the right of the flag. Soft luster glows beneath the translucent patina, with a sharp strike except on the scroll beneath STATES. NGC ID# 24G2, PCGS# 39949 Base PCGS# 6169

REEDED EDGE HALF DOLLARS

1837 Reeded Edge Half, MS63
GR-13, Lustrous Satin Surfaces

4346 1837 GR-13, R.1 MS63 PCGS. Bluish-gray toning surrounds ivory-gold centers on both sides of this smooth and lustrous Select Uncirculated half. The central details are sharply impressed with exception of stars 4 to 6, where a series of linear abrasions — possibly of Mint origin — cross the portrait between 1 and 9 o'clock. The eye appeal is far above average for the assigned grade. PCGS# 531059 Base PCGS# 6176

4347 1838 GR-13, R.1, MS61 PCGS. Lustrous and well preserved with a nearly brilliant obverse and a chestnut-gold reverse. The centers are sharply struck, although the borders show minor incompleteness. Certified in an old green label holder. NGC ID# 24G5, PCGS# 531094 Base PCGS# 6177

1838 GR-15 Half Dollar, MS63
Smooth, Lustrous, Lightly Toned

4348 1838 GR-15, R.3, MS63 PCGS. Delicate chestnut-gold toning drapes this lustrous Select reeded edge half dollar. The major devices are well struck, while peripheral elements retain traces of the texture of the planchet. Marks are minimal for the designated grade. An early die state without any of the cracks referenced in Graham-Reiver. PCGS# 531096 Base PCGS# 6177

4349 1839-O GR-1, R.1 — Cleaning — PCGS Genuine. AU Details. The 1839-O is a slightly better date, coming from a mintage of only 116,000 pieces. This piece is sharply detailed, with minimal evidence of circulation. Lightly cleaned in the past, the surfaces have since retuned deep gunmetal-gray. The reverse die is shattered. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

SEATED HALF DOLLARS

4350 1840 Small Letters, Reverse of 1839, WB-101, MS63 PCGS. Bright and essentially untuned other than a few brief glimpses of color, this Select representative possesses sharply struck design elements. Two or three shallow obverse marks exist, although the overall surfaces are smooth and clean for the grade. Population (all Small Letters varieties): 17 in 63, 27 finer (8/15).
Ex: *Long Beach Signature* (Heritage, 9/2004), lot 6615. NGC ID# 24GM, PCGS# 572002 Base PCGS# 6234

4351 1843-O/O WB-102, Die Pair 14, R.3, MS61 Prooflike NGC. Brilliant and entirely untuned, the prooflike surfaces are visited by numerous light abrasions but no heavy marks. The central devices are frosted and sharply struck except at Liberty's hair curls, which show some blending, and the right-side star centers lack detail. Struck from a middle die state, repunching no longer shows on the mintmark but all other diagnostics for Die Pair 14 are present. This is the sole prooflike example at NGC. Census: 1 in 61 Prooflike, 0 finer (8/15). PCGS# 572024 Base PCGS# 6244

4352 1846 Tall Date, Repunched Date, WB-107, MS63 PCGS. The 1 and 4 are lightly repunched at the bases, and heavy horizontal die lines are located under the lower three olive leaves. This variety is rarely seen in Mint State. This is a cream-gray representative with uncommonly smooth surfaces. A sharp strike save for the star left of the cap. Population (all varieties included): 21 in 63 (1 in 63+), 14 finer (7/15).
Ex: *Dallas Signature* (Heritage, 10/2009), lot 677; *FUN Signature* (Heritage, 1/2011), lot 3789. PCGS# 572046 Base PCGS# 6252

1846-O Seated Half, Scarce MS62
WB-103, Repunching on the Date

4353 1846-O Medium Date, Repunched Date, WB-103, Die Pair 5, R.4, MS62 PCGS. The 18 in the date is repunched north, and numerous die cracks confirm the die pair including a bold crack at U of UNITED that is on the verge of forming a cud. Patchy blue and golden-gray toning covers fields that show various degrees of prooflikeness. The strike is extremely sharp throughout for this New Orleans issue. Abrasions and marks are small but numerous, defining the assigned grade, but the Medium Date halves are underrated and they are rare in all Mint State grades. Population: 7 in 62, 5 finer (8/15). NGC ID# 27SW, PCGS# 572050 Base PCGS# 6255

1853 Half Dollar, MS63
Single-Year Arrows and Rays Subtype
WB-101, FS-802 Doubled Die Reverse

4354 1853 Arrows and Rays, Doubled Die Reverse, WB-101, FS-802, MS63 PCGS. A mostly brilliant and frosty example of this one-year type, with faint golden overtones visible on the reverse and at the obverse margin. Sharply struck except on Liberty's lowest curls and on the reverse arrow fletchings as well as the left talon. The denomination HALF is doubled at the bottom of the letters, suggesting the scarce FS-802 variety. Nice mint luster offsets the few light lines and marks that define the Select Uncirculated grade. PCGS# 413718 Base PCGS# 6275

4355 1859 MS64+ NGC. A thick patina of royal-blue, violet, and orange-gold toning blankets both sides of this high-end near-Gem half, with sharply struck motifs and splendid eye appeal. A moderate mintage of 747,200 pieces was not saved to any great extent, and the Philadelphia issue is challenging so well-preserved. The surfaces are nearly mark-free, and mint luster shines through the original toning. Census: 21 in 64 (2 in 64+, 1 in 64 ★), 10 finer (8/15). NGC ID# 24HY, PCGS# 6296 Base PCGS# 6296

4356 1860-O Type One Reverse, Distorted Stripes, WB-102, Die Pair 3, R.3, MS64 PCGS. This is the more frequently seen of two die pairings that employ this "Weird Vertical Stripes" reverse. Most of the vertical shield stripes were reengraved at bizarre angles, creating the distinctive variety. This Choice example offers wonderful mint luster with just a slight touch of field haze, but the appeal is enormous. The strike is sharp and the surfaces display a touch of light golden toning. Population: 37 in 64 (2 in 64+), 23 finer (7/15).
Ex: *Central States Signature* (Heritage, 4/2008), lot 1129. PCGS# 572138 Base PCGS# 6300

4357 1866-S No Motto, Small Thin S, WB-101, Die Pair 1, R.4, XF40 PCGS. This is the only known die pair for the No Motto 1866-S half dollar, the final issue in the No Motto series. Only 60,000 pieces were struck, making the date elusive in all grades. This example is lightly circulated, as are most representatives, but retains strong detail in Liberty's gown and the eagle's plumage. Both sides show original golden-gray patina. Population: 18 in 40, 30 finer (7/15). PCGS# 572170 Base PCGS# 6315

4358 1869-S WB-101, Die Pair 3, R.3, MS62 PCGS. Previously from Dick Osburn's personal collection. The date is further right than on other die pairs of this scarce San Francisco date, and distinct die lumps appear on Liberty's gown near the left (facing) forearm and another below the right knee. Struck from an earlier state of the reverse die, with a strong, very small mintmark and no visible die cracks above the legend. This coin is extremely frosty and pearly, with mint luster plentiful but subdued beneath the thick frost. The strike is sharp but not quite full at Liberty's head and the surrounding stars. Mint State examples are always a challenge for this better-date issue. Population: 2 in 62, 14 finer (7/15). PCGS# 572187 Base PCGS# 6326

4359 1871-S Very Small S, WB-102, Die Pair 4, R.2, MS62 NGC. Ex: Richmond Collection. The central devices are sharply defined, although the upper obverse stars exhibit moderate weakness. Modest semiprooflike mirroring in the fields illuminates just a blush of light golden toning. A few mint-made planchet streaks appear on the reverse, but there are no obvious abrasions. Census: 8 in 62, 14 finer (7/15). PCGS# 572199 Base PCGS# 6332

4360 1872-CC WB-101, Die Pair 3, R.4, VF30 NGC. Somewhat outranked in importance by the surrounding Carson City dates, the 1872-CC is in itself a challenging, low-mintage date in the series. This moderately circulated example displays medium silver-gray surfaces and sharp remaining detail. The letters of LIBERTY — with the exception of E — are bold, with the E partially visible. A small rim mark near star 1 is noted. Census: 10 in 30, 45 finer (7/15). PCGS# 572203 Base PCGS# 6334

4361 1873-CC No Arrows, Small CC, WB-101, Die Pair 2, R.5, XF40 PCGS. Closed 3 in the date, as are all of the 1873 No Arrows halves. Two die pairs were used to strike a reported mintage of 122,500 pieces prior to the mandated weight change. This variety shows the date farther to the right than its companion die marriage for the type. Reportedly, many pieces were melted after April, 1873 and recoinced as the Arrows type. The surfaces of this XF example are smooth and pleasing with only a few minor marks — sharply defined, with light, silver-gray patina and some deeper toning in the recesses. Population (both No Arrows varieties): 15 in 40, 36 finer (7/15). PCGS# 572214 Base PCGS# 6338

**1873 Arrows Seated Half, MS64
WB-106, Smooth, Brilliant Surfaces
Low Population Issue**

4362 1873 Large Arrows, WB-106, MS64 NGC. First year of the two-year Arrows type. Thick, frosted mint luster swirls around the untoned, brilliant surfaces of this attractive Large Arrows half. Sharply struck in all areas except for slight incompleteness at Liberty's head and the surrounding two stars as often seen. The exceptional fields are free of all but the most minor marks and abrasions. Simply outstanding quality in this popular type coin. Census: 16 in 64, 9 finer (8/15). Ex: FUN Signature (Heritage, 1/2007), lot 4485. From The Stephen A. Walling Collection. NGC ID# 24L7, PCGS# 572211 Base PCGS# 6343

4363 1875 WB-101 MS64 PCGS. A production of more than 6 million pieces yielded few near-Gem and finer coins for such a large mintage. This attractive example displays ocean-blue, golden-gray, and hints of rose toning over reflective surfaces. The bold, variegated toning disguises much of the prooflikeness. Sharply struck with a few small marks on Liberty. Population: 44 in 64, 19 finer (8/15). PCGS# 572226 Base PCGS# 6349

4364 1875 WB-101 MS64 PCGS. A lustrous, attractive near-Gem with russet and blue toning accents at the margins and frosty silver centers. Choice for this high-mintage issue, and scarcer than its 6 million-plus production would suggest. Sharply struck with just a few shallow lines on the obverse and no serious marks. Population: 44 in 64, 19 finer (8/15). PCGS# 572226 Base PCGS# 6349

4365 1876-S Open Bud, Very Small S, WB-102, Die Pair 35, R.3, MS64 NGC. Type One Reverse. Very Small S Mintmark. A massive mintage of more than 4.5 million pieces required at least 44 die pairs, with additional varieties yet to be discovered. This example matches the Wiley-Bugert Die Pair 35, an R.3 variety. Choice and appealing surfaces are richly toned with pleasing luster beneath red-violet and dusky-gold patina. Nicely struck, with only a few scattered marks in the fields. Census (all varieties included): 28 in 64 (2 in 64+), 15 finer (7/15). Ex: Dallas Signature (Heritage, 10/2006), lot 1187. PCGS# 572242 Base PCGS# 6354

4366 1888 WB-101 MS64 PCGS. CAC. New half dollars were unneeded throughout the 1880s: Older coins came out of the woodwork as the value of silver dropped and specie payments resumed. Only 12,001 halves were coined in 1888. This is a frosty and brilliant example with minor softness at the upper obverse and a degree of semiprooflikeness. PCGS# 572273 Base PCGS# 6370

PROOF SEATED HALF DOLLARS

4367 1859 PR62 Cameo PCGS. Starting in the late 1850s, the Mint moved forward on a strategy to market proofs to the general public. A comparatively large mintage of 800 Seated half proofs was struck in 1859. This example is brilliant and untoned, with bold contrast between the mirrored fields and the frost-white devices. A glass reveals a razor-sharp proof strike, as well as several scattered, delicate lines that determine the grade. Population: 9 in 62 Cameo, 24 finer (6/15). NGC ID# 27TJ, PCGS# 86413

**1860 Seated Half, PR63+ Cameo
High-End Appeal for the Grade**

4368 1860 PR63+ Cameo PCGS. Gunmetal-blue shades at the margins merge with pale reddish-bronze interiors for substantial eye appeal from this Plus-graded Select Cameo proof. A full strike accompanies smooth mint frost on the devices for nice contrast with the reflective fields. The Mint struck an overly ambitious 1,000 proofs but the public was reluctant to pay a premium for the format, resulting in much of the mintage being melted as unsold. Population: 5 in 63 (1 in 63+) Cameo, 19 finer (8/15). NGC ID# 27TK, PCGS# 86414

- 4369 1861 PR63 NGC.** Brilliant and fully struck with mild contrast between the fields and devices. The surfaces show a few scattered lines and abrasions, but these have little effect on the deep reflectivity of the proof mirrors. A large proof mintage of 1,000 pieces was struck, but many were melted as unsold. Census: 24 in 63, 50 finer (8/15). Ex: *Central States Signature (Heritage, 5/2005)*, lot 7210. From *The Stephen A. Walling Collection*. NGC ID# 27TL, PCGS# 6415

1861 Half Dollar, PR64 Cameo

Ex: Stokely

- 4370 1861 PR64 Cameo PCGS. WB-101.** Ex: Stokely Collection. Medium golden toning visits this sharply struck near-Gem. A tiny obverse gray spot at 6 o'clock is detected, but the preservation is exceptional for the designated grade. 1,000 proofs were struck, but a goodly portion of this emission was eventually melted by the mint. Population: 12 in 64 (2 in 64+) Cameo, 8 finer (7/15). Ex: *Denver Signature (Heritage, 8/2006)*, lot 3369. NGC ID# 27TL, PCGS# 86415

- 4371 1864 PR62 PCGS.** The small proof mintage (470 pieces) was about normal for the Civil War years, restricted both by the Mint's concerns about the war and a distracted public. This gold-toned survivor shows numerous delicate lines on both sides that limit the grade, but the razor-sharp strike and nicely mirrored fields remain to provide substantial eye appeal. NGC ID# 27TR, PCGS# 6418

1864 Half Dollar, PR64

Modest Contrast

- 4372 1864 PR64 NGC. WB-101.** Soft champagne patina resides over each side of this near-Gem proof half. The design features are well-impressed, and their somewhat satiny texture helps them stand out against the mirrored fields. Wispy handling marks prevent the attainment of Gem classification. Census: 52 in 64 (2 in 64+), 21 finer (7/15). Ex: *Central States Signature (Heritage, 4/2010)*, lot 934. NGC ID# 27TR, PCGS# 6418

- 4373 1864 PR62 Cameo PCGS.** Nearly brilliant except for a few faint blushes of clear gold toning, this gleaming proof displays bold contrast between the frosted central motifs and mirrored fields. The Mint produced a lower number of proofs during the height of the Civil War, with the 1864 production of just 470 pieces typical of the later war years. This example has faint, delicate lines visible under magnification and a few pinpoint spots of deep toning, but nice eye appeal and a sharp strike more than offset the few minor surface diversions. Population: 5 in 62 Cameo, 33 finer (8/15). NGC ID# 27TR, PCGS# 86418

**1865 Seated Half, PR64
Final-Year No Motto Type**

- 4374 1865 PR64 PCGS. CAC.** The final No Motto proof of the series saw a restrained mintage of just 500 pieces, in line with other war-year proof production. Based on the number of submissions at the grading services, most proofs survived but relatively few exceed the near-Gem grade of this attractive example. Fawn-gold toning varies in intensity across the deep-mirrored surfaces, with bluish-gray accents for nice eye appeal. The strike is pinpoint-sharp. CAC endorsed for technical and visual quality. Population: 50 in 64 (1 in 64+), 21 finer (7/15). NGC ID# 27TS, PCGS# 6419

- 4375 1868 PR64 Cameo PCGS.** An attractive, near-Gem cameo proof with the expected sharp proof strike and glassy-deep mirrors. The frosted central devices contrast boldly with the beautifully toned fields, which display shades of electric blue, reddish-bronze, and amber gold patina. A few delicate lines are microscopic in nature and do not distract from the in-hand appeal. Population: 14 in 64 (1 in 64+) Cameo, 10 finer (7/15). NGC ID# 27U3, PCGS# 86426

- 4376 1870 PR63 PCGS.** Considerable contrast exists between the figure of Liberty and the deeply mirrored obverse fields. The reverse fields are equally reflective and glassy, although the eagle is less frosted than the other motifs. A thin band of deep amber and blue toning surrounds both sides, while the interior surfaces are virtually untuned. The few light field lines are non-distracting but account for the assigned grade. NGC ID# 27U5, PCGS# 6428

- 4377 1873 No Arrows PR64 PCGS.** Vibrant blue, amber-gold, and burnt orange toning covers the reflective silver surfaces, with frosted smoke-gray patina across the raised elements that spills over into the fields. One of 600 proofs struck with the Closed 3 logotype. The Open 3 was not implemented until the Arrows design was put into use in April, 1873. An original, thickly patinated near-Gem proof, sharply struck, housed in a green label holder. Population: 34 in 64, 33 finer (8/15). NGC ID# 27U8, PCGS# 6431

**1882 Seated Liberty Half Dollar, PR65
Elusive Cameo Specimen**

- 4378 1882 PR65 Cameo PCGS.** Very lightly toned, the devices show a considerable amount of mint frost. Set against the deeply reflective fields, this Gem proof 1882 half dollar exhibits modest cameo contrast. This issue had a mintage of 1,100 pieces, but seldom are Cameo representatives encountered at this grade level. Population: 18 in 65 (2 in 65+) Cameo, 11 finer (8/15). NGC ID# 27UH, PCGS# 86443

**1884 Seated Half Dollar, PR65
875 Pieces Struck**

4379 1884 PR65 PCGS. WB-101. Vivid shades of pale gold, cerulean-blue, and silver-gray toning mingle on the well-preserved surfaces of this delightful Gem. The design elements are sharply detailed and deeply mirrored fields shine through the patina. Eye appeal is outstanding. Population: 22 in 65, 16 finer (7/15). NGC ID# 27UK, PCGS# 6445

4380 1885 PR63 PCGS. Patchy, original blue-gray toning flashes golden highlights across the deep-mirrored surfaces of this Select proof example. The strike is needle-sharp. A few light lines are visible with a glass, but they are well-hidden in the rich toning. Just 930 pieces were struck. NGC ID# 27UL, PCGS# 6446

**1885 Seated Half, Gem Cameo Proof
Well-Contrasted, Ivory-Gold Toning**

4381 1885 PR65 Cameo PCGS. CAC. Excellent, glass-smooth deep mirrors and sharply struck frosted devices earn the Gem grade for this lightly toned late series proof. The pale-ivory patina covers both sides in an evenly mellow hue, while the raised elements are razor-sharp except for the slightest blending of the forehead curls. A wispy line near star 7 and a small planchet flaw between stars 1 and 2 are the only limitations, since the surface quality and eye appeal are suggestive of an even higher grade. CAC endorsed. Population: 18 in 65 (2 in 65+) Cameo, 2 finer (8/15). NGC ID# 27UL, PCGS# 86446

BARBER HALF DOLLARS

**1892 Barber Half Dollar, MS66
Tripled Die Reverse, Multicolor Toning**

4382 1892 Tripled Die Reverse, FS-801, MS66 NGC. Although undesignated as such on the NGC insert, this is the Cherrypickers' variety with clear tripling of design elements throughout the reverse periphery. This lustrous and boldly struck Premium Gem offers dappled forest-green and plum-red toning across much of both sides. Smooth aside from faint contact at the centers. NGC ID# 24LF, PCGS# 145290 Base PCGS# 6461

4383 1893-O MS63 PCGS. CAC. Fire-red borders encompass olive-green and ocean-blue fields and devices. Lustrous and lightly marked with moderate inexactness of strike near the right shield corner. Struck from clashed dies. Population: 35 in 63 (1 in 63+), 53 finer (7/15). NGC ID# 24LL, PCGS# 6466

**1894 Half Dollar, MS65
Frosty and Attractive**

4384 1894 MS65 PCGS. CAC. Ex: Shireman. Traces of gold grace the frosty luster of this Gem 1894 Barber half dollar, allowing for a high degree of eye appeal. Noticeable weakness of strike occurs on the eagle's head and right (facing) talons, but the obverse is razor-sharp. This issue is scarce in MS65, and finer coins are usually out of reach for most collectors. Population: 22 in 65 (1 in 65+), 14 finer (8/15). NGC ID# 24LN, PCGS# 6468

**1894 Barber Half Dollar, MS66
Vivid Multicolor Toning**

4385 1894 MS66 NGC. Richly toned in shades of turquoise, gray, and golden-brown, this impressive Premium Gem displays needle-sharp definition on all design elements, with satiny mint luster and well-preserved surfaces under the patina. From a mintage of 1.1 million pieces. Census: 8 in 66, 1 finer (8/15). NGC ID# 24LN, PCGS# 6468

4386 1896 MS64 PCGS. CAC. The lustrous, well-preserved surfaces of this impressive Choice specimen are blanketed in shades of lavender-gray toning, with sharply detailed design elements and no mentionable distractions. Population: 31 in 64, 19 finer (8/15). NGC ID# 39RH, PCGS# 6474

4387 1896-S XF45 PCGS. The 1896-S ranks among the rarest Barber half dollar regular issues, and a majority of survivors are heavily worn. Problem-free better grade circulated examples are highly elusive. The present cream-gray piece is well defined and is smooth aside from a field tick near the nose. NGC ID# 24LX, PCGS# 6476

**1897 Half Dollar, MS65
Frosty and Fully Struck**

4388 1897 MS65 NGC. This brilliant and frosty Gem displays pinpoint-sharp design features and bright silver surfaces with no evidence of toning on either side. The few minuscule marks do little to inhibit the impressive eye appeal of this beauty. An elusive pre-1900 issue, always challenging to find in Gem or finer grades. Census: 20 in 65, 6 finer (7/15).
Ex: Long Beach Signature (Heritage, 9/2010), lot 4170. NGC ID# 24LY, PCGS# 6477

1897-O Barber Half, Toned MS62

4389 1897-O MS62 PCGS. The 1897-O is a challenging date to locate in Uncirculated condition, partly due to its minimal mintage of 632,000 coins. This piece is sharply detailed, and the flat gunmetal-gray patina accentuates this aspect to the benefit of the eye appeal. There are no mentionable abrasions. Population: 3 in 62, 45 finer (8/15). NGC ID# 24LZ, PCGS# 6478

**1898-O Barber Half, MS64
Brilliant Silver Luster**

4390 1898-O MS64 PCGS. An untoned coin with a vibrant, satiny finish that atones for a few wispy blemishes on and to the right of Liberty's portrait. A few isolated areas of striking weakness are noticed on each side, typical of its New Orleans origin. Scarce in near-Gem, with plenty of visual appeal. Population: 22 in 64, 12 finer (7/15).
Ex: Long Beach Signature (Heritage, 6/2005), lot 6328. NGC ID# 24M4, PCGS# 6481

4391 1899-S MS63 PCGS Secure. An original coin with satiny luster and minimal abrasions for the grade. Both sides show light golden toning, with tinges of amber and russet around the borders. Roller marks appear on Liberty's cheek and the upper-right portion of the eagle, but the definition of strike is nonetheless sharp. Population: 14 in 63, 31 finer (7/15). NGC ID# 24M8, PCGS# 6485

4392 1900 MS65 PCGS. Glistening luster enlivens surfaces toned in rich shades of steel-blue, rose, and golden patina. The strike is razor-sharp on each side, particularly at the juncture of the right shield corner and the eagle's wing, and the arrow fletchings. Population: 36 in 65 (3 in 65+), 11 finer (6/15). NGC ID# 24M9, PCGS# 6486

4393 1901-O AU55 PCGS. CAC. The 1901-O Barber half dollar is seldom encountered in high grade. This Choice AU specimen shows a trace of wear on the well-detailed design elements and the lightly abraded surfaces are blanketed in shades of blue-steel, greenish-gold, and lavender-gray toning. Population: 7 in 55, 46 finer (8/15). NGC ID# 24MD, PCGS# 6490

4394 1901-S AU55 PCGS. CAC. An attractive Choice AU example of this low-mintage issue, this coin shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain significant amounts of original mint luster. Population: 12 in 55, 37 finer (8/15). NGC ID# 5EPB, PCGS# 6491

**1903-S Half Dollar, MS64
Better Date in Mint State**

4395 1903-S MS64 PCGS. CAC. Pale olive-gray toning spans both sides of this coin in a woodgrain pattern, yet allowing vibrant cartwheel luster to fully penetrate. The strike is sharp and there are no major abrasions — only a few small reed marks are hidden in the leaves on the obverse. Population: 22 in 64, 14 finer (8/15). NGC ID# 24ML, PCGS# 6497

1903-S Barber Half, MS65
Surprisingly Scarce in High Grade

4396 1903-S MS65 NGC. This is a brilliant Mint State example of an elusive San Francisco issue. Walter Breen stated that “part of the demand for this date has been influenced by the fame of the dollar, quarter, and dime.” The rest of the demand for the date has been influenced by its low survival rate in high grades. Only 12 MS65 coins have been certified by the major grading services — six pieces by each service — plus a combined total of nine finer examples (7/15). This attractive Gem is sharply struck with brilliant and satiny silver luster, graced by champagne and powder-blue toning. Diagonal roller marks are noted over the reverse.
Ex: ANA Signature (Heritage, 7/2005), lot 6355; FUN Signature (Heritage, 1/2009), lot 2940. NGC ID# 24ML, PCGS# 6497

4397 1904 MS64 PCGS. The 1904 half dollar’s availability drops off significantly above the MS64 level. This piece is light golden with satin luster and minimal abrasions. The strike is bold throughout. Population: 40 in 64, 20 finer (7/15). NGC ID# 5EPG, PCGS# 6498

4398 1904 MS64 PCGS. Sharply detailed design elements and vibrant mint luster are the calling cards of this attractive Choice specimen. The well-preserved surfaces show a few hints of pale gold toning. Population: 40 in 64, 20 finer (8/15). NGC ID# 5EPG, PCGS# 6498

1906 Barber Half Dollar, MS65+
Seldom Encountered in Finer Grades

4399 1906 MS65+ PCGS. A high-end Gem Barber half, with sharply defined design elements and vibrant satiny mint luster on both sides. The well-preserved surfaces are visited by attractive shades of champagne-gold toning and eye appeal is terrific. Population: 26 in 65 (1 in 65+), 6 finer (8/15). NGC ID# 24MU, PCGS# 6504

1906 Half Dollar, MS65
Elusive This Fine

4400 1906 MS65 PCGS. CAC. The availability of this largely plentiful Philadelphia issue plummets at the Gem grade level, following a trend that spans most common dates in the series. The present coin is a high-end example of the issue, showing frosty luster and pleasant champagne toning. The eagle’s right (facing) talons and wing junction show minor weakness. Population: 26 in 65 (1 in 65+), 6 finer (8/15). NGC ID# 24MU, PCGS# 6504

1906-D Barber Half, MS65
Lustrous and Nicely Toned

4401 1906-D MS65 PCGS. CAC. The 1906-D is surprisingly scarce in high grades for a coin with a mintage in excess of 4 million pieces. PCGS has certified 15 Gems, and 10 are finer (8/15). The surfaces of this piece show soft mint frost, and each side has light, speckled rose and gray toning. Sharply struck overall with just a bit of high point softness.
Ex: Long Beach Signature (Heritage, 2/2010), lot 1204. NGC ID# 24MV, PCGS# 6505

1909 Barber Half, MS65
Rarely Encountered Finer

4402 1909 MS65 PCGS. CAC. CAC-approved Gem surfaces exhibit satiny luster with just a blush of light golden toning. There are no bothersome abrasions upon close study with a glass. The eagle’s right (facing) wing junction shows the usual weakness, but no other imperfections occur in the strike. Population: 64 in 65 (1 in 65+), 14 finer (8/15). NGC ID# 24N8, PCGS# 6516

4403 1909-O MS64 PCGS. This 1909-O Barber half exhibits above-average sharpness for a New Orleans issue from this period. Satiny golden-gray surfaces show few abrasions. This is a pleasing, affordable example of the final O-mint Barber half dollar. Population: 34 in 64 (1 in 64+), 19 finer (7/15). NGC ID# 24N9, PCGS# 6517

**1911-D Barber Half Dollar, MS65
Low-Mintage Better Date**

- 4404 1911-D MS65 PCGS.** The 1911-D Barber half dollar is a better date in the series, from a low mintage of 695,080 pieces. This impressive Gem exhibits well-detailed design elements and satiny mint luster, under shades of golden-brown and lavender-gray toning. Population: 22 in 65 (1 in 65+), 12 finer (8/15). NGC ID# 24NE, PCGS# 6522

**1912-D Half Dollar, MS65
Well-Produced Issue**

- 4405 1912-D MS65 PCGS. CAC.** The 1912-D is one of the better produced Barber halves and it is also one of the more available of the late dates. This is a sharply struck example that displays the usual nice luster this issue is known for. Additionally, there are no noticeable abrasions on either side. Originally toned with speckled russet patina over both obverse and reverse. Population: 60 in 65, 16 finer (8/15).
Ex: *Palm Beach Signature (Heritage, 3/2005), lot 5812.* NGC ID# 24NH, PCGS# 6525

1912-S Barber Half, Frosted MS65

- 4406 1912-S MS65 PCGS. CAC.** The 1912-S is an available issue in the lower Mint State grades, given the mintage of 1.3 million pieces, nominal for the series. Survivors are relatively available in grades up through MS63. In higher Mint State grades, however, the 1912-S is a noteworthy rarity, and few examples match the technical quality of this example. Frosted luster complements a bold strike in most areas. The otherwise olive-gray surfaces reveal blushes of dappled light-purple patina on the obverse. A small abrasion on the upper-right eagle's shield is the only possible distraction. Population: 22 in 65, 8 finer (8/15).
Ex: *Andy Geosits Collection/November Signature (Heritage, 11/2003), lot 6808.* NGC ID# 24NJ, PCGS# 6526

1914 Barber Half, Lustrous AU58

- 4407 1914 AU58 PCGS. CAC.** A lustrous Borderline Uncirculated example of one of the key-date Philadelphia issues from the tail end of the Barber half series. This piece is well-struck and just trivial friction is observed over the high points of the design. Minimally abraded with a light golden hue overall. NGC ID# 24NN, PCGS# 6530

- 4408 1915-D MS64 PCGS.** While the mintage of 1,170,400 pieces towers above the much lower-mintage Philadelphia issue for the year, this Denver date is surprisingly challenging in high-grade Mint State. The current near-Gem shows some deep toning accents at the borders with orange and blue accents, surrounding a lustrous, pale-gold center. The reverse is brilliant and highly lustrous, with a hint of gold at the rims. Just a bit of blending at the right shield point, wing, and talon is visible. A glass reveals a thin scrape in the right obverse field and a few scattered minor marks, defining the assigned grade. NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

- 4409 1905 PR64 PCGS.** Well-mirrored, if low-contrast, with pale green-gold outer toning and a circle of translucent rose at the left separating dot on the reverse. Intricately detailed but with faint slide marks on the cheek.
Ex: *Long Beach Signature (Heritage, 2/2012), lot 3731.* NGC ID# 24P9, PCGS# 6552

- 4410 1906 PR65 NGC.** A beautiful Gem proof, with deep, original toning in shades of aquamarine and rose-gold. The fields are highly reflective and might have produced a cameo effect were it not for the rich patina. The eagle's right (facing) wing junction shows a touch of striking softness. NGC ID# 24PA, PCGS# 6553

**1907 Barber Half, PR66
Lightly Toned, Old Green Label Holder**

- 4411 1907 PR66 PCGS.** The obverse displays cameo contrast with the frosted portrait floating on glassy-mirrored fields. Faint reddish-gold and blue toning provides a colorful, translucent glow across the silvery surfaces. The reverse is equally well-produced and sharply struck, although less contrasted with pale-blue and orange-gold toning dispersed over the reflective fields. Housed in an old green label holder. Population: 18 in 66, 8 finer (7/15). NGC ID# 24PB, PCGS# 6554

- 4412 1910 PR64 Cameo PCGS. CAC.** The sharply detailed frosty design elements contrast boldly with the deeply reflective fields to create a dramatic cameo effect. The well-preserved surfaces show only minor signs of contact, with some delicate hints of pale gold toning. Population: 13 in 64 Cameo, 18 finer (8/15). NGC ID# 24PE, PCGS# 86557

**1911 Half Dollar, PR66 Cameo
Icy Motifs, Flashy Mirrors**

- 4413 1911 PR66 Cameo NGC.** The portrait and eagle display consistent cameo frost, and the reflective fields are devoid of toning. The strike is bold, and the eye appeal is imposing. A magnificently preserved specimen. A scant 543 proofs were issued. Census: 11 in 66 Cameo (1 in 66 ★ Cameo), 9 finer (8/15).
Ex: Central States Signature (Heritage, 5/2005), lot 7311, which realized \$3,593.75.
From The Stephen A. Walling Collection. NGC ID# 24PF, PCGS# 86558

WALKING LIBERTY HALF DOLLARS

- 4414 1916 MS65 PCGS.** The 1916 Walking Liberty half possesses strong appeal as the first issue of this widely popular series, but high-end examples are only available to the patient enthusiast. This Gem is well-struck, with glowing silver luster that displays the matte-like texture characteristic of the issue. A few trivial marks along Liberty's thigh and in the eagle's feathers limit the grade. NGC ID# 24PL, PCGS# 6566
- 4415 1916-D MS65 PCGS. CAC.** This impressive Gem offers sharply detailed design elements, aside from the slightest softness on the eagle's leg, and vibrant mint luster on both sides. Hints of pale gold toning add to the outstanding eye appeal and only the most insignificant signs of contact are evident. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

**1916-S Walking Liberty Half Dollar
Scarce, Near-Gem Example**

- 4416 1916-S MS64 PCGS.** Of the three mintages (P-D-S) in the first year of issue, the San Francisco half dollars are the most challenging. Just 508,000 pieces were struck, the West Coast penchant for utilizing the entire mintage in commerce meant fewer pieces were preserved. The present near-Gem survivor offers a sharp strike on Liberty's head and hand, and even the eagle's trailing leg displays some feather detail. Satin luster shines beneath an original patina of lilac, gold, and pale blue shades. A technically and visually appealing coin. NGC ID# 24PN, PCGS# 6568

**1916-S Walking Liberty Half, MS64
Low-Mintage, First-Year Example**

- 4417 1916-S MS64 PCGS.** Always in demand as a first-year branch mint issue, the 1916-S Walking Liberty half dollar claims a small mintage of 508,000 pieces. This attractive Choice specimen offers sharply detailed design elements and vibrant mint luster throughout. A few hints of pale gold toning add to the outstanding eye appeal. NGC ID# 24PN, PCGS# 6568

**1916-S Walking Liberty Half Dollar, MS64
First-Year, Branch Mint Type Coin**

- 4418 1916-S MS64 PCGS. CAC.** An impressive Choice example of this low-mintage issue, from the first year of the Walking Liberty design. The design elements are well-detailed, with just a touch of softness on the eagle's leg. The well-preserved surfaces radiate vibrant mint luster under delicate shades of pale gold toning. NGC ID# 24PN, PCGS# 6568
- 4419 1917-D Obverse MS63 PCGS.** A lustrous, well-detailed specimen of this early series issue, featuring the prominent obverse mintmark which was moved to the reverse later in the year. Attractive shades of blue-steel and golden-brown patina blanket the pleasing surfaces. NGC ID# 24PR, PCGS# 6570
- 4420 1917-D Reverse MS62 PCGS.** Bright surfaces are visited by wisps of gold-orange patina that are more noticeable on the obverse. Strong definition is noted on Liberty's left thumb and adjacent branches, as well as on most of the eagle's feathers. A small pinscratch on Liberty's torso contributes to the grade.
Ex: Long Beach Signature (Heritage, 6/2006), lot 1764; ANA Signature (Heritage, 3/2011), lot 3709. NGC ID# 24PS, PCGS# 6571

**1917 Half Dollar, Brilliant MS64
Scarcer Reverse Mintmark Variant**

- 4421 1917-D Reverse MS64 PCGS.** The radiant, fully brilliant surfaces of this near-Gem offer strong detail on the head and branch hand with surprisingly few marks. The 1917-D Reverse was struck to a significantly greater extent than its Obverse Mintmark counterpart (1.9 million coins vs. 765,400 coins), but this variant proves scarcer in mint condition. PCGS reports 52 finer submissions (8/15). NGC ID# 24PS, PCGS# 6571

**1917-D Half Dollar, Lustrous MS64
Reverse Mintmark**

- 4422 1917-D Reverse MS64 PCGS.** While the mintage might indicate ready availability of the Reverse Mintmark variety, the opposite is true for this Denver issue. Fewer Mint State examples were preserved despite more than double the mintage of the 1917-D Obverse type. This gold-toned near-Gem is particularly well-struck on the reverse, while the central obverse shows above-average definition, too. A few minor marks are visible with a glass to define the assigned grade, but the eye appeal is excellent. NGC ID# 24PS, PCGS# 6571

**1917-D Walking Liberty Half, MS64
Reverse Mintmark**

- 4423 1917-D Reverse MS64 PCGS.** The mintmark was moved to the reverse partway through the year in 1917, an important consideration for type purposes. This attractive Choice specimen exhibits well-detailed design elements and lightly toned lustrous surfaces with only a few scattered minor contact marks. Eye appeal is outstanding. NGC ID# 24PS, PCGS# 6571

- 4424 1917-S Obverse AU55 PCGS.** Fewer than 1 million Obverse Mintmark 1917-S half dollars were struck, making the issue one of the more elusive early dates in the Walking Liberty half series. This Choice AU example shows satiny ice-blue luster with lightly mottled olive toning over portions of each side. Only the most trivial wear precludes a Mint State designation. NGC ID# 26G7, PCGS# 6572

- 4425 1917-S Obverse — Obverse Improperly Cleaned — NGC Details. Unc.** Satiny surfaces show medium golden-gray toning with a few areas of verdigris on the obverse. This is a well-struck example of this early Walking Liberty half dollar, but a few faint hairlines preclude a numeric grade from NGC. NGC ID# 26G7, PCGS# 6572

**1917-S Half Dollar, MS62
Obverse Mintmark**

- 4426 1917-S Obverse MS62 PCGS.** This piece is boldly struck and displays a hint of light golden toning over satiny surfaces. A few hair-thin scratches are hidden behind Liberty's head and below the pine branch, these being the chief grade-determining factor. With a mintage of 952,000 coins, the Obverse Mintmark 1917 half is a popular issue in all Mint State grades. NGC ID# 26G7, PCGS# 6572

- 4427 1917-S Reverse MS63 PCGS.** Vibrant mint luster shines through shades of golden-brown and lavender-gray toning, enhancing the outstanding eye appeal of this well-detailed Select specimen. The surfaces show few minor contact marks on both sides. NGC ID# 24PU, PCGS# 6573

- 4428 1917-S Reverse MS63 PCGS.** Rich, matte-like luster shows a faint blush of lavender-gold toning over each side of this Select 1917-S half, with few significant abrasions. Liberty's thigh is a trifle soft, but the remainder of the motifs are well-defined. NGC ID# 24PU, PCGS# 6573

**1918 Walker, MS65
Seldom Available Finer**

- 4429 1918 MS65 PCGS. CAC.** Satiny luster shows traces of light golden toning on each side of this Gem 1918 Walking Liberty half. Liberty's head is sharp and partial thumb separation is present, but the eagle's trailing leg feathers remain soft. This issue is scarce in MS65, and finer pieces are out of reach for many collectors, with just nine certified at PCGS (8/15). NGC ID# 24PV, PCGS# 6574

- 4430 1918-D MS62 NGC.** Considerable central weakness is evident on this piece, typical of the early Denver Mint Walkers. This example has fully lustrous and frosty silver surfaces beneath delicate champagne toning.
Ex: Long Beach Signature (Heritage, 9/2010), lot 4221. NGC ID# 24PW, PCGS# 6575

1918-D Half Dollar, Lustrous MS63

- 4431 1918-D MS63 PCGS.** Scattered freckles of deep toning are confined mostly to the borders, while the rest of the coin is brilliant and untoned. Both sides emit frosty mint luster. The 1918-D ranks near the top of the early dates in terms of high-grade rarity, making this Select Uncirculated piece attractive to those who do not want to absorb the substantial price increases in near-Gem or Gem conditions. A few light marks are noted on Liberty's leg, head, and raised gown folds. NGC ID# 24PW, PCGS# 6575

- 4432 1919 AU55 PCGS.** Attractive shades of golden-brown and russet toning blanket the lightly abraded surfaces of this impressive Choice AU specimen, with well-detailed, lightly worn design elements and vibrant mint luster underneath. NGC ID# 24PY, PCGS# 6577

1919 Half Dollar, MS62 Lightly Toned Mint State Example

- 4433 1919 MS62 NGC.** The 1919 ranks among the lowest-mintage issues of the series (962,000 pieces), and since it was struck prior to the advent of roll hoarding, it is conditionally scarce in VF or better grades. This lustrous and unmarked example provides pastel steel-blue, olive-green, and almond-gold toning.
Ex: *Long Beach Signature* (Heritage, 6/2011), lot 3729. NGC ID# 24PY, PCGS# 6577

- 4434 1919-D AU53 PCGS.** The 1919-D is a notable strike rarity. Most coins, including the one offered here, exhibit incompleteness on the head, branch, hand, and skirt lines. This untuned AU representative has satiny, unabraded surfaces. A splendid example of this challenging Denver issue. NGC ID# 24PZ, PCGS# 6578

1919-D Half Dollar Uncirculated Details

- 4435 1919-D — Improperly Cleaned — NGC Details. Unc.** The 1919-D ranks among the most challenging Walking Liberty issues to obtain in Uncirculated grades. This satiny straw-gold and pearl-gray example displays unmarked and moderately subdued surfaces. The strike exhibits unimportant incompleteness at the centers. NGC ID# 24PZ, PCGS# 6578

- 4436 1919-S AU55 PCGS.** This attractive Choice AU example displays hints of pale gold toning. Just a touch of wear shows on the high points of the well-detailed design elements and the lightly abraded surfaces retain much of their original mint luster. NGC ID# 24R2, PCGS# 6579

- 4437 1920-D MS61 NGC.** For the 1920-D, this Mint State coin is incredibly sharp, including a delineated thumb on Liberty's branch hand. Luster is satiny and toned light golden. Scattered abrasions limit the grade, but pose little distraction. NGC ID# 24R4, PCGS# 6581

1920-S Walking Liberty Half, MS63 Challenging S-Mint Issue

- 4438 1920-S MS63 NGC.** Whispers of reddish-gold cling to the margins of this Select Walker half dollar and pleasing luster issues from both sides. Some definition shows on the thumb of the branch hand, but the trailing leg of the eagle reveals the usual weakness. No significant marks are apparent.
Ex: *FUN Signature* (Heritage, 1/2011), lot 5762. NGC ID# 24R5, PCGS# 6582

- 4439 1921 VF35 PCGS.** A Choice VF example of this low-mintage key, with sharp skirt lines and a little wear on the hand and torso. The pleasing lavender-gray surfaces show hints of gold and amber toning and are free of large or distracting abrasions. NGC ID# 24R6, PCGS# 6583

- 4440 1921 — Damage — PCGS Genuine. AU Details.** The obverse is problem-free, but a pair of scrapes affect portions of the eagle and the second T in STATES. Partly lustrous with light butter-gold and ice-blue toning. Only the 1921-D has a lower mintage than the 1921, due to the extraordinary coinage of silver dollars that year. NGC ID# 24R6, PCGS# 6583

4441 1921-D VF20 PCGS. The 1921-D was only struck to the extent of 208,000 coins and is well-recognized as one of the keys to the Walking Liberty series along with its S-mint counterpart. This circulated example displays light battleship-gray patina with deeper olive and steel-gray elements in the recesses. NGC ID# 24R7, PCGS# 6584

4442 1921-D VF25 PCGS. CAC. An outstanding collector coin, showing original battleship-gray patina with tinges of deeper olive color seen in the protected regions. Just a problem-free, midgrade example of this key Denver issue. NGC ID# 24R7, PCGS# 6584

1921-S Walking Liberty Half, XF40 Satisfying Collector Piece

4443 1921-S XF40 PCGS. A combination of low mintage and strong demand make the 1921-S the second most-challenging date of the series behind only the 1919-S. The smooth, medium-gray surfaces of this example show only minor marks from circulation and grade-consistent wear. Sharp details remain on all of the raised devices. Pleasing original, silver-gray fields retain some reflectivity. NGC ID# 24R8, PCGS# 6585

4444 1923-S AU58 PCGS. A lustrous, satiny near-Mint example with just a touch of light golden color. Traces of high-point friction are only discernible with a loupe, as most of the central weakness is due only to a deficient strike, not wear. NGC ID# 24R9, PCGS# 6586

4445 1923-S MS62 NGC. The design elements of this attractive MS62 example show the usual softness on Liberty's hand and head and the brightly lustrous surfaces show the expected number of minor contact marks for the grade. NGC ID# 24R9, PCGS# 6586

1923-S Half Dollar, Lustrous MS62

4446 1923-S MS62 PCGS. This issue is scarcer than most early Walkers, especially in Mint State grades. Both sides of the present specimen, a Select Mint State piece, exhibit brilliant and satiny silver luster with hints of champagne toning. An excellent opportunity to fill this hole in a collection of Walking Liberty half dollars. Ex: *Stamford Coinfest Signature (Heritage, 10/2010), lot 4137.* NGC ID# 24R9, PCGS# 6586

4447 1927-S MS63 NGC. The well-detailed design elements of this attractive Select example show a touch of the usual softness on Liberty's head and wreath hand and the lustrous surfaces show a scattering of minor contact marks, with hints of champagne-gold toning. NGC ID# 24RA, PCGS# 6587

1927-S Half Dollar, Brilliant MS64

4448 1927-S MS64 PCGS. The 1927-S is the only Walking Liberty half issue of the year, essential for a complete date set of this popular series. This Choice example displays untuned, frosty luster with few abrasions. Mild striking weakness on the central devices is characteristic of the issue. Finer pieces are scarce. NGC ID# 24RA, PCGS# 6587

4449 1928-S MS62 NGC. The eye appeal of this 1928-S Walker defies the grade, showing vibrant, frosty luster rolling over untuned surfaces. Scattered abrasions are almost forgotten. As expected for the grade, the central high points are weakly struck. NGC ID# 24RB, PCGS# 6588

4450 1929-D MS65 PCGS. Light ice-blue and lime-green toning graces this lustrous and beautifully preserved Gem. The branch hand is indistinct, as customary for the low mintage issue, but the remainder of the strike is good. Housed in a green label holder. NGC ID# 24RC, PCGS# 6589

4451 1929-S MS64 PCGS. CAC. This well-detailed Choice specimen shows just a touch of the usual softness on the wreath hand and eagle's leg, with lustrous surfaces that exhibit only minor signs of contact. NGC ID# 24RD, PCGS# 6590

1929-S Half Dollar, MS66 Brilliant and Attractive

4452 1929-S MS66 NGC. While the 1929-S Walkers are among the most available coins in the series in most grades, they are scarce in Premium Gem condition and nearly unavailable any finer. This brilliant and untuned example is free of all but the tiniest of marks, with satiny mint luster and exceptionally smooth surfaces. The strike is suitably strong with only slight blending at the centers. Census: 33 in 66 (1 in 66+, 1 in 66 ★, 1 in 66+★), 4 finer (8/15). NGC ID# 24RD, PCGS# 6590

4453 1933-S MS63 PCGS. This impressive Select specimen exhibits better-than-average definition on all design elements, with clear separation between Liberty's thumb and finger. The surfaces show only minor signs of contact, with vibrant mint luster on both sides. NGC ID# 24RE, PCGS# 6591

4454 1933-S MS63 PCGS. A pleasing coin for the grade, sharply struck and satiny. Both sides show a hint of light golden toning over lightly scattered abrasions which determine the grade. The 1933-S is a slightly better date in the finer Mint State grades. NGC ID# 24RE, PCGS# 6591

- 4455 1934-S MS64 PCGS.** A lustrous, frosty example of this mid-series San Francisco issue, showing a blush of light amber-gold toning that is most prominent around the reverse borders. The strike is sharp, including complete thumb separation on Liberty's branch hand. A couple marks on the eagle's breast appear to be all that limit the grade. NGC ID# 24RH, PCGS# 6594
- 4456 1935-S MS65+ PCGS.** This San Francisco issue can be located in MS65 and even in MS66 for a price, though the popularity of the series ensures that demand for such high-grade pieces perennially outpaces supply. This brilliant Gem is sharply defined with faint softness over the branch hand. Thickly frosted and immensely appealing. NGC ID# 24RL, PCGS# 6597
- 4457 1936 MS67 PCGS. CAC.** The design elements of this magnificent Superb Gem are sharply detailed in all areas, even the usual trouble spots, like the wreath hand. The flawless surfaces are lightly toned in shades of champagne-gold and lavender, with vibrant mint luster underneath. PCGS has graded two numerically finer examples (8/15). NGC ID# 24RM, PCGS# 6598 Base PCGS# 6598
- 4458 1936-S MS66 PCGS. CAC.** Attractive golden-russet and cobalt-blue patina at the margins frames brilliant interiors on each side of this eye-appealing Premium Gem Walker half. Luminous S-mint frost rolls over impeccably preserved surfaces with well-detailed devices. A touch of central softness is expected. NGC ID# 24RP, PCGS# 6600
- 4459 1937-D MS66+ PCGS. CAC.** Mint-fresh, frost-white luster greatly contributes to the immense eye appeal of this high-end Premium Gem, devoid of any significant abrasions or stacking marks. Partial thumb separation is present on Liberty's branch hand and the head detail is sharp. The eagle's trailing leg lacks full definition on its forward feathers. The 1937-D Walker is seldom seen finer. NGC ID# 24RS, PCGS# 6602
- 4460 1937-S MS66+ PCGS. CAC.** This blazing MS66+ representative delivers extraordinary eye appeal thanks to frosty, untuned surfaces that are devoid of mentionable impairments. Sharply rendered aside from mild indistinctness on the upper gown lines. PCGS shows just 35 examples finer (6/15). NGC ID# 24RT, PCGS# 6603
- 4461 1938-D MS65 PCGS.** The 1938-D is the key to the late-date Walkers, and is most heavily sought in Gem or finer grades. This piece is weak on Liberty's branch hand and the eagle's trailing leg, but is otherwise well-struck. The obverse fields show numerous die polishing lines which contribute to the satiny appearance of the luster. An essentially brilliant coin. NGC ID# 24RV, PCGS# 6605
- 4462 1938-D MS65 PCGS. CAC.** An attractive Gem example of this low-mintage issue, with well-detailed design elements that show just a trace of the usual softness on Liberty's wreath hand. The well-preserved surfaces display hints of champagne-gold toning and vibrant mint luster on both sides. NGC ID# 24RV, PCGS# 6605
- 4463 1939 MS67+ PCGS.** Incredibly sharp detail is the hallmark of this Superb Gem 1939 Walker, although the outstanding preservation equally contributes to the eye appeal. Both sides show champagne-gold toning overall, with hints of pastel around the borders. PCGS lists only 24 pieces finer (8/15). NGC ID# 24RW, PCGS# 6606
- 4464 1939-D MS67 PCGS. CAC.** This spectacular Superb Gem exhibits just a touch of the usual softness on Liberty's wreath hand and the eagle's leg, but the design elements are sharply defined in other areas. Vibrant mint luster and impeccably preserved, lightly toned surfaces add to the incredible eye appeal. Population: 83 in 67 (4 in 67+), 2 finer (8/15). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607
- 4465 1940 MS67+ PCGS. CAC.** Daubs of spectacular turquoise-blue patina appear over frosty surfaces, intermixed with areas of brilliance. The strike features pinpoint definition on the branch hand, skirt lines, and the eagle's leg feathers. This is an available date through Superb Gem, but PCGS has only seen 24 examples finer (7/15). NGC ID# 24RZ, PCGS# 6609
- 4466 1940 MS67+ PCGS. CAC.** Deep burgundy-red and olive-gold hues surround the peripheries of this high-end Superb Gem 1940 Walker. The frosty surfaces are free of bothersome abrasions and the design elements are impressively well brought up. PCGS lists just two dozen finer examples (8/15). NGC ID# 24RZ, PCGS# 6609
- 4467 1940 MS67+ PCGS. CAC.** A beautiful Superb Gem, lustrous and well-struck, with complete definition on Liberty's head, branch hand, and foot. The unmarked silver surfaces reveal pleasing golden accents that are more noticeable on the reverse. PCGS has graded 24 numerically finer examples (8/15). NGC ID# 24RZ, PCGS# 6609
- 4468 20-Piece 1941-1947 Short Set MS65 PCGS.** All 20 coins are identically graded and individually certified. The lot includes: **1941**, a high-end Gem; **1941-D**; **1941-S**, medium golden-gray toning; **1942**; **1942-D**, **1942-S**, trumpet tail S; **1943**, well preserved; **1943-D**, old green label holder, light olive-gold toning; **1943-S**, trumpet tail S, tan-gold and ice-blue patina; **1944**, **1944-D**, green label holder, wheat-gold toning; **1944-S**, large S, attractive light tan and powder-blue patina; **1945**, **1945-D**, **1945-S**, knob S, peripheral golden-brown toning; **1946**, light golden-tan patina; **1946-D**, **1946-S**, trumpet-tail S, well preserved; **1947**, a whisper of gold toning; and a **1947-D**, dusky silver-gray toning. (Total: 20 coins) NGC ID# 24S3, PCGS# 6611
- 4469 1941 MS67+ PCGS. CAC.** Fresh luster and original toning contribute to this Superb Gem's immense visual appeal. The obverse shows just a hint of pale champagne color in the center but has deeper amber-russet around the periphery. The reverse is more deeply toned in the same hues, but with additional tinges of olive and gold throughout. PCGS lists just 20 finer examples (7/15). NGC ID# 24S3, PCGS# 6611
- 4470 1941 MS67+ PCGS. CAC.** This is a boldly struck, vibrantly lustrous Superb Gem with just a hint of light golden toning over each side. Finer representatives are seldom seen, with only 20 certified by PCGS (8/15). NGC ID# 24S3, PCGS# 6611
- 4471 1941-D MS67+ PCGS. CAC.** A splash of reddish-orange toning accents the upper obverse margin, but this high-end Superb Gem Walker is otherwise untuned and frosty-white. The strike is bold with only slight blending of the branch hand, and the eye appeal is terrific. Still just one numerically finer example by PCGS. Population: 15 in 67+, 1 finer (8/15). NGC ID# 24S4, PCGS# 6612 Base PCGS# 6612
- 4472 1941-S MS66+ PCGS.** Vivid shades of greenish-gold and magenta toning enhance the impeccably preserved surfaces of this high-end Premium Gem, with most of the color on the obverse. The design elements are well-detailed, with vibrant mint luster on both sides. PCGS has graded nine numerically finer examples (8/15). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613
- 4473 1943-S MS66+ PCGS. CAC. FS-101.** Trumpet Tail S. A lightly toned, lustrous, and well-preserved representative. The branch hand is typically struck, but the skirt lines have above average detail for a wartime S-mint Walker. The lower half of the obverse is die doubled, present on the working hub and usual for the issue. NGC ID# 24SB, PCGS# 6620
- 4474 1944 MS67 PCGS.** Conditionally scarce, this blazing 1944 Walking Liberty half boasts vibrant luster and bold detail, including sharp head and branch hand definition. A tinge of russet toning along the upper-left obverse and lower-left reverse borders is the origin of a faint champagne tint that stretches over much of the remaining surfaces. Only a single MS68 coin is finer (7/15). NGC ID# 24SC, PCGS# 6621
- 4475 1944-D MS67+ NGC. CAC.** This high-end Superb Gem exhibits well-detailed design elements, with some separation between Liberty's thumb and finger. The virtually pristine brilliant surfaces radiate vibrant mint luster with terrific eye appeal. NGC has graded just one numerically finer example (8/15). NGC ID# 24SD, PCGS# 6622 Base PCGS# 6622

**1944-S Walking Liberty Half, MS66+
Rarely Seen Finer**

- 4476 1944-S MS66+ PCGS. CAC.** Although available in MS66, the 1944-S is a major rarity at the Superb Gem level, which gives this Plus-graded Premium Gem significant appeal. The well-preserved surfaces display untuned, frosty luster devoid of mentionable imperfections. The eagle's trailing leg and Liberty's branch hand show slight weakness. Only eight coins are finer at PCGS (8/15). NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

**PROOF WALKING LIBERTY
HALF DOLLARS**

- 4477 1936 PR64 NGC.** Tinges of gold and rainbow toning decorated the peripheries of this Choice first-year proof Walking Liberty half dollar, while the interiors are deeply mirrored and brilliant. Stray hairlines limit the grade, but none are obvious the unaided eye. NGC ID# 27V4, PCGS# 6636
- 4478 1937 PR67 NGC. CAC.** This fully struck proof Walker displays brilliant surfaces, with deeply mirrored fields and a hint of contrast against the satiny obverse motif. This CAC-approved Superb Gem is high-end for the issue, with only 28 PR68 coins finer (8/15). NGC ID# 5ESS, PCGS# 6637

1937 Half Dollar, Sharp PR67+

- 4479 1937 PR67+ PCGS. CAC.** This Superb Gem proof Walker is fully struck throughout the relief elements and shows deep, gleaming mirrors in the fields. The nearly pristine surfaces display a faint blush of light golden toning which fades in the reflection of the fields when tilted beneath a light. PCGS lists only 10 proofs finer (8/15). NGC ID# 5ESS, PCGS# 6637
- 4480 1938 PR67+ NGC. CAC.** Struck from highly polished dies, this Superb Gem proof displays bold design definition and deeply mirrored fields. Each side exhibits light champagne toning, with irregular splashes of amber-olive toning scattered throughout, most noticeably on the obverse. NGC lists only 59 finer representatives (8/15). NGC ID# 27V6, PCGS# 6638
- 4481 1939 PR67+ NGC.** The 1939 proof Walker is slightly more available than the previous two issues in the proof series, but high-end examples remain highly sought-after due to the significant number of collectors who pursue this seven-coin set. This golden-toned example is fully struck and almost perfectly preserved. The sun-rays are bold, denoting an early die state. NGC ID# 5ESU, PCGS# 6639

- 4482 1940 PR67+ PCGS. CAC.** Pastel shades of blue, green, and lavender-rose appear over the impeccably preserved surfaces of this Superb Gem proof. Bands of deeper coloration occur at the right margins on each side. Proof production reached 11,279 pieces in 1940, yet PCGS reports just 34 finer submissions (7/15). NGC ID# 27V8, PCGS# 6640

**1940 Walking Liberty Half, PR68
Beautiful Two-Sided Toning**

- 4483 1940 PR68 NGC.** This gleaming proof is among the finest known of the 1940 issue. Liberty and the eagle are boldly defined, largely toned in soft pastel hues. The peripheries exhibit deeper sun-gold and amber-orange toning, delivering overall outstanding eye appeal. Census: 58 in 68 (4 in 68 ★), 0 finer (8/15). NGC ID# 27V8, PCGS# 6640
- 4484 1942 PR67+ PCGS.** This fully struck final-year proof Walker showcases deeply reflective fields as a back drop for satiny design elements. A faint blush of champagne toning deepens toward the peripheries. Finer examples are elusive. NGC ID# 282G, PCGS# 6642
- 4485 1942 PR67+ PCGS. CAC.** The obverse is awash in electric-blue, mint-green, purple, and crimson patina, while subtle shades of gold, rose, and lime-green color the other side. Flawlessly preserved surfaces are devoid of contact and feature predictably needle-sharp definition. NGC ID# 282G, PCGS# 6642
- 4486 1942 PR67+ PCGS. CAC.** A gleaming Superb Gem proof, showcasing full design definition and warm golden toning. This is the final date in the seven-year proof series. Finer representatives are seldom available. NGC ID# 282G, PCGS# 6642
- 4487 1942 PR68 PCGS.** This high-end Superb Gem is among the finer-known representatives of this final-year proof Walker. This piece is fully struck with design elements that are crisp, without the usual fading as a result of excessive die polishing. A tinge of champagne border toning emits a slight bluish hue when tilted beneath a light. Population: 52 in 68 (1 in 68+), 1 finer (8/15). NGC ID# 282G, PCGS# 6642
- 4488 1942 PR68+ PCGS.** This beautifully toned Superb Gem is the only PR68 coin with a Plus designation at PCGS. The eye appeal stems from fully rendered design elements, gleaming, brilliant centers, and vivid rainbow peripheries. The coloring is especially bold along the upper-left obverse. Population: 52 in 68 (1 in 68+), 1 finer (8/15). NGC ID# 282G, PCGS# 6642

FRANKLIN HALF DOLLARS

- 4489 1948-D MS66+ Full Bell Lines PCGS. Ex: Radabaugh Collection.** Sharply detailed and brightly lustrous, this high-end Premium Gem displays fully defined bell lines and well-preserved surfaces with attractive shades of greenish-gold and lavender toning. PCGS has graded five numerically finer examples (8/15). NGC ID# 2549, PCGS# 86652
- 4490 1949 MS66+ Full Bell Lines PCGS. Ex: Radabaugh Collection.** This spectacular high-end Premium Gem offers sharply detailed design elements, with Full Bell Lines, and vibrant mint luster throughout. The reverse shows highlights of golden-tan and amber toning. PCGS has graded one numerically finer example (8/15). NGC ID# 24ST, PCGS# 86653 Base PCGS# 86653

4491 1949 MS66+ Full Bell Lines PCGS. CAC. With only a single MS67 example certified at PCGS (8/15), this Plus-graded Premium Gem is among the finest Full Bell Lines 1949 Franklin halves available to Registry Set collectors. This remarkable coin is intricately struck, with frosty luster and unabraded surfaces. A dusting of lavender-gray toning covers the interiors, while the peripheries display warmer olive and sun-orange hues. NGC ID# 24ST, PCGS# 86653 Base PCGS# 86653

4492 1949-D MS66 Full Bell Lines PCGS. A frosty, well-preserved Premium Gem Franklin half, with some deep golden-brown toning on the obverse and a more faintly gold-toned reverse. Pearlescent mint luster glows from the minimally marked surfaces. The bell lines are legitimately full as confirmed by PCGS, which has yet to certify a numerically finer piece. Population: 60 in 66 (4 in 66+) Full Bell Lines, 0 finer (8/15). NGC ID# 5HWE, PCGS# 86654

4493 1949-D MS66 Full Bell Lines PCGS. Delicate shades of pale gold toning add to the outstanding eye appeal of this delightful Premium Gem, with sharply detailed design elements and full definition on the bell lines. Population: 60 in 66 (4 in 66+) Full Bell Lines, 0 finer (8/15). NGC ID# 5HWE, PCGS# 86654

4494 1949-S MS66+ Full Bell Lines PCGS. CAC. Full definition is evident on the bell lines and the other design elements of this high-end Premium Gem are well-detailed, as well. The lustrous surfaces are free of mentionable distractions and shades of sea-green and lavender-gray patina add to the considerable eye appeal. PCGS has graded six numerically finer examples (8/15). NGC ID# 24SV, PCGS# 86655 Base PCGS# 86655

4495 1950 MS66+ Full Bell Lines PCGS. A Registry-grade Full Bell Lines example, this 1950 Franklin half dollar is boldly struck and frosty with original champagne color over much of each side. Portions of the outer peripheries exhibit deep amber-red and gold toning. There are only 12 Full Bell Lines coins finer at PCGS (8/15). NGC ID# 24SW, PCGS# 86656

4496 1951 MS66+ Full Bell Lines PCGS. A high-end Premium Gem, with well-detailed design elements and the coveted Full Bell Lines designation. The well-preserved surfaces are visited by shades of sea-green and mouse-gray toning. PCGS has graded three numerically finer examples (8/15). NGC ID# 24SY, PCGS# 86658

4497 1951-D MS66+ Full Bell Lines PCGS. CAC. This high-end Premium Gem displays sharply detailed design elements, with Full Bell Lines definition, and vibrant mint luster throughout. The well-preserved surfaces are lightly toned in shades of champagne-gold and lavender-blue. PCGS has graded only one numerically finer example (8/15). NGC ID# 24SZ, PCGS# 86659

4498 1952-S MS65 Full Bell Lines PCGS. CAC. With Full Bell Lines, the 1952-S Franklin half is difficult to locate in high grade. This Gem is boldly struck, with frosty luster and a lack of obvious abrasions. A blanket of dusky lavender-gold and mint-green toning enriches each side and a small amber spot appears at the lower edge of the Liberty Bell.
Ex: ANA Signature (Heritage, 3/2007), lot 1175; Long Beach Signature (Heritage, 9/2007), lot 1828. NGC ID# 24T5, PCGS# 86663

4499 1952-S MS66 Full Bell Lines PCGS. A Registry-grade example of this San Francisco issue which is seldom seen in high grade with Full Bell Lines. This coin shows a bold strike with frosty luster that shines through a blanket of dusky grayish-gold toning. Deeper lavender and russet hues appear near the borders. Population: 52 in 66 (7 in 66+) Full Bell Lines, 2 finer (7/15). NGC ID# 24T5, PCGS# 86663

4500 1952-S MS66 Full Bell Lines PCGS. Pleasingly original with a frosty, silver-gray sheen along with deeper russet and apple-green toning at the borders, with the toning more extensive on the reverse. A trio of faint milling marks are ill-placed at the center of Franklin's cheek. Population: 52 in 66 (7 in 66+) Full Bell Lines, 2 finer (8/15).
Ex: November Signature (Heritage, 11/2003), lot 6995; Central States Signature (Heritage, 4/2006), lot 3097. NGC ID# 24T5, PCGS# 86663

1953-S Franklin Half Dollar, MS67 Tied for Finest at PCGS

4501 1953-S MS67 PCGS. Shades of sea-green, amber, gold, and lavender-gray toning blanket the well-preserved surfaces of this impressive Superb Gem, with most of the color on the obverse. Well-detailed design elements and vibrant mint luster are evident, under the patina. Population: 17 in 67, 0 finer (7/15). NGC ID# 24T8, PCGS# 6666

1953-S Half Dollar, MS67 Among the Finest Certified

4502 1953-S MS67 PCGS. CAC. A crescent of light crimson and gold hues surrounds the frosty, untuned centers of the obverse. Glints of comparable toning appear at the upper reverse. As the Superb Gem assessment dictates, each side is void of any discernible abrasions. Perfect for the Registry specialist. Population: 17 in 67, 0 finer (8/15). NGC ID# 24T8, PCGS# 6666

4503 1954-D MS66+ Full Bell Lines PCGS. Ex: Radabaugh Collection. An impressive high-end Premium Gem, with some slight softness on Franklin's hair, but full definition on the lower bell lines. Shades of sea-green and lavender toning visit the virtually pristine, lustrous surfaces. PCGS has graded three numerically finer examples (8/15). NGC ID# 24TA, PCGS# 86668

4504 1955 MS66+ Full Bell Lines PCGS. Sharply detailed design elements, including full definition on the lower bell lines, and well-preserved lustrous surfaces are the calling cards of this delightful high-end Premium Gem. Shades of lavender and pale gold toning add to the terrific eye appeal. PCGS has graded two numerically finer examples (8/15). NGC ID# 24TC, PCGS# 86670

4505 1959 MS66 Full Bell Lines PCGS. Ex: Radabaugh Collection. Type Two Reverse. Glimpses of forest-green, cherry-red, and lemon-gold toning embrace the borders of this lustrous and beautifully preserved Premium Gem. Population: 49 in 66 (3 in 66+) Full Bell Lines, 0 finer (8/15). NGC ID# 24TJ, PCGS# 86676

4506 1960 MS66 Full Bell Lines PCGS. An attractively toned Registry candidate, this Premium Gem Full Bell Lines coin exhibits bold definition on all design elements with frosty, undisturbed mint luster. Each side displays an even balance of lemon-gold and lavender-blue toning with glimpses of amber and olive. Tied for finest at PCGS (6/15). NGC ID# 5H6J, PCGS# 86678

PROOF FRANKLIN HALF DOLLARS

- 4507 1950 PR65 Cameo PCGS.** Largely untoned, this Gem Cameo proof exhibits intermittent splashes of multicolor patina near the borders. Glassy, deeply reflective fields encircle frosted motifs, accounting for the designated contrast. PCGS has only seen 55 submissions finer (8/15). NGC ID# 27VA, PCGS# 86691
- 4508 1953 PR67 Cameo PCGS. CAC.** Stark white-on-black contrast is the defining feature of this PR67 Cameo half dollar. The surfaces are virtually untuned aside for a few wisps of golden-russet patina. Each side has apparently depthless, mirrorlike fields that are practically mark-free. PCGS reports just seven higher-rated proofs (6/15). NGC ID# 27VD, PCGS# 86694
- 4509 1956 Type Two PR69 Deep Cameo PCGS.** The feathers on the eagle's neck, wings, and legs are more sharply defined on the Type Two proofs. This virtually perfect example offers well-detailed frosty design elements that stand out dramatically against the deeply mirrored brilliant fields. Population: 41 in 69 Deep Cameo, 0 finer (8/15). NGC ID# 24TW, PCGS# 96697

1957 Franklin Half Dollar, PR69 Cameo None Numerically Finer at NGC

- 4510 1957 PR69 Cameo NGC.** This amazing 1957 proof Franklin half dollar is among the finest-certified examples, with incredible eye appeal to complement the highest available technical quality. The sharply detailed frosty design elements stand out dramatically against the deeply mirrored fields and the brilliant surfaces are just one tick away from perfection. Census: 31 in 69 Cameo (8 in 69 ★ Cameo), 0 finer (8/15). NGC ID# 24TX, PCGS# 86698
- 4511 1963 PR68+ Deep Cameo PCGS. CAC.** A superb Registry Set candidate, this high-end Deep Cameo proof showcases ice-white design elements set against fully mirrored, glass-black fields. The strike is bold throughout and the surfaces are virtually perfect. PCGS lists 17 PR69 coins finer in the Deep Cameo category (7/15). NGC ID# 27VL, PCGS# 96704

PROOF KENNEDY HALF DOLLARS

- 4512 1964 PR69 Ultra Cameo NGC.** Type One Reverse. Only a wisp of golden toning visits this intricately struck and immaculate first-year Kennedy half. Icy motifs rise above glassy fields. Unavailable in PR70 Ultra Cameo at either leading service. NGC ID# 24WF, PCGS# 96800

1974-S Kennedy Half, PR70 Deep Cameo Registry-Grade Clad Proof

- 4513 1974-S PR70 Deep Cameo PCGS.** Only the finest proof Kennedy halves are selected for Registry purposes. For the 1974-S, this piece is one of just 42 pieces to receive the perfect PR70 Deep Cameo grade from PCGS (8/15). The brilliant surfaces showcase razor-sharp, frosty design elements set against the gleaming mirrors of the fields. NGC ID# 27WN, PCGS# 96810

1976-S Clad Bicentennial Half PR70 Deep Cameo

- 4514 1976-S Clad PR70 Deep Cameo PCGS.** A trace of golden toning warms the stark white-on-black contrast of this Registry-grade Deep Cameo proof. The strike is full and the fields exhibit seemingly infinite depth of mirroring. The Bicentennial half dollar proof was produced in both clad and silver alloys, with the former being significantly scarcer in the perfect PR70 Deep Cameo grade. Population: 72 in 70 Deep Cameo, (7/15). NGC ID# B76C, PCGS# 96811

EARLY DOLLARS

- 4515 1795 Flowing Hair, Two Leaves, B-9, BB-13, R.4 — Graffiti — PCGS Genuine. VG Details.** The portrait exhibits faint pinscratches that form a large letter B, but the fields are minimally abraded. The glossy lavender-gray surfaces exhibit laminations on the reverse and near star 9. NGC ID# 24WZ, PCGS# 39980 Base PCGS# 6853
- 4516 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4 — Rim Damage — NGC Details. VG.** A pearl-gray early dollar with peripheral hints of tan toning. Rim knocks are present at 5:30 and 11 o'clock on the obverse, and at 4:30, 6, 9, and 10:30 on the reverse. A few thin marks are noted near stars 5 and 11. All legends are bold, and the stars, portrait, eagle, and wreath are well outlined. NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853

**1795 Flowing Hair Dollar, Fine 12
Two Leaves, B-2, BB-20 Variety**

- 4517** 1795 Flowing Hair, Two Leaves, B-2, BB-20, R.3, Fine 12 PCGS. Medium golden-gray toning encompasses this evenly circulated and slightly glossy early silver type coin. The obverse displays trivial Mint-made adjustment marks, but a few faded, thin lines and ticks on the central reverse are the only mentionable abrasions. The obverse is mildly granular between star 12 and central device. Struck from rotated dies.
Ex: FUN Signature (Heritage, 1/2013), lot 4470. NGC ID# 8M5Y, PCGS# 39985 Base PCGS# 6853

- 4518** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Rim Damage — PCGS Genuine. VF Details. Ex: Pedram Collection. Moderate edge knocks are noted at 4:30 on the obverse and 7:30 on the reverse. The reverse edge is lightly filed near 2:30. This evenly circulated Flowing Hair type coin has a deep gunmetal-blue obverse and golden-brown and silver-gray reverse. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

**1795 Flowing Hair Dollar, XF40
Two Leaves, B-1, BB-21**

- 4519** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, XF40 NGC. As the most-abundant Two Leaves variety, BB-21 is a collector favorite both for its availability, but also for its usual well-balanced appearance. The portrait of Liberty was deeply impressed into the die, providing a more dimensional profile than on other varieties. High-grade examples show nice hair detail, while circulated coins at times retain that distinction. The present example is sharply defined despite 20 points of wear. Smooth surfaces show only well-hidden remnants of adjustment marks, now hidden in the hair strands and on the rim at stars 9 to 12. The original, warm-gray patina remains with deep-gray accents at the borders. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

**1795 B-6, BB-25 Dollar, VF Sharpness
Flowing Hair, Three Leaves**

- 4520** 1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3 — Environmental Damage — NCS. VF Details. A deep steel-gray representative of the introductory and briefly issued crown-sized type. The nicely defined surfaces are moderately granular and the obverse displays faint hair-thin marks. Unimportant mint-made adjustment marks cross Liberty's ear. A minor rim ding is noted at 5 o'clock on the obverse. A better Bolender variety. NGC ID# 24WZ, PCGS# 39975 Base PCGS# 6852

- 4521** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Repaired — NCS. VF Details. The die line or "bar" behind the highest neck curl is diagnostic for Bolender-5. The obverse field is smoothed beneath the L in LIBERTY and near Liberty's chin. Stone-white centers cede to charcoal-gray borders. We note a slender horizontal mark on the eagle and a minor obverse edge knock at 7 o'clock.
From The Stephen A. Walling Collection. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 Draped Bust Dollar, XF45
B-14, BB-51, Off-Center Bust**

- 4522** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, XF45 NGC. Ex: Pedram Collection. Die State I, perfect dies. The two 1795 Draped Bust dollar varieties are easily distinguished by the position of the obverse portrait, which is noticeably off-center on BB-51 and well-centered on BB-52. The two die pairings also employ different tail dies, but the obverse is the chief differentiator. This BB-51 example displays a bold strike, including sharp border dentils, stars, and interior devices. A glimpse of adjustment marks appear within the hair curls behind Liberty's ear, but are absent from the peripheries. Both sides show medium olive-gray patina with tinges of amber-gold and russet throughout. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1796 B-5, BB-65 Dollar, XF Details
Large Date, Small Letters

- 4523** 1796 Large Date, Small Letters, B-5, BB-65, R.2 — Whizzed — NGC Details. XF. Ex: Pedram Collection. Bowers Die State II with a medium-sized break from the corner of the I in AMERICA. The steel-gray and wheat-gold surfaces are nicely defined and minimally abraded. The reverse displays moderate parallel adjustment marks, as issued. Mildly glossy near the eagle's right (facing) wing, but most collectors would be proud to own this scarce Small Eagle type coin. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

- 4524** 1796 Small Date, Small Letters, B-1, BB-66, R.4 — Tooled — PCGS Genuine. Fine Details. Ex: Pedram Collection. Smoothing is apparent on Liberty's hair and the field near the hair ribbon. Moderately granular near the shoulder curl and the eagle's beak. The obverse is sun-gold, pearl-gray, and russet-brown. The reverse is orange-red with glimpses of apple-green. PCGS# 39999 Base PCGS# 6859

- 4525** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2 — Smoothed — PCGS Genuine. VF Details. Bowers Die State III. The right obverse field is smoothed on this lime-green and cream-gray early dollar. The reverse border has a coarse appearance near the UN in UNITED. The surfaces are microgranular and glossy. The lower reverse border displays minor adjustment marks. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1797 Large Letters Dollar, Fine 12
9x7 Stars, B-1, BB-73

- 4526** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, Fine 12 PCGS. Bowers Die State II. Pearl-gray and almond-gold patina embraces this refreshingly unabraded example. The eagle's wings and Liberty's hair curls have some remaining definition. A tiny rim ding near 1 o'clock on the reverse is barely worthy of individual mention. Housed in a green label holder.
Ex: *Baltimore Signature (Heritage, 7/2003)*, lot 8130, which realized \$2,875.
From *The Stephen A. Walling Collection*. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1797 B-1, BB-73 Dollar, XF Details
Large Letters, 9x7 Stars

- 4527** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 — Filed Rims — Genuine PCGS. XF Details. Ex: Pedram Collection. Bowers Die State III. The rims are lightly filed where the dentils meet the edge, but close inspection is required to detect the impairment. Otherwise, an attractive and unmarked example with pleasing definition and medium olive-green, cream-gray, and chestnut-gold toning. The reverse is misaligned a few degrees toward 1:30, but only dentil width is affected.

- 4528** 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3 — Smoothed — PCGS Genuine. XF Details. Bowers Die State III. This final-year Small Eagle dollar has been whizzed but displays few marks and shows ample design detail. Predominantly toned forest-green, although the centers are stone-gray. NGC ID# 24X5, PCGS# 40006 Base PCGS# 6867

- 4529** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3 — Plugged — NGC Details. VF. Ex: Pedram Collection. Bowers Die State III. Plugged and skillfully re-engraved near 12 o'clock, affecting the E in LIBERTY, tail feathers, and branch stem. The surfaces are whizzed, but well defined for the VF level and retoned in tan-brown shades that deepen at the borders. NGC ID# 24X6, PCGS# 40022 Base PCGS# 6877

1798 Silver Dollar, AU Details
Heraldic Eagle, Pointed 9
Better B-16, BB-110 Variety

- 4530** 1798 Large Eagle, Pointed 9, Wide Date, B-16, BB-110, R.5 — Improperly Cleaned — NGC Details. AU. Bowers Die State I. A lightly circulated representative of this very scarce Bolender variety. The surfaces are moderately bright, and both sides exhibit fine parallel hairlines. Minor abrasions are scattered, and the strike shows softness on the right-side stars and the F in OF. NGC ID# 24X6, PCGS# 40027 Base PCGS# 6877

- 4531** 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4 — Obverse Scratched — NGC Details. VF. Bowers Die State V. A faint thin vertical mark on Liberty's head and a horizontal pinscratch near obverse star 11 correspond to the NGC notation. A lightly hairlined stone-gray representative. A late die state with the obverse sinking near Liberty's shoulder, which causes a soft impression on the right-side stars above the eagle. NGC ID# 24X6, PCGS# 40037 Base PCGS# 6877

- 4532 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4, VF30 PCGS.** Bowers Die State II. A scarce Wide Date variety struck from the sole use of the obverse die with the 17 of the date close together, but the other figures wide apart. The reverse shows a faint die crack from the two left-most wing feathers to STAT of STATES. Attractive warm-gray covers the minimally marked surfaces. Nice definition remains on the raised elements, although some of the field stars show weakness (a characteristic of the variety). NGC ID# 24X6, PCGS# 40037 Base PCGS# 6877

**1798 Large Eagle Silver Dollar, VF35
B-12, BB-120, Wide Date**

- 4533 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4, VF35 NGC.** Bowers Die State IV. Hints of silver luster lurk beneath the smooth-gray toning of this original, moderately circulated Draped Bust half. The Large Eagle reverse shows several diagnostic die cracks to confirm the late die state, while weakness in the field stars is inherent for the variety. There are no substantial abrasions or adjustment marks to disturb this appealing, Choice VF example. NGC ID# 24X6, PCGS# 40037 Base PCGS# 6877

- 4534 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4 — Rim Damage — PCGS Genuine. XF Details.** Bowers Die State II. The reverse rim has a small area of damage at 6 o'clock. Several pinscratches cross the portrait and left obverse field. A thin line extends from the arrows to the second S in STATES. Deep gunmetal and walnut-brown toning encompasses both sides. NGC ID# 24X6, PCGS# 40038 Base PCGS# 6873

- 4535 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, VF25 NGC.** Ex: Hesselgesser. Bowers Die State VI. This almond-gold and stone-gray Heraldic Eagle dollar retains ample wing plumage detail. The fields and devices are minimally abraded. The reverse rims have minor dings at 1 o'clock, 4:30, and 5:30. A late die state with scattered die crumbling and sinking. NGC ID# 24X6, PCGS# 40039 Base PCGS# 6873

- 4536 1798 Large Eagle, Pointed 9, Close Date, B-25, BB-123, R.4, Fine 15 NGC.** Bowers Die State II. Cream-gray high points contrast with deeper gunmetal fields and peripheries. Marks are minor overall, despite a brief horizontal line above the beak. A scarce Bolender variety. NGC ID# 4ETC, PCGS# 40040 Base PCGS# 6873

- 4537 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, VF30 PCGS.** Bowers-Borckardt Die State IV. The "Blundered Stars" reverse. The left side of the drapery is worn, but the hair retains much interior detail intact and the pleasing gray and blue-steel surfaces show only minor abrasions. NGC ID# 24X6, PCGS# 40041 Base PCGS# 6873

- 4538 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2 — Stained — NGC Details. VF.** Bowers Die State II without the radial crack through the C in AMERICA. Nonetheless, the obverse die is sinking near star 5, which causes that star (and the E in UNITED opposite) to show weak definition that should not be confused with wear. This gunmetal-gray early dollar is moderately clashed but surprisingly void of abrasions. NGC ID# 24X6, PCGS# 40042 Base PCGS# 6873

- 4539 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, VF25 PCGS.** Bowers Die State IV. The olive branch has just four berries instead of the usual five. The mildly bright surfaces display apple-green and caramel-gold toning. Moderate marks are relegated to the field above the arrowheads. The wings are well defined for the VF25 level.
Ex: Long Beach Signature (Heritage, 6/2011), lot 3837, which realized \$2,070. NGC ID# 24X6, PCGS# 40042 Base PCGS# 6873

**1798 Large Eagle Dollar, B-8, BB-125, XF40
Buckled Die State**

- 4540 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, XF40 PCGS.** Die State IV, shattered reverse. Both dies are heavily cracked and show buckling. On the obverse, stars 5 and 7 are nearly invisible due to die fatigue, while the corresponding portion of the reverse shows UNITED extremely weak as a result of severe buckling. The coin is otherwise well-struck, and its blatantly original olive-gray patina pleases the eye. The central motifs show strong detail and there are no adjustment marks observed. NGC ID# 24X6, PCGS# 40042 Base PCGS# 6873

**1799/8 Draped Bust Dollar, XF40
13 Stars Reverse, B-2, BB-143**

- 4541 1799/8 13 Stars Reverse, B-2, BB-143, R.4, XF40 NGC.** Bowers-Borckardt Die State II. The BB-143 variety is recognized by the overdate on the obverse and the position of the reverse star with a ray extending into the eagle's mouth. The BB-143 is the scarcest of the three overdate varieties for the year, two or three times as difficult to locate as BB-141 and BB-142. The present coin shows light-to-moderate wear on the devices, with iridescent gold, gray, and blue-steel toning. The 13 Stars overdate variety is listed on page 219 of the 2016 Guide Book.
Ex: Long Beach Signature (Heritage, 6/2011), lot 3843 NGC ID# 24X8, PCGS# 40066 Base PCGS# 6884

- 4542 1799 7x6 Stars, B-7, BB-156, R.4 — Devices Outlined — PCGS Genuine. XF Details.** Ex: Pedram Collection. Bowers Die State III. The top of the eagle's head, scroll, and wings are outlined with wispy pinscratches, observable only beneath a loupe. Otherwise, this golden-brown, ocean-blue, and rose-red early dollar is attractive for the XF level. A late die state with buckling on the field northeast of the eagle's head. NGC ID# 24X7, PCGS# 40048 Base PCGS# 6878

**1799 Draped Bust Dollar, XF40
Scarce B-7, BB-156 Variety**

- 4543** 1799 7x6 Stars, B-7, BB-156, R.4, XF40 NGC. Bowers-Borckardt Die State III, with diagnostic die crack through the STA of STATES plus many other prominent die cracks throughout the reverse margins. An appealing and luminous early dollar with only mild wear, although the area around the eagle's head shows a degree of typical striking softness from die buckling. Attractive gold, rose, and blue-violet shadings grace each side. The diagnostic 1 in the date received a flat, straight top when the die was refinished.
Ex: Long Beach Signature (Heritage, 9/2009), lot 912. NGC ID# 24X7, PCGS# 40048 Base PCGS# 6878

- 4544** 1799 7x6 Stars, B-5, BB-157, R.2 — **Cleaning** — PCGS **Genuine. VF Details.** Bowers-Borckardt Die State I. The rare early die state without reverse cracks. The design elements retain almost all of their interior detail and the surfaces are lightly abraded, with a few grease strike-throughs on both sides. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

- 4545** 1799 7x6 Stars, B-16, BB-158, R.2 — **Cleaning** — PCGS **Genuine. VF Details.** *Ex: Pedram Collection.* Bowers Die State IV. Obverse glimpses of powder-blue are present, but most of this early dollar is russet-brown. Sharply detailed for the VF level, and only minimally abraded. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

- 4546** 1799 8x5 Stars, B-23, BB-159, R.3, VF30 NGC. *Ex: Pedram Collection.* Bowers Die State II. A problem-free midgrade representative. Medium autumn-gold and steel-gray toning drapes minimally abraded and minutely granular surfaces. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

- 4547** 1799 7x6 Stars, B-12, BB-160, R.3, VF20 NGC. Bowers Die State III. Stone-white motifs rise above charcoal-gray fields. Abrasions are minimal, although close inspection reveals minor hairlines. The stars above the M in UNUM exhibit blurry definition. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

- 4548** 1799 7x6 Stars, B-10, BB-163, R.2, VF30 PCGS. Die State IV. This is the rare early die state showing the reverse in its most terminal condition. A bold radial crack through the O in OF is the pickup point. This light-gray midgrade example is nonetheless well and evenly struck, showing complete border dentils and strong interior motifs. Some lighter color appears over the highest points of the devices. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

**1799 Silver Dollar, Choice VF
7x6 Stars, B-10, BB-163**

- 4549** 1799 7x6 Stars, B-10, BB-163, R.2, VF35 NGC. Bowers Die State III-IV. Stone-white high points are surrounded by rich gunmetal-gray fields. An attractive midgrade collector coin. The reverse is refreshingly unabraded, and the obverse is smooth aside from a slight rim nick at 1 o'clock, and faded marks on the field near the profile. All letters in E PLURIBUS UNUM are bold.
From The Stephen A. Walling Collection. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

- 4550** 1799 7x6 Stars, B-10, BB-163, R.2 — **Improperly Cleaned** — NGC **Details. XF.** Bowers Die State I. Both sides are free of die cracks. The obverse shows a die lump in the drapery above the first 9 in the date. Star 2 on the reverse touches the eagle's mouth and points to the left upright of the U in PLURIBUS. Violet and steel-gray patina shows areas of golden-tan color, while boldly struck motifs exhibit trivial blending. A marvelous early dollar type coin. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

- 4551** 1799 7x6 Stars, B-17, BB-164, R.2, VF30 NGC. Bowers Die State II with a die crack on the reverse angling from the rim through UN to the bottom of ITED. Natural slate-gray patina covers both sides of this attractive, lightly circulated Draped Bust dollar. Only a few faint marks are scattered about the appealing surfaces, which display olive-gold undertones and strong definition on the central devices. Some minimal, deeper old build-up around the reverse elements confirms the coin's originality and lengthy time stored away in collector hands. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

**1799 Dollar, AU Sharpness
B-17, BB-164, 7x6 Stars**

- 4552** 1799 7x6 Stars, B-17, BB-164, R.2 — **Improperly Cleaned** — NGC **Details. AU.** *Ex: Pedram Collection.* Bowers Die State V. This early dollar has impressive definition and lacks any mentionable marks. The central obverse is moderately bright, and displays lemon, apricot, and stone-gray shades. The reverse is deeply patinated gunmetal-blue. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

**1799 Bust Dollar, XF40
B-9, BB-166, Old-Silver Appeal**

- 4553** 1799 7x6 Stars, B-9, BB-166, R.1, XF40 ANACS. Bowers Die State V. Battleship-gray and gunmetal-blue toning is deepest at the margins and along the edges of the raised devices. The fields and central motifs display light-gray, silver patina. A vertical die crack connects 1 in the date to the edge, while a long, arched die crack bisects star 10 and travels across the right field to Liberty's chin and neck. More faint die cracks occupy the left side of star 12. Both the obverse and reverse dies were solely used to strike BB-166, and they are particularly well-presented on this sharp-yet-smoothly-worn XF example. Housed in an early generation ANACS holder. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

**1799 B-9, BB-166 Dollar, XF45
Attractive, Richly Toned Early Type**

- 4554** 1799 7x6 Stars, B-9, BB-166, R.1, XF45 ANACS. Bowers Die State II. Brief circulation accounts for 15 points of wear on this richly toned early dollar, but few abrasions were acquired and the surfaces are remarkably smooth and appealing. Remnants of golden mint luster shine through the deep, olive-gray patina. Bolender called B-9 the "Apostrophe" variety, an apt description of the short die break that is particularly well-displayed after the second S of STATES on this example. A Choice XF coin — housed in an early generation ANACS holder. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

**1799 'Apostrophe' Dollar, AU Details
B-9, BB-166, 7x6 Stars**

- 4555** 1799 7x6 Stars, B-9, BB-166, R.1 — Reverse Scratched — NGC Details. AU. Bowers Die State V. A better grade example of the "apostrophe" Bolender variety, nicknamed for its vertical die break near the second S in STATES. The few delicate hair-thin marks on the reverse starry field do not appear worthy of the NGC designation. A narrow strike-through is noted below UNUM. The almond-gold and pearl-gray surfaces are minimally abraded aside from minor hairlines. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

- 4556** 1799 7x6 Stars, B-14, BB-167, R.3, VF20 NGC. Bowers Die State II, with die flaws under AM in AMERICA but no cracking at tops of those letters. The deep gray patina displays rich forest-green and tobacco-brown undertones. Minimally marked for the designated grade.

Ex: Rosemont Central States (Heritage, 4/2011), lot 3829, which realized \$2,070. NGC ID# 24X7, PCGS# 40058 Base PCGS# 6878

- 4557** 1799 7x6 Stars, B-22, BB-168, R.4 — Improperly Cleaned — NGC Details. VF. Bowers Die State IV with intersecting cracks below the date and between the 17. The heavy horizontal crack across the reverse is characteristic of B-22. A pearl-gray representative with charcoal toning in protected areas. Well defined for the VF level, particularly on the reverse. The fields have a cloudy appearance but the eye appeal is more than acceptable. NGC ID# 24X7, PCGS# 40059 Base PCGS# 6878

- 4558** 1799 7x6 Stars, B-21, BB-169, R.3, VF20 NGC. Die State II. A rising die crack through the 99 in the date helps identify this slightly scarcer Bolender variety. A minutely granular slate-gray Draped Bust dollar with hints of chestnut toning. Wear is apparent on the devices, but most letters in E PLURIBUS UNUM remain legible.

Ex: Dallas Signature (Heritage, 10/2006), lot 2237. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

**1800 Draped Bust Dollar, XF40
B-12, BB-184, Ex: Hesselgesser**

- 4559** 1800 B-12, BB-184, R.3, XF40 PCGS Secure. Ex: Hesselgesser. Bowers Die State I. The obverse die was employed first on BB-182 and BB-183, but this BB-184 variety is the sole use of the reverse die. A die dot within D of UNITED, while a chunky die flaw at the outside of the upright of E in AMERICA confirms the attribution. Medium golden-umber color covers both sides, interrupted by lilac and blue areas that provide both interest and appeal. Aside from the expected light wear, the motifs are sharp and remaining mint luster suggests an even higher grade. Only faint abrasions exist, disguised by the toning and softened by circulation. NGC ID# 24X9, PCGS# 40070 Base PCGS# 6887

**1800 Dollar, B-10, BB-190, Choice VF
Pleasing Patina**

- 4560** 1800 Wide Date, Low 8, B-10, BB-190, R.3, VF35 PCGS. Die State VI, heavily cracked reverse. Despite the late die state, this Large Eagle type coin shows bold definition around the peripheral dentils and on the central devices, with sharpness nearly that of an XF coin. There are no adjustment marks, and the smooth surfaces show medium steel-gray patina with hints of deeper toning in the protected regions. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

- 4561 1800 AMERICA I, B-11, BB-191, R.4, Fine 12 PCGS.** B-11 is the scarcer of the two AMERICA I die marriages, and shares the Wide Date, Low 8 obverse of B-10. This representative has pearl-white high points and caramel-gold fields. No abrasions are conspicuous, and about one-third of E PLURIBUS UNUM is evident. NGC ID# 24X9, PCGS# 40081 Base PCGS# 6892

**1800 Dollar, Choice VF
B-9, BB-192, AMERICA I**

- 4562 1800 AMERICA I, B-19, BB-192, R.2, VF35 ANACS.** Die State II, clashed. BB-192 is the more available of two die marriages that employ the AMERICA I reverse. This Choice VF example shows hints of gold toning throughout the steel-gray surfaces, with deeper amber, violet, and sky-blue color appearing occasionally in the peripheral recesses. The strike is bold and wear is even. No adjustment marks are present. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

- 4563 1800 B-13, BB-193, R.4, VF20 NGC.** Bowers Die State III. An attractive early dollar with cream-gray high points and slightly deeper toning throughout the fields. No marks are noticeable aside from a thin line through the first U in UNUM, and a few small to moderate obverse rim dings. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

- 4564 1800 Dotted Date, B-14, BB-194, R.3, VF25 ANACS.** Bowers Die State III. A wheat-gold, powder-blue, and gunmetal-gray example of the popular "Dotted Date" *Guide Book* variety. Refreshingly free from abrasions. A thin mark on Liberty's shoulder shows unobtrusive smoothing. NGC ID# 24X9, PCGS# 40078 Base PCGS# 6889

**1800 12 Arrows Dollar, VF30
B-17, BB-196**

- 4565 1800 12 Arrows, B-17, BB-196, R.1, VF30 NGC.** Bowers Die State IV. A deep dove-gray early dollar with chestnut-gold and lime-green undertones. Liberty's neck shows a few scattered ticks but there are no singularly significant marks. All letters in E PLURIBUS UNUM are present, although most are faint. A popular *Guide Book* variety with a blundered arrow count. NGC ID# 24X9, PCGS# 40079 Base PCGS# 6890

**1801 Draped Bust Dollar, VF25
B-2, BB-212, Ex: Samuel Mills Damon**

- 4566 1801 B-2, BB-212, R.3, VF25 NGC.** Ex: S.M. Damon Collection. Bowers-Borckardt Die State II. The left side of the drapery is worn, but much interior detail remains intact in other areas. The silver-gray surfaces are lightly abraded and show traces of original mint luster in sheltered areas. Samuel Mills Damon was a collector from Honolulu, Hawaii who formed a large collection of coins in the late 19th and early 20th century. He died in 1924 and his collection was held intact by his estate until it was sold after the death of his last surviving grandchild in 2004. Census: 2 in 25, 8 finer (7/15). Ex: *Samuel Mills Damon Collection* (Doyle, 3/2006), lot 2564. NGC ID# 24XA, PCGS# 40084 Base PCGS# 6893

- 4567 1801 B-4, BB-214, R.4, VG8 PCGS.** Bowers-Borckardt Die State II. The drapery is worn and most interior detail is missing from the hair, but all devices remain intact in outline. The pleasing gray surfaces show no major abrasions and all lettering and the date are legible. NGC ID# 24XA, PCGS# 40086 Base PCGS# 6893

- 4568 1802 Narrow Date, B-6, BB-241, R.1, Fine 15 PCGS.** Bowers-Borckardt Die State III. The lines in the drapery are distinguishable and much interior detail remains intact in the hair. The pleasing gray surfaces show only minor abrasions and there are no serious rim bumps. The T in LIBERTY is missing the right foot. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

- 4569 1802 Narrow Date, B-6, BB-241, R.1 — Rims Filed — ANACS. VF20 Details.** Bowers Die State III. This cream-gray Heraldic Eagle dollar appears to be problem-free upon cursory inspection, but the dentils beneath the 0 in the date are crimped. Still a nicely example with the majority of E PLURIBUS UNUM present. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

**1802 Dollar, Choice VF
B-6, BB-241, Narrow Date**

- 4570 1802 Narrow Date, B-6, BB-241, R.1, VF35 PCGS.** Bowers Die State III. A well-detailed example of this available variety, showing pale lavender-gray color over each side that lightens slightly on portions of the relief elements. The strike is even and there are no adjustment marks. Just a nice, problem-free Heraldic Eagle type coin. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

**1803 Silver Dollar, AU Details
B-5, BB-252, Small 3**

- 4571** 1803 Small 3, B-5, BB-252, R.3 — Improperly Cleaned — NGC Details. AU. Ex: Pedram Collection. A richly detailed tan-gold and silver-gray early dollar. The rims are darkly toned between 4 and 6 o'clock on the obverse, and between 12 and 3 o'clock on the reverse. Dentils are absent on the obverse between 6 and 7 o'clock, and on the reverse between 11 and 12 o'clock. The surfaces are occasionally microgranular, but surprisingly void of abrasions. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

**1803 Small 3 Dollar, VF20
B-4, BB-254, Attractive Toning**

- 4572** 1803 Small 3, B-4, BB-254, R.3, VF20 PCGS. The fields are somewhat reflective beneath a blanket of medium-brown toning with blue overtones. Golden undertones remain beneath the rich patina. The few small marks that dot the surfaces are softened by the coin's fair share of wear, yet the assigned grade seems a bit severe given the overall sharpness of the elements and the considerable eye appeal. The rims and the narrow dentilation typical of the variety are wholly without problems. NGC ID# 24XD, PCGS# 40099 Base PCGS# 6900

- 4573** 1803 Large 3, B-6, BB-255, R.2, VF25 NGC. Bowers Die State III. The 3 in the date rides low and shows slight repunching, especially at the base. A faint die crack connects stars 8 through 13. The BB-255 is an available variety in all grades — thought to outnumber all other varieties of the 1803 date combined — and as a result, the variety is a favorite representative of the Large 3 type. The current coin is a moderately circulated example that offers smooth surfaces with attractive, old-silver toning. Honest wear mitigates the effect of any abrasions across the fields and devices of this pleasing, collector-grade Bust dollar. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

**1803 Draped Bust Dollar, VF35
Large 3, B-6, BB-255**

- 4574** 1803 Large 3, B-6, BB-255, R.2, VF35 NGC. Bowers-Borckardt Die State II. A Choice VF example of this popular variety, with lightly abraded surfaces that are blanketed in pleasing shades of golden-brown and lavender-gray toning. Light wear shows on the left side of the drapery and the dentils are weak on the left obverse, but much interior detail remains intact. Some light adjustment marks are evident on the bust. Census: 6 in 35, 41 finer (7/15). NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

SEATED DOLLARS

- 4575** 1840 XF45 NGC. Nearly sharp enough to warrant an AU grade, this first-year Seated Liberty dollar offers the budget-conscious collector an ideal type acquisition. Both sides show golden-gray toning with a suggestion of reflectivity in the fields when tilted beneath a light. A tiny rim tick at 7 o'clock on the reverse is the only flaw. NGC ID# 24YA, PCGS# 6926

- 4576** 1845 — Obverse Lamination — AU53 NGC. The central obverse displays two moderate-sized rod-shaped impressions, 8 x 2 mm and 6 x 2 mm. The impressions are parallel and separated by 5 mm. Although designated as laminations by NGC, the cataloger believes that they are strike-throughs, also as made. Lightly toned with glimmers of luster and no obtrusive marks. A mere 24,500 pieces were issued.

- 4577** 1846 AU58 NGC. This lightly toned, silver-white Seated dollar displays near-Mint definition on the devices but shows numerous abrasions on both sides. The coin retains glimpses of reflective flash from its original prooflike fields despite light lines and nicks from coin-to-coin contact. The wide, bold rims are free of any significant marks. NGC ID# 24YH, PCGS# 6932

**1846 Seated Liberty Dollar, MS62
Elusive Issue in High Grade**

- 4578** 1846 MS62 PCGS. The 1846 Seated Liberty dollar is not too difficult to locate in circulated grades, but Mint State examples are elusive. This attractive MS62 specimen offers well-detailed design elements and lightly marked surfaces under shades of silver-gray, golden-brown, and amber toning. Population: 22 in 62, 41 finer (8/15). NGC ID# 24YH, PCGS# 6932

**1850 Seated Dollar, Unc Details
Better Philadelphia Issue**

4579 1850 — Improperly Cleaned — NCS. Unc Details. With a mintage of only 7,500 pieces, the 1850 Seated dollar is a better date in all grades. Mint State coins are scarce and likely number fewer than the certified population totals would suggest, due to resubmissions. This piece is unworn, but with a glossy hue imparted by light cleaning. Both sides have since retoned mottled gray and olive-gold and the design elements are well-defined. Scattered abrasions are as expected. NGC ID# 24YM, PCGS# 6937

4580 1850-O — Cleaning — PCGS Genuine. AU Details. The almond-gold and stone-gray surfaces are well defined and free from visible bagmarks. Rotation beneath a light reveals faint hairlines. The 1850-O is the rarest of the four New Orleans Seated dollar issues. A scant 40,000 pieces were produced. NGC ID# 24YN, PCGS# 6938

4581 1853 AU53 NGC. Substantial luster remains visible on both sides of this light silver-gray Seated dollar. Both sides show trivial grade-consistent marks. The 1853 is a scarce date, although the collector will be able to locate an example such as this one with a brief search. NGC ID# 24YS, PCGS# 6941

4582 1859-O MS60 NGC. Undoubtedly from the Treasury release of 1859-O and 1860-O dollars in 1962. The mint luster is brightly frosted and each side is nearly brilliant. Lightly abraded except for a slightly deeper scrapes in the left obverse field. NGC ID# 24YY, PCGS# 6947

4583 1859-O MS60 Prooflike ANACS. An incredible, gleaming example of this popular No Motto Seated dollar, with fully prooflike fields and beautiful gold, violet, and blue toning around the borders. The interiors are untuned. Liberty's head is slightly soft, but the eagle is sharp. Scattered abrasions determine the grade. NGC ID# 24YY, PCGS# 6947

4584 1860-O MS60 Prooflike ANACS. Watery mirroring in the fields delivers outstanding eye appeal on this Mint State 1860-O Seated dollar. The strike is bold on the reverse, and a touch of softness on Liberty's head is not bothersome. A light golden hue is slightly deeper around the peripheries, while scattered abrasions limit the grade. NGC ID# 24Z3, PCGS# 6950

4585 1860-O MS61 PCGS. CAC. The 1860-O Seated Liberty dollar is one of the more available issues of the series and a popular choice with type collectors. This attractive Mint State example exhibits well-detailed design elements and lustrous, brilliant surfaces with a scattering of minor contact marks.
From The Stephen A. Walling Collection. NGC ID# 24Z3, PCGS# 6950

**1860-O Seated Liberty Dollar, MS63
Well-Struck, Ideal Type Coin**

4586 1860-O MS63 NGC. Sharply struck and attractive with satiny luster and slightly prooflike fields. Both sides are mostly brilliant with light, silvery-gray surfaces. The obverse shows a pleasing band of peripheral blue, lilac, and iridescent toning while the reverse displays wisps of light-gold color. The surfaces have minor marks and hair-thin lines, consistent with the grade. This Select Uncirculated dollar is of higher quality than most examples from the Treasury Hoard disbursement. A desirable New Orleans representative for the specialist or type collector.
Ex: Long Beach Signature (Heritage, 9/2005), lot 3747. NGC ID# 24Z3, PCGS# 6950

**1860-O Seated Dollar, MS63+
Lustrous No Motto Type Coin**

4587 1860-O MS63+ PCGS. CAC. An attractively bold example of this popular New Orleans issue. The surfaces reveal few distracting abrasions and show soft, satiny luster, rather than the often seen prooflike mirroring. Pale lavender-gold toning graces each side. The 1860-O is one of the most plentiful No Motto Seated dollars in Mint State, ideal for type acquisitions. NGC ID# 24Z3, PCGS# 6950

4588 1866 Motto AU50 PCGS. The first-year Motto issue from the Philadelphia Mint — an untuned example, with strong details on the devices but numerous light lines in the fields and a few small marks. The silver-gray surfaces are a bit subdued on the obverse but the reverse is approaches semiprooflikeness with a few glimpses of luster. NGC ID# 24Z9, PCGS# 6959

4589 1870-CC Fine 12 NGC. Breen-5485, Variety 1-A. The Close CC variety, which Breen considered rare. Numerous die combinations are known for the introductory '70-CC despite a reported mintage of 12,462 pieces. This cream-gray and golden-brown Carson City dollar is only lightly marked given its service in Old West commerce. The outer two letters in LIBERTY are present. NGC ID# 24ZE, PCGS# 6964

4590 1872-CC — Improperly Cleaned — NGC Details. Fine. A meager mintage of 3,150 pieces ensures the rarity of the 1872 Carson City dollar. This mildly glossy silver-gray example lacks relevant abrasions, and the wings show ample feather definition for the Fine level. NGC ID# 24ZK, PCGS# 6969

**1872-CC Seated Dollar, Fine 12
Collector Coin**

- 4591 1872-CC Fine 12 ANACS.** This midgrade example will have a high degree of appeal for the budget-conscious collector with an interest in scarce early Carson City coinage. Wear is even and the remarkably smooth surfaces display consistent pewter-gray patina. Few examples of this elusive Carson City Seated dollar are found in problem-free midgrade condition. NGC ID# 24ZK, PCGS# 6969

**1872-CC Dollar, VF Details
Low-Mintage Carson City Issue**

- 4592 1872-CC — Improperly Cleaned — NGC Details. VF.** A fairly sharp example of this rare Carson City emission. All letters in LIBERTY are readable, and only the BE is faint. The drapery and plumage reveal luster. The moderately subdued surfaces are mostly stone-gray but the obverse periphery exhibits orange, red, and green patina. NGC ID# 24ZK, PCGS# 6969

**1872-CC Seated Dollar, VF25
Original Patina**

- 4593 1872-CC VF25 NGC.** A refreshingly original collector-grade example of this key 1872-CC Seated dollar. The relief elements show deep tan-gray patina, with even deeper gunmetal-blue and olive hues evident in the fields. Detail is strong for the grade, and there are no bothersome surface imperfections. NGC ID# 24ZK, PCGS# 6969

- 4594 1872-CC — Tooled — PCGS Genuine. XF Details.** The obverse field has been smoothed with myriad fine pinscratches, and the reverse rim has a minor ding at 4 o'clock, but this rare date Carson City Seated dollar is well defined and displays rich gunmetal and olive-green toning. NGC ID# 24ZK, PCGS# 6969

- 4595 1872-S VF30 PCGS.** With a low mintage of only 9,000 pieces, the 1872-S is scarcely seen in any grade; still, it is the most available With Motto Seated Liberty dollar from this mint. This lightly circulated example displays original olive-gray patina over both sides, with strong detail remaining on the devices. A pleasing example of this elusive San Francisco issue. NGC ID# 24ZL, PCGS# 6970

- 4596 1872-S VF30 NGC.** The San Francisco Mint issued just four Seated dollars in 1859, 1870, 1872, and 1873. The 1870-S is a major rarity and the 1873-S is unknown. This leaves only the 1859-S to represent the No Motto design, and the 1872-S as the only collectible With Motto issue. This moderately worn dollar has natural grayish-gold surfaces with scattered marks and a few darker toning splashes on each side. NGC ID# 24ZL, PCGS# 6970

PROOF SEATED DOLLARS

- 4597 1863 — Rim Damage — PCGS Genuine. Proof, Unc Details.** The edge is crimped at 3 o'clock on both sides, but no other marks are consequential. Golden-brown, electric-blue, and plum-red toning adorns the borders. A well struck specimen with frosty devices. Just 460 proofs were issued.

**1868 Seated Dollar, PR63
Subtle Contrast**

- 4598 1868 PR63 PCGS.** Seated dollars from the 1860s are highly sought-after in both proof and circulation strike formats. This Select proof 1868 is a boldly struck and fully mirrored coin, showing modest, undesignated field-motif contrast. The interiors are largely brilliant, although the outer peripheries exhibit hints of champagne color. Hairlines in the fields limit the grade but are largely invisible to the unaided eye. NGC ID# 252P, PCGS# 7016

**Proof 1869 Seated Liberty Dollar
Obverse Intricately Engraved**

- 4599 1869 — Graffiti — ANACS. Genuine, Proof.** The "graffiti" mentioned by ANACS is actually engraving in old-style cursive writing. The left obverse field is engraved: "July 23, 1869." The right obverse field reads: "91 per cent." The precision of the engraving suggests that this piece might have been prepared as a presentation coin of some sort, although the meaning of "91 per cent" has been lost. Researching the origin and meaning of this engraving would be an intriguing project.

The eye appeal of the coin in general is excellent. The fields are deeply reflective and display warm sun-gold toning with areas of violet, mint, and ocean-blue around the peripheries. The design elements are sharply rendered. NGC ID# 252R, PCGS# 7017

- 4600 1870 PR55 PCGS.** A pleasing lower-end proof example of this With Motto Seated dollar, showing a trace of friction over boldly rendered, satiny devices. Deep mirroring in the fields is evident when tilted beneath a light. This coin displays dusky olive and lavender-gray toning overall, with tinges of blue, gold, and amber in the protected regions. NGC ID# 252S, PCGS# 7018

**1871 Seated Liberty Dollar, PR64
Attractive Proof Set Toning**

- 4601 1871 PR64 ANACS.** A beautifully toned example, with pale lilac at the centers, and bands of navy-blue and straw-gold near the rims. This intricately struck Choice proof dollar displays clean fields and exceptional eye appeal. High-grade specimens from the mintage of 960 pieces are under ceaseless demand from both series and type set collectors.
Ex: FUN Signature (Heritage, 1/2009), lot 4379; Central States Signature (Heritage, 4/2010), lot 1057. NGC ID# 252T, PCGS# 7019

TRADE DOLLARS

- 4602 1873-CC XF45 PCGS.** A collector-grade example of this first-year Carson City Trade dollar issue. The design elements retain significant detail and the protected areas of the fields show hints of semiprooflike mirroring. Both sides are blanketed in medium golden-gray toning. NGC ID# 252X, PCGS# 7032

**1874-CC Trade Dollar, MS61
Semiprooflike Fields**

- 4603 1874-CC MS61 PCGS. CAC.** Tall CC. The circulation issue Trade dollar series is a rewarding and completable collection, with the Carson City issues standing out as the more elusive dates in high grade. This Mint State 1874-CC example is vibrantly lustrous and frosty with just a hint of light golden color on the otherwise brilliant surfaces. Localized weakness is seen on Liberty's head, as well as on the upper edges of the eagle's wings and on the right (facing) talons. Scattered abrasions determine the grade. NGC ID# 2532, PCGS# 7035
- 4604 1874-S MS62 PCGS.** Large S. Period after FINE. Booming luster sweeps this nicely struck and lightly abraded silver type coin. Medium chestnut-gold and olive-green toning adorns both sides. NGC ID# 2533, PCGS# 7036
- 4605 1874-S MS63 PCGS.** Large S. Period after FINE. Glimpses of forest-green and tobacco-brown toning visit both sides. The central reverse displays faint rose-gold patina. Lustrous and minimally abraded with moderate blending of impression on Liberty's head and the eagle's right (facing) claw. The reverse has minor spots near the right wingtip and the I in FINE. NGC ID# 2533, PCGS# 7036

- 4606 1875-CC Type One Reverse AU58 PCGS.** Ocean-blue and walnut-brown toning drapes this briefly circulated Carson City type coin. The satiny surfaces exhibit moderate field marks near star 1 and the eagle's beak. The strike shows minor blending on Liberty's hair and the right (facing) claw. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

- 4607 1875-S Type One Reverse MS62 NGC.** Large S. A coruscating type representative with light autumn-gold toning in design recesses. Free from mentionable contact. The strike shows minor incompleteness on the left-side stars and the eagle's right (facing) claw. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

- 4608 1875-S Type One Reverse MS63 PCGS.** Large S. Booming luster, few marks, and a mere wisp of golden patina ensure the eye appeal of this Select Trade dollar. The strike is good except for weakness on the eagle's right (facing) leg. Heavy cracks on the reverse increase the numismatic interest. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

- 4609 1876 Type One Obverse, Type One Reverse, MS63 NGC.** A lustrous, boldly struck, and nearly brilliant Select Trade Dollar. The reverse on its own challenges a higher grade, and the obverse is also clean except for a trio of small marks beneath the branch stem.
Ex: Dallas Signature (Heritage, 11/2005), lot 5171, which realized \$1,840. From The Stephen A. Walling Collection. NGC ID# 2539, PCGS# 40110 Base PCGS# 7041

- 4610 1876-CC Type Two Reverse AU55 NGC.** Tall CC. A well struck and untuned Carson City type coin that lacks any remotely mentionable marks. Luster emerges from protected areas. The surfaces are minutely granular. Minute die doubling is evident on the UNI in UNITED and the 2 in 420. NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042

- 4611 1877 MS62 NGC.** Widely spaced dies account for the strike softness that plagues all Uncirculated survivors from this final Philadelphia circulation-strike issue, including the MS62 coin offered here. Untoned silvery-gray surfaces maintain vibrant luster and minimal abrasions over each side. NGC ID# 253C, PCGS# 7044

- 4612 1877-S MS63 NGC. Breen-5814.** Scarce Minute S variety. While the strike is not particularly sharp on Liberty's head and the surrounding stars and branch, this piece displays impressive visual allure. Attractive orange and reddish-gold toning radiates from the margins and the high points. Flashy cartwheel luster flows over the smooth, appealing surfaces. Despite a mintage of more than 9.5 million pieces, the issue is a major rarity in MS65 or finer and Select examples such as this example command a premium. Several small bagmarks limit the grade, because the vibrant eye appeal is suggestive of an even higher level. NGC ID# 253E, PCGS# 7046

**1877-S Trade Dollar, MS64
Lustrous and Well Preserved**

- 4613 1877-S MS64 PCGS.** Large S. An exceptionally nice Trade dollar type coin that boasts vibrant luster, an unmarked appearance, a crisp strike, and medium wheat-gold and olive toning. The reverse exhibits minute die doubling on E PLURIBUS UNUM and AMERICA. Of greater interest is ghostly doubling (to the east) of the eagle's right (facing) wing near its crest. NGC ID# 253E, PCGS# 7046

**1877-S Trade Dollar, MS64+
Lustrous and Lightly Toned**

- 4614 1877-S MS64+ PCGS. CAC.** Large S. Original luster highlights the surfaces of this near-Gem Trade dollar type coin, illuminating dusky lavender-gold toning over each side. Only a few tiny ticks are detected which prevent a Gem grade. The top of Liberty's head is a trifle soft, but this piece is otherwise sharply struck. PCGS lists 37 examples finer (8/15). NGC ID# 253E, PCGS# 7046

PROOF TRADE DOLLARS

**1873 Trade Dollar, PR64
First-Year Proof Type Coin**

- 4615 1873 PR64 PCGS.** Dusky champagne-gray toning blankets each side of this Choice first-year proof, although the underlying fields reveal gleaming reflectivity when tilted beneath a light. The eagle's right (facing) leg is weak, but the obverse is sharply rendered, even on Liberty's head. Population: 30 in 64, 7 finer (8/15). NGC ID# 27YJ, PCGS# 7053
- 4616 1883 PR35 PCGS.** This is without a doubt one of the lowest-grade proof Trade dollars known, and it will appeal to collectors as a novelty item just as much as an affordable example of this proof-only issue. This problem-free, gunmetal-gray piece adds a whole new meaning to the term "condition rarity." NGC ID# 5DP8, PCGS# 7063
- 4617 1883 PR62 PCGS.** An attractive PR62 example from a proof-only mintage of 979 pieces, this coin exhibits razor-sharp definition on all design elements and the reflective fields show only minor signs of contact. Delicate shades of pale gold toning add to the considerable eye appeal. NGC ID# 5DP8, PCGS# 7063

MORGAN DOLLARS

- 4618 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** A diagonal line appears in the lower portion of the first 8 in the date as part of this variety. Additional diagnostics include extra wing feathers, among them a large pointed feather. A few tiny hints of color are present on this lustrous, well-struck Gem. Population: 18 in 65 (2 in 65+), 0 finer (7/15). NGC ID# 253H, PCGS# 133818 Base PCGS# 7072
- 4619 1878 8TF Broken R&B, VAM-21, MS65 PCGS. CAC.** The feet of the R and B in PLURIBUS show doubling unique to the obverse die. On the reverse, the N in ONE is widely doubled. A desirable example of the shortly issued initial design subtype. Cartwheel luster swirls over each side. This brilliant Gem possesses clean surfaces and wonderful eye appeal. NGC ID# 253H, PCGS# 133822 Base PCGS# 7072

- 4620 1878 8TF Crazy Lips, VAM-23, MS64 PCGS. CAC.** A Top 100 Variety. The nickname for this popular variety derives from the prominent doubling on Liberty's lips. The obverse displays an even layer of patina that includes shades of rose, gold, plum, and cobalt-blue. Similar colors hug the reverse margins, surrounding brilliant interiors. The centers are a touch soft with roller marks across the obverse. Population: 1 in 64, 0 finer (7/15). NGC ID# 253H, PCGS# 133824 Base PCGS# 7072
- 4621 1878 7/8TF Doubled Legs, VAM-33, MS65 PCGS. CAC.** Splendid cherry-red, lemon-gold, blue-green, and golden-brown toning enriches this lustrous and fully struck Gem. Both sides display relatively few marks. A "weak" doubled tailfeather VAM with fragments of three feathers emerging below the middle tailfeathers. NGC ID# 2TY3, PCGS# 134032 Base PCGS# 7070
- 4622 1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS. CAC.** The remnants of four tailfeathers appear under the primary tailfeathers, and the B and R in LIBERTY show die polish lines. Completely brilliant surfaces with swirling frosty luster give this Gem marvelous visual appeal. Sharply struck with small ticks in the fields on each side. PCGS reports just 10 finer examples, all varieties included (6/15). NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078
- 4623 1878 7TF Reverse of 1878 MS65+ PCGS. CAC. VAM-114-2.** The "Doubled R and Stars" variety, a reference to the R in PLURIBUS and several obverse stars. Lustrous, brilliant, and precisely struck. A well preserved and desirable Gem. NGC ID# 2TY3, PCGS# 7074
- 4624 1878 7TF Reverse of 1879 MS65 PCGS.** The 1878 Morgan dollars are known from three different hubs, including the 8 Tailfeathers, 7 Tailfeathers, and Reverse of 1879 hubs. The fourth major type, the 7/8 Tailfeathers type, was the result of double hubbing from the first two types. This piece has the Reverse of 1879, and it is an elusive variety, especially in Gem grades. The surfaces are fully brilliant with frosty silver luster and untuned surfaces. NGC ID# 253L, PCGS# 7076
- 4625 1878 7TF Reverse of 1879 MS65 PCGS.** The slanting top arrow feather identifies the Reverse of 1879. This first-year Gem offers well-detailed design elements and well-preserved lustrous surfaces, under vivid shades of golden-brown, gray, and lavender toning. PCGS has graded 20 numerically finer examples (8/15). NGC ID# 253L, PCGS# 7076
- 4626 1878 7TF Reverse of 1879 MS65 PCGS. CAC.** The slanting top arrow feather identifies the Reverse of 1879. This attractive Gem displays sharply detailed design elements and vibrant mint luster on both sides, and the lightly toned surfaces are free of mentionable distractions. PCGS has graded 20 numerically finer examples (8/15). NGC ID# 253L, PCGS# 7076
- 4627 1878-CC MS65 PCGS.** A pleasing example of the first installment in the Carson City Morgan dollar set, with well-preserved surfaces and softly frosted luster. Mottled olive and amber toning blankets each side. Trivial striking softness appears on the eagle's breast and the hair above Liberty's ear. NGC ID# 253M, PCGS# 7080
- 4628 1878-CC MS65 PCGS.** This intricately struck introductory Carson City Morgan offers dynamic luster and delicate straw-gold toning. No marks are more than incidental. Encapsulated in an old green label holder. NGC ID# 253M, PCGS# 7080
- 4629 1878-CC MS65 PCGS.** A first-year Gem Morgan dollar from the fabled Carson City Mint, this coin offers sharply detailed design elements and well-preserved lustrous surfaces under natural shades of greenish-gold and lavender-gray toning. NGC ID# 253M, PCGS# 7080
- 4630 1878-CC MS64 Deep Mirror Prooflike NGC.** Attractive peach-gold and cherry-red hues adorn the margins of this flashy and well-struck Choice Carson City dollar. Occasional small marks limit the grade, but the cheek is generally smooth. Housed in a former generation holder. NGC ID# 253M, PCGS# 97081

- 4631 1878-CC MS64 Deep Mirror Prooflike PCGS.** The eye appeal of this blazing, untoned dollar is unsurpassed. Each side exhibits thickly frosted, fully struck motifs surrounded by jet-black mirrors. Its first-year status and Carson City mintmark make this near-Gem all the more desirable. PCGS reports just 38 Deep Mirror Prooflike submissions finer (8/15). NGC ID# 253M, PCGS# 97081
- 4632 1878-S MS66 ★ NGC.** The well-preserved surfaces of this impressive Premium Gem show strong, but undesignated, elements of prooflike reflectivity, especially on the obverse. The design elements are sharply defined and frosty. NGC has graded 34 numerically finer examples (8/15). NGC ID# 253R, PCGS# 7082
- 4633 1879 MS65+ PCGS. CAC.** Thin streaks of amber patina over Liberty's chin and hair curls are the only suggestions of color on either side of this blazing Gem, recognized by PCGS and CAC for its quality within the grade. The design features exhibit sharp detail, and minimal marks are well-hidden. NGC ID# 253S, PCGS# 7084
- 4634 1879 MS66 PCGS.** Shades of greenish-gold and lavender toning enhance the well-preserved surfaces of this impressive Premium Gem, with well-detailed design elements and a mix of vibrant mint luster and prooflike reflectivity under the patina. The 1879 Morgan dollar is a condition rarity in grades above the MS66 level. PCGS has graded only four numerically finer examples (8/15). NGC ID# 253S, PCGS# 7084

1879-CC Silver Dollar Uncirculated Details

- 4635 1879-CC — Improperly Cleaned — NGC Details. Unc. VAM-4.** This well struck semikey Carson City Morgan is unexpectedly bright but the borders display light lavender toning. Marks are minimal aside from moderate contact on the portrait. A minor VAM variety with die scratches down from the nose, a small break on the left center of the 8 in the date, and slight repunching on the second C in the mintmark.

1879-CC VAM-4 Dollar Mint Sharpness

- 4636 1879-CC — Cleaning — PCGS Genuine. Unc Details. VAM-4.** Horizontal hairlines emerge on the obverse when it is rotated at obscure angles. The reverse appears unimpaired. An untuned example of this scarce and widely collected Carson City issue. The centers display minor incompleteness of strike. Bagmarks are minimal and unworthy of individual mention. NGC ID# 253U, PCGS# 7086
- 4637 1879-O MS64+ PCGS. CAC.** A high-end Choice example of this early series branch mint issue, with well-preserved brilliant surfaces that radiate vibrant mint luster and sharply detailed design elements throughout. NGC ID# 253X, PCGS# 7090

- 4638 1879-S Reverse of 1878 MS64 PCGS.** The parallel top arrow feather identifies the scarcer Reverse of 1878. This attractive Choice example displays well-detailed design elements and vibrant mint luster on both sides and the brilliant surfaces show a few minor signs of contact. NGC ID# 253W, PCGS# 7094
- 4639 1879-S Reverse of 1878, VAM-9, MS64 PCGS.** A Top 100 Variety. A sharply struck obsolete reverse silver dollar that boasts vibrant luster and few marks. Only a wisp of golden patina denies full brilliance. A rare variety any finer. NGC ID# 253W, PCGS# 133858 Base PCGS# 7094
- 4640 1879-S MS67+ PCGS. CAC.** An exemplary type coin with traces of light champagne color warming modest cameo contrast. The obverse fields are fully prooflike, the reverse fields nearly so. The strike is bold and there are no surface distractions. NGC ID# 253X, PCGS# 7092

1879-S Silver Dollar, Incredible MS68 Morgan Type Coin

- 4641 1879-S MS68 NGC. CAC.** This immaculate, CAC-approved Superb Gem is awash in vibrant mint bloom with frost-white devices and semiprooflike obverse fields. Devoid of toning and virtually flawless, this Morgan type coin is razor-sharp. The 1879-S is elusive in MS68, and none are finer at NGC or PCGS (8/15). NGC ID# 253X, PCGS# 7092
- 4642 1880 MS65+ PCGS.** This high-end Gem 1880 Morgan dollar displays frosty, untuned luster that is free of any obvious abrasions. The eagle's breast and central obverse are sharply rendered, further heightening the outstanding appeal. Finer coins are seldom seen. NGC ID# 253Y, PCGS# 7096
- 4643 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. Almond-gold overtones flash over the lustrous and extremely frosty surfaces of this Gem overdated variety. The Reverse of 1878 adds to its desirability. The fields are remarkably unabraded, while a few high point scuffs are primarily luster grazes across the heavily frosted devices. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108
- 4644 1880-CC 8 Over High 7, VAM-5, MS65 Prooflike PCGS.** A Top 100 Variety. This overdated Carson City Gem is brilliant and displays flashy fields. No marks are consequential, and the strike is good despite blending of detail on the wreath bow and eagle's legs. Ex: *Chicago Signature (Heritage, 8/2011), lot 4465.* NGC ID# 2542, PCGS# 41133 Base PCGS# 7103
- 4645 1880-CC 8/7 Reverse of 1878 MS64 PCGS. CAC. VAM-7A.** A Hit List 40 Variety. The obsolete reverse is the most interesting feature, but the N in IN is also clashed near Liberty's neck, and a dash is beneath the second 8, as seen on all '80-CC dollars. Fully struck and close to brilliant with potent luster and well preserved fields. NGC ID# 2542, PCGS# 7110
- 4646 1880-CC MS65 PCGS. Ex: GSA.** A delightful Gem from the famous Carson City Mint, with sharply detailed design elements and well-preserved lustrous surfaces that show hints of pale gold and pink toning. NGC ID# 2542, PCGS# 7100
- 4647 1880-CC MS66 NGC. VAM-9.** Rich orange-red, lavender, and butter-gold toning envelops the obverse, but the reverse is mostly white. Lustrous and nicely struck with smooth fields and minor facial contact. NGC ID# 2542, PCGS# 7100

- 4648 1880-CC MS66 PCGS. CAC. VAM-3A.** A whisper of almond-gold toning denies full brilliance, but this lustrous Carson City dollar has well preserved fields and only minor grazes on the portrait. The centers show incompleteness of strike. NGC ID# 2542, PCGS# 7100
- 4649 1880-CC MS66 PCGS. CAC. VAM-3A.** Autumn-brown and jade-green toning embrace the peripheries of this lustrous Carson City silver dollar. The center of the cheek is smooth, and the fields are also unblemished.
Ex: New York Signature (Heritage, 12/2011), lot 3938, which realized \$2,012.50. NGC ID# 2542, PCGS# 7100
- 4650 1880-CC MS65 Prooflike PCGS. VAM-10.** A short die scratch on Liberty's lip and a dash under the second 8 identify the variety. Russet-toned rims with blushes of mint-green encompass brilliant centers that show thickly frosted and fully struck motifs. The fields are deeply mirrored, giving each side a stark white-on-black appearance. PCGS reports just 11 prooflike coins finer (7/15). NGC ID# 2542, PCGS# 7101
- 4651 1880-O MS64 PCGS. VAM-9.** Small or Micro O. The 0 in the date is clearly repunched. Golden-brown and forest-green toning dominates the upper obverse and lower reverse, but the remainder of this lustrous New Orleans dollar is white. Lustrous and well preserved with a clean cheek and smooth fields. NGC ID# 2543, PCGS# 7114
- 4652 1880-O MS64 PCGS.** Small or Micro O. A brilliant and thoroughly lustrous Choice dollar. The strike is unusually sharp for a New Orleans issue. The reverse is minutely die doubled; most apparent on the top of the U in TRUST. NGC ID# 2543, PCGS# 7114
- 4653 1880-O MS64+ PCGS.** The 1880-O Morgan dollar is available in Choice condition, but finer pieces are out of reach for most collectors. This Plus-designated coin displays satiny luster with just a hint of light golden toning. A touch of the usual striking softness is seen on the central high points. NGC ID# 2543, PCGS# 7114
- 4654 1880-O MS64 NGC. CAC.** Micro or Small O. Light peach-gold patina adorns the borders of this lustrous and crisply struck Choice New Orleans Morgan. Faint grazes on the fields and cheek correspond to the grade.
Ex: Long Beach Signature (Heritage, 2/2012), lot 4169, which realized \$1,782.50. NGC ID# 2543, PCGS# 7114
- 4655 1880-O MS63 Deep Mirror Prooflike PCGS. CAC.** Oval O. *A Guide Book of Morgan Silver Dollars* notes that "those [1880-O dollars] with DMPL surfaces are elusive." In fact, Select examples such as this are very scarce, and finer coins are rare. Brilliant surfaces exhibit dramatic cameo contrast between the sharp, frosty motifs and deeply reflective fields. NGC ID# 2543, PCGS# 97115
- 4656 1880-S MS67+ PCGS. CAC.** Large S. As far as Morgan dollar type coins go, the 1880-S ranks among the most popular because of its availability in high grade, strong strike, and eye appeal. This impeccable Superb Gem features frosty, brilliant centers that cede to light golden toning at the rims. Virtually pristine. NGC ID# 2544, PCGS# 7118
- 4657 1881 MS66 PCGS.** This Premium Gem offering is a great coin for the aficionado of Morgan dollars. It is sharply struck, including noticeable detail in the hair over Liberty's ear and on the breast feathers. Moreover, it displays pleasing luster, minimally abraded surfaces, and attractive overall eye appeal. These attributes are significant, for as Bowers (2007) writes: "Sharply struck, lustrous coins with superb eye appeal are hard to find and mount a challenge for the serious collector." PCGS has graded five numerically finer examples (8/15). NGC ID# 2546, PCGS# 7124
- 4658 1881-CC MS66 PCGS.** Always a popular issue, the 1881-CC Morgan dollar boasts a low mintage of 296,000 pieces. This spectacular Premium Gem is well-detailed, with just a touch of softness on the hair above the ear. The fields show only minor signs of contact, with vibrant satiny mint luster and ample eye appeal. NGC ID# 2549, PCGS# 7126
- 4659 1881-CC MS66 PCGS. CAC. VAM-2.** Beautiful golden-brown and forest-green toning endows the margins of this low mintage and high grade Carson City dollar. The strike is intricate and the eye appeal is excellent. VAM-2 shows interesting die fill within the loops of the 8s. NGC ID# 2549, PCGS# 7126
- 4660 1881-CC MS66 PCGS. CAC.** This spectacular Premium Gem exhibits sharply detailed design elements throughout, and the brilliant, well-preserved surfaces radiate vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 2549, PCGS# 7126
- 4661 1881-CC MS66+ PCGS. CAC. VAM-2.** On this variety, the 8s in the date are doubled inside their upper loops, as is seen with low-power magnification. This Plus-graded Premium Gem example is boldly struck and frosty, with traces of lemon-gold toning around the peripheries. There are no bothersome abrasions. NGC ID# 2549, PCGS# 7126
- 4662 1881-CC MS66+ PCGS. CAC.** Comparatively speaking, the 1881-CC is among the best-produced of all the Carson City dollars despite the fact that the Mint struggled to produce just 296,000 pieces. The Philadelphia, San Francisco, and New Orleans mints combined struck more than 27 million silver dollars in 1881. Many of the CC-Mint dollars were saved from circulation in treasury vaults, so high-grade pieces are not rare. Few can match the quality of this Plus-graded Premium Gem — blaze-white and frosty, with a full strike and fantastic, lustrous eye appeal. CAC endorsed. NGC ID# 2549, PCGS# 7126
- 4663 1881-O MS65 PCGS.** The well-preserved surfaces of this spectacular Gem radiate vibrant mint luster on both sides and the design elements are well-detailed, with just a touch of the usual softness on the hair above the ear. PCGS has graded 28 numerically finer examples (7/15). NGC ID# 2548, PCGS# 7128
- 4664 1881-O MS65 PCGS.** This attractive Gem displays vivid shades of golden-brown and lavender toning, with well-detailed design elements and frosty mint luster underneath. Only minor signs of contact are evident. PCGS has graded 28 numerically finer examples (8/15). NGC ID# 2548, PCGS# 7128
- 4665 1881-O MS65 PCGS.** This spectacular Gem exhibits sharply detailed design elements and vibrant cartwheel mint luster on both sides. The surfaces show a few hints of pale gold toning with no mentionable distractions. PCGS has graded 28 numerically finer examples (8/15). NGC ID# 2548, PCGS# 7128
- 4666 1881-O MS65 PCGS.** This impressive Gem exhibits an especially sharp strike, with fine definition on the hair above Liberty's ear. The lustrous surfaces show only minor signs of contact, with a few hints of greenish-gold toning. PCGS has graded 28 numerically finer examples (8/15). NGC ID# 2548, PCGS# 7128
- 4667 1881-S MS67+ PCGS. CAC.** Vibrant mint luster glows unhindered on the reverse and illuminates warm sun-gold toning on the obverse. The strike is bold and the surfaces are free of distractions. High-end examples of this available date are known for possessing exceptional eye appeal and are popular for type purposes. NGC ID# 2549, PCGS# 7130
- 4668 1881-S MS67+ PCGS. CAC.** This high-end Superb Gem exhibits sharply detailed design elements throughout and impeccably preserved surfaces with vibrant, frosty mint luster. A few hints of golden-tan toning add to the incredible eye appeal. NGC ID# 2549, PCGS# 7130
- 4669 1882 MS66 PCGS.** Like most Philadelphia issues from the early part of the Morgan dollar series, the 1882 is rarely seen above the MS66 grade level. This Premium Gem example displays well-struck devices and frosty luster. Vivid sun-gold and ocean-blue hues illuminate much of the peripheral regions, while the centers show dusky lavender-gray toning. PCGS has seen just nine Superb Gems finer (7/15). NGC ID# 254A, PCGS# 7132

- 4670 1882 MS66 PCGS.** Following suit with a few other Philadelphia issues from this period, the 1882 is scarcer in MS66 than its mintage of more than 11 million coins would suggest, and it is rarely seen above this level. The present Premium Gem displays thickly frosted luster and sharp motifs. A few trivial ticks in the left obverse field appear to be all that limit the grade. There nine finer coins at PCGS (8/15). NGC ID# 254A, PCGS# 7132
- 4671 1882-CC MS66+ PCGS. CAC.** An outstanding Carson City type coin, likely originating from the GSA sales, even though it is not so-pedigreed on the holder. The intense, frost-white luster and sharp design elements accentuate the excellent preservation of the fields. NGC ID# 254S, PCGS# 7134
- 4672 1882-CC MS66 Prooflike PCGS.** A brilliant and beautiful Carson City type coin. Well struck and lustrous with exemplary preservation. The fields are flashy and the eye appeal is excellent. Nearly unobtainable any finer with a Prooflike designation. NGC ID# 254B, PCGS# 7135
- 4673 1882-CC MS66 Prooflike PCGS.** Flashy fields and a pleasing strike only begin to proclaim the charms of this brilliant Carson City silver dollar. The sweet spot of the cheek is immaculate, and only a solitary obverse graze near 3:30 is remotely worthy of comment. Population: 94 in 66 (6 in 66+) Prooflike, 1 finer (8/15). NGC ID# 254B, PCGS# 7135
- 4674 1882-O MS65 PCGS. CAC.** Faint gold toning is universal aside from a blush of lilac on the right obverse field. Crisply struck and lustrous with impressive eye appeal. The mintmark leans to the left. Certified in a green label holder.
Ex: Central States Signature (Heritage, 4/2012), lot 5522, which realized \$977.50. NGC ID# 254C, PCGS# 7136
- 4675 1882-O/S Recessed, VAM-4, MS64 PCGS.** A Top 100 Variety. The "O/S Recessed" VAM showing a diagonal crossbar within the O mintmark and tiny raised dots of metal across much of the reverse, resulting from a rusted die. Each side displays cartwheel luster and brilliant surfaces, with minimal abrasions noted. PCGS has seen two numerically finer pieces (7/15). NGC ID# 254D, PCGS# 133891 Base PCGS# 7138
- 4676 1882-O/S Recessed, VAM-4, MS64 PCGS.** A Top 100 Variety. The broad diagonal line in the lower half of the loop of the mintmark confirms the VAM-4 "strong" overmintmark variety. Medium silver-gray and straw-gold toning invigorates this lustrous and well preserved New Orleans dollar. Encapsulated in an old green label holder. NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

1883-O Dollar, Vibrant MS67 Challenging at This Level

- 4677 1883-O MS67 PCGS.** Sharply struck for the issue, this conditionally rare New Orleans dollar is untoned and imbued with brilliant silver luster. Liberty's cheek is clean and smooth, as are the frosty-white fields that show only a few widely scattered minor marks. More than 8.7 million pieces were struck, so the issue is not rare in an absolute sense, yet the 1883-O is unknown in a finer certified grade at either service, which presents a significant opportunity for the high-grade collector. Population: 48 in 67 (1 in 67+), 0 finer (7/15). NGC ID# 254J, PCGS# 7146
- 4678 1883-S MS61 NGC.** Vibrant luster is the hallmark of this piece, although much of its appeal stems from the elusiveness of the 1883-S Morgan in Mint State. This coin is well-struck and unworn, just showing moderate abrasions, as suggested by the grade. NGC ID# 254K, PCGS# 7148

- 4679 1883-S MS62 NGC.** The intense, brilliant cartwheel luster of this Uncirculated 1883-S dollar immediately catches the eye, and closer inspection reveals the design elements to be sharply defined. Scattered bagmarks on the obverse are as expected for the grade. NGC ID# 254K, PCGS# 7148
- 4680 1883-S MS63 PCGS.** This Select Mint State example from San Francisco claims a high mintage of 6.25 million coins, yet examples graded any finer than MS64 are scarce. The bright mint frost over silver-white untuned surfaces gives this piece a flashy, pleasing appearance. Scattered minor marks define the grade. NGC ID# 254K, PCGS# 7148
- 4681 1883-S MS63 PCGS.** A charming Select specimen, with sharply detailed design elements and vibrant cartwheel mint luster. The surfaces show delicate hints of greenish-gold toning and a few scattered minor contact marks. NGC ID# 254K, PCGS# 7148
- 4682 1883-S MS63 ANACS.** An attractive Select Morgan dollar, with a blanket of greenish-gold, magenta, and amber toning. The lustrous surfaces show a scattering of minor contact marks under the patina and the design elements are well-detailed. NGC ID# 254K, PCGS# 7148
- 4683 1884 MS66+ PCGS. CAC.** Few 1884 silver dollars grade finer than this high-end Premium Gem. This piece is boldly struck and devoid of major abrasions. The reverse shows a light golden hue, but the obverse is boldly toned in teal, violet, and sun-gold, with lighter pastel hues around portions of the borders. NGC ID# 254L, PCGS# 7150
- 4684 1884-CC MS66+ PCGS.** The 1 in the date is repunched. Attractive peach-gold and aquamarine toning embraces the borders of this lustrous and high grade Carson City type coin. Faint parallel roller marks on Liberty's cheek and the eagle's breast are strictly of mint origin. A high-end Premium Gem, sure to enhance a collection of high-grade, tastefully toned dollars. NGC ID# 8BBF, PCGS# 7152
- 4685 1884-CC MS66+ PCGS. CAC.** The toning enthusiast will appreciate the burnt-umber and olive-gold hues that color the obverse of this high-end 1884-CC Morgan dollar, while the reverse shows a complementary light golden hue. The strike is bold and there are no bothersome abrasions on the frosty surfaces. NGC ID# 8BBF, PCGS# 7152
- 4686 1884-CC MS66+ PCGS. CAC. VAM-7.** This die variety features a brief horizontal line on the cheek and recutting on the 18 in the date. The eagle exhibits die rust, as made. Lustrous and essentially brilliant with a sharp strike aside from the claws. An outstanding Carson City type coin. NGC ID# 8BBF, PCGS# 7152
- 4687 1884-CC MS66+ PCGS. CAC. VAM-3.** One of several minor repunched date varieties for this popular Carson City issue. Lustrous and lightly toned with a smooth cheek and minimal marks. A costly acquisition any finer. NGC ID# 8BBF, PCGS# 7152
- 4688 1884-CC MS66 Prooflike PCGS.** The reflective prooflike surfaces of this delightful Premium Gem show only the most insignificant signs of contact and the frosty design elements are sharply detailed throughout. Eye appeal is terrific. Population: 92 in 66 (2 in 66+) Prooflike, 1 finer (8/15). NGC ID# 254M, PCGS# 7153
- 4689 1884-CC MS65 Deep Mirror Prooflike NGC.** The contrast between the thickly frosted motifs and seemingly limitless fields provides this brilliant Carson City Gem with outstanding eye appeal. Each side offers fully struck devices without any mentionable flaws. NGC shows just 55 Deep Mirror Prooflike coins finer (8/15). NGC ID# 254M, PCGS# 97153
- 4690 1884-O MS67 NGC.** MS67 is the finest numerical grade that is likely to be encountered of this date as the two major services have certified a mere two examples finer (7/15). Untoned lustrous surfaces are nearly flawless. NGC ID# 254N, PCGS# 7154

- 4691 1884-O MS67 PCGS.** The 1884-O is an available date in the absolute sense, but Superb Gems are inherently scarce. This piece shows beautifully preserved surfaces with soft golden toning. Only a single MS68 piece is finer at PCGS (8/15). NGC ID# 254N, PCGS# 7154
- 4692 1884-S AU58 PCGS.** Dollars struck at the S-mint in 1884 mostly entered into circulation, and while AU coins are available, Uncirculated coins are rare relative to the demand for them. Bright, untoned surfaces exhibit a trace of wear with light abrasions throughout. This near-Mint coin strikes a nice balance between condition and affordability. NGC ID# 254P, PCGS# 7156
- 4693 1884-S AU58 PCGS.** A lustrous near-Mint example of this better San Francisco issue, showing sharp detail and near-brilliant surfaces. Trivial friction appears on the eagle's breast and the hair above Liberty's ear, with a few scattered abrasions in accompaniment. NGC ID# 254P, PCGS# 7156
- 4694 1884-S AU58 NGC.** Luster and semiprooflike mirroring remain in the fields of this near-Mint 1884-S Morgan dollar, while a brush of friction over the high points of the devices precludes a Mint State grade. Medium golden-gray toning blankets each side. NGC ID# 254P, PCGS# 7156
- 4695 1884-S AU58 PCGS.** Crisply struck with subtle silver-gray patina over each side. The obverse shows significant cartwheel luster, while the reverse is more flashy.
Ex: Houston Signature (Heritage, 12/2008), lot 2842. NGC ID# 254P, PCGS# 7156
- 4696 1884-S AU58 PCGS.** This 1884-S Morgan is extraordinarily eye-appealing for the AU58 level. A touch of high-point friction confirms the grade, but the details remain sharp and both sides show significant remaining luster. The reverse fields are fully prooflike, the obverse satiny. A hint of light golden toning graces each side. NGC ID# 254P, PCGS# 7156
- 4697 1884-S AU58+ NGC.** This high-end near-Mint specimen shows just the slightest trace of high-point wear on the sharply detailed design elements and the lightly abraded brilliant surfaces retain most of their original mint luster. NGC ID# 254P, PCGS# 7156
- 4698 1884-S AU58 PCGS. CAC.** The reverse fields of this nearly Uncirculated 1884-S dollar are fully prooflike, although the obverse is slightly less reflective. The strike is sharp and grade-limiting wear is restricted to the highest points of the devices. NGC ID# 254P, PCGS# 7156
- 4699 1885 MS67 PCGS.** A delightful Superb Gem that exhibits well-detailed design elements and impeccably preserved brilliant surfaces that radiate vibrant mint luster. Eye appeal is terrific. PCGS has graded only two numerically finer examples (8/15). NGC ID# 254R, PCGS# 7158
- 4700 1885 MS65 Deep Mirror Prooflike PCGS. CAC.** This Gem boasts pronounced contrast between frosty design elements and reflective fields, warranting a Deep Mirror Prooflike designation from PCGS. The green CAC sticker confirms the eye appeal and quality with the grade of this sharply struck, wholly brilliant example. The fields are exceptionally clean, and marks are limited to grazes on the cheek. NGC ID# 254R, PCGS# 97159
- 4701 1885-CC MS65 PCGS.** An impressive Gem, this brilliant and highly lustrous Carson City dollar has frosty, sharply detailed devices and satiny fields. Just a trace of pale gold toning visits the well-preserved surfaces and eye appeal is outstanding. NGC ID# 254S, PCGS# 7160
- 4702 1885-CC MS65 PCGS. VAM-2A.** The low mintage and Carson City mintmark are compelling, but the best features of this Gem are potent luster and well preserved surfaces. Virtually free from toning. The letter N from IN is clashed in front of Liberty's neck. NGC ID# 254S, PCGS# 7160

- 4703 1885-CC MS65 PCGS.** Lustrous and well struck with smooth fields and good eye appeal. Essentially brilliant, save for a glimpse of granular gray toning on the O in OF. This low mintage Carson City dollar is certified in a green label holder. NGC ID# 254S, PCGS# 7160
- 4704 1885-CC MS65 NGC.** The 1885-CC Morgan dollar is a popular issue with collectors and it was well-represented in the GSA sales. This attractive Gem displays sharply detailed design elements and well-preserved lustrous surfaces with a few hints of golden-tan toning. NGC ID# 254S, PCGS# 7160
- 4705 1885-CC MS65+ NGC.** Although just 228,000 pieces were struck, this low-mintage Carson City issue was heavily represented in the GSA sales and most of the mintage was preserved in Uncirculated grades. This high-end Gem example shows remarkably few marks from storage or handling and the coin is imbued with frosty silver luster. A sharply struck piece, it displays a narrow band of gold toning around the obverse rim. NGC ID# 254S, PCGS# 7160
- 4706 1885-CC MS66 NGC.** A sharp, beautifully preserved example of this popular Carson City issue. Both sides are uniformly toned in lavender-gray, gold, amber, and sea-green hues, and there are no bothersome abrasions beneath the patina. Seldom seen finer. NGC ID# 254S, PCGS# 7160
- 4707 1885-CC MS66 PCGS.** An especially frosty, untuned example of the 1885-CC Morgan dollar. The strike is sharp and the eye appeal is excellent. A few trivial grazes on Liberty's cheek are all that preclude an even finer grade. NGC ID# 254S, PCGS# 7160

**1885-CC Morgan Dollar, MS66
Elusive Deep Mirror Prooflike Example**

- 4708 1885-CC MS66 Deep Mirror Prooflike PCGS.** This amazing Premium Gem exhibits razor-sharp definition on all design elements and the deeply reflective fields contrast profoundly with the richly frosted devices. The well-preserved brilliant surfaces show only the most insignificant signs of contact. Population: 46 in 66 (5 in 66+) Deep Mirror Prooflike, 2 finer (8/15). NGC ID# 254S, PCGS# 97161
- 4709 1886 MS66 Deep Mirror Prooflike NGC.** Deeply mirrored fields offer strong contrast against the lightly frosted and well-struck design features on this Premium Gem. The carefully preserved surfaces display hints of light gold patina at the margins. The collector would be hard-pressed to find a better representative. Census: 14 in 66 (2 in 66 ★) Deep Mirror Prooflike, 6 finer (8/15). NGC ID# 254V, PCGS# 97167
- 4710 1886-O MS61 PCGS. CAC.** Fine marks are extensive but few are severe on this frosty Mint State 1886-O Morgan, a better-date issue that becomes notably rare in the higher Uncirculated grades. Frosty luster runs over largely untuned surfaces that show a slight ring of color at the extreme rim. The strike is surprisingly strong for the issue. NGC ID# 254W, PCGS# 7168
- 4711 1886-O MS62 PCGS.** The 1886-O is a recognized condition rarity in the series despite a production of 10.7 million coins. Most coins likely either circulated or were melted under the Pittman Act of 1918. This light gold and silvery-gray MS62 example is typically struck with glistening luster and minimal abrasions. NGC ID# 254W, PCGS# 7168

- 4712 1886-O MS62 PCGS.** Bright silvery surfaces display well-struck design elements. The luster flow is nearly complete except where interrupted by occasional marks or grazes. Nevertheless, a nice looking piece for the grade designation. NGC ID# 254W, PCGS# 7168
- 4713 1886-O MS62 NGC.** Despite a mintage of more than 10 million coins, the 1886-O Morgan dollar is a better date in Mint State. Many examples were released into circulation in the 19th century and others were likely melted under the terms of the Pittman Act of 1918. This piece is well-struck, with a hint of light golden toning over each side. NGC ID# 254W, PCGS# 7168
- 4714 1886-O MS62 PCGS. CAC.** This 1886-O Morgan dollar exhibits remarkably few abrasions for the grade, but a degree of striking softness is nonetheless present on the central high points. The interiors are untuned, while tinges of amber-red and navy blue appear around portions of the peripheries. NGC ID# 254W, PCGS# 7168

**1886-O Silver Dollar, MS63
Elusive in Finer Grades**

- 4715 1886-O MS63 PCGS.** Dave Bowers calls the 1886-O "exceedingly rare in choice to gem Mint State," which gives this frosty Select example much appeal for the budget-conscious collector. The eagle's breast shows some of the typical lightness of strike, but the obverse is better defined. Tinges of sun-gold toning surround the peripheries, with light grade-consistent abrasions in the interiors. NGC ID# 254W, PCGS# 7168

**1886-O Morgan Dollar, MS63
Better O-Mint Issue**

- 4716 1886-O MS63 NGC.** The 1886-O is a slightly better date in the context of the Morgan dollar series, especially in Mint State. This Select example is minimally abraded for the grade, with satiny golden-toned luster. The hair above Liberty's ear is a trifle soft, but the overall sharpness is above-average for this New Orleans issue. NGC ID# 254W, PCGS# 7168
- 4717 1886-S MS65 PCGS.** This delightful Gem exhibits sharply defined design elements and well-preserved brilliant surfaces with vibrant mint luster on both sides. The 1886-S Morgan dollar is a scarce issue in higher grades. NGC ID# 254X, PCGS# 7170
- 4718 1886-S MS65 PCGS.** The 1886-S is always popular as a low-mintage issue, quite elusive in high grade. This impressive Gem is well-detailed and brightly lustrous, under colorful shades of blue, lavender, gray, and greenish-gold toning. PCGS has seen 50 numerically finer specimens (8/15). NGC ID# 254X, PCGS# 7170

- 4719 1886-S MS65 PCGS.** The 1886-S Morgan dollar is a better date in the series, from a low mintage of 750,000 pieces. This sharply detailed Gem displays brightly lustrous surfaces with just a few minor contact marks. PCGS has graded 50 numerically finer examples (8/15). NGC ID# 254X, PCGS# 7170
- 4720 1886-S MS65 PCGS.** In Gem condition, the 1886-S Morgan dollar remains marginally available, but finer pieces are very scarce. This coin is vibrantly lustrous and essentially untuned. The strike is bold and there are no obtrusive abrasions. Just 50 coins are finer at PCGS (8/15). NGC ID# 254X, PCGS# 7170
- 4721 1887 MS66+ PCGS. CAC.** The availability of the 1887 Morgan, struck to the extent of more than 20 million coins, makes it an ideal candidate for type representation. This high-end Premium Gem is boldly struck, with brilliant, frosty luster that is devoid of significant abrasions. Finer examples are noticeably more elusive. NGC ID# 27Y3, PCGS# 7172
- 4722 1887/6 VAM-2, MS65+ PCGS.** Top 100. Wisps of butter-gold toning adorn the peripheries of this highly lustrous and nicely struck overdated dollar. The fields and motifs are nearly brilliant. Clean-checked and pleasing. A rare variety any finer. NGC ID# 2552, PCGS# 133908 Base PCGS# 7174
- 4723 1887/6-O VAM-3 MS62 PCGS.** A Top 100 Variety. Narrow bands of peach-gold toning visit the margins of this lustrous New Orleans overdated dollar. Minor scuffs are distributed but do not distract. The centers are incompletely impressed, usual for the variety. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178
- 4724 1887/6-O VAM-3 MS62 PCGS. CAC.** A Top 100 Variety. Delicate chestnut toning visits the thoroughly lustrous surfaces of this overdated New Orleans dollar. The reverse is well preserved, and the obverse lacks any individually mentionable abrasions. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178
- 4725 1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. The tell-tale curve of an underdigit 6 confirms the scarce New Orleans overdate. The centers show softness customary for the variety, but the remainder of the design is bold. Lustrous and moderately marked with caramel-gold obverse toning.
Ex: FUN Signature (Heritage, 1/2007), lot 7106, which realized \$1,955. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178
- 4726 1887-O MS65 PCGS.** The 1887-O Morgan dollar is scarce in Gem condition, and very rare any finer. This impressive specimen is sharply detailed, with well-preserved brilliant surfaces that radiate vibrant mint luster. PCGS has graded 10 numerically finer examples (7/15). NGC ID# 2547, PCGS# 7176

**1887-O Dollar, MS64+ Deep Mirror Prooflike
Few Are Finer**

- 4727 1887-O MS64+ Deep Mirror Prooflike NGC. CAC.** A nicely contrasted, high-end near-Gem example of this New Orleans issue. More completely struck at the centers than often seen, and the deeply mirrored fields give the coin dazzling eye appeal. An untuned and silver-white example, with slight chatter in the glassy fields and at the high points of the eagle. Plus-graded by NGC and CAC endorsed — the sole example at this level with the Plus designation. Rare any finer. Census: 49 in 64 (1 in 64+) Deep Mirror Prooflike, 3 finer (6/15). NGC ID# 2552, PCGS# 97177

- 4728 1887-S MS65 PCGS.** This delightful Gem exhibits well-detailed design elements and vibrant mint luster on both sides, with well-preserved brilliant surfaces and outstanding eye appeal. PCGS has graded 27 numerically finer examples (7/15). NGC ID# 2554, PCGS# 7180
- 4729 1887-S MS65 NGC.** Blushes of peach-gold and blue-green endow the borders of this lustrous and fully struck Gem. The fields are beautifully preserved, and the portrait displays only incidental contact. Certified in a prior generation holder. NGC ID# 2554, PCGS# 7180
- 4730 1887-S MS65 PCGS.** The Gem-quality surfaces of this 1887-S Morgan dollar are accentuated by a suggestion of semiprooflike reflectivity in the fields and well-defined details on the central motifs. Traces of light golden color prevent full brilliance. PCGS has seen only 27 finer representatives (8/15). NGC ID# 2554, PCGS# 7180

**1887-S Morgan Dollar, MS65+
Rarely Seen Finer**

- 4731 1887-S MS65+ PCGS.** The availability of this San Francisco issue declines somewhat in Gem condition, and finer pieces are rare. This Plus-designated coin displays vibrant luster with a few traces of gold toning around the outer peripheries. A touch of striking softness appears on the hair above Liberty's ear, as is typical, but there are no bothersome abrasions. PCGS lists 29 finer coins (8/15). NGC ID# 2554, PCGS# 7180
- 4732 1888 MS66+ PCGS.** This 1888 Morgan is boldly struck, with just a few traces of golden toning gracing the satiny silver surfaces. Both sides are free of bothersome abrasions and the eye appeal is pleasing. PCGS lists 31 finer representatives (8/15). NGC ID# 2556, PCGS# 7182
- 4733 1888 MS66+ PCGS. CAC.** More than 19 million pieces were struck in Philadelphia, pleasing the Bland-Allison Act proponents but putting undue stress on the dies, which were pushed to their limits. This example must have benefited from a fresh die pair, given its nearly full strike and overall bold details. The coin is entirely untuned with blazing silver luster. It seems incredible so few high-end Premium Gems and finer coins exist from such a huge mintage. Just 31 examples are certified numerically finer by PCGS (7/15). NGC ID# 2556, PCGS# 7182
- 4734 1888-O MS66 PCGS.** A few subtle hints of pale gold and lavender toning highlight the mostly brilliant surfaces of this well-detailed Premium Gem. Vibrant mint luster radiates from both sides and only minor signs of contact are evident. PCGS has graded no numerically finer examples (8/15). NGC ID# 2556, PCGS# 7184
- 4735 1888-O MS66 PCGS. CAC.** Liberty's cheek is virtually unmarked, and the fields on each side are incontrovertibly clean for the grade. All-brilliant surfaces display surprisingly radiant luster. The sharp strike, too, is uncharacteristic for the O-mint. Among the finest at PCGS (8/15). NGC ID# 2556, PCGS# 7184
- 4736 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU55 PCGS.** A Top 100 Variety. The widely die doubled profile confirms the "Hot Lips" variety, one of the most popular and distinctive VAMs of the entire series. Rare in Uncirculated grades, which makes a lustrous Choice AU a desirable entry into a variety collection. Minimally abraded and typically struck with a hint of straw-gold toning. NGC ID# 2556, PCGS# 133919 Base PCGS# 7308

- 4737 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU55 PCGS.** A Top 100 Variety. The famous "Hot Lips" VAM with strong die doubling seen on Liberty's profile. This creamy-gray example is moderately marked and lightly worn across the design's high-points. It is well-detailed and the doubling on Liberty's lips, nose, and chin are easy to discern with the unaided eye. Population: 52 in 55, 22 finer (8/15). NGC ID# 2556, PCGS# 133919 Base PCGS# 7308
- 4738 1888-S MS65 PCGS.** An occasional wisp of golden-tan color visits the lustrous surfaces of this Gem S-mint dollar. The design elements show good detail, except for the usual weak hair over Liberty's ear and the eagle's breast feathers. A few minute marks are consistent with the grade designation. PCGS has graded 31 numerically finer examples (7/15). NGC ID# 2557, PCGS# 7186
- 4739 1889-CC VF25 NGC.** The 1889-CC is the key to the Carson City series of Morgan dollars. This VF25 specimen retains much interior detail on Liberty's hair, and her ear is well-defined. The pleasing surfaces show some scattered minor abrasions under attractive shades of greenish-gold and lavender-gray toning. NGC ID# 2559, PCGS# 7190
- 4740 1889-CC VF25 PCGS.** Light golden toning visits the borders of this principally stone-gray silver dollar. Traces of luster linger in design crevices. The most elusive issue among Carson City Morgans. Only a single example emerged from the GSA holdings. Certified in a green label holder. NGC ID# 2559, PCGS# 7190
- 4741 1889-CC VF30 NGC.** Both sides of this key date Carson City Morgan dollar display bright gray patina and an expected number of abrasions. The highest points of the design show wear but the majority of the details remain distinct. NGC ID# 2559, PCGS# 7190
- 4742 1889-CC VF30 PCGS.** A pleasing VF specimen of the rarest Carson City Morgan, with most of the detail in Liberty's hair still intact and her ear well-defined. The silver-gray surfaces show scattered minor abrasions on both sides. NGC ID# 2559, PCGS# 7190
- 4743 1889-CC — Cleaning — PCGS Genuine. XF Details.** Stone-gray fields and devices cede to golden-brown borders. This key date Carson City dollar is hairlined but bagmarks are only incidental for the grade. The centers display wear but the wing plumage is sharp. NGC ID# 2559, PCGS# 7190
- 4744 1889-CC — Harshly Cleaned — NGC Details. AU.** This untuned key date Carson City dollar is somewhat bright and exhibits delicate hairlines throughout both sides. The borders and motifs are illuminated by luster, and no marks are noticeable. NGC ID# 2559, PCGS# 7190
- 4745 1889-CC — Cleaning — PCGS Genuine. AU Details.** Light straw-gold toning adorns this well-defined key date Carson City Morgan. The surfaces are moderately subdued and the cheek displays a few faded thin marks, but the fields are minimally abraded. NGC ID# 2559, PCGS# 7190
- 4746 1889-O MS64+ Prooflike PCGS. CAC.** The Plus designation and CAC approval sticker attest to the high-end technical and aesthetic quality of this Choice O-mint dollar, while the Prooflike designation confirms the overt field-motif contrast that provides an added degree of appeal. All-brilliant, crisply struck, and clean for the grade. NGC ID# 33SN, PCGS# 7193
- 4747 1889-S MS65 NGC.** This spectacular Gem exhibits sharply detailed design elements and vibrant cartwheel mint luster on both sides. The mostly brilliant surfaces are well-preserved, with a few hints of pale gold toning. NGC has graded 30 numerically finer examples (7/15). NGC ID# 255B, PCGS# 7194
- 4748 1889-S MS65 PCGS.** Dynamic luster sweeps this faintly toned and nicely struck better date silver dollar. The reverse is refreshingly close to pristine, and the obverse is also smooth. Certified in a green label holder.
Ex: MKJ Collection (Heritage, 4/2012), lot 5617, which realized \$1,495. NGC ID# 255B, PCGS# 7194

- 4749 1889-S MS64 Prooflike PCGS. CAC.** The issue's 700,000-coin mintage is among the lowest in the series, and Choice examples with prooflike surfaces are seldom seen. This is a brilliant representative with reflective mirrors that contrast modestly against well-struck design elements. Delicate coppery-orange patina graces the rims. Population: 41 in 64 (1 in 64+) Prooflike, 8 finer (7/15). NGC ID# 255B, PCGS# 7195

1889-S Dollar, MS64 Deep Mirror Prooflike Sharp Cameo

- 4750 1889-S MS64 Deep Mirror Prooflike NGC.** Deep Mirror Prooflike examples of this San Francisco issue are scarce. When found, a number of abrasions can be expected to interrupt the mirrors. This Choice example is conditionally rare. The strike is bold and cameo contrast highlights the motifs on each side. Hints of light golden toning appear around the extreme outer peripheries. Census: 13 in 64 Deep Mirror Prooflike, 2 finer (8/15). NGC ID# 255B, PCGS# 97195

- 4751 1890 MS65 NGC.** This well-detailed Gem Morgan dollar is brightly lustrous, with well-preserved brilliant surfaces and outstanding visual appeal. NGC and PCGS combined have awarded higher numeric grades to a mere eleven examples (7/15). NGC ID# 255C, PCGS# 7196

- 4752 1890 MS65 PCGS.** The 1890 Morgan dollar is conditionally rare in grades above the MS65 level. This well-detailed Gem displays dusky shades of golden-brown, silver-gray, and violet toning, with ample mint luster underneath. PCGS has graded four numerically finer examples (8/15). NGC ID# 255C, PCGS# 7196

- 4753 1890 MS65 PCGS.** This Gem 1890 silver dollar is among the finest representatives of this issue that are typically available to collectors, as PCGS has seen only four Premium Gems finer (8/15). Frosty luster is untuned, and only a few trivial surface grazes limit the grade. The central high points show a touch of the usual striking weakness. NGC ID# 255C, PCGS# 7196

- 4754 1890-CC MS64 PCGS. VAM-3.** The 90 in the date is lightly repunched southwest. A brilliant and uncommonly unabraded scarcer-date Carson City dollar. Liberty's forehead has a minor strike-through (as made) and the cartwheel luster is slightly muted. NGC ID# 255D, PCGS# 7198

- 4755 1890-CC MS64 PCGS.** The 1890-CC is a rather plentiful issue through Choice condition. In higher grades, however, the issue is scarce. Thus, this frosty and untuned representative offers an affordable opportunity for the budget-minded collector to obtain a high-end Mint State Carson City coin. Well-struck and minimally abraded. NGC ID# 255D, PCGS# 7198

- 4756 1890-CC MS64 PCGS.** Boldly defined, with a pleasing satiny-white appearance, radiant luster, and few appreciable surface marks. The 1890-CC is an issue that is far less obtainable (and less affordable) once the Gem threshold is reached. The reverse appears choice for the grade.
Ex: *Dallas Signature* (Heritage, 10/2006), lot 1499. NGC ID# 255D, PCGS# 7198

**1890-CC Silver Dollar, MS65
Eye-Appealing Surfaces**

- 4757 1890-CC MS65 NGC.** The GSA sales of the early 1970s yielded only 3,949 1890-CC dollars, few of which were in high grade. Gem examples of this issue are only marginally available and finer coins are genuine rarities. This MS65 coin is well-struck and displays vibrant, frosty luster. Hints of gold toning appear around the rims, and there are no obvious abrasions. Census: 82 in 65, 4 finer (8/15). NGC ID# 255D, PCGS# 7198

- 4758 1890-CC MS64 Deep Mirror Prooflike PCGS.** A charming Choice specimen, with unusually frosty devices that contrast profoundly with the deeply reflective fields. Shades of greenish-gold, lavender, and blue toning visit the pleasing surfaces, with a scattering of minor contact marks and hairlines. PCGS has graded 26 numerically finer examples (7/15). NGC ID# 255D, PCGS# 97199

**1890-CC Tail Bar Dollar, MS63
VAM-4, Distinctive Top 100 Variety**

- 4759 1890-CC Tail Bar, VAM-4, MS63 PCGS.** A Top 100 Variety. Of all the Morgan dollar VAMs, the 1890-CC is the most easily attributed. It is identifiable at arm's length, due to the broad die scratch below the left border of the tail feathers. This brilliant and lustrous representative has a good strike and an essentially immaculate reverse. A strike-through below Liberty's eye, shaped like an inverted L, adds further numismatic interest. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

- 4760 1890-O MS65 PCGS. VAM-31.** The 9 in the date is lightly repunched north. Delicate tan toning adorns this lustrous, nicely struck, and splendidly preserved Gem. The '90-O is readily acquired in typical Mint State, but like many New Orleans issues, is challenging to locate as a Gem. NGC ID# 255E, PCGS# 7200

- 4761 1890-O MS65 PCGS.** Though the centers show minor striking softness, the pillowy luster is above-average. Peach and golden-brown accents visit largely silver surfaces that show a "graze field" at the lowest part of the portrait and scattered marks elsewhere. PCGS has graded 26 numerically finer examples (8/15). NGC ID# 255E, PCGS# 7200

- 4762 1890-O MS64 Deep Mirror Prooflike NGC. VAM-31.** The 9 in the date is repunched north. This well preserved near-Gem has flashy fields and good eye appeal. The strike is good except on the right-side borders. Light straw-gold toning graces both sides. Certified in a former generation holder. NGC ID# 255E, PCGS# 97201

4763 1890-S MS65 PCGS. CAC. The 1890-S Morgan dollar becomes scarce in grades above the MS65 level. This attractive Gem exhibits well-detailed design elements and vibrant mint luster under shades of champagne-gold and pink toning. NGC ID# 255F, PCGS# 7202

4764 1890-S MS66 PCGS. VAM-2. The mintmark is blatantly repunched within the loops. Per VAMworld.com, the tops of an 89 lurk within the dentils below the date. Highly lustrous and fully struck with a smooth obverse field and minor marks on the cheek and left reverse field.

Ex: Jimmy G. PCGS Registry Collection (Heritage, 2/2008), lot 1326, which realized \$2,990.

From The Stephen A. Walling Collection. NGC ID# 255F, PCGS# 7202

4765 1891-CC MS64 PCGS. CAC. Frosty mint-fresh luster glows over each side of this Choice 1891-CC Morgan dollar, showing just a blush of light golden toning around the outer peripheries. The eagle's breast and the hair above Liberty's ear are a trifle soft, but there are no significant abrasions. NGC ID# 255H, PCGS# 7206

1891-CC Silver Dollar, MS65 Light Rose-Gold Toning

4766 1891-CC MS65 PCGS. The 1891-CC is one of the more conditionally elusive Carson City Morgans in Gem and finer grades. This piece is attractively preserved with original, frosty luster that shows just a hint of rose-gold toning emerging from the peripheries on each side. The strike is sharp and there are no major abrasions. Housed in an old green label holder. PCGS lists 31 finer examples (7/15). NGC ID# 255H, PCGS# 7206

4767 1891-CC MS63 Deep Mirror Prooflike NGC. Deeply prooflike, with frosty design elements that deliver modest cameo contrast. The strike is well-executed and tinges of orange-gold color appear around the peripheries. Scattered abrasions define the grade. Housed in a prior generation holder. Census: 64 in 63 Deep Mirror Prooflike, 26 finer (7/15). NGC ID# 255H, PCGS# 97207

4768 1891-CC Spitting Eagle, VAM-3, MS64 PCGS. A Top 100 Variety. The first C in the mintmark is repunched north, a lesser-known characteristic of the familiar "Spitting Eagle" reverse. Lustrous and minimally toned with a few left obverse grazes and only minor incompleteness of strike at the centers. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

4769 1891-CC Spitting Eagle, VAM-3, MS64 PCGS. CAC. A Top 100 Variety. Radiant brilliance is the hallmark of this Choice Carson City dollar, an ideal collectible example for an MS64 set. Trivial grazes on the cheek and to a lesser extent in the fields limit the grade, though the eye appeal is unaffected. Boldly impressed throughout. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

4770 1891-CC Spitting Eagle, VAM-3, MS64 PCGS. CAC. A Top 100 Variety. The available but ever-popular "Spitting Eagle" variety earns its name from a small die lump that occurs in front of the eagle's beak. This Carson City representative offers an above-average strike for the issue. The untuned surfaces are lustrous and appealing. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

4771 1891-CC Spitting Eagle, VAM-3, MS64+ PCGS. CAC. A Top 100 Variety. This is one of the most collectible Carson City Morgan dollar issues after those struck in the early to mid-1880s. CAC has rightfully awarded a green sticker to this all-brilliant near-Gem. Frosted surfaces are remarkably clean, and the eye appeal is undeniable. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

1891-CC Dollar, MS65 VAM-3, Spitting Eagle

4772 1891-CC Spitting Eagle, VAM-3, MS65 PCGS. A Top 100 Variety. The small die lump below the beak is the inspiration for the "Spitting Eagle" nickname. This nicely struck and clean-cheeked Carson City dollar is mostly white but displays hints of orange-red toning throughout the borders. The lustrous fields exhibit occasional minor grazes. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

4773 1891-O MS64+ PCGS. Were this 1891-O Morgan struck a little sharp on the central motifs, it might have garnered a full Gem grade. The Plus designation denotes outstanding surface quality for the grade, including smooth, satiny luster and just a suggestion of light golden toning. The central high points are weak, as usual. NGC ID# 255J, PCGS# 7208

4774 1891-O MS64+ PCGS. CAC. A high-end Choice example of this popular Morgan dollar issue, with well-detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show a few hints of golden-tan toning. NGC ID# 255J, PCGS# 7208

4775 1891-S MS65 PCGS. It is difficult to discern why this piece did not receive a Prooflike designation, as substantial mirroring provides noticeable contrast with the well-struck, frosty devices. A few minute luster grazes limit the numeric grade. This better San Francisco issue is seldom available in numerically finer condition. NGC ID# 255K, PCGS# 7210

4776 1891-S MS65 PCGS. Splashes of peach-gold toning grace this lustrous and boldly struck Gem. The reverse is remarkably smooth, and the left obverse shows only light marks. Certified in an old green label holder.

Ex: Long Beach Signature (Heritage, 6/2012), lot 4360, which realized \$1,092.50. NGC ID# 255K, PCGS# 7210

4777 1892 MS64+ PCGS. CAC. This slightly better Philadelphia issue becomes noticeably more elusive in each succeeding grade beyond MS64. This Plus-designated Choice example displays frosty luster beneath golden-gray toning. A tinge of blue appears periodically around the reverse periphery. A carbon-colored toning streak spans the reverse from 7 to 12 o'clock. The central high points are softly struck. NGC ID# 255L, PCGS# 7212

1892 Morgan Dollar, MS65
Very Rare Any Finer

4778 1892 MS65 PCGS. The 1892 Morgan dollar is a prime condition rarity in grades above the MS65 level. This attractive Gem offers sharply detailed design elements and lustrous, well-preserved surfaces with a few hints of pink and gold toning. PCGS has graded five numerically finer examples (7/15). NGC ID# 255L, PCGS# 7212 [34032 STD](#)

4779 1892-CC MS61 NGC. A well-detailed Mint State specimen from the famous Carson City Mint, with brilliant surfaces that show the expected number of minor contact marks for the grade and radiate vibrant mint luster. NGC ID# 255M, PCGS# 7214

4780 1892-CC MS62 NGC. Only one 1892-CC dollar turned up during the GSA sales of the 1970s, but a sufficient number of coins survive from MS62 to MS64 to meet the bulk of collector demand. Brilliant and lustrous surfaces are expectedly marked, but free of any singular impairments. Frosty and well-struck. NGC ID# 255M, PCGS# 7214

4781 1892-CC MS62 NGC. An attractive MS62 example of this popular Morgan dollar issue from the famous Carson City Mint, this coin offers sharply detailed design elements and lustrous surfaces that show a minimum number of minor contact marks for the grade. NGC ID# 255M, PCGS# 7214

4782 1892-CC MS63 PCGS. CAC. Always in demand because of the popular CC mintmark, this attractive Select example displays sharply detailed design elements and lustrous surfaces with a few scattered minor contact marks. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64
Brilliant With a Hint of Gold Color

4783 1892-CC MS64 NGC. Quantities of this CC-mint issue were depleted after the Treasury release of the early 1960s, save for a single representative. Most coins survive in low to mid-Uncirculated grades, but examples begin to pose a challenge at the Gem level. The brilliant surfaces of this Choice piece retain shimmering luster and display minimal abrasions. Well-struck with an expected bit of softness over the ear. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64
Dazzling Cartwheel Luster

4784 1892-CC MS64 PCGS. Dazzling cartwheel effects glow over the surfaces of this frosty, highly lustrous near-Gem. Shallow marks on Liberty's cheek, and in a few of the field areas, prevent an even finer grade assessment. A popular and scarce Carson City issue in its highest affordable grade.

Ex: Dallas Signature (Heritage, 11/2006), lot 1385. NGC ID# 255M, PCGS# 7214

1892-CC Silver Dollar, MS64
Near-Brilliant Luster

4785 1892-CC MS64 NGC. The 1892-CC is one of the less often seen Carson City Morgans in Gem and finer grades, heightening demand among budget-conscious collectors for pieces in Choice condition. This example is well-struck for the issue, with frosty luster that shows just a few trivial grazes on Liberty's cheek and in the adjacent field. Hints of lemon-gold toning appear around the peripheries. NGC ID# 255M, PCGS# 7214

4786 1892-CC MS60 Prooflike PCGS. VAM-4. The second C in the mintmark is clearly repunched. A flashy better date Carson City dollar. Brilliant save for a hint of tan toning on the left obverse field. The fields are relatively smooth and the cheek displays distributed grazes. Encapsulated in an old green label holder. NGC ID# 255M, PCGS# 7215

4787 1892-O MS64 PCGS. CAC. A lovely example that remains almost entirely untoned, other than a few minor spots along the wreath on the reverse. Minor abrasions, including a few roller marks, appear. NGC ID# 255N, PCGS# 7216

4788 1892-O MS64+ PCGS. CAC. This New Orleans issue is seldom seen well-struck, a characteristic to which this Plus-graded MS64 example falls victim. The frosty, untuned surfaces are well-preserved, and if it were not for striking weakness on the central high points, the coin might have garnered a full Gem grade. NGC ID# 255N, PCGS# 7216

4789 1892-S AU50 NGC. A better date in Mint State and therefore heavily collected in AU. This About Uncirculated 1892-S Morgan shows medium steel-gray patina with minor wear over the high points of the devices. There are no bothersome surface flaws. NGC ID# 255P, PCGS# 7218

4790 1892-S AU53 PCGS. The lightly abraded surfaces of this attractive AU53 example display prooflike reflectivity in sheltered areas, especially near the rims. The design elements show just a trace of friction on the high points. NGC ID# 255P, PCGS# 7218

- 4791 1892-S AU53 PCGS.** The 1892-S Morgan dollar is surprisingly elusive in high grade. This pleasing AU53 example exhibits just a touch of wear on the well-detailed design elements and the lightly abraded surfaces show traces of greenish-gold and silver-gray toning. NGC ID# 255P, PCGS# 7218

**1892-S Silver Dollar, AU55
Major San Francisco Semikey**

- 4792 1892-S AU55 PCGS.** A higher-end example of this conditionally elusive San Francisco issue. The strike is bold and just a brush of friction dulls the luster on each side. Even so, a distinct cartwheel effect survives in the protected areas of the fields. The surfaces are fairly smooth and each side displays light golden-gray color. NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, AU55
Better San Francisco Issue**

- 4793 1892-S AU55 NGC.** After the key 1893-S, the 1892-S is the scarcest Morgan dollar in Mint State. This is a collectible Choice AU example, showing strong detail and remnants of luster. There are no bothersome abrasions and each side exhibits hints of light champagne toning. Wear is largely limited to the high points of the eagle's breast and the hair above Liberty's ear. NGC ID# 255P, PCGS# 7218

- 4794 1893 MS64 PCGS.** A delightful coin with a sharp strike and impressively vibrant, frosty luster. Save for a blush of deep amber along the upper obverse and lower reverse borders, the surfaces are brilliant. A small cluster of light marks appears on Liberty's jaw, with the remainder of each side largely pristine. NGC ID# 255R, PCGS# 7220

- 4795 1893 MS64 PCGS.** One of just 378,000 business strike Morgan Dollars produced in the Philadelphia Mint in 1893, this near-Gem example reveals bright, nearly untuned surfaces and sharply defined design elements.
Ex: Palm Beach Signature (Heritage, 11/2004), lot 9774. NGC ID# 255R, PCGS# 7220

- 4796 1893 MS64 PCGS. VAM-2.** A lightly toned and lustrous example of this low mintage and better date Philadelphia issue. The reverse is beautifully preserved and the obverse shows only unimportant contact. The 3 in the date is repunched north.
Ex: Dallas Signature (Heritage, 11/2006), lot 1400, which realized \$2,530. NGC ID# 255R, PCGS# 7220

- 4797 1893-CC AU50 PCGS.** A collector-grade example of the final issue in the Carson City short set, this About Uncirculated coin shows excellent definition with original golden-gray toning. Light wear leaves a significant amount of fine detail in Liberty's hair curls, suggesting a sharp strike. NGC ID# 255S, PCGS# 7222

- 4798 1893-CC — Obverse Damage — NGC Details. Unc. VAM-5.** The portrait exhibits minor die doubling. This lustrous semikey Carson City dollar has a bold strike and medium wheat-gold obverse toning. The fields are nearly unabraded, but a shallow scrape behind Liberty's mouth corresponds to the NGC designation. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, Unc Details
Semiprooflike Mirroring**

- 4799 1893-CC — Improperly Cleaned — NGC Details. Unc.** Semiprooflike mirroring in the fields accentuates the eye appeal of this lustrous final-year Carson City dollar. Tinges of amber-gold toning appear along the upper-left obverse border, but there is no other obvious color. The usual striking weakness on the eagle's breast and the hair above Liberty's ear persists on this piece. When studied at an angle with a glass, scattered hairlines are revealed which preclude a numeric grade. NGC ID# 255S, PCGS# 7222

- 4800 1893-CC — Cleaning — PCGS Genuine. Unc Details. A** lustrous and lightly toned semikey Carson City dollar. The strike is uncommonly sharp for the issue. The portrait displays faint hairlines, but the fields are only lightly marked. NGC ID# 255S, PCGS# 7222

- 4801 1893-O AU58 NGC.** Luster is almost strong enough to warrant a Mint State grade, although this 1893-O dollar does show a trace of friction on the eagle's breast and the hair above Liberty's ear. Some high-point softness is characteristic of the issue, but the overall strike is above-average. An essentially untuned coin. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS60
Appealing for the Grade**

- 4802 1893-O MS60 NGC.** This 1893-O Morgan exhibits few abrasions for the grade, although a number of faint grazes on Liberty's cheek have a deciding factor on NGC's opinion. Moderate striking weakness on the central high points is characteristic of this better New Orleans issue. Amber-gold toning warms the peripheries. NGC ID# 255T, PCGS# 7224

1893-O Morgan, Frosty MS62

- 4803 1893-O MS62 NGC.** Minimal abrasions for the grade, combined with frosty, untuned mint luster gives this lower-end Mint State 1893-O Morgan excellent eye appeal. As is expected for the issue, this piece shows moderate striking softness on the eagle's breast and the hair above Liberty's ear. This issue is extremely difficult to locate with pleasing eye appeal, especially in the area of satisfactory luster. NGC ID# 255T, PCGS# 7224

- 4804 1893-S — Rim Filing — NGC Details. AG.** All legends are clear on this rare date Morgan dollar. Charcoal-gray fields contrast with pearl-white devices. The obverse rim is lightly filed near 4:30. The reverse rim is filed between 2 and 7 o'clock, with additional minor filing near 1 o'clock. NGC ID# 255U, PCGS# 7226

- 4805 1893-S Good 4 PCGS.** A collector-grade coin through and through, this well-circulated 1893-S Morgan shows even wear with complete rims and boldly outlined central devices. Olive-gray patina deepens in the fields, delivering a circulation-cameo appearance. NGC ID# 255U, PCGS# 7226

- 4806 1893-S — Improperly Cleaned — NGC Details. VG.** Faint almond-gold toning overlies pearl-gray surfaces. Microgranular but without consequential abrasions, this key date silver dollar would complete many business strike sets of the popular series. NGC ID# 255U, PCGS# 7226

- 4807 1893-S — Graffiti — PCGS Genuine. VG Details.** The diagnostic die markers within the RT in LIBERTY are plain on the present key date dollar. Pinscratches on the reverse field near the wings are accompanied by patches of hairlines. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, Collectible VG10

- 4808 1893-S VG10 NGC.** This is a collector-grade example of the key San Francisco Morgan dollar, showing evenly worn battleship-gray surfaces with hints of deeper gray in the crevices around the relief elements. This is a problem-free representative that will appeal to the cost-conscious enthusiast. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, VG10
Appealing Two-Toned Gray Color

- 4809 1893-S VG10 ANACS.** Original battleship-gray patina allows deeper hues to reside in the protected regions on each side of this collector-grade 1893-S Morgan dollar. Even wear over the motifs is consistent with the grade. An old mark on the eagle's neck is the only surface flaw of note, but is hardly bothersome. NGC ID# 255U, PCGS# 7226

- 4810 1893-S — Improperly Cleaned — NGC Details. Fine.** An affordable midgrade example of the key to the Morgan dollar series. This example shows even wear, with bright steel-gray surfaces. Some olive-gold toning appears around the peripheries. NGC ID# 255U, PCGS# 7226

- 4811 1893-S — Obverse Scratched — NGC Details. Fine.** A cream-gray key date representative that retains partial hair and plumage detail. Evaluation beneath a loupe reveals pinscratches outlining the motifs, most apparent on the field near Liberty's nose. NGC ID# 255U, PCGS# 7226

1893-S Morgan, Fine 12
Dove-Gray, Well-Preserved Surfaces

- 4812 1893-S Fine 12 ANACS.** The surfaces are largely dove-gray with no more than a touch of deeper gold color on the reverse. This key-date Morgan shows merely good, old-fashioned wear, but there are few marks of import and the eye appeal is quite high for the grade. The obverse on this piece is especially nice. NGC ID# 255U, PCGS# 7226

1893-S Dollar, VF Details
Pleasing Collector-Grade Example

- 4813 1893-S — Repaired — NGC Details. VF.** Bright silver-gray surfaces characterize this circulated, but nevertheless important key date offering. The highest points of the design show evidence of friction, but the legends and other areas remain well-detailed. The noted repair occurs diagonally from the eagle's left (facing) wing down through the shoulder to the breast, but it is not overly distracting. This is a pleasing collector-grade example for the specialist on a budget.

1893-S Dollar, VF Sharpness
Key Branch Issue

- 4814 1893-S — Improperly Cleaned — NGC Details. VF.** A moderately hairlined cream-gray and straw-gold representative of the famous key date. Void of conspicuous marks. Liberty's curls display wear but most of the wing feathers are clear. The mintages of the 1893-S and 1894 are similar, but the latter issue failed to circulate as widely, since paper money was preferred in the East and Midwest, while the West Coast enjoyed a hard money tradition.

1893-S Silver Dollar, VF Details

- 4815 1893-S — Rim Damage — PCGS Genuine. VF Details.** This budget-friendly 1893-S Morgan dollar exhibits pleasing original color that consists of deep gunmetal-gray in the fields and lighter shades of the same over the relief elements. Small, intermittent dings and bumps around the rims preclude a numeric grade from PCGS, but do little to harm the eye appeal. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Collectible VF30

- 4816 1893-S VF30 NGC.** Pewter-gray surfaces show hints of light gold color when tilted beneath a light. This midgrade 1893-S Morgan is well-detailed for the VF level, and there are no bothersome flaws. The budget-conscious collector will be especially interested in this piece, as it is among the finer examples of the issue that can be termed affordable. NGC ID# 255U, PCGS# 7226

1893-S Dollar, XF Details

- 4817 1893-S — Improperly Cleaned — NGC Details. XF.** The well-known die markers within the RT in LIBERTY are readily apparent on this well-defined key date dollar. Luster illuminates the borders and devices. Golden-brown and apple-green toning clings to the margins. The lightly cleaned surfaces show few marks, though we note a thin vertical line on the nose.

1893-S Dollar, AU Details

- 4818 1893-S — Improperly Cleaned — NGC Details. AU.** A briefly circulated wheat-gold and pearl-white key date dollar. The surfaces are bright and somewhat hairlined but lack any obtrusive abrasions. Luster illuminates design elements, and evident wear is chiefly confined to the eagle's breast and the hair above the ear.

- 4819 1894 XF45 PCGS.** A Choice XF example from the second-lowest mintage of the series, this coin shows light wear on Liberty's hair and the eagle's breast and some scattered minor abrasions on both sides. NGC ID# 255V, PCGS# 7228

- 4820 1894 AU50 PCGS.** Collectors prize the 1894 Morgan dollar for its low mintage of 110,000 pieces. This attractive AU specimen is minimally abraded and shows only a touch of high-point wear on the well-detailed design elements. NGC ID# 255V, PCGS# 7228

- 4821 1894 AU55 PCGS.** Just a trace of wear precludes a Mint State grade on this better-date Morgan, although luster remains in the fields and the design elements are sharply detailed. Traces of light golden color accent each side, while a few grade-consistent abrasions appear on Liberty's cheek. NGC ID# 255V, PCGS# 7228

1894 Morgan, Lustrous MS60

- 4822 1894 MS60 NGC.** The 1894 Morgan dollar is a low-mintage semikey, seldom encountered in high grades and prized by collectors in all conditions. This attractive MS60 example is sharply detailed throughout and minimally abraded for the grade, with vibrant mint luster and strong eye appeal. NGC ID# 255V, PCGS# 7228

1894 Dollar, MS62 Satin, Untoned Semikey

- 4823 1894 MS62 PCGS.** An example of the 1894 is usually one of the final additions to a Morgan dollar set, as this semikey date claims the second-lowest mintage in the series (110,000 coins). Satiny, untoned surfaces show well-struck design elements with an expected number of small abrasions. A diagonal mark on Liberty's cheek is the only impairment that merits individual attention. NGC ID# 255V, PCGS# 7228

- 4824 1894-O MS61 PCGS.** A pleasing lower-grade Mint State example of this popular O-mint issue, this piece displays softly frosted, untoned luster, with only minor grazes on the cheek limiting the grade. The eagle's talons and the hair above Liberty's ear are lacking full definition, as is typical of this New Orleans issue. NGC ID# 255W, PCGS# 7230

- 4825 1894-O MS62 NGC.** The eye appeal of this 1894-O Morgan dollar exceeds that which is expected for the MS62 level. Abrasions are light and scattered, and the luster is untoned and vibrant. Significant striking deficiency in the centers likely contributes to NGC's assessment. NGC ID# 255W, PCGS# 7230

- 4826 1894-S MS63 NGC.** Vibrant mint luster is accentuated on this piece by a suggestion of prooflike mirroring in the reverse fields. Scattered abrasions are almost completely restricted to the obverse, but pose little distraction. The strike is a trifle soft on the hair above Liberty's ear, while each side displays light lavender-gold toning. NGC ID# 255X, PCGS# 7232

- 4827 1894-S MS63 NGC.** A few subtle hints of lavender toning visit the lightly marked surfaces of this attractive Select specimen, with sharply detailed design elements and frosty mint luster on both sides. NGC ID# 255X, PCGS# 7232

- 4828 1894-S MS63 PCGS.** This eye-appealing 1894-S dollar has two distinctively different looks. The obverse is frosty and radiant with a brilliant interior and golden periphery. The reverse is prooflike, with margins that show pale lavender and deeper plum hues. Both sides are well-struck and show a few scattered abrasions. NGC ID# 255X, PCGS# 7232

- 4829 1894-S MS63+ PCGS.** This high-end Select example displays sharply detailed design elements and vibrant mint luster on both sides. The pleasing surfaces show a scattering of minor contact marks and delicate hints of golden-tan toning in selected areas. NGC ID# 255X, PCGS# 7232

1894-S Morgan, Beautifully Toned MS64+

- 4830 1894-S MS64+ NGC.** Beautiful cinnamon-rose patina is more abundant on the obverse of this near-Gem Morgan dollar, while the reverse is largely brilliant with a light ring of patina at the rim. Both sides show great eye appeal and few marks, although some roller marks appear in Liberty's hair, as struck. Far finer than usually seen for this elusive S-mint issue. Census: 12 in 64+, 2 in 64 ★, 58 finer (8/15). NGC ID# 255X, PCGS# 7232

- 4831 1894-S MS64 PCGS. CAC.** The frosty reverse is practically untoned, while dappled lemon-yellow, orange, and silver-gray patina graces the obverse. A well-defined and pleasing S-mint dollar. Ex: *Long Beach Signature* (Heritage, 9/2007), lot 2756; *Phoenix Signature* (Heritage, 3/2008), lot 1150. NGC ID# 255X, PCGS# 7232

- 4832 1895-O AU53 PCGS. CAC.** A collector-grade example of this better New Orleans issue, showing original steel-gray surfaces with hints of luster remaining in the protected regions. A tinge of amber toning graces the left obverse border, while wear is largely restricted to the high points of the devices. NGC ID# 255Y, PCGS# 7236

- 4833 1895-O AU55 NGC.** The obverse shows mottled violet-gray, gold, and cobalt blue patina with areas of brilliance in the fields, while the largely untoned reverse features daubs of similar coloration around the margins and near the recesses. Typically struck with fewer marks than expected for the grade. NGC ID# 255Y, PCGS# 7236

- 4834 1895-O AU55 NGC.** From a mintage of just 450,000 pieces, this is certainly one of the better dates in the Morgan dollar series. The silver-gray surfaces feature plenty of cartwheel luster and signs of only light circulation over the high points. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58 Seldom Seen Finer

- 4835 1895-O AU58 NGC.** The 1895-O is highly coveted in Mint State, but the scarcity of such coins forces most collectors to acquire AU examples instead. This piece is nearly Uncirculated, showing just a trace of friction over the high points of the devices. Each side retains modest luster and displays bright, untoned surfaces. NGC ID# 255Y, PCGS# 7236

1895-O Silver Dollar, AU58
Light Peripheral Toning

4836 1895-O AU58 NGC. Much luster remains in the fields of this Borderline Uncirculated 1895-O Morgan dollar. The interiors are near-brilliant, but tinges of rose-gold toning appear around portions of the peripheries. This New Orleans issue is scarce in Mint State, making high-end AU coins, such as this piece, highly sought-after. NGC ID# 255Y, PCGS# 7236

4837 1895-S AU53 NGC. A lightly circulated example of this sought-after issue, from a low mintage of 400,000 pieces, this coin shows just a touch of wear on the well-detailed design elements and the surfaces are visited by hints of greenish-gold and pink toning. NGC ID# 255Z, PCGS# 7238

1895-S Silver Dollar, AU58
Better S-Mint Issue

4838 1895-S AU58 NGC. In balancing cost and eye appeal, many collectors prefer an attractive AU58 coin to a lower-end Mint State piece, making this near-Mint 1895-S notably appealing to the budget-conscious collector. Trivial friction limits the grade but leaves significant luster in the fields. Faint traces of light golden toning grace each side. NGC ID# 255Z, PCGS# 7238

1895-S Morgan, Lustrous AU58

4839 1895-S AU58 PCGS. CAC. The 1895-S Morgan is famous for its comparatively low mintage of 400,000 coins and its corresponding elusiveness in Mint State. The present coin shows slight high-point friction, but offers the budget-conscious collector bold detail and significant luster. Scattered abrasions accompany the grade, and a light golden hue graces each side. NGC ID# 255Z, PCGS# 7238

1896 Morgan Dollar, MS67
Superb Luster and Eye Appeal

4840 1896 MS67 PCGS. CAC. The 1896 is one of the most plentiful Morgan dollar issues from the 1890s, but its availability declines significantly at the Superb Gem level. This piece is frosty and brilliant, but with a tinge of sun-gold toning around the extreme outer peripheries. A touch of striking softness on the hair immediately above Liberty's ear accompanies the unabraded surfaces. PCGS lists just two MS68 coins finer (7/15). NGC ID# 2562, PCGS# 7240

4841 1896-O MS61 NGC. General circulation consumed many examples of this New Orleans issue, limiting the supply of Mint State coins today. This piece shows light chatter on Liberty's cheek, but there are no other serious surface flaws. As expected for the issue, there is trivial softness on the eagle's breast and the hair above Liberty's ear. Traces of light golden toning appear over each side. NGC ID# 27ZU, PCGS# 7242

4842 1896-O MS62 PCGS. A lustrous Mint State example of this conditionally elusive New Orleans issue, showing above-average central definition. The reverse is uniformly champagne in color, while the obverse displays lavender-gray toning that masks scattered abrasions. NGC ID# 27ZU, PCGS# 7242

4843 1896-O MS62 PCGS. A frosty Mint State piece with brilliant silver surfaces and a splash of gold at the center of the obverse. A scarce issue in Mint State grades, always in demand from advanced collectors. The strike is excellent for the issue, with only modest central weakness. NGC ID# 27ZU, PCGS# 7242

4844 1897-O MS62 PCGS. An underrated and difficult coin to find in the finer Mint State grades. The present piece shows only a few light contact marks consistent with an MS62 grade, although apparently held back by the somewhat lackluster surfaces. NGC ID# 2565, PCGS# 7248

4845 1897-O MS62 NGC. For an issue that typically has "dull and lifeless" luster, in the words of Dave Bowers, this coin is unusually frosty and vibrant. The central motifs also show better than average sharpness. Grade-limiting abrasions are minor in nature, posing little direct distraction on this near-brilliant 1897-O. NGC ID# 2565, PCGS# 7248

**1897-O Morgan Dollar, MS63
Pleasing for the Grade**

4846 1897-O MS63 PCGS. The 1897-O Morgan is a better date in Mint State, seldom seen finer than the currently offered MS63 example. Both sides of this piece show softly frosty luster with traces of light golden toning throughout. A touch of the usual New Orleans striking softness occurs on the eagle's breast and the hair above Liberty's ear, but grade-limiting abrasions are relatively light and evenly dispersed over each side. NGC ID# 2565, PCGS# 7248

4847 1897-S MS66 NGC. The brilliant, well-preserved surfaces of this delightful Premium Gem radiate vibrant frosty mint luster on both sides, with just the slightest trace of lavender toning. The design elements are sharply detailed and eye appeal is terrific. NGC has graded 11 numerically finer examples (7/15). NGC ID# 2567, PCGS# 7250

4848 1897-S MS66 PCGS. A delightful Premium Gem, with sharply detailed design elements and vibrant, frosty mint luster on both sides. The creamy well-preserved surfaces show only insignificant signs of contact. PCGS has graded 26 numerically finer examples (8/15). NGC ID# 2567, PCGS# 7250

4849 1897-S MS65 Prooflike PCGS. CAC. A crisply struck and lustrous Gem bathed in lemon-gold and ice-blue patina. Impressively unabraded and appealing. A desirable example of this relatively available later San Francisco issue. Encapsulated in a first-generation holder. NGC ID# 267S, PCGS# 7251

**1898 Morgan Dollar, MS67
Light, Two-Sided Toning**

4850 1898 MS67 PCGS. This Superb Gem 1898 silver dollar is boldly struck over each side, and exhibits beautifully unabraded surfaces and frosty luster. Both sides show consistent golden-rose toning that deepens slightly toward the borders, where the reverse features occasional hints of lavender and blue. A sliver of rainbow toning graces the bottom of the date. Population: 87 in 67 (4 in 67+), 0 finer (8/15). NGC ID# 2568, PCGS# 7252

4851 1898-O MS67 PCGS. Sharply detailed in most areas, this delightful Superb Gem shows just a trace of the usual softness on the hair above the ear. The lustrous surfaces show a few hints of golden-tan toning and no mentionable distractions are evident. PCGS has graded no numerically finer examples (8/15). NGC ID# 2569, PCGS# 7254

4852 1898-O MS67 PCGS. Without a doubt, this Superb Gem 1898-O Morgan will please even the most discerning collector. The surfaces are pristine and frosty, with only a few traces of champagne toning. Striking definition is also above-average for the issue. PCGS has not certified any examples numerically finer (8/15). NGC ID# 2569, PCGS# 7254

4853 1898-O MS65 Deep Mirror Prooflike NGC. A spectacular Gem, with sharply detailed, frosty design elements and nicely contrasted reflective fields. The brilliant surfaces are free of mentionable flaws. NGC has graded 14 numerically finer examples (7/15). NGC ID# 2569, PCGS# 97255

4854 1898-S MS65 PCGS. This impressive Gem is brilliant and lustrous. Well struck design features and minimally abraded surfaces add to the coin's appeal. PCGS has graded 84 numerically finer examples (7/15). NGC ID# 256A, PCGS# 7256

4855 1898-S MS65 PCGS. The well-preserved surfaces of this attractive Gem are blanketed in shades of golden-brown, sea-green, and lavender-gray toning. The design elements are well-detailed and eye appeal is outstanding. NGC ID# 256A, PCGS# 7256

4856 1898-S MS65 PCGS. A bold strike and Gem-quality surfaces are the hallmarks of this brilliant 1898-S Morgan dollar, although a vibrant cartwheel effect further contributes to the eye appeal. Few finer coins are certified (8/15). NGC ID# 256A, PCGS# 7256

4857 1899 MS64 Deep Mirror Prooflike PCGS. CAC. This gleaming near-Gem presents like a proof at first glance, but exhibits a hint of cartwheel luster which endorses the circulation strike origin. The fields are fully mirrored and provide a lovely backdrop for the sharp, frosty design elements. Essentially untuned and displaying few abrasions. NGC ID# 256B, PCGS# 97259

4858 1899-O MS67 PCGS. This plentiful New Orleans issue becomes conditionally scarce in MS67, and only a single finer coin is certified by PCGS and NGC combined (8/15). This coin is incredibly well-preserved and thickly frosted with light golden toning over the reverse and around the obverse periphery. A touch of softness on the hair above Liberty's ear is characteristic of the issue. NGC ID# 256C, PCGS# 7260

4859 1899-S MS65 PCGS. The 1899-S Morgan dollar is always popular as a turn-of-the-century issue. This sharply detailed Gem offers well-preserved surfaces with vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 256D, PCGS# 7262

**1899-S Silver Dollar, MS66
Outstanding Surface Quality**

4860 1899-S MS66 PCGS. Dusky golden-gray toning blankets each side of this Premium Gem 1899-S Morgan dollar, but no abrasions are hidden by the patina; the surfaces of this piece appear high-end for the grade. The strike is sharp and there is a hint of semiprooflike mirroring in the fields. Only 10 Superb Gems are finer at PCGS (8/15). NGC ID# 256D, PCGS# 7262

4861 1900 MS66+ PCGS. CAC. Satiny luster is nearly untouched on this high-end Premium Gem, save for medium amber-gold toning which blankets much of each side. Lovely sky-blue graces much of each periphery. The strike is a trifle soft on the eagle's breast and the hair above Liberty's ear. NGC ID# 256F, PCGS# 7264

- 4862 1900-O MS66+ PCGS. CAC.** A vibrantly lustrous, brilliant example that presents as pristine to the naked eye. Only close study with a loupe reveals a few tiny ticks that limit the grade. This coin shows a touch of the usual softness on the central high points, but is above-average overall. Finer examples are scarcely seen and are out of reach for many collectors. NGC ID# 256F, PCGS# 7266
- 4863 1900-S MS65 PCGS.** Frosty, nearly undisturbed luster enlivens both sides of this Gem representative, with just a faint suggestion of light golden color seen upon close examination. The eagle's breast feathers and the hair above Liberty's ear are not fully defined, though the remarkably clean surfaces balance the visual appeal. NGC ID# 256H, PCGS# 7270
- 4864 1900-S MS65 PCGS.** A delightful Gem specimen of this popular Turn-of-the-century issue, with razor-sharp definition on the design elements and well-preserved lustrous surfaces throughout. Eye appeal is outstanding. NGC ID# 256H, PCGS# 7270
- 4865 1901 AU58 PCGS.** A true "slider," this Borderline Uncirculated 1901 Morgan dollar exhibits nearly full mint luster over brilliant surfaces. There is no obvious wear, other than trivial slide marks on the devices. Among the finest circulated examples known. NGC ID# 256J, PCGS# 7272
- 4866 1901 AU58+ PCGS.** Light copper toning frames golden-gray surfaces that retain abundant mint luster. Strike softness and a touch of friction occur over Liberty's ear, the eagle's breast, and the lower olive leaves. The difference between this Plus-designated near-Mint example and an Uncirculated coin is virtually indiscernible. NGC ID# 256J, PCGS# 7272
- 4867 1901 MS60 ANACS.** A pleasing Mint State example of this well-known condition rarity, golden-gray surfaces offer softly frosted luster beneath blushes of reddish-violet and orange patina. The strike shows incompleteness at the extreme centers and around the peripheries, as usual, while marks are surprisingly unobtrusive for the grade. Housed in a small-sized holder. NGC ID# 256J, PCGS# 7272

**1901 Morgan Dollar, MS62
Satin Mint State Example**

- 4868 1901 MS62 NGC.** The 1901 is arguably the scarcest 20th century Morgan dollar in Mint State. This piece shows light chatter on Liberty's cheek but there are no individually bothersome abrasions. The strike is a trifle soft on the central high points, as usual, while each side shows hints of rose-gold toning. NGC ID# 256J, PCGS# 7272
- 4869 1901-S MS64 PCGS.** The design elements are sharply detailed overall with slight strike incompleteness at the centers. Each side shows vibrant mint luster over all-brilliant surfaces. Minimally marked and scarce any finer. NGC ID# 256L, PCGS# 7276
- 4870 1901-S MS64 PCGS.** This Choice example shows few noticeable abrasions and displays satiny golden-gray luster with amber overtones on the left-hand portion of the obverse. The eagle's breast and the hair above Liberty's ear exhibit some of the typical striking softness. NGC ID# 256L, PCGS# 7276
- 4871 1901-S MS64 PCGS. CAC.** An attractive Choice example of this popular issue, with well-detailed design elements and vibrant mint luster on both sides. A few scattered minor contact marks do not detract from the outstanding eye appeal. NGC ID# 256L, PCGS# 7276

- 4872 1901-S MS64+ PCGS. CAC.** Quality control at the San Francisco Mint was marginal in 1901, as can be seen by the Morgan dollar issue which is frequently encountered with a weak strike. This Plus-graded Choice example might have garnered a full Gem grade were the central high points a little better defined. Nonetheless, the coin is frosty and attractive, with a hint of light golden toning. NGC ID# 256L, PCGS# 7276
- 4873 1901-S MS64+ PCGS. CAC.** Frosty and impressively smooth, this Choice 1901-S Morgan might have garnered a full Gem grade were it not for a deficient strike on the central high points. An essentially untuned example. This San Francisco issue's availability begins a rapid decline in finer grades. NGC ID# 256L, PCGS# 7276
- 4874 1902 MS66 PCGS. CAC.** This impressive Premium Gem offers well-detailed design elements and well-preserved surfaces with the subtle, satiny mint luster often seen on this issue. PCGS has graded 30 numerically finer examples (8/15). NGC ID# 256M, PCGS# 7278
- 4875 1902 MS66+ PCGS. CAC.** Those who prefer untuned, brilliant-white coins will find this example near the top of its grade in both surface quality and eye appeal. CAC endorsed, the flashy silver luster reveals nearly mark-free, frosted fields and devices while the strike approaches full details on Liberty's hair strands. Few pieces are finer at either service. Population: 21 in 66+, 29 finer (7/15). NGC ID# 256M, PCGS# 7278
- 4876 1902-O MS66+ PCGS. CAC.** Unusually frosty for the issue, this 1902-O Morgan dollar is carefully preserved and shows a tinge of lemon-gold toning around the extreme outer peripheries. The interiors are brighter, but display a dusky hue. A touch of the usual softness appears on the highest points of the central devices. PCGS has seen just 16 finer examples (7/15). NGC ID# 256N, PCGS# 7280

**1902-S Morgan Dollar, MS65
Vivid Obverse Toning**

- 4877 1902-S MS65 PCGS.** The obverse of this Gem 1902-S Morgan displays attractive forest-green, crimson, sun-gold, and iridescent ebony toning around the periphery, yielding to lighter golden-gray in the center. The reverse shows a light champagne hue over the interior, with pale pastel shadings around the borders. The strike is a trifle soft on the eagle's breast. This issue is scarcely seen finer than MS65. NGC ID# 256P, PCGS# 7282
- 4878 1903-S AU55 NGC.** Some luster remains in the fields of this Choice AU example, while each side displays a suggestion of gold toning. Light wear and scattered abrasions determine the grade but leave this semikey San Francisco Morgan with pleasing eye appeal for the AU range. NGC ID# 256T, PCGS# 7288
- 4879 1904 MS65 PCGS.** This attractive Gem exhibits sharply detailed design elements throughout and a faint die crack connects the obverse stars on the left. The well-preserved surfaces display vibrant mint luster and eye appeal is outstanding. PCGS has graded 20 numerically finer examples (7/15). NGC ID# 256U, PCGS# 7290
- 4880 1904-O MS67 NGC.** Bright, shimmering mint luster is seen over the untuned surfaces of this Superb Gem. Well-defined for the issue, the last Morgan dollar struck at New Orleans. NGC has graded no numerically finer examples (8/15). NGC ID# 256V, PCGS# 7292

1904-S Silver Dollar, Lustrous MS62

4881 1904-S MS62 NGC. The 1904-S is a better date among 20th century Morgans, with only the 1901 and 1903-S posing a more significant challenge in Mint State. This MS62 example is vibrantly lustrous with brilliant interiors and rose-gold toning around the peripheries. The eagle's breast and the hair above Liberty's ear are a trifle soft. Grade-consistent abrasions are scattered over each side. NGC ID# 256W, PCGS# 7294

4882 1921-D MS66 PCGS. CAC. The reverse is essentially brilliant, but the obverse displays an aquamarine border and an orange-gold center. 1921-D dollars are popularly collected by die crack variety, and the present piece exhibits numerous interesting cracks for specialist perusal. NGC ID# 256Y, PCGS# 7298

PROOF MORGAN DOLLARS

4883 1883 PR61 PCGS. A pleasing lower-end proof, showing deeply mirrored fields and bold, satiny design elements. Hairlines in the fields limit the grade, but these are largely hidden from the naked eye by a blanket of light golden toning. NGC ID# 2727, PCGS# 7318

1892 Morgan Dollar, PR63 Deep Multicolor Toning

4884 1892 PR63 PCGS. A vivid mix of powder-blue, lavender, and greenish-gold toning blankets the lightly marked surfaces of this impressive Select specimen. The well-detailed design elements show just a touch of softness on the hair above the ear and the reflective fields shine through the patina in a few places. NGC ID# 272M, PCGS# 7327

4885 1894 — Polished — PCGS Genuine. Proof, AU Details. This proof 1894 Morgan dollar shows deeply mirrored fields and a bold strike, but has been subjected to a uniform polishing in the past. There is no significant wear beyond that acquired during the polishing process. NGC ID# 2577, PCGS# 7329

4886 1894 — Obverse Damage — NGC Details. Proof, Unc Details. A glittering, uncontrasted proof with deeply mirrored surfaces. Attractive, electric-blue and russet-red toning that emanates from the rims. Liberty's cheek is silky smooth and strike is of proof quality. The damage resulting in the NGC net grade consists of a tiny "H" counterstamp beneath the tip of the bust truncation. A few light lines in the fields (visible with a glass) are of little concern given the assigned grade.

PEACE DOLLARS

4887 1921 MS65 PCGS. Well-struck with pleasing luster, a lovely example of this one-year High Relief subtype. Carefully preserved with pleasing peripheral detail, though the gold-toned centers show a measure of the usual softness.
Ex: Dallas Signature (Heritage, 11/2007), lot 1410. NGC ID# 2U4E, PCGS# 7356

4888 1921 MS65 PCGS. This Gem High Relief type coin shows light champagne toning over beautifully preserved and frosty surfaces. The interior high points show the expected softness, but the overall eye appeal is outstanding for the issue and grade. NGC ID# 2U4E, PCGS# 7356

4889 1921 MS65 NGC. Just a touch of the usual softness shows on Liberty's hair, but the design elements of this attractive Gem are sharply detailed in other areas. The well-preserved lustrous surfaces show a few hints of pale gold toning. NGC ID# 2U4E, PCGS# 7356

4890 1921 MS65 PCGS. CAC. Sharply detailed in most areas, this impressive Gem shows a touch of the always seen softness on the obverse center, due to the high relief of the design. The lustrous surfaces are free of mentionable flaws and attractive shades of champagne-gold toning add to the outstanding eye appeal. NGC ID# 2U4E, PCGS# 7356

1921 Peace Dollar, MS66 VAM-1H, From Satin Proof Dies

4891 1921 VAM-1H, Satin Proof Dies, MS66 NGC. Although undesignated as such on the NGC insert, this high grade introductory year Peace dollar was struck from satin proof dies. Bold die polish lines on both sides confirm the attribution. This lustrous Premium Gem is nearly brilliant, but has a few gray freckles on the right obverse. Well struck, particularly for this high relief subtype.
Ex: Belle Glade Collection, Part Two (Heritage, 8/2007), lot 2542, which realized \$4,312.50.
From The Stephen A. Walling Collection. PCGS# 518800 Base PCGS# 7356

4892 1922-S MS65 PCGS. A wide swath of tawny-gold toning on the obverse gives way to brilliant silver surfaces across both sides of this lustrous and sharply produced Peace dollar. The hair details show individual strand definition, while the eagle is bold and frostlike. A pleasing bicolor Gem. NGC ID# 257E, PCGS# 7359

4893 1922-S MS65 PCGS. The 1922-S Peace dollar is conditionally rare in grades above the MS65 level. This attractive Gem exhibits well-detailed design elements and well-preserved lustrous surfaces throughout. PCGS has graded seven numerically finer examples (8/15). NGC ID# 257E, PCGS# 7359

1922-S Peace Dollar, MS65
Rarely Encountered Finer

4894 1922-S MS65 PCGS. CAC. The Gem level is the finest that this San Francisco issue is typically available. This piece is nearly brilliant and displays a suggestion of prooflike reflectivity in the obverse fields, although the mirroring is limited slightly by mint-made die striae. The central high points show characteristic softness, but there are no significant abrasions. PCGS lists only seven finer representatives (8/15). NGC ID# 257E, PCGS# 7359

4895 1923-D MS65 PCGS. CAC. The well-detailed design elements of this attractive Gem show just a touch of softness in Liberty's tresses. The surfaces are lightly toned in shades of golden-tan, and the fields are free of mentionable contact marks. NGC ID# 257G, PCGS# 7361

4896 1924 MS66+ PCGS. CAC. Blazing luster is the hallmark of this high-end Premium Gem, accented by lemon-gold around the peripheries and subtle champagne over the interiors. The strike is sharp and there are no bothersome abrasions. PCGS lists only 30 finer examples of the 1924 dollar (7/15). NGC ID# 257J, PCGS# 7363

4897 1924-S MS64 PCGS. CAC. The 1924-S Peace dollar is not too difficult to locate in Choice condition, but examples in finer grades are very scarce. This attractive example is lightly toned and lustrous, with well-detailed design elements and only minor contact marks. NGC ID# 257K, PCGS# 7364

4898 1924-S MS64 NGC. CAC. Light champagne and ice-blue hues encompass the frosty surfaces of this Choice 1924-S Peace dollar. The strike is sharp and abrasions are minimal. Minor doubling is evident on Liberty's profile, WE, and the R in LIBERTY — only detectable with a loupe. This issue is seldom seen finer. NGC ID# 257K, PCGS# 7364

1925 Peace Dollar, MS67
High-End Type Coin

4899 1925 MS67 PCGS. CAC. Although by far one of the more plentiful issues in the series overall, the 1925 Peace dollar is conditionally scarce in Superb Gem condition, and is almost unknown finer than this MS67 example. This piece displays a sharp strike and frosty luster with a hint of golden toning. CAC-approved in a green label holder. Population: 99 in 67 (1 in 67+), 1 finer (8/15). NGC ID# 257L, PCGS# 7365

4900 1925-S VAM-1A1 MS64+ PCGS. VAM-1A1 is an R.5 variety with a die gouge in the tiara between BE. Flashy mint brilliance defines this high-end Choice Peace dollar. A touch lightly struck, but remarkably clean for this conditionally rare issue. PCGS reports 40 finer examples, including all varieties (8/15). NGC ID# 257M, PCGS# 7366

4901 1925-S MS64+ PCGS. CAC. The 1925-S is obtainable in Choice condition, yet Plus-designated near-Gems like this make up only a small fraction of the certified population. In Gem condition, the 1925-S is the rarest issue in the series. This typically defined representative is wholly untuned with coruscating mint frost. PCGS has only seen 40 submissions finer (7/15). NGC ID# 257M, PCGS# 7366

4902 1925-S MS64+ PCGS. CAC. Each side displays a glimpse of tan-gold toning, but this lustrous near-Gem is otherwise brilliant. Nicely struck and carefully preserved with one small spot on Liberty's jaw. A costly issue any finer. NGC ID# 257M, PCGS# 7366

4903 1925-S MS64+ PCGS. CAC. Intense, frosty luster glows on each side of this high-end near-Gem, illuminating well-struck design elements. The reverse is brilliant, but the obverse shows dusky lavender-gray toning. Finer pieces are extremely scarce by comparison. NGC ID# 257M, PCGS# 7366

4904 1925-S Die Doubled Reverse, VAM-2, MS64 PCGS. CAC. A Top 50 Variety. Although undesignated as such by PCGS, this Choice silver dollar exhibits the die doubling on the leaves and berries associated with VAM-2. The lustrous and originally toned surfaces display olive-green, stone-gray, and peach patina. NGC ID# 257M, PCGS# 133771

4905 1926 MS66 NGC. A translucent veil of golden-gray tones covers each side, allowing the radiant mint frost to shine through. The strike is bold, save for softness on ONE, and the preservation is nearly unsurpassed. From a mintage of 1.9 million coins. Census: 52 in 66, 1 finer (8/15). NGC ID# 257N, PCGS# 7367

4906 1926 MS66 NGC. This Premium Gem is among the finer-known examples of the 1926 Peace dollar, showing satiny luster shining through an overlay of olive-gold toning. The strike is sharp and there are no bothersome abrasions. Census: 52 in 66, 1 finer (8/15). NGC ID# 257N, PCGS# 7367

4907 1926-D MS66 PCGS Secure. CAC. VAM-3. Minor die doubling is apparent on the 6 in the date, the designer's monogram, and the TRV in TRVST. This lustrous high-grade Peace dollar has fully struck devices, although the TY in LIBERTY are incomplete. Blushes of caramel-gold and powder-blue toning grace both sides. NGC ID# 257P, PCGS# 7368

1927-D Peace Dollar, MS65
Vibrantly Frosted

4908 1927-D MS65 PCGS. A better date at the Gem grade level, the 1927-D Peace dollar boasts a moderately low mintage of less than 1.3 million coins. This frosty representative is boldly struck and devoid of toning. A few tiny, scattered ticks determine the grade, but do not detract. PCGS reports only 10 MS66 coins finer (8/15). NGC ID# 257T, PCGS# 7371

- 4909 1927-S MS64 NGC. CAC.** The 1927-S Peace dollar boasts an enticingly low mintage of only 866,000 coins, and few survive finer than this Choice example. The strike is bold and the surfaces show remarkably few abrasions for the grade. Just a hint of light champagne toning graces the frosty surfaces. NGC ID# 26J6, PCGS# 7372
- 4910 1928 MS64 PCGS.** As the lowest-mintage date in the series (360,649 coins), the 1928 is in perennially high demand. This is a blazing, untuned example with bold legends and just a trace of softness over the ear. Scattered grazes in the obverse field define the grade, but the cheek is unmarked. NGC ID# 257V, PCGS# 7373
- 4911 1928 MS64 PCGS.** An attractive Choice example of this low-mintage issue, with sharply detailed design elements and vibrant mint luster on both sides. Only a few minor contact marks prevent an even higher grade. NGC ID# 257V, PCGS# 7373
- 4912 1928 MS64+ PCGS.** A well-preserved near-Gem example of the recognized key to the Peace dollar series. This Plus-graded coin is well-struck, with satiny luster and a touch of light golden toning. NGC ID# 257V, PCGS# 7373
- 4913 1928 MS64 PCGS. CAC.** Original lavender-gray patina envelops each side, while mottled gunmetal-blue and crimson toning cling to the border regions. Softly frosted luster illuminates minimally abraded surfaces with strong strike definition. A lovely key-date representative. NGC ID# 257V, PCGS# 7373

1928 Peace Dollar, MS65 Popular Low-Mintage Issue

- 4914 1928 MS65 PCGS.** From a series-low mintage of 360,649 pieces, the 1928 Peace dollar becomes scarce at the MS65 level, and finer examples are rare. This delightful Gem exhibits well-detailed design elements and vibrant mint luster on both sides. Eye appeal is outstanding. PCGS has graded 15 numerically finer examples (7/15). NGC ID# 257V, PCGS# 7373
- 4915 1928-S MS64 PCGS. CAC. VAM-6.** Like most 1928-S Peace dollars, the present near-Gem is die doubled, most notably on the monogram and the TR in TRVST. Lustrous and virtually brilliant with minor grazes and slight incompleteness at the centers. A conditionally elusive issue. NGC ID# 257W, PCGS# 7374
- 4916 1928-S MS64 PCGS. CAC.** Olive-gray toning blankets this exquisite better date near-Gem. The margins offer glimpses of russet patina. The obverse is virtually mark-free, and the reverse field is also uncommonly smooth. Die doubling is apparent on the designer's monogram and the initial letters in TRVST, as usually seen on this conditionally scarce issue. NGC ID# 257W, PCGS# 7374
- 4917 1934-D MS65 PCGS. Micro D.** A well struck and lustrous Gem of the final Denver issue. Powder-blue centers are framed by butter-gold margins. The obverse is splendidly preserved, and the reverse shows few marks. NGC ID# 257Y, PCGS# 7376
- 4918 1934-D MS65 PCGS. CAC. Micro D.** A sharply defined example of this better late-date Peace dollar. Lustrous and pleasing with pastel gold patina and infrequent minor contact.
Ex: Palm Beach Signature (Heritage, 3/2005), lot 6435; Central States Signature (Heritage, 4/2012), lot 5868, which realized \$1,495. NGC ID# 257Y, PCGS# 7376

- 4919 1934-S Doubled Tiara, VAM-3, MS62 ANACS.** The VAM is undesignated on the small-sized ANACS holder, but die doubling is apparent on the rays in Liberty's tiara. A lustrous caramel-gold and ice-blue key date dollar. Highly pleasing for the designated grade. NGC ID# 257Z, PCGS# 133782 Base PCGS# 7377
- 4920 1935 MS66 PCGS.** A popular late-series issue, seldom seen this fine. This Premium Gem 1935 Peace dollar exhibits satiny luster and smooth, well-preserved surfaces. Rose-gold and olive hues accent primarily golden-gray toning. None are finer at PCGS (8/15). NGC ID# 2582, PCGS# 7378
- 4921 1935-S MS65 NGC.** Four rays below ONE. Hints of gold toning deny full brilliance. A highly lustrous Gem with a good strike and a practically pristine obverse. The reverse exhibits only unimportant abrasions. A better branch mint issue from the final year of the series. NGC ID# 2583, PCGS# 7379
- 4922 1935-S MS65 PCGS.** Three rays below ONE, one of two design subtypes found on this conditionally elusive final-year issue. A brilliant and lustrous Gem. The strike is good and there are no distracting abrasions. NGC ID# 2583, PCGS# 7379

PROOF EISENHOWER DOLLARS

- 4923 1972-S Silver PR70 Deep Cameo PCGS.** Only 1.8 million silver-clad proof 1972-S Eisenhower dollars were produced, all sold individually in brown boxes, not included in the proof sets of the year. This technically perfect example exhibits fully struck, frosty design elements that contrast profoundly with the deeply reflective fields. Population: 73 in 70 Deep Cameo, (8/15). NGC ID# 258T, PCGS# 97429
- 4924 1977-S PR70 Deep Cameo PCGS.** A razor-sharp example, with deep mirrors and stark field-device contrast. The proof Eisenhower dollar series is heavily collected by modern coin enthusiasts, but perfectly preserved examples of any date are elusive. Population: 82 in 70 Deep Cameo, (7/15). NGC ID# 282C, PCGS# 97437

1978-S Eisenhower Dollar, PR70 Deep Cameo Incredible Contrast

- 4925 1978-S PR70 Deep Cameo PCGS.** The 1978-S is the final issue in the proof Eisenhower dollar series. Generous quantities are available in the absolute sense, but Registry enthusiasts will find perfectly preserved Deep Cameos scarce. This example is razor-sharp, with stark cameo contrast and fields reminiscent of a looking glass. NGC ID# 282D, PCGS# 97438

MODERN BULLION COINS

- 4926 1988 Half-Ounce Gold Eagle MS69 NGC.** Uncirculated-finish half-ounce Gold Eagle output dropped by over 65% between 1987 and 1988, when only 45,000 coins were struck. This is an effectively pristine representative, featuring complete design detail, glistening luster, and unmarked yellow-gold surfaces. NGC ID# 26N9, PCGS# 9822
- 4927 1989 Half-Ounce Gold Eagle MS69 NGC.** Marvelous straw-gold surfaces are devoid of any noticeable imperfections. The devices are fully brought up, and coruscating luster rolls over each side. A few minuscule alloy spots appear on the reverse. From a mintage of 44,829 pieces. NGC ID# 26NA, PCGS# 9832

4928 1989 Half-Ounce Gold Eagle MS70 NGC. Technically flawless and aesthetically impressive, this half-ounce Gold Eagle boasts radiant lemon-gold surfaces with fully rendered design motifs. Struck to the extent of just 44,829 pieces. NGC ID# 26NA, PCGS# 9832

4929 1990 Half-Ounce Gold Eagle MS69 NGC. This issue has the second-lowest mintage in the half-ounce Gold Eagle set after the 1991 (just 31,000 coins struck). Each side exhibits fully struck devices over radiant, butter-gold surfaces that are essentially flawless. There are only 41 coins finer at NGC (8/15). NGC ID# 26NB, PCGS# 9842

**1990 Half-Ounce Gold Eagle, MS70
Elusive in Perfect Condition**

4930 1990 Half-Ounce Gold Eagle MS70 NGC. This half-ounce bullion issue is rare certified at the perfect MS70 grade level. NGC lists only 41 coins in pristine condition, and none have received such a grade at PCGS (8/15). This piece is fully struck and flawless, with frosty golden luster. Ideal for the bullion coin enthusiast. NGC ID# 26NB, PCGS# 9842

4931 1991 Half-Ounce Gold Eagle MS69 NGC. A meager production of just 24,100 half-ounce Gold Eagles makes the 1991 the unrivalled key to the series. This is an immaculate representative with light butter-gold color and luminous mint luster. An important offering for the modern bullion enthusiast. NGC ID# 26NC, PCGS# 9852

4932 1991 Half-Ounce Gold Eagle MS69 PCGS. Listed in 45th place on Schechter and Garrett's *100 Greatest U.S. Modern Coins*, the 1991 claims a mintage of just 24,100 coins — the lowest figure for any bullion-issue Gold Eagle. This essentially perfect example features lively luster over impeccable light yellow-gold surfaces. NGC ID# 26NC, PCGS# 9852

4933 1992 Quarter-Ounce Gold Eagle MS70 NGC. The 1992 quarter-ounce Gold Eagle had a rather minimal mintage of 59,546 coins, of which few claim perfect preservation. This example is needle-sharp, with fresh, unblemished luster. Census: 30 in 70 (7/15). NGC ID# 26M8, PCGS# 9860

4934 1993-P Silver Eagle PR70 Deep Cameo PCGS. Only 405,913 proof one-ounce Silver Eagles were struck at the Philadelphia Mint in 1993. This technically perfect example features fully struck design elements and deeply mirrored fields that contrast profoundly with the frosty devices. Eye appeal is incredible. NGC ID# 26JK, PCGS# 9867

4935 1993-P Silver Eagle PR70 Deep Cameo PCGS. A perfectly produced, pristinely preserved Deep Cameo proof, showcasing frost-white motifs set against fully mirrored, glass-black fields. A beautiful, as-struck 1993-P Silver Eagle. NGC ID# 26JK, PCGS# 9867

4936 1994-P Silver Eagle PR70 Deep Cameo PCGS. The razor-sharp design elements of this magnificent, technically perfect specimen display a rich coat of mint frost that contrasts dramatically with the deeply mirrored fields to create a stunning cameo effect. A visually superb example of this low-mintage issue. NGC ID# 26UF, PCGS# 9877

4937 Five-Piece 1995-W 10th Anniversary American Eagle Proof Set PCGS. The coins are separately housed in PCGS holders bearing consecutive certification numbers. The key date 1995-W silver eagle grades PR68 Deep Cameo. The tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50 are graded PR69 Deep Cameo. All five pieces appear immaculate and fully struck with exemplary contrast between the mirrored fields and luminous devices. (Total: 5 coins) NGC ID# 28WZ, PCGS# 9887

1995-W Proof 69 Deep Cameo Silver Eagle

4938 1995-W Silver Eagle PR69 Deep Cameo PCGS. Outstanding white-on-black contrast invigorates this key-date silver eagle. Color free surfaces are virtually perfect, and a powerful strike yields completeness on the design elements. The mintage was limited to only 30,125 pieces, the smallest of the entire silver eagle series. Ex: *FUN Signature* (Heritage, 1/2008), lot 5797; *National Money Show Signature* (Heritage, 3/2008), lot 1283. NGC ID# 28WZ, PCGS# 9887

**1995-W Silver Eagle, PR69 Ultra Cameo
'King of the Silver Eagles'**

4939 1995-W Silver Eagle PR69 Ultra Cameo NGC. The 1995-W proof Silver Eagle was only ever issued in the complete 10th anniversary bullion coin proof set from the West Point Mint. The cost of this set, \$999.00, limited distribution to just 30,125 pieces. The silver eagle from this set is now considered the key to the series. This nearly perfect example displays bold white-on-black contrast and fully render motifs. The depth of the mirroring is seemingly infinite. NGC ID# 28WZ, PCGS# 9887

**1995-W Silver Eagle, PR69 Ultra Cameo
The West Point Key**

4940 1995-W Silver Eagle PR69 Ultra Cameo NGC. By comparison, the 1995-W proof Silver Eagle is by far the scarcest issue in the entire series. Its distribution of 30,125 coins is far insufficient to supply the demands of the plethora of collectors who pursue this popular series. The present coin is virtually perfect in both strike and preservation. The stark field-device contrast delivers a seemingly painted white-on-black appeal. NGC ID# 28WZ, PCGS# 9887

4941 Five-Piece 1995-W 10th Anniversary American Eagle Proof Set PR69 Deep Cameo PCGS. This complete five-piece silver and gold American Eagle proof set is housed in separate holders bearing identical grades and consecutive certification numbers. With a mintage of just 30,125 coins, the silver Eagle is the key issue to the set. The tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50 are also included. Each coin has deeply mirrored fields and highly lustrous devices with exceptional eye appeal. (Total: 5 coins) NGC ID# 28WZ, PCGS# 9887

4942 1995 Half-Ounce Gold Eagle MS69 PCGS. This is a virtually flawless lemon-gold example. The surfaces are devoid of even the tiniest imperfections, and one cannot help but wonder where this coin lost points. Tied for finest at PCGS (8/15). NGC ID# 26NG, PCGS# 9892

4943 1996 Half-Ounce Gold Eagle MS69 PCGS. Fully struck and seemingly flawless, this impressive example offers light yellow-gold surfaces with a hint of reflectivity. A production of 39,287 is one of the smallest in the series. PCGS reports just nine MS70 examples finer (8/15). NGC ID# 26NH, PCGS# 9906

**1997 Quarter-Ounce Gold Eagle
Flawless Preservation**

4944 1997 Quarter-Ounce Gold Eagle MS70 PCGS. This is the first 1997 quarter-ounce gold eagle we have handled in the rare MS70 grade, an issue which is occasionally seen in near-perfect condition but seldom as a certified pristine example. Entrancing light, yellow-gold color blankets the incredibly smooth and visually exquisite surfaces. After 18 years, it is safe to assume that few others will achieve this highest level of certification. Population: 8 in 70 (7/15). NGC ID# 26MD, PCGS# 9916

4945 1999 Silver Eagle MS70 ANACS. A technically perfect example of this popular date, with fully struck design elements and brilliant surfaces that radiate vibrant mint luster on both sides. For some reason, relatively few specimens of this date have been certified in the ultimate grade of MS70. NGC ID# 26JX, PCGS# 9947

4946 1999 Quarter-Ounce Gold Eagle MS70 PCGS. The 1999 quarter-ounce Gold Eagle is readily available, but collectors have few coins from which to choose in perfect MS70 condition, where PCGS has certified just 17 pieces (7/15). This example is razor-sharp with vibrantly golden luster. NGC ID# 26MG, PCGS# 9941

4947 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS. During a year of Y2K-inspired high mintages of gold bullion coins, the Mint prepared two mintmarked fractional ounce die pairs, a tenth-ounce and a quarter-ounce, with an Uncirculated finish instead of the expected proof finish. Thus, two inadvertent low mintage issues were created, both listed in the *Guide Book*. A lustrous and fully struck example; pristine save for a tiny tick above the G in GOLD. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

4948 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS. Hints of peach toning adorn this coruscating and precisely struck example. Immaculate except for trivial field contact near the beak of the mother bird. In 1999, the West Point mintmark was intended solely on proof issues and the Uncirculated 1999-W George Washington five dollar. A popular Mint error. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

4949 2001 Half-Ounce Gold Eagle MS69 NGC. The 2001 half-ounce Gold Eagle is a better date in the series in Uncirculated format. Only 48,047 coins were minted. This near-perfect example offers a delightful mix of vibrant luster, light lemon-gold color, and outstanding preservation. NGC ID# 26SV, PCGS# 9957

4950 2001 One-Ounce Platinum Eagle MS68 PCGS. Ex: 9-11-01 WTC Ground Zero Recovery. Fully struck and beautiful with a selective mirrored finish on the motifs. A strong lens is required to locate the inconsequential imperfections. A scant 14,070 Uncirculated pieces were issued. NGC ID# 26U4, PCGS# 9789

4951 2006-W Proof Gold Eagle Set, 20th Anniversary, PR70 and PR70 Ultra Cameo NGC. This set includes two one-ounce Gold Eagles, one in regular proof format and the other in reverse proof format. Both coins are fully struck, with technically perfect yellow-gold surfaces and incredible eye appeal. (Total: 2 bag)

4952 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 NGC, and a 2006-W One-Ounce Gold Eagle, 20th Anniversary PR70 Ultra Cameo NGC. An important anniversary of the American gold eagle bullion program was celebrated with a reverse proof variety from the West Point Mint. A regular ultra cameo proof is also included. Both coins are immaculate and exhibit razor-sharp strikes. (Total: 2 coins)

COINS OF HAWAII

**1847 Hawaii Cent, MS64 Red and Brown
Medcalf 2CC-6 Variety**

4953 1847 Hawaii Cent, MS64 Red and Brown PCGS Secure. CAC. M. 2CC-6. Ex: Forsythe Collection. Crosslet 4. This is the most frequently seen Hawaii cent variety, showing the berries arranged 7x8 in the wreath. This piece exhibits significant mint red, but subtle burgundy overtones and a few carbon specks determine the Red and Brown designation. The coin is sharply struck and devoid of major abrasions. Listed on page 413 of the 2016 *Guide Book*. Population: 22 in 64 (1 in 64+) Red and Brown, 1 finer (8/15). NGC ID# 2C52, PCGS# 10966

4954 1883 Hawaii Ten Cents MS63 PCGS. This is a boldly struck, satiny example of the 1883 Hawaii dime, showing just a few minor abrasions when studied with a loupe. Both sides are deeply toned in mottled blue-gray and dusky lavender hues. Much of the 250,000-coin mintage was eventually destroyed after Hawaii became a U.S. territory just before the turn of the century. NGC ID# 2C54, PCGS# 10979

4955 1883 Hawaii Dollar AU58 PCGS. Light wheat-gold toning endows this partly lustrous and minimally marked example. A single-year type, struck at the San Francisco Mint on regular issue silver dollar planchets. Encased in a green label holder. NGC ID# 2TGD, PCGS# 10995

4956 1871 Wailuku Plantation 12 1/2 Cents, Broad Starfish — Environmental Damage — PCGS Genuine. XF Details. M. 2TE-3. The scarcer “Broad Starfish” variety of this popular Wailuku Plantation token. On close inspection, the dark olive-brown surfaces show evidence of corrosion, with numerous small depressions that do not stand out at first glance. Listed on page 414 of the 2016 *Guide Book*. PCGS# 412434

4957 1879 T. Hobron, Kahului-Wailuku 12 1/2 Cent Railroad Token, 6/2 Stars XF40 PCGS. M. 2TE-8. The Kahului & Wailuku Railroad was built by Captain Thomas H. Hobron in 1879 and his workers were paid in these tokens, which circulated throughout the islands. This lightly worn specimen offers pleasing olive-brown surfaces with hints of lilac and only minor abrasions. Listed on page 414 of the 2016 *Guide Book*. Population: 4 in 40, 9 finer (7/15). NGC ID# 2UBN, PCGS# 600515

GSA DOLLARS

4958 1880/79-CC Reverse of 1878, VAM-4, GSA, MS64+ NGC. A Top 100 Variety. Light tan-gray toning visits this overdated Carson City GSA dollar. Lustrous and nicely struck. The fields are well preserved and the cheek displays a few moderate marks. No box or certificate accompanies the lot. NGC ID# AP7P, PCGS# 518922 Base PCGS# 407108

4959 1880-CC Reverse of 1879, GSA, MS65 NGC. VAM-8. Ex: GSA Hoard. The 8 is plainly punched over 7, with a dash below the second 8 and a short ear of the 7 at the top of the 8. Bright silver luster flashes in cartwheel fashion across both sides, with a smooth cheek on Liberty and few marks anywhere on the frosted surfaces. Band-certified in its black plastic GSA holder (no box). NGC ID# 2542, PCGS# 518851 Base PCGS# 407100

4960 1882-CC GSA MS66 NGC. Ex: GSA Hoard. Liberty’s cheek is clean and brilliant silver luster shows a faint reddish-gold tint in the hair strands above and below the ear. Sharply struck. Marks are limited to a few shiny abrasions on the frosted surfaces, primarily on the high points of the hair and the eagle’s plumage. Housed in a black GSA holder, no box, band-certified by NGC. Just 14 pieces are certified numerically finer in GSA holders by NGC (7/15). NGC ID# 254B, PCGS# 518866 Base PCGS# 407134

4961 1884-CC GSA NGC. VAM-3. The “Doubled 188 Left” variety. A whisper of chestnut-gold toning enriches this lustrous and high-grade GSA Carson City type coin. The strike is bold and contact is minimal. A box and certificate are included with the lot. NGC ID# 254L, PCGS# 518872 Base PCGS# 407152

4962 1885-CC GSA MS65+ NGC. The 1885-CC has one of the smallest productions in the series, yet the majority of coins were preserved in vaults and distributed as part of the GSA sales of the 1970s. Both sides of this GSA Gem are frosty and brilliant with an area of olive and golden-orange patina at the lower reverse. NGC ID# 254M, PCGS# 518875 Base PCGS# 407160

1885-CC GSA Dollar, MS66

4963 1885-CC GSA MS66 NGC. A low mintage and better grade Carson City dollar that boasts dynamic luster and a good strike. Only a whisper of gold patina denies full brilliance. A couple of curly black plastic threads are housed between the lower reverse and the GSA holder; a GSA packaging mishap without an impact on the preservation of the actual coin. The lot includes a box but no certificate. NGC ID# 254M, PCGS# 518875 Base PCGS# 407160

1885-CC Morgan Dollar, MS66 Frosty GSA Coin

4964 1885-CC GSA MS66 NGC. An exemplary 1885-CC Morgan dollar, certified in its original GSA holder with intense, frost-white luster and virtually unabraded surfaces. The design elements are boldly rendered. Nearly 65 percent of the 228,000-coin mintage of this issue was retained in Treasury vaults until the early 1970s when the coins were distributed through the famous GSA sales. The date is a favorite among collectors, particularly in MS66 or finer condition, where it is elusive. NGC ID# 254M, PCGS# 518875 Base PCGS# 407160

1890-CC Morgan Dollar, MS63 Scarcely Seen in Original GSA Holder

4965 1890-CC GSA MS63 NGC. VAM-6. Splashes of pale gold grace the frosty and brilliant surfaces of this Select representative. Sharply struck devices are typical for the issue. The Carson City Mint manufactured 2.3 million Morgan dollars in 1890. The final 3,949 coins in storage were distributed as part of the GSA hoard in the 1970s (this is one such example). NGC reports just 16 finer submissions (8/15). NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

1891-CC Morgan Dollar, MS61
Elusive in GSA Plastic

- 4966** 1891-CC GSA MS61 NGC. The 1891-CC Morgan had a fairly small presence in the GSA sales of the early 1970s of only 5,687 coins, and finding an example in its original GSA holder can be difficult. This coin is moderately abraded, but displays vibrant, frosty luster with a tinge of golden toning along the lower obverse rim. The eagle's breast and the hair above Liberty's ear show a touch of striking softness. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

1891-CC Silver Dollar, MS62
Better GSA Issue

- 4967** 1891-CC GSA MS62 NGC. A brilliant and lustrous representative. The strike shows minor incompleteness, but the reverse is well preserved, and the cheek is also only lightly abraded for the MS62 level. A field mark near the profile determines the grade. A box and certificate accompany the lot. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

1891-CC GSA Dollar, MS62
VAM-3, Top 100 Variety

- 4968** 1891-CC Spitting Eagle, VAM-3, GSA, MS62 NGC. A Top 100 Variety. This is a frosty, untuned example of the available but ever-popular "Spitting Eagle" variety with a die gouge below the eagle's beak. The hair above Liberty's ear is the only indication of strike softness, as the other design features are boldly rendered. Light grazes occur primarily in the left obverse field and over the cheek. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

WASHINGTONIA

- 4969** 1797-Dated Sansom Medal MS62 Brown NGC. Baker-71A, Julian PR-1. Bronzed copper, 40.7 mm. U.S. Mint engraver John Reich was the maker of the Baker-71 dies, issued in 1807 by Joseph Sansom of Philadelphia in silver, bronze, and white metal. Medals from copy dies were later sold by Thomas Halliday (Baker-70) and the U.S. Mint (Baker-72, Julian PR-1). The present fully struck example has rich sea-green and mahogany-brown toning. The right obverse field displays unobtrusive marks.

Circa-1800 Westwood Medal
Fire-Gilt Bronze, Full Strike
Second Reverse, Baker-81A

- 4970** (1800) Westwood Medal, Second Reverse. Baker-81A. Fire-gilt bronze, 41 mm. Plain edge. Well struck and mark-free with distributed minute spotting. This uncertified and Uncirculated Washington medal has a small piece of cloth affixed to the edge near 5:30. Per Rulau and Fuld, the dies were made by John Westwood in England to commemorate Washington's passing.

U.S. MINT MEDAL

Maj. Gen. U.S. Grant Bronze Mint Medal
MS62 Brown, Julian MI-29

- 4971** (1865) Major General Ulysses S. Grant MS62 Brown NGC. Julian-MI-29. Bronze, 105mm. Dies by Anthony C. Paquet. Grant's U.S. Mint military medal has the largest diameter among the 33 military varieties listed by Julian. The obverse depicts a head-and-shoulders bust left of Grant, while the reverse has an allegorical depiction of his Civil War victories at Vicksburg and Chattanooga, which gave the Union control of the Mississippi River. A friction-free chocolate-brown example with unobtrusive hairlines and minor contact on the right reverse field.

SO-CALLED DOLLARS

- 4972** Three-Piece Lot of 1946 United Nations So-Called Dollars. All three examples are uncertified. The lot of 37mm 1946 United Nations monetary patterns includes: **HK-871**, silver, beautiful ocean-blue and peach-gold toning; **HK-872**, bronze, rich lemon-gold, cherry-red, and gunmetal patina; and an **HK-873**, .900 Fine gold, accompanied by its original Medallion Art Co. cardboard box. (Total: 3 medals)

ALASKA TOKENS

- 4973** Three-Piece 1909 A.Y.P.E. Alaska Gold Set NGC. The three tokens, part of the M.E. Hart Coins of the Golden West series, are housed in separate holders, two of which have consecutive certification IDs. The DWT token was certified a few years prior. The well-preserved tokens are accompanied by an original maroon cardboard box bearing the Alaska-Yukon-Pacific Exposition logo. The set includes: 1/4 DWT MS65 NGC, 0.40 gm; 1/2 DWT MS65 NGC, 0.78 gm; and a 1 DWT MS66 NGC. (Total: 3 tokens)

CASINO AND GAMING TOKENS

1988 Union Plaza Casino Chip PR66 Ultra Cameo Gold Dollar, One of Ten Made

- 4974** 1988 Union Plaza Casino Chip, Gold Dollar, PR66 Ultra Cameo NGC. Ex: El Cortez Casino Collection. 37mm. One of ten gold dollar chips issued. In 1988, the Union Plaza Casino was owned by Jackie Gaughan, who was one of the three founders of the casino in 1971. Previously, a Union Pacific railroad station was at the site. The casino still stands, its name later changed to the Plaza Hotel & Casino.

1988 El Cortez Casino Chip PR66 Ultra Cameo Gold Five Dollar

- 4975** 1988 El Cortez Hotel and Casino Chip, Gold Five Dollar, PR66 Ultra Cameo NGC. Ex: El Cortez Casino Collection. 45 mm. A large and fairly heavy gold casino chip, presumably struck in limited quantity for presentation purposes. Jackie Gaughan was the longtime owner of the El Cortez, which stands today and is listed in the National Register of Historic Places.

ERRORS

1953 Lincoln Cent, MS62 on a Brass Cuba Centavo Planchet

- 4976** 1953 Lincoln Cent — Struck on a Cuba Centavo Planchet — MS62 ANACS. In 1953, the U.S. Mint struck brass centavos for Cuba (KM-26). A brass centavo planchet found its way between cent dies, and the result was the present rare off metal error. A well-centered example with virtually complete legends, missing only the L in LIBERTY. The upper legends exhibit stretching toward the rim, characteristic of the error category. Lustrous and unabraded with rich lime-green and peach-gold toning.

195(7) Lincoln Cent, MS66 Red on a Honduras Centavo Planchet

- 4977** 195(7) Lincoln Cent — Struck on a Honduras Centavo Planchet — MS66 Red NGC. In 1956 and 1957, the U.S. mint coined copper Honduras centavos (KM-77.2). One of those centavo planchets (the present lot) was fed between Lincoln cent dies, and struck aligned with the collar die at 7 o'clock. The first three date digits are complete, and the fourth digit shows only the upper left corner, enough to suggest it is a 7. This lustrous and unabraded example retains its introductory orange-gold color.

1958 Lincoln Cent, MS63 on a Cuban Centavo Planchet

- 4978** 1958 Lincoln Cent — Struck on a Cuban Centavo Planchet — MS63 PCGS. In 1958, Cuba outsourced the production of copper-nickel centavos (KM-30) to their northwest neighbor, the United States. One of those planchets was struck between Lincoln cent dies, aligned with the collar at 3 o'clock. IN GOD WE and the LI in LIBERTY are absent, while TRUST and PLURIBUS are blurry and partial. The date is bold and complete. A satiny and unabraded silver-gray example.

(1958) Jefferson Nickel, MS63
on a Cuban Centavo Planchet

- 4979** (1958) Jefferson Nickel — Struck on a Cuban Centavo Planchet — MS63 NGC. 2.6 gm. In 1958, the U.S. Mint struck copper-nickel centavos for Cuba (KM-30), a single-year type. The weight, diameter, and alloy confirms the planchet attribution. This undersized wrong planchet Jefferson nickel was struck aligned with the collar at 6 o'clock. A majority of the date is present, although the tops of the digits are off the flan. LIBERTY, WE TRUST, and the country name are mostly absent. The untuned surfaces are semiprooflike and unmarked.

1920-D Dime, MS64 Full Bands
13% Off Center, Light Original Toning

- 4980** 1920-D Mercury Dime — Struck 13% Off Center — MS64 Full Bands PCGS. Off center toward 4:30, but the legends are intact, including the date. Several peripheral letters exhibit stretching toward the border, diagnostic for the error category. The major devices are fully struck. Lustrous and unabraded with light to medium wheat-gold toning. A high quality example of an off-center obsolete silver type.

Kennedy Half Dollar, MS64
50% Off Center, Brockage Reverse

- 4981** Undated Kennedy Half — Struck 50% Off Center, First Strike Brockage — MS64 PCGS. A half dollar (not the present piece) was normally struck, but stuck to the reverse die and failed to eject. A planchet was fed in (which became this lot) widely off center toward 6 o'clock, and was struck between the obverse die and the obverse of the previously struck coin. The date and any mintmark are off the flan. Lustrous and lightly toned with the expected minor planchet striae on the unstruck portion of the coin. The 40% silver alloy indicates that the coin was struck sometime between 1965 and 1970.

CERTIFIED MODERN PROOF SETS

Five-Piece 1937 Proof Set
PR66 to PR67

- 4982** 1937 Proof Set PR66 to PR67 NGC. Individually housed in holders with consecutive certification IDs. The set includes: cent PR66 Red Cameo, orange-gold color, a brief obverse arc of russet near 8 o'clock; nickel PR67, light straw-gold toning, a good strike; dime PR66, hints of tan patina, intricately impressed; quarter PR67, flawless, brilliant save for lemon toning near LIBERTY; and a half dollar PR66, the rims exhibit glimpses of deep brown toning but the remainder of the coin is nearly white. (Total: 5 coins)

- 4983** Six-Piece 1942 Proof Set PR65 to PR67 NGC. The set is individually certified in holders with consecutive serial numbers. The set includes: cent PR65 Red, a peach-gold Gem, one speck on Lincoln's collar; Type One nickel PR65, fully struck, scattered light gray flecks; Type Two nickel PR65, brilliant, an intricate strike; dime PR66, untuned, razor-sharp, slightly rotated dies; quarter PR66, only a trace of toning, exemplary preservation; and a half dollar, PR67, well struck, faint wheat-gold obverse toning, a white reverse. (Total: 6 coins)

- 4984 Three-Piece 1942 Proof Set PCGS CAC.** Each coin is separately held by PCGS with consecutive certification IDs and a CAC seal. **The lot includes: dime PR66+,** beautiful cherry-red, apple-green, and lemon toning; **quarter PR66,** the obverse exhibits remarkable ruby-red, aquamarine, and sun-gold patina; and a **half dollar PR67+,** peripheral orange and honey toning. (Total: 3 coins)

MINT SETS

- 4985 Six Uncertified Double Mint Sets.** The lot includes (1) 1955, (2) 1956, and (3) 1958 double mint sets. The 1955 set and one of the 1958 sets lack the outer mailing envelope that accompanies the other four sets. All coins display attractive original toning, and the typical coin grades MS64.
- 4986 Five Uncertified 1957 Double Mint Sets.** The coins in the five sets remained housed in the cardboard holders of Treasury Department issue. One set is sealed. Three sets retain the outer mailing envelope. The coins display varying degrees of toning. The typical coin grades MS63 to MS65. (Total: 100 coins)

INGOTS

- 4987 One Ounce Gold Swiss Credit Bar PCGS.** 9-11-01 World Trade Center Ground Zero Recovery. 1 of 426. Ingot serial number 572786.

San Francisco Mint 5.42-Ounce Silver Ingot Type One Hallmark, Straight Stem 9s

- 4988 San Francisco Mint Type One Oval Hallmark Silver Ingot. 5.42 Ounces.** This oval hallmark has a serif font and small lettering. The surfaces are nicely laid out, but appear to have been cleaned at one time. The straight stem 9s indicate a casting period from the early 1940s. The hallmark is just off the left side / the number 278 is immediately below / 999.5 / FINE. Only the lower, short side has an imprint, the number 8. The lower third of the back side shows 5.42 / OZS. Ken Conaway commented about this ingot:

"The Type One Oval Hallmark, small font, straight stem 9s in 999.5 type is one of the scarcest varieties in the 5-ounce class ingots from the San Francisco Mint. In seven years of research I have only seen five ingots from this particular series. Of the five, three are from Lot #7, and this makes only the second ingot from Lot #8 in this series."

Type One Oval Hallmark Silver Ingot San Francisco Mint, 5.52 Ounces

- 4989 San Francisco Mint Type One Oval Hallmark Silver Ingot. 5.52 Ounces.** This Small Font, Serif ingot was produced sometime after 1942, as the 999.75 fine ingots were cast that year. This is an especially attractive ingot that appears to have not been cleaned and shows medium density gray patina on all sides. The top side has the oval hallmark / 941 (slightly overlapping the bottom of the hallmark) / 999.5 / FINE. No imprints are on the sides, but the back has 5.52 / OZs. A gas bubble or some other imperfection in the pour is seen as a semicircular depression above the fineness on the top side. We were fortunate to have collector Ken Conaway comment on this ingot also:

"The hallmark on this ingot is among the finest I have seen. The irregularity of the cast surfaces on these ingots frequently results in much less than full contact. Presumably, in an effort to use the surface area to best result, the hallmark die was rotated one way or another. Not only is this hallmark strike noteworthy, the positioning is perfect."

End of Session Three

SESSION FOUR

PATTERNS

1854 Judd-160 Cent, PR64 Brown
Intermediate Diameter

- 4990** 1854 One Cent, Judd-160, Pollock-187, R.4, PR64 Brown NGC. This familiar pattern is mid-sized between the large and small cent, an intermediate step in the transition toward the cent in the diameter as we know it today. Aside from the absence of stars, the types are retained from the Large cent, but are smaller in scale, especially the wreath. Struck in copper with a plain edge. A chocolate-brown Choice proof with a satiny and unmarked appearance. One small spot is noted on the right obverse field. A later die state with bold clash marks on both sides. NGC ID# 5WWB, PCGS# 11659

1854 Cent, PR63 Red and Brown
Judd-161, Transitional Diameter

- 4991** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR63 Red and Brown PCGS. The diameter is about midway between the large and small cent. The designs are similar to the contemporary large cent but smaller in scale, and there are no obverse stars. The wreath is undersized in relation to the legends. Struck in bronze with a plain edge. A medium brown representative with straw-gold and steel-blue undertones. Devoid of marks, but moderately granular near Liberty's nose. Struck from clashed dies. Encapsulated in an old green label holder. NGC ID# 29A6, PCGS# 11664

1858 Small Letters Copper-Nickel Cent Pattern
Judd-193, Unc Details

- 4992** 1858 Flying Eagle Cent, Judd-193, Pollock-236, Snow-PT11a, R.5 — Spot Removed — PCGS Genuine. Unc Details. The obverse is struck from the Small Letters 1858 Indian cent die, while the pattern reverse shows an oak wreath with a broad ornamental shield at top. Struck in copper-nickel with a plain edge. Each side displays reddish patina, and a spot has obviously been removed between ED on the obverse. Surprisingly bright fields for a non-proof. NGC ID# 29BD, PCGS# 11844

1858 Indian Cent in Copper-Nickel
Judd-208, PR63

Low Date, Five-Leaf Clusters

- 4993** 1858 Indian Cent, Judd-208, Pollock-253, R.1, PR63 ANACS. Low Date, Five-Leaf Clusters. Indian head cent as adopted in 1859, struck in copper-nickel with a plain edge. Two obverse and two reverse dies were used to strike these pattern cents. This is the rare variant with a low date and clusters of five leaves. The Judd-208 is common, but only a half dozen pieces are estimated known of this variant, according to USPatterns.com. The bright copper-nickel surfaces are covered with a slight iridescence. Not completely struck up, but close. A few small contact marks are scattered over each side, none of which are individually distracting. NGC ID# 29BP, PCGS# 11885

**1859 Longacre Half Dollar, PR62
Judd-237, Silver, Reeded Edge**

- 4994 1859 Half Dollar, Judd-237, Pollock-293, R.4, PR62 PCGS.** The Longacre-designed French Liberty Head, facing right with laurel and vine in her hair. A ribbon below the bust is inscribed LIBERTY, with UNITED STATES OF AMERICA around, and the date below. The reverse displays the agricultural wreath of the Seated dime, resized to appropriate scale, around the denomination HALF DOLLAR. Struck in silver with a reeded edge. The present fully struck specimen displays lovely peach-gold toning, with hints of lilac across the right-side obverse margin. Microgranular near 9 o'clock on the obverse, the sole reason why a higher grade was not attained. NGC ID# 29CH, PCGS# 11966

**1859 Longacre Half Dollar, PR64
Judd-237, Struck in Silver**

- 4995 1859 Half Dollar, Judd-237, Pollock-293 PR64 PCGS.** Reeded Edge. James B. Longacre designed the obverse, dubbed the "French Head of Liberty." The Cereal Wreath reverse was the design of Anthony Paquet according to James Ross Snowden (per Pollock) although Judd does not confirm. This example, like most, shows raised parallel die striae over both sides, with brief golden toning at the margins and light silver-gray centers. Population: 8 in 64, 4 finer (7/15). NGC ID# 29CH, PCGS# 11966

**1863 Liberty Eagle, PR63 Brown
GOD OUR TRUST, Judd-350**

- 4996 1863 Ten Dollar, Judd-350, Pollock-422, Low R.6, PR63 Brown NGC.** Ex: Exemplar Collection. The design of the Judd-350 pattern is similar to the then-contemporary Liberty Head eagle design, except that GOD OUR TRUST appears on a scroll in the upper reverse field. Struck in copper with a reeded edge, then bronzed at the Mint. This piece is deep chocolate-brown with excellent eye appeal. As an identifier, we note a lint mark (as made) between the first two stars. Census: 2 in 63 Brown, 0 finer (8/15). NGC ID# 29G6, PCGS# 60512

**1865 Three Cent Nickel, PR63 Brown
Judd-411, Ex: Eric P. Newman**

- 4997 1865 Three Cent Nickel, Judd-411, Pollock-482, High R.6, PR63 Brown NGC.** Ex: Eric P. Newman Collection. Nearly identical to the regular issue 1865 three cent nickel, except the ribbon ends are oversize and merge with the border. Struck in copper with a plain edge. A fully struck specimen. Richly patinated medium brown with jade-green, fire-red, and wheat-gold undertones. Ex: "Colonel" E.H.R. Green; Green Estate; Eric P. Newman Collection (Heritage, 4/2013), lot 3945. NGC ID# 26VL, PCGS# 60591

**1868 Three Cent Nickel
Judd-618, PR63**

- 4998 1868 Three Cent Nickel, Judd-618, Pollock-687, R.4, PR63 PCGS.** Similar to the regular issue, but the Roman numerals on the reverse are smooth instead of ribbed. Struck in nickel with a plain edge. While nickel strikings are the most frequently seen, examples are also known in copper and aluminum (only one known). The fields are only moderately reflective, a trait often seen on nickel coins. Most of each side appears light gray, but close examination reveals just the slightest hint of iridescence. NGC ID# 29NA, PCGS# 60834

**1868 Five Cent Pattern in Nickel
Judd-633, High Date Variant, PR63**

- 4999 1868 Five Cents, Judd-633, Pollock-705, R.5, PR63 NGC.** The obverse design resembles the adopted three cent nickel, but on a larger planchet, with minor design modifications appropriate to the increased diameter. The reverse features a Roman numeral V in the center, with a wreath encircling, scroll with IN GOD WE TRUST and Maltese cross above. The High Date Pollock variant. Struck in nickel with a plain edge. Each side displays light oil-slick iridescence with shallowly mirrored fields. NGC ID# 29NN, PCGS# 60851

1869 Standard Silver Half in Silver
Judd-742, PR64

- 5000** 1869 Standard Silver Half Dollar, Judd-742, Pollock-823, R.5, PR64 PCGS. CAC. A bust of Liberty faces right with UNITED STATES OF AMERICA around and a scroll with IN GOD WE TRUST below. Liberty wears a cap ornamented with two large stars. William Barber's initial "B" can be seen within the folds of the ribbon at the back of the cap, and pronounced doubling is seen on the motto IN GOD WE TRUST. The reverse has 50 CENTS centered within a wreath of oak and laurel leaves with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. Of the two varieties of this pattern, this is the more frequently seen. The rarer one lacks Barber's initial within the folds of the ribbon. The center of each side is almost brilliant tending toward pinkish-rose, then the margins pick up significant deep blue patina. A lovely Standard Silver half. NGC ID# 29SS, PCGS# 60969

1870 Standard Silver 10 Cents, PR64
Judd-825, Silver, Reeded Edge

- 5001** 1870 Standard Silver Ten Cents, Judd-825, Pollock-915, Low R.7, PR64 PCGS. A left-facing seated Liberty holds a shield at her right side and an olive branch in her left hand. A scroll inscribed with LIBERTY flows across the shield, and a crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date on the exergue. On the reverse 10 / CENTS is within an open wreath of cotton and corn, tied with a bow at the bottom. STANDARD in small letters is centered above the wreath. The reverse rim is unusually wide. Struck in silver with a reeded edge. Crisply struck and essentially brilliant with exemplary field reflectivity. A small spot is noted at 12 o'clock and a dark fleck on the right obverse field is accompanied by trivial hairlines. NGC ID# 29V2, PCGS# 61069

- 5002** 1870 Standard Silver Half Dollar, Judd-985, Pollock-1106, High R.7 — Environmental Damage — PCGS Genuine. Proof, Unc. Details. The obverse features a diademed bust of Liberty facing right, her hair tied in a bun. The reverse has the denomination 50 CENTS in an oak and laurel wreath with STANDARD SILVER above and the date 1870 below. Struck in aluminum with a reeded edge. This well-struck specimen is mostly untuned but has a granular gray area between 12 and 2 o'clock on the reverse. The STA in STANDARD also shows corrosion, and moderate verdigris is noted near the ST in STATES and the right-side star. PCGS# 61231

1870 Judd-985 Half Dollar in Aluminum
Standard Silver Proof

- 5003** 1870 Standard Silver Half Dollar, Judd-985, Pollock-1106, R.8, PCGS Genuine. Proof. The obverse features a diademed bust of Liberty facing right, her hair tied in a bun. The reverse has the denomination 50 CENTS in an oak and laurel wreath with STANDARD SILVER above and the date 1870 below. Struck in aluminum with a reeded edge. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this proof coin has the details of an Uncirculated specimen that has been corroded, scratched, cleaned, and damaged. Lightly hairlined, and the three obverse pinscratches are unobtrusive. The corrosion is noticeable near Liberty's neck and jaw. The upper reverse has a minor lamination, a common flaw seen on many aluminum patterns.

1870 Standard Silver Half, PR63
Judd-987, Reeded Edge

- 5004** 1870 Standard Silver Half Dollar, Judd-987, Pollock-1116, High R.6, PR63 PCGS. Standard Silver design with Liberty facing right wearing a headband with a star, a scroll below, and UNITED STATES OF AMERICA above. The reverse has 50 CENTS in the center and is surrounded by a wreath of oak and laurel with 1870 below and STANDARD SILVER above. Struck in silver with a reeded edge. Almond-gold toning adorns both sides of this fully struck Select pattern. The central reverse shows a blush of ice-blue patina. Thorough evaluation is required to reveal trivial field hairlines. Population: 4 in 63, 6 finer (8/15).
Ex: Long Beach Signature (Heritage, 9/2006), lot 1840, which realized \$2,300. NGC ID# 29ZB, PCGS# 61233

**1873 Bailly-Designed Trade Dollar
Judd-1281, PR62**

Ex: Lemus

- 5005 1873 Trade Dollar, Judd-1281, Pollock-1423, R.4, PR62 NGC.** Ex: Lemus Collection. The obverse, designed by J. A. Bailly, features a coiled hair bust of Liberty facing left. The reverse mimics the 'Amazonian' pattern silver dollar save for a reduction in the size of the eagle and the addition of the motto E PLURIBUS UNUM above and the weight and fineness below. Struck in silver with a reeded edge. Fully reflective proof mirrors dance around the brilliant surfaces of this remarkable pattern Trade dollar. The centers are brilliant with peripheral gold toning. NGC ID# 2A8B, PCGS# 61566

**1873 Trade Dollar Pattern, PR63
Judd-1315, Silver, Reeded Edge**

- 5006 1873 Trade Dollar, Judd-1315, Pollock-1458, R.4, PR63 PCGS.** The obverse shows Liberty seated on a globe, with 13 stars around and the date below. The reverse has a defiant eagle perched on a rock, with a scroll and motto below; TRADE DOLLAR and UNITED STATES OF AMERICA are around the periphery, along with two stars. E PLURIBUS UNUM is set into the field above the eagle's head; 420 GRAINS and 900 FINE. are below the scroll and above TRADE DOLLAR. Modified from a design of Joseph Alexis Bailly by William Barber, and struck in silver with a reeded edge. This well struck and satiny specimen is deeply patinated gunmetal-gray but exhibits forest-green, rose-red, and peach-gold undertones. The centers lack a complete impression, which suggests that the tiny ticks on the obverse motif were on the flan before the strike. Certified in a green label holder. NGC ID# 2A8V, PCGS# 61601

1879 Goloid Metric Dollar, Judd-1617

- 5007 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4 — Obverse Spot Removed — NCS. Proof Details.** A William Barber design with the head of Liberty facing left, wearing a coronet with the word LIBERTY on it. Above the portrait is E PLURIBUS UNUM, and the date is below. The reverse has the composition of the metric alloy in three lines with the weight below, surrounded by an elaborate wreath of corn and cotton, and a cartouche above with DEO EST GLORIA inside. At the margin is UNITED STATES OF AMERICA and ONE DOLLAR. Struck in goloid alloy with a reeded edge. A well struck and satiny caramel-gold and powder-blue pattern. Both sides display faint hairlines, and a small patch of hairlines accompanies a minor spot near star 4. Ex: Milwaukee ANA Signature (Heritage, 8/2007), lot 2752. NGC ID# 2AH8, PCGS# 61995

GOLD DOLLARS

- 5008 1849-O Open Wreath MS61 PCGS. Variety 3.** A lemon-gold example with hints of prooflike reflectivity on the obverse field being all that keep this coin from a full MS65 grade. As is typical of the type, this piece shows mild striking weakness in the centers. Population: 40 in 64 (5 in 64+), 22 finer (8/15). NGC ID# 25BE, PCGS# 7508
- 5009 1850 MS64+ PCGS.** Satiny yellow-gold luster glows on this high-end near-Gem, with a few insignificant grazes in the left obverse field being all that keep this coin from a full MS65 grade. As is typical of the type, this piece shows mild striking weakness in the centers. Population: 40 in 64 (5 in 64+), 22 finer (8/15). NGC ID# 25BE, PCGS# 7509
- 5010 1851-C XF45 PCGS. Variety 3.** This early Charlotte Mint Gold Dollar is very sharp for the XF45 grade, and the rich peach toning is attractive. Each side displays distributed pinpoint marks. Variety 3 is the high date variant; about as available as Variety 1. Certified in a green label holder. Ex: Dallas Signature (Heritage, 11/2005), lot 3814. NGC ID# 25BL, PCGS# 7514
- 5011 1851-O MS63 NGC. Variety 2.** The scarce die pair shows a lengthy, faint die crack from the left edge at 9 o'clock through the left field, across the bridge of Liberty's nose, past the eyelid, and into the hair. This is a deeply frosted Select Uncirculated example, with few marks and soft luster beneath pleasing apricot-gold coloration. Well struck for this New Orleans issue. NGC ID# 25BN, PCGS# 7516
- 5012 1851-O MS63 PCGS. CAC. Variety 1.** Lively mint luster and attractive yellow-gold color give this Select New Orleans gold dollar the excellent visual quality for which CAC has awarded a desirable "green bean" sticker. The devices are sharply struck, save for the usual softness over the upper hair strands, LA in DOLLAR, and the 5 in the date. NGC ID# 25BN, PCGS# 7516
- 5013 1854 Type Two MS61 NGC.** Quite an appealing coin for the MS61 grade level, with both sides exhibiting medium gold color and above-average striking detail for the Type Two design. Typically abraded for the grade, yet free of singularly mentionable bagmarks. Ex: Long Beach Signature (Heritage, 6/2004), lot 8621. From The Stephen A. Walling Collection. NGC ID# 32EH, PCGS# 7531

5014 1856 Upright 5 MS63 PCGS. The 1856 Large Head gold dollar represents the first year of the design type and the Upright 5 variant is less available than its Slanting 5 counterpart. This attractive Select example is well-detailed and lustrous, with only minor signs of contact. Population: 23 in 63 (1 in 63+), 29 finer (8/15). NGC ID# 25CB, PCGS# 7541

5015 1856 Upright 5 MS64 NGC. An attractive Choice example of the first year of the Large Head design, with the popular Upright 5 in the date. The design elements are well-detailed and the lustrous, peach-gold surfaces show only minor signs of contact. Census: 19 in 64, 4 finer (8/15). NGC ID# 25CB, PCGS# 7541

5016 1860 MS63 PCGS. A lovely and original green-gold representative of this better date gold dollar, with well-detailed design elements and satiny mint luster. Population: 16 in 63, 27 finer (8/15). NGC ID# 25CR, PCGS# 7555

5017 1860 MS64 PCGS. The 1860 gold dollar (36,668 coins) is a seemingly underrated issue. There are only 46 total grading events in MS64 or higher at both services combined. This near-Gem has light yellow-gold surfaces with radiant frost. The headdress and wreath elements are needle-sharp. Population: 18 in 64, 9 finer (8/15). NGC ID# 25CR, PCGS# 7555

5018 1861 MS63 PCGS. This attractive Select specimen displays lustrous orange-gold surfaces with prominent clash marks on both sides. The design elements are well-detailed and eye appeal is outstanding. NGC ID# 25CU, PCGS# 7558

1861 Gold Dollar, MS65 Popular Type Three Issue

5019 1861 MS65 PCGS. CAC. From a substantial mintage of 527,150 pieces, the 1861 Type Three gold dollar is an available date and a popular choice of type collectors. This impressive Gem is sharply detailed in most areas, but some incompleteness is seen on the feathers, due to lapping. The well-preserved yellow and rose-gold surfaces radiate vibrant mint luster. Population: 42 in 65, 11 finer (8/15). NGC ID# 25CU, PCGS# 7558

1862 Gold Dollar, MS66 Nice Color and Luster

5020 1862 MS66 NGC. From a large mintage of 1.3 million pieces, the 1862 gold dollar is elusive at the MS66 level, and finer coins are very rare. This spectacular Premium Gem offers sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster and outstanding eye appeal. Census: 48 in 66 (1 in 66 ★), 10 finer (7/15). NGC ID# 25CW, PCGS# 7560 34059 STD

5021 1867 MS61 PCGS. The lightly marked yellow-gold surfaces of this attractive Mint State piece show a combination of satiny mint luster and some prooflike reflectivity at certain angles. Both sides show signs of die clashing and a scattering of minor contact marks. Population: 7 in 61, 41 finer (8/15). NGC ID# 25D3, PCGS# 7566

5022 1869 MS62 PCGS. PCGS Population (19/40). NGC Census: (20/30). Mintage: 5,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$1,025. NGC ID# 25D5, PCGS# 7568

1870-S Gold Dollar, AU58 Gold CAC Seal, Old Holder

5023 1870-S AU58 PCGS. Gold CAC. A well struck peach-gold representative. The semiprooflike fields are small aside from a cluster of faint marks above the O in DOLLAR. A scant 3,000 pieces were produced. The 1870-S was the only San Francisco gold dollar issue struck after 1860, with the exception of the 1915-S Panama-Pacific commemorative. Housed in an old green label holder. NGC ID# 25D7, PCGS# 7570

5024 1873 Closed 3 MS61 NGC. With a reported mintage of just 1,800 coins, the 1873 Closed 3 gold dollar is one of the most elusive dates in the series. Only 125 or so coins are extant in all grades. Prooflike surfaces offer vibrant frosty luster and light yellow-gold color. The date is a touch soft, but the strike is crisp overall. NGC ID# 25DA, PCGS# 7574

5025 1885 MS61 Prooflike NGC. The Mint struck 11,156 gold dollars in 1885, and while semiprooflike coins are available, NGC has only awarded a Prooflike designation to 32 submissions. This yellow-gold MS61 example has pronounced contrast and bold definition with scattered wispy marks. Census: 4 in 61 Prooflike, 28 finer (8/15). NGC ID# 25DP, PCGS# 77586

5026 1889 MS66 NGC. A lovely caramel-gold representative. Lustrous and boldly struck with minimal imperfections. As is the case with all business strike final-year gold dollars, the lower portion of the wreath is die doubled.
Ex: Long Beach Signature (Heritage, 9/2008), lot 3215, which realized \$2,300.
From The Stephen A. Walling Collection. NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLE

1836 Two and a Half, MS61
Block 8, Variety 8

- 5027 1836 Block 8 MS61 NGC. Breen-6142, Variety 8, R.3.** Large Head of 1834. A mildly prooflike Classic gold type coin that benefits from an unusually bold strike throughout the major devices. This lovely and only lightly abraded quarter eagle has considerable eye appeal. The total mintage for the type is less than 1 million pieces, below that of the highly regarded Type Two gold dollar.
Ex: Dallas Signature (Heritage, 7/2006), lot 868, which realized \$3,737.50.
From The Stephen A. Walling Collection. NGC ID# 25FU, PCGS# 97694

LIBERTY QUARTER EAGLES

- 5028 1842-O XF45 PCGS. Variety 1.** A very scarce New Orleans issue, since only 19,800 pieces were coined. This pumpkin-gold representative is lightly brought up at the centers but marks are confined to the field above the arrowheads. Population: 18 in 45, 35 finer (7/15). NGC ID# 25GK, PCGS# 7726
- 5029 1847-C AU50 NGC. Variety 1.** A well detailed caramel-gold Charlotte type coin. The fields are microgranular and free from any mentionable abrasions. The strike is above average, by the standards of the remote branch facility. Struck from moderately rotated dies. NGC ID# 25H6, PCGS# 7745

1848 Quarter Eagle, AU55
Gold CAC Seal, Old Holder

- 5030 1848 AU55 PCGS. Gold CAC.** An intricately struck sun-gold two-and-a-half. Only lightly abraded, and luster dominates the devices and borders. The 1848 has a low *Guide Book* mintage of 6,500 pieces, although half eagles were struck in quantity that year. Certified in an old green label holder. Population: 10 in 55, 15 finer (8/15). NGC ID# 25H9, PCGS# 7748

1848-C Two and a Half, AU50
Scarce Charlotte Issue

- 5031 1848-C AU50 NGC. Variety 1.** An apricot-gold representative of this low mintage Southern gold issue. Glimmers of luster remain, and there are no mentionable marks. The top of the portrait and the lower third of the eagle are typically impressed. The usually encountered die marriage with the second 8 in the date distant from the bust. NGC ID# 25HB, PCGS# 7750
- 5032 1851 MS63 NGC. CAC.** The Philadelphia Mint was flush with deposits from the California gold fields in 1851, and huge mintages of gold coins were the result. Nevertheless, few mid- to high-grade Uncirculated coins survive. This Select Uncirculated example displays the attractive yellow-gold appeal of the early Gold Rush bullion, with vibrant mint luster and frosty, sharply struck elements. CAC endorsed, with only minor marks precluding an even finer grade. NGC reports just 51 finer examples (7/15). NGC ID# 25HL, PCGS# 7759
- 5033 1855 MS63+ NGC.** A pleasing example of this conditionally scarce Philadelphia issue, showing a crisp strike and satiny yellow-gold luster. Abrasions are light and evenly distributed over each side, causing little distraction. Census: 22 in 63 (1 in 63+), 26 finer (7/15). NGC ID# 25J4, PCGS# 7774
- 5034 1856-S AU58 NGC.** The 1856-S (72,120 coins struck) is the first collectible quarter eagle issue from the San Francisco Mint, as the first-year 1854-S is among the rarest issues in American coinage. Near-Mint examples of the 1856-S are very scarce, and Mint State pieces are rare. Partly lustrous yellow-gold surfaces offer strongly defined devices with a touch of friction and minimal marks. NGC ID# 25KL, PCGS# 7781
- 5035 1856-S AU58 PCGS.** This San Francisco issue is elusive in AU grades, and Mint State pieces are rare. This Borderline Uncirculated example displays a bold strike with little evidence of wear. Bright yellow-gold surfaces retains hints of luster in the protected regions. Population: 20 in 58 (1 in 58+), 19 finer (8/15). NGC ID# 25KL, PCGS# 7781

1856-S Two and a Half, AU58
Semiprooflike Fields

- 5036 1856-S AU58 PCGS. CAC.** This San Francisco issue is scarce in all grades, and is rarely seen at any Mint State level. The present coin offers virtually complete detail without the costly price of an Uncirculated coin. Each side is boldly struck, with warm straw-gold luster. The fields exhibit significant semiprooflike mirroring. Population: 20 in 58 (1 in 58+), 19 finer (8/15). NGC ID# 25KL, PCGS# 7781

5037 1861 Old Reverse, Type One, AU58 PCGS. Only 100 or so Old Reverse examples are believed extant, compared to around 2,000 New Reverse quarter eagles. This near-Mint Old Reverse coin has light peach-gold surfaces with partial luster and strongly struck devices. Lightly marked with blending over the left leg and right claw. Population: 7 in 58, 26 finer (7/15). NGC ID# 25JX, PCGS# 97794

5038 1867-S AU50 PCGS. CAC. The 1867-S quarter eagle is scarcer in AU and Mint State than its modest price levels would suggest. This About Uncirculated example retains hints of luster amid orange-gold patina. The central reverse is weakly struck, as usual, but actual wear is only slight. Population: 12 in 50, 31 finer (8/15). NGC ID# 7JRX, PCGS# 7806

5039 1873 Open 3 MS64 PCGS. The 1873 Open 3 quarter eagle proves more available than its Closed 3 counterpart, but near-Gems are conditionally scarce. Blended shades of sun-gold and lavender color highly lustrous surfaces with few marks of note. Fully struck. Population: 60 in 64 (2 in 64+), 14 finer (8/15). NGC ID# 25KN, PCGS# 7817

5040 1873 Closed 3 MS64 PCGS. The Closed 3 variant is slightly scarcer than its Open 3 counterpart, especially in high grades. This Choice example displays original orange-gold luster with minimally disturbed surfaces. Trivial striking weakness is noted on Liberty's upper hair curls and on the eagle's left (facing) leg. Population: 50 in 64 (2 in 64+), 12 finer (8/15). NGC ID# 25KN, PCGS# 7818

5041 1873 Closed 3 MS64 PCGS. The Closed 3 quarter eagle of 1873 is slightly scarcer in most grades than its Open 3 counterpart. This Choice example is in a seldom seen level of preservation, and there are few finer examples known. This coin shows frosty wheat-gold luster with a few minor marks as allowed for by the grade. The eagle's left (facing) leg exhibits a touch of softness, the only such occurrence on the coin.
From The Stephen A. Walling Collection. NGC ID# 25KN, PCGS# 7818

1876 Two and a Half, MS61 Rare in Mint State

5042 1876 MS61 PCGS. With a scant mintage of just 4,176 coins, the 1876 quarter eagle is elusive in all grades and is genuinely rare at the Mint State level. This piece is moderately abraded, as the grade suggests, but shows as-struck detail and yellow-gold luster. The lower part of the eagle and the hair curls around Liberty's face show trivial softness, as is characteristic of many quarter eagle issues from this period. Population: 8 in 61, 6 finer (7/15). NGC ID# 7JS6, PCGS# 7824

1878 Liberty Quarter Eagle, MS66 Only Three Finer at NGC

5043 1878 MS66 NGC. This is a charming quarter eagle of a date that is conditionally scarce in Gem or finer grades. Smooth, frosty surfaces are aglow with rich rose-gold hues which show deeper amber-red overtones in the peripheral recesses. As might be expected for the issue, there is minor striking softness on the eagle's left (facing) leg and inner shield, and reactionary incompleteness is observed on the hair curls around Liberty's face. Census: 8 in 66, 3 finer (8/15). NGC ID# 25KY, PCGS# 7828

5044 1898 MS64 PCGS. The combination of low mintage (24,000 coins) and relative availability through mid-Uncirculated grades ensures the popularity of the 1898 among date and type collectors. Strongly rendered with frosty luster and minimal marks. Two alloy spots occur above star 5 and S1 in STATES. NGC ID# 25LN, PCGS# 7850

5045 1898 MS65 PCGS. This highly lustrous Gem exhibits frosty light yellow gold surfaces and bold design motifs. A splendid survivor from a low mintage of just 24,000 coins. NGC ID# 25LN, PCGS# 7850

5046 1907 MS66+ NGC. Mint State examples of this final-year Liberty Head quarter eagle are readily available, making the date a favorite for type purposes. This Plus-designated Premium Gem is boldly struck and satiny, with soft wheat-gold luster. NGC ID# 2688, PCGS# 7859

1907 Quarter Eagle, Frosty MS67 Delicate Patina

5047 1907 MS67 NGC. This magnificent Liberty Head type coin exhibits a lovely medley of rose, peach, lilac, and yellow-gold hues overly pristine surfaces and frosty luster. Razor-sharp definition encompasses each side, save for the very center of the shield crossbars which show a small mint-made planchet void. Census: 162 in 67 (3 in 67+, 21 in 67 ★, 7 in 67+★), 5 finer (8/15). NGC ID# 2688, PCGS# 7859

INDIAN QUARTER EAGLES

1908 Quarter Eagle, MS65 First-Year Type Coin

- 5048 1908 MS65 PCGS.** A combination of first-year issue status and availability in Gem condition make the 1908 Indian quarter eagle a favorite among type collectors. This frosty orange-gold example is sharply struck, with unabraded surfaces and a few pale olive overtones in the central reverse. The softness on the eagle's wing is a product of inadequate die engraving, a diagnostic of this issue. NGC ID# 288Y, PCGS# 7939

- 5049 1910 MS63+ NGC. CAC.** A lovely, budget-friendly type coin, this Plus-graded MS63 Indian quarter eagle shows frosty orange-gold luster with hints of lilac and bronze color throughout. The lower headdress feathers are a trifle soft, but the remaining devices are well-defined. The only mentionable abrasion is hidden below the eagle among its legs. NGC ID# 2892, PCGS# 7941

- 5050 1910 MS64+ PCGS.** Were it not for a few stray lines in the reverse fields, this 1910 Indian quarter eagle would have the surface quality of a Gem example. As it stands, the satiny yellow-gold luster is free of major abrasions, and the design elements are well-defined. A suitable type coin for the collector on a budget. NGC ID# 2892, PCGS# 7941

- 5051 1910 MS64+ NGC.** Lustrous orange-gold surfaces, with hints of rose and lilac, and sharply detailed design elements are the calling cards of this attractive high-end Choice example. Only a few minor contact marks are evident. NGC ID# 2892, PCGS# 7941

- 5052 1911 MS64+ PCGS. CAC.** Delightfully free of major abrasions, this Plus-graded near-Gem might have garnered a higher grade were it not for a few faint lines in the left obverse field. The strike is well-executed and the surfaces display satiny yellow-gold luster. NGC ID# 7KR6, PCGS# 7942

- 5053 1911-D — Improperly Cleaned — NGC Details. AU.** The Denver mintmark is bold on the present faintly hairlined caramel-gold key date quarter eagle. Slight wear on the eagle's shoulder confirms light circulation, and a thin mark is noted near the TY in LIBERTY. NGC ID# 7KR7, PCGS# 7943

- 5054 1911-D Strong D — Ex-Jewelry — PCGS Genuine. AU Details.** This key date quarter eagle is well struck and exhibits little if any wear. The mintmark is sharp and no abrasions are apparent. The honey-gold surfaces are somewhat bright, and the field shows a small smoothed area west of the G in GOD. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, Unc Details Sharp Strong D Example

- 5055 1911-D — Improperly Cleaned — NGC Details. Unc. Strong D.** The 1911-D is the most sought-after Indian quarter eagle issue in Mint State where it commands a strong premium. This piece is sharply detailed and offers the budget-conscious collector an affordable coin in unworn condition. The satiny surfaces show warm honey-gold color and few significant abrasions. Close study with a lens reveals light hairlines that preclude a numeric grade. NGC ID# 7KR7, PCGS# 7943

1912 Quarter Eagle, MS64 Glowing Mint Luster

- 5056 1912 MS64 PCGS.** For the MS64 grade, this 1912 Indian quarter eagle is an outstanding coin. The frosty surfaces exhibit original honey-gold luster that is uncommonly well-preserved. A few tiny ticks hidden within the eagle's wing feathers appear to be the chief grade-limiting factor, but are indistinct to the unaided eye. The strike is sharp. Few examples are certified finer. NGC ID# 7KR8, PCGS# 7944

1912 Indian Quarter Eagle, MS64 CAC-Endorsed Quality

- 5057 1912 MS64 PCGS. CAC.** This piece exhibits modest eye appeal with satiny wheat-gold luster that delivers a soft glow over each side. Design elements show pleasing detail, although the lower headdress feathers are a touch soft. This near-Gem coin is free of major abrasions, exhibiting only a few light lines in the fields when studied with a loupe. NGC ID# 7KR8, PCGS# 7944

- 5058 1914 MS63 PCGS.** From a smallish mintage of 240,000 pieces, this attractive Select specimen offers well-detailed design elements and lustrous orange-gold surfaces with a few scattered minor contact marks. NGC ID# 7KRA, PCGS# 7946

5059 1914-D MS63 NGC. The brightly lustrous yellow-gold surfaces of this attractive Select example show a few highlights of green and some scattered minor contact marks. The design elements are sharply detailed and eye appeal is quite strong. NGC ID# 2899, PCGS# 7947

5060 1915 MS64+ PCGS. CAC. This 1915 Indian quarter eagle shows original green-gold luster without any bothersome abrasions. The strike is well-executed and the overall eye appeal is suitable for inclusion in a budget-friendly type set. NGC ID# 7KRC, PCGS# 7948

**1915 Two and a Half, MS65
Deep Original Patina**

5061 1915 MS65 PCGS. This boldly struck Gem is among the finest 1915 Indian quarter eagles most collectors will have a chance to acquire. Finer pieces are extremely rare, with only four certified by PCGS (8/15). This coin is free of bothersome abrasions and displays deep apricot-gold and rose-orange hues. NGC ID# 7KRC, PCGS# 7948

**1925-D Two and a Half, MS65
Frosty Branch Mint Type Coin**

5062 1925-D MS65 PCGS. CAC. The 1925-D is frequently touted as one of the most plentiful issues in the Indian quarter eagle series, and is often encountered in type collectors' cabinets. This Gem example is well-preserved and frosty, with pale rose and greenish hues throughout the yellow-gold luster. PCGS lists only 34 pieces finer (8/15). NGC ID# 7KRD, PCGS# 7949

**1926 Quarter Eagle, MS65
Sharply Detailed and Lustrous**

5063 1926 MS65 PCGS. CAC. The well-preserved orange-gold surfaces of this delightful Gem show a few minor contact marks on the reverse, none worthy of individual mention, with vibrant mint luster on both sides. The design elements are sharply detailed throughout and eye appeal is outstanding. From a mintage of 446,000 pieces, the 1926 quarter eagle is very scarce in higher grades. NGC ID# 7KRE, PCGS# 7950

THREE DOLLAR GOLD PIECES

5064 1854 AU55 NGC. This attractive Choice AU specimen shows just a trace of wear on the tops of the feathers and hair above the brow and the lightly abraded surfaces retain much of their original mint luster. NGC ID# 25M3, PCGS# 7969

5065 1854 AU55 PCGS. Luster brightens the legends and motifs of this first-year sun-gold representative. The fields are clashed but refreshingly unabraded. Light wear on the forehead curl confirms a brief stint in antebellum commerce. Certified in a first generation holder. NGC ID# 25M3, PCGS# 7969

5066 1854 MS61 NGC. An attractive Mint State example of this popular type issue, with well-detailed design elements and lustrous canary-yellow surfaces that show the minimum number of minor contact marks for the grade. NGC ID# 25M3, PCGS# 7969

5067 1854-O — Rim Filing, Cleaned — NGC Details. AU. Variety 2. Both rims show occasional bright areas with filing apparent near the UN in UNITED. The straw-gold surfaces are moderately luminous, especially above the large 3. A faded field mark is noted near the nose, and a strike-through (as made) separates the TA in STATES. NGC ID# 25M5, PCGS# 7971

5068 1854-O — Improperly Cleaned — NGC Details. AU. Variety 1. A well-detailed example of this elusive New Orleans issue, showing medium yellow-gold luster overall. Hairlines appear when studied with a loupe, but the only bothersome surface flaw is an old scratch in front of Liberty's eye. NGC ID# 25M5, PCGS# 7971

5069 1855 MS61 NGC. Suitable for type purposes, this Uncirculated 1855 three dollar gold piece displays soft orange-gold luster with light slide marks being the only grade-limiting surface flaw. The wreath bow is weak, as usual, but the obverse portrait well-struck. NGC ID# 25M6, PCGS# 7972

**1855 Three Dollar Gold, MS62
Attractive Mint Luster**

5070 1855 MS62 NGC. This softly lustrous example displays satiny yellow-gold hues, without any severe abrasions. Faint lines in the fields, seen with a loupe, are all that limit the grade. The strike is soft on the wreath bow, as usual, while the obverse portrait is well-defined. Although not common, the 1855 three dollar gold piece is plentiful enough in Mint State to be considered for type purposes. NGC ID# 25M6, PCGS# 7972

5071 1856-S XF40 PCGS Secure. Lightly circulated with medium yellow-gold patina and moderate detail remaining. The San Francisco issues comprise an underrated subset of the three dollar gold series. The 1856-S had a mintage of only 34,500 coins. NGC ID# 25M9, PCGS# 7975

5072 1856-S AU53 NGC. Medium S. A pleasing apricot-gold San Francisco type coin. Marks are minimal and the portrait high points exhibit moderate wear. The usually encountered reverse variety with a "tail" die break on the second L in DOLLARS. NGC ID# 25M9, PCGS# 7975

5073 1860-S — Improperly Cleaned — NGC Details. AU. The caramel-gold surfaces show moderate wear. Hairlines are conspicuous on the lower left obverse and the central reverse. The obverse exhibits minor pinscratches. This scarce San Francisco issue has a mintage of just 7,000 pieces.
Ex: Long Beach Signature (Heritage, 9/2011), lot 1159, which realized \$1,840. NGC ID# 7K5M, PCGS# 7981

5074 1861 VF35 NGC. This original, orange-gold 1861 three dollar shows considerable detail for the VF grade level, with light even wear overall. This issue's low mintage of 5,959 pieces ensures the scarcity of high-grade survivors. This piece is a collector-grade example for the budget-conscious enthusiast. NGC ID# 7K5N, PCGS# 7982

5075 1864 XF45 NGC. Some light wear shows on the tops of the curled feathers and the hair above the eye, but the pleasing orange-gold surfaces are lightly abraded and retain traces of original mint luster. From a mintage of 2,600 pieces. NGC ID# 7HSK, PCGS# 7985

5076 1868 AU55 ANACS. A lovely orange-gold representative that boasts a crisp strike, substantial shimmering luster, and an absence of consequential marks. The obverse field exhibits minor hairlines. Certified in an ANA cache holder. NGC ID# 25MP, PCGS# 7989

5077 1871 AU53 PCGS. Slight wear over the high points of the devices limits the grade but leaves significant semiprooflike mirroring in the fields. An attractive piece with medium gold color. The bowknot shows the only mentionable striking weakness and a small mark in the field immediately below it is the only abrasion of note. NGC ID# 25MU, PCGS# 7993

5078 1874 AU58 NGC. A lustrous Borderline Uncirculated type coin from one of the more plentiful issues in the three dollar gold series. This piece shows typical weakness on the wreath bow, but is otherwise well-struck and devoid of major abrasions. NGC ID# 7KDE, PCGS# 7998

5079 1874 AU58 NGC. An attractive near-Mint specimen of this popular type issue, with just a touch of high-point wear on the design elements and lustrous, lightly abraded yellow-gold surfaces. NGC ID# 7KDE, PCGS# 7998

5080 1878 XF45 NGC. Gold CAC. A lightly circulated but lovely apricot-gold type coin. No marks are readily apparent, and luster brightens the legends and motifs. Wear on Liberty's eyebrow confirms service in the 19th century economy. Certified in an early, pre-hologram holder. NGC ID# 25MZ, PCGS# 8000

1882 Three Dollar Gold, AU58 Sharp, Semiprooflike

5081 1882 AU58 PCGS. From a low 1,500-coin mintage, this late-series three dollar gold piece offers warm honey-gold color with tinges of coppery-red in the protected areas of the fields. Slight friction precludes a Mint State grade, but leaves moderate reflectivity in the fields. The strike is especially sharp, most notably on the wreath bow. NGC ID# 25N5, PCGS# 8004

EARLY HALF EAGLE

1808 Half Eagle, AU Sharpness BD-3, Close 5D

5082 1808 Close 5D, BD-3, R.4 — Improperly Cleaned — NGC Details. AU. Bass-Dannreuther Die State b/e. BD-3 is scarce, but is the most available Close 5D variety of the 1808 half eagle; likely fewer than 125 pieces survive in all grades. This coin is evenly struck, with sharp central detail. Some original coppery-gold luster remains in the protected areas of the fields, but a few light hairlines in the central regions preclude a numeric grade.

CLASSIC HALF EAGLES

5083 1834 Plain 4 AU55 NGC. Breen-6502, McCloskey 2-B, R.3. Second Head. This variety has a Block 8, triple punched 4, and the eagle lacks a tongue. Considerable mint luster remains within the recesses, while the exposed devices show a trace of friction. Still, they remain strongly detailed. Bright yellow-gold surfaces exhibit light abrasions throughout. NGC ID# 25RR, PCGS# 8171

5084 1834 Plain 4 AU55 NGC. Breen-6501, McCloskey 3-B, R.1. A caramel-gold Choice AU Classic type coin. There are no noticeable marks, and luster illuminated the legends and stars. The curls and left shield border show incompleteness of strike. NGC ID# 25RR, PCGS# 8171

1834 Classic Head Half Eagle, XF45 Crosslet 4, Scarce This Fine

5085 1834 Crosslet 4 XF45 NGC. Breen-6503, McCloskey 5-D, R.4. In the nine years since Garrett and Guth published their Encyclopedia of U.S. Gold Coins, the population of Crosslet 4 Classic Head half eagles has risen only moderately despite the book's statement: "The 1834, Classic Head, Crosslet 4 half eagle is vastly rarer than the Plain 4 version (by a factor of roughly 10 to 1)." Scarcity confirmed, this Choice XF example remains in strong demand by gold specialists and series collectors. The olive-gold coloration and minimally marked surfaces provide substantial appeal. Census: 12 in 45, 46 finer (7/15). NGC ID# 25RU, PCGS# 8172

5086 1835 AU55 NGC. Breen-6504, McCloskey 1-A, R.2. First Head. A partly lustrous and nicely struck straw-gold representative. The left obverse field displays a few bright grazes, but no other marks merit mention.
Ex: Palm Beach Signature (Heritage, 3/2006), lot 1844, which realized \$1,610.
From The Stephen A. Walling Collection. NGC ID# 25RV, PCGS# 8173

5087 1835 AU58 PCGS. Breen-6505, McCloskey 3-D, R.3. A well struck Borderline Uncirculated Classic type coin. Refreshingly unabraded, although shallow strike-throughs are seen above the bust tip and west of star 10. Liberty's curls show only a trace of wear. NGC ID# 25RV, PCGS# 8173

5088 1838 AU58 NGC. Breen-6514, McCloskey 1-A, R.2. The Large Arrows, Small 5 variety, the scarcer of the two 1838 die marriages. Luster rolls across the motifs and margins of this caramel-gold Classic type coin. Small to moderate marks are distributed. NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

5089 1839 AU50 PCGS. The Gobrecht-designed Coronet half eagle was introduced in 1839 and struck to the extent of 118,143 pieces. This bright yellow-gold example shows moderate friction over the relief elements. Myriad abrasions are lightly peppered throughout. Population: 23 in 50, 61 finer (8/15). NGC ID# 25S7, PCGS# 8191

5090 1839 AU53 PCGS. The inaugural issue of the Liberty head half eagle is a highly sought-after coin in all grades. However, due to the rarity of Mint State survivors, AU examples are typically the finest most collectors acquire. This piece shows well-defined relief elements with minor wear primarily seen over the high points of the obverse portrait. The coin is wheat-gold in color, with hints of luster appearing in the protected areas of the fields. Population: 10 in 53, 51 finer (8/15). NGC ID# 25S7, PCGS# 8191

5091 1843 MS60 PCGS Secure. A comparatively large mintage of 611,205 pieces makes the issue one of the few half eagles from the 1840s that are somewhat accessible in Mint State. This sharp example provides substantial quality for the MS60 level, with appealing green-gold color and brilliant mint luster. As expected, a scattering of light abrasions determine the grade. Population: 2 in 60, 29 finer (8/15). NGC ID# 94FD, PCGS# 8213

5092 1843-O Small Letters XF45 PCGS. Variety 2. Small O. An original green-gold No Motto New Orleans five. Lightly abraded and attractive with sharp definition on the wings. Per the *Guide Book*, the Small Letters variety has a production of just 19,075 pieces. Encapsulated in an old green label holder. NGC ID# 25T5, PCGS# 8217

5093 1844-D VF35 PCGS. Variety 11-G. The top of the 1 is repunched. With a mintage of 88,900 coins, the 1844-D is a relatively accessible Dahlonega issue, though all examples are scarce. The color throughout this Choice VF coin ranges from green to rich orange-gold with reddish tints. Well-struck for the facility with expected blending and scattered abrasions. NGC ID# 25T9, PCGS# 8221

5094 1846-D XF45 NGC. Variety 16-I. An original butter-gold Dahlonega type coin that retains glimpses of plum-red and navy-blue toning near the rims. The strike shows blending on the curls and the eagle's peripheries, but glimmers of luster emerge from protected regions. NGC ID# 25TH, PCGS# 8228

1849-C Five Dollar, Well-Struck AU55 Outstanding Color and Surfaces

5095 1849-C AU55 NGC. CAC. Variety 1. Doug Winter suggests as many as 375 examples of this Charlotte half eagle survive in all grades, but the date is seldom seen above the XF grade level with original color. This Choice AU example is blatantly original, showing still-lustrous olive-gold hues with coppery-brown and peach accents in the protected regions. The strike is lacking some sharpness on the central shield on the reverse, but the eagle's talons, plumage, and Liberty's hair curls are sharp. The border dentils are bold and all obverse stars show complete centrils. An outstanding coin for the grade and issue. Census: 43 in 55, 45 finer (7/15). NGC ID# 42GT, PCGS# 8241

5096 1849-D — Damage — Genuine PCGS. AU Details. Variety 24-R. A very rare die variety. The date is lightly repunched, most apparent above the 9. The mintmark does not touch the stem. The present canary-gold Dahlonega five has ample bright luster and a blush of orange toning near the U in UNITED. The strike shows blending at the centers. The moderately hairlined fields are pinscratched near the M in AMERICA and stars 8 and 11.

5097 1853 MS61 PCGS. Struck to the extent of 305,770 coins, the 1853 half eagle is challenging to locate in Mint State. This is a brightly lustrous example with razor-sharp strike characteristics on each side. Softness is restricted to the upper curls and the V in FIVE. The obverse die is cracked from the date through star 5. NGC ID# 25UD, PCGS# 8253

5098 1856 MS60 NGC. Mint State examples of the 1856 half eagle are scarcer than might be anticipated given the mintage of nearly 200,000 coins. This piece just makes the grade, being unworn but moderately abraded. The strike is well-executed and each side shows satiny yellow-gold luster. Census: 5 in 60, 37 finer (8/15). NGC ID# 25UV, PCGS# 8266

5099 1856 MS61 PCGS. Like most Philadelphia No Motto issues, the 1856 is available in VF to AU but becomes very scarce in Mint State. The present lemon-gold half eagle has a good strike and relatively few abrasions. Population: 11 in 61, 22 finer (8/15).
Ex: Long Beach Signature (Heritage, 6/2004), lot 8876, which realized \$2,185.
From The Stephen A. Walling Collection. NGC ID# 25UV, PCGS# 8266

1856-C Half Eagle, AU50
Underappreciated Charlotte Five

5100 1856-C AU50 NGC. Variety 1. Doug Winter calls the 1856-C an “underrated and undervalued issue,” with an estimated survival totaling just 150 to 200 coins in all grades, most XF or lower. This AU representative is above-average in terms of both striking sharpness and remaining detail, and displays original olive-gold color with tinges of luster in the protected areas of the peripheries. A brush of wear over each side is hardly distracting. We believe the certified population of finer pieces to be inflated by resubmissions. Census: 14 in 50, 80 finer (7/15). NGC ID# 25UW, PCGS# 8267

5101 1857 MS61 PCGS. A scarce Mint State example of this underappreciated Philadelphia issue. This coin is sharply struck and displays original honey-gold luster. A couple marks on Liberty's jaw and in the adjacent field are the only mentionable abrasions. Population: 12 in 61, 30 finer (8/15). NGC ID# 25V2, PCGS# 8271

1857-S Half Eagle, AU58
Scarce and Underrated

5102 1857-S AU58 NGC. The 1857-S half eagle is scarcer than its mintage of 87,000 coins would suggest, especially in AU or Mint State condition. This Borderline Uncirculated example is sharply detailed, with yellow-gold surfaces that show remnants of luster in the protected regions of the fields. A few scattered abrasions accompany the grade. Census: 17 in 58, 6 finer (7/15). NGC ID# 4GUF, PCGS# 8275

1857-S Half Eagle, AU58
Bold Motifs

5103 1857-S AU58 PCGS. The 1857-S half eagle is seldom seen in the finer AU grades, and Mint State coins are rare. This Borderline Uncirculated example displays sharp detail, and only slight friction in the fields precludes a Mint State designation. Each side exhibits satiny luster and yellow-gold patina. Population: 15 in 58, 10 finer (8/15). NGC ID# 4GUF, PCGS# 8275

1860-D Five Dollar, Choice XF
Medium D Mintmark

5104 1860-D Medium D XF45 NGC. Variety 46-GG. Peach-gold and lime-green toning blends across this lightly abraded late-date Dahlonega five. As usual for a Southern gold issue, the eagle's neck and Liberty's curls show incompleteness of strike. The stars and eagle's wings are sharply detailed. From a low mintage of 14,635 pieces. NGC ID# 25VH, PCGS# 8286

5105 1866 XF40 PCGS. CAC. From a scant mintage of only 6,700 coins, likely fewer than 100 examples survive in all grades. This lightly circulated example shows original olive-gold patina and pleasing detail. Small amounts of subtle luster remain in the protected areas of the fields. Population: 5 in 40, 31 finer (7/15). NGC ID# 25VZ, PCGS# 8311

1869-S Liberty Half Eagle, AU50
Elusive in Any Grade

5106 1869-S AU50 PCGS. A nominal mintage of 31,000 Liberty half eagles was accomplished at the San Francisco Mint in 1869 and the issue is scarce-to-rare in all grades today. This lightly worn and lightly abraded AU example offers pleasing orange-gold surfaces that retain traces of original mint luster. Population: 3 in 50, 13 finer (8/15). NGC ID# 25W8, PCGS# 8318

5107 1870-S — Cleaning — PCGS Genuine. AU Details. Double eagles were the preferred gold denomination in the Old West. Although eagles and half eagles were struck nearly every year, mintages were very low. The 1870-S five has a production of only 17,000 pieces, and AU examples are rare. The present lightly circulated coin is glossy from a wipe and exhibits iridescent orange and lime-green toning. NGC ID# 25WB, PCGS# 8321

**1874-S Five Dollar, AU53
Underrated San Francisco Issue**

5108 1874-S AU53 NGC. The 1874-S half eagle, struck to the limited extent of just 16,000 pieces, is scarce in all grades and unknown in Mint State. Pleasing AU examples, such as this piece, are highly underrated. This coin is well-struck and displays original olive-gold patina with luminous honey-colored highlights in the fields. Eye appeal is outstanding for the grade. Census: 9 in 53, 20 finer (7/15). NGC ID# 25WR, PCGS# 8335

5109 1883 MS64 NGC. Lovely rose-gold luster adorns each side of this Choice 1883 quarter eagle. The strike is sharp and grade-limiting abrasions are light and evenly dispersed over each side. This Philadelphia issue is scarce in MS64, and finer coins are genuinely rare. Census: 23 in 64 (2 in 64+), 5 finer (8/15). NGC ID# 25XK, PCGS# 8361

5110 1885 MS63+ Prooflike NGC. CAC. This high-end Select specimen offers well-detailed design elements and reflective prooflike fields that show a few scattered minor contact marks. Eye appeal is outstanding. Census: 6 in 63 (1 in 63+ Prooflike, 1 in 63 ★) NGC ID# 25XS, PCGS# 78367

5111 1889 MS62 PCGS. The 1889 is one of the final really low mintage Philadelphia issues in the Liberty half eagle series, struck to the extent of just 7,520 coins. Mint State pieces are scarce in all grades and rare finer than MS62. This piece is boldly struck, with orange-gold luster and semiprooflike fields. Population: 13 in 62, 7 finer (8/15). NGC ID# 25XZ, PCGS# 8374

**1890 Half Eagle, MS62
Scarce, Low-Mintage Issue**

5112 1890 MS62 PCGS. A paltry 4,240 half eagles were struck in 1890, and many retain the original die polish in the fields, as this one does. The devices are strongly struck on each side. The surfaces are peppered with numerous small abrasions, as one would expect from the grade, but the most obvious one is located in the field in front of the face of Liberty. Population: 5 in 62, 4 finer (8/15). NGC ID# 25Y2, PCGS# 8375

5113 1891-CC MS62 PCGS. CAC. Variety 2-A. The design elements of this attractive Carson City half eagle are well-detailed, and the lustrous orange and rose-gold surfaces show scattered minor contact marks on both sides. From a mintage of 208,000 coins, this beautiful CC five dollar would make an ideal type representative. NGC ID# 25Y5, PCGS# 8378

**1892 Liberty Five, MS65+
Vivid Color, Vibrant Luster**

5114 1892 MS65+ PCGS. Despite the substantial mintage of 753,400 pieces, the 1892 Liberty half eagle is a rare issue in grades above the Gem level. This high-end Gem exhibits sharply detailed design elements and colorful orange-gold surfaces with vibrant mint luster and no mentionable distractions. Population: 29 in 65 (2 in 65+), 23 finer (8/15). NGC ID# 42AS, PCGS# 8379

5115 1893-CC AU55 NGC. Variety 1-A. Despite a mintage of only 60,000 pieces, three die marriages of '93-CC fives are known. Variety 1-B is scarcer than Variety 1-A, and Variety 1-B is rare. Variety 1-A has a centered date, and the mintmark's second C is entered high. This is an orange-gold Choice AU example with a good strike and original, unblemished surfaces. NGC ID# 25YB, PCGS# 8384

5116 1893-CC AU58 NGC. Variety 2-A. This is a semiprooflike near-Mint example with strongly struck motifs. Fiery orange and magenta tones color the margins, blending with olive-gold color elsewhere. Peripheral coloration is a common trait among coins held in Europe hoards and stacked in rolls, per Winter. From a mintage of 60,000 pieces. NGC ID# 25YB, PCGS# 8384

**1894 Liberty Five, MS65
None Finer at NGC**

5117 1894 MS65 NGC. This attractive Gem offers sharply detailed design elements, with some interesting clash marks on the reverse. The well-preserved orange-gold surfaces are brightly lustrous, with outstanding overall eye appeal. From a substantial mintage of 957,880 pieces. Census: 12 in 65, 0 finer (8/15). NGC ID# 25YE, PCGS# 8387

5118 1895-S MS61 NGC. Although the 1895-S half eagle had a mintage of 112,000 coins, Mint State survivors are rare. This piece is lightly abraded, as the grade suggests, but displays sharp, unworn motifs and satiny straw-gold luster. Census: 17 in 61, 8 finer (8/15). NGC ID# 25YJ, PCGS# 8391

5119 1895-S MS62 NGC. Despite a mintage of 112,000 coins, the 1895-S half eagle is decidedly rare in Mint State. Garrett and Guth (2006) add that the issue "must be considered one of the most underrated after the 1890 half eagle." Light yellow-gold surfaces show undistracting abrasions and sharply detailed motifs. Census: 5 in 62, 3 finer (7/15). NGC ID# 25YJ, PCGS# 8391

5120 1900 MS65 PCGS. CAC. Reddish and orange-gold hues paint the surfaces, leaving an area of central rose-gold color on each side of this marvelous Gem type coin. Cartwheel luster illuminates fully struck devices, and grade-defining marks are nearly invisible without a loupe. PCGS shows just 10 coins rated higher (7/15). NGC ID# 25YU, PCGS# 8400

5121 1903 MS65 PCGS. CAC. The 1903 Liberty half eagle is seldom encountered in MS65 condition. This attractive Gem is sharply detailed and brightly lustrous, with only a few minor signs of contact. Population: 25 in 65, 12 finer (8/15). NGC ID# 25Z2, PCGS# 8407

INDIAN HALF EAGLES

5122 1908-D MS63+ NGC. CAC. Uncommonly strong, frosty luster garners the Plus designation on this first-year Denver half eagle, although a few small ticks preclude a full MS64 grade. The strike is sharp and the eye appeal is excellent. NGC ID# 93KW, PCGS# 8511

5123 1908-D MS64 PCGS. CAC. This first-year Denver issue is marginally available at the Choice level, but is a genuine rarity any finer. This piece is sharply struck, with satiny straw-gold luster. A few light, scattered grazes in the fields do little to hindered the eye appeal. PCGS has seen only 11 finer examples (7/15). NGC ID# 93KW, PCGS# 8511

5124 1909-D MS64 PCGS. CAC. A sharply detailed Choice example of this early series issue, with vivid orange-gold surfaces that show just a few minor contact marks and vibrant mint luster on both sides. NGC ID# 28DJ, PCGS# 8514

5125 1909-D MS64+ NGC. CAC. A high-end Choice Example of this early Denver Mint issue, with sharply detailed design elements and well-preserved lustrous surfaces. NGC has graded 81 numerically finer examples (8/15). NGC ID# 28DJ, PCGS# 8514

5126 1909-S AU58 PCGS. CAC. The lustrous orange-gold surfaces of this attractive near-Mint specimen are lightly abraded and the well-detailed design elements show the faintest trace of wear. The 1909-S is a challenging issue in Mint State grades. NGC ID# 25ZL, PCGS# 8516

5127 1910 MS63 PCGS. Deep orange-gold luster shows an occasional area of lilac or lavender on this sharply struck 1910 Indian half eagle. A few light, scattered abrasions appear with a loupe, but none a individually obvious. Suitable for the collector who appreciates original patina.
From The Stephen A. Walling Collection. NGC ID# 28DK, PCGS# 8517

5128 1910-S MS61 PCGS. The 1910-S Indian half eagle is a challenging issue in high grade. This attractive Mint State piece exhibits sharply detailed design elements and lustrous orange-gold surfaces, with a scattering of minor contact marks on both sides. NGC ID# 28DN, PCGS# 8519

1910-S Indian Half Eagle, MS62 Sharp Appeal for the Grade

5129 1910-S MS62 PCGS. Collectors of the series find both the 1909-S and 1910-S half eagles challenging in Mint State, but especially so in Select or finer condition. This example is a point below that in terms of technical merit, but it excels in eye appeal. Rich, orange-gold surfaces are smooth and highly lustrous. The strike is strong. Only a few light marks — none severe — define the assigned grade, with few coins (just 48 examples at PCGS) granted a higher numeric level (7/15). NGC ID# 28DN, PCGS# 8519

5130 1911 MS64 PCGS. The vivid orange-gold surfaces of this impressive Choice example radiate vibrant mint luster and show only scattered minor contact marks. The design elements are sharply detailed and visual appeal is outstanding. NGC ID# 28DP, PCGS# 8520

5131 1911-S MS61 PCGS. This impressive Mint State specimen exhibits sharply detailed design elements and colorful yellow-gold surfaces with vibrant mint luster and a minimum number of minor contact marks for the grade. NGC ID# 25ZM, PCGS# 8522

5132 1911-S MS61 PCGS. Although not as scarce as its Denver counterpart, the 1911-S Indian five is more elusive in Mint State than many collectors realize. This example displays well-struck motifs amid deep orange and lavender-gold patina. A few ticks in the field behind the eagle's head are the only abrasions of note. NGC ID# 25ZM, PCGS# 8522

5133 1912 MS63 PCGS. A pleasing Select example of this popular five dollar gold issue, with well-detailed design elements and lustrous orange-gold surfaces that show some scattered minor contact marks. NGC ID# 28DS, PCGS# 8523

5134 1915 MS63 NGC. A few olive overtones attest to the originality of the lustrous golden surfaces of this Select 1915 Indian half eagle. The strike is sharp and grade-limiting abrasions are relatively minor in nature, scattered uniformly over each side. NGC ID# 28DX, PCGS# 8530

1915 Half Eagle, MS64 Wonderful Coloration

5135 1915 MS64 PCGS. A collectible, yet, upper-end Mint State example of the 1915 Indian half eagle. This coin displays original, frosty luster in attractive shades of lilac, mint, and orange-gold. The strike is sharp, and a few scattered ticks are largely forgotten amid the lovely patina. Finer examples of this issue are seldom seen and command strong premiums. NGC ID# 28DX, PCGS# 8530

1915-S Half Eagle, MS61 Scarce Series Key Issue

5136 1915-S MS61 PCGS. The 1915-S joins two other rare Indian fives — the 1909-O and the 1911-D — as the most challenging issues of the series in Mint State. Even coins near the bottom of the Uncirculated grading scale are decidedly scarce. This attractive example is seemingly close to an even finer grade, with substantial eye appeal and few marks of any note. The strike is sharp everywhere except at the highest points of the headdress. Just 164,000 pieces were struck. NGC ID# 25ZR, PCGS# 8531

LIBERTY EAGLES

- 5137 1840 XF40 PCGS.** A gleaming orange-gold example despite 20 points of wear. Glimpses of mint luster remain around the raised elements, and the surfaces appear satin-smooth when in hand despite scattered light abrasions that are softened by wear. The most notable mark is a shallow rim bruise at 3 o'clock on the obverse. Nice eye appeal for the grade. Population: 18 in 40, 70 finer (8/15). NGC ID# 262G, PCGS# 8581
- 5138 1843-O AU55 NGC. Variety 2.** The 1843-O eagle is elusive in the finer AU grades and is extremely rare in Mint State. This Choice AU representative exhibits just a brush of wear over sharply struck devices, with bright yellow-gold patina. Some die erosion is discernible around the outer peripheries. NGC ID# 262R, PCGS# 8589
- 5139 1847-O AU58 NGC. Variety 6.** Orange-red toning accompanies protected areas of this original and moderately abraded near-Mint New Orleans ten. The strike is bold for the No Motto type. Seven die marriages are confirmed for the 1847-O. Variety 2 is the most prevalent, while Variety 3 is the rarest. NGC ID# 2632, PCGS# 8598

1848-O No Motto Eagle, AU50

- 5140 1848-O AU50 PCGS. CAC. Variety 1.** An original lemon-gold New Orleans ten. The moderately marked surfaces offer ample glimmers of luster. A shield ring is present atop the second vertical stripe, seen on Variety 1 but not the other two known die marriages for the issue. All three varieties are scarce, since only 35,850 pieces were struck. NGC ID# 2634, PCGS# 8600

Uncirculated 1849 Ten Dollar Conditionally Scarce No Motto Type

- 5141 1849 MS60 NGC.** The No Motto type is collectible in circulated grades, but Mint State examples are elusive. The present lemon-gold eagle displays ample bright luster and is less abraded than expected for the MS60 level. The strike is good although by no means complete.
Ex: Dallas Signature (Heritage, 11/2005), lot 4290, which realized \$3,450.
From The Stephen A. Walling Collection. NGC ID# 2635, PCGS# 8601

- 5142 1850 Large Date AU53 PCGS. CAC.** This lightly abraded About Uncirculated eagle is the more available Large Date variety, which is seen about three times more often than the scarce Small Date variant. Green-gold surfaces retain remnants of bright mint luster and considerable eye appeal for the grade. CAC endorsed. Population: 20 in 53, 32 finer (8/15). NGC ID# 2637, PCGS# 8603
- 5143 1850-O VF30 PCGS. Variety 1.** The usual centered date variety. The introduction of the double eagle did not hinder ten dollar gold coin production at the New Orleans Mint in 1850. A total of 57,500 eagles were manufactured, and examples are collectible through mid-range circulated grades. Typically struck devices appear over green-gold surfaces that show minimal marks. NGC ID# 2639, PCGS# 8605

1854 Ten Dollar, AU58 Conditionally Elusive

- 5144 1854 AU58 PCGS.** The 1854 Liberty eagle is rarely seen in Mint State, making high-end AU coins among the finest many collectors will have the ability to acquire. This Borderline Uncirculated example retains sharp detail, with remnants of luster in the protected areas of the fields. Light surface chatter is as expected for the grade. Population: 15 in 58, 8 finer (8/15). NGC ID# 263G, PCGS# 8613
- 5145 1854-O Large Date XF40 NGC. Gold CAC. Variety 4.** A possible misplaced date variety, with the bottom of 85 digits apparent on the bust truncation. A better New Orleans issue, the 1854-O has a mintage of 52,500 pieces, approximately evenly divided between Small and Large Date variants. This honey-gold example has relatively few marks and ample peripheral luster. Housed in a former generation holder. NGC ID# 263J, PCGS# 98614
- 5146 1857-S XF40 PCGS. CAC.** An unheralded rarity, the 1857-S has a mintage of 26,000 pieces and a combined PCGS Population of only 68 pieces (8/15). This originally toned peach-gold representative is well defined and shows many glimpses of luster. The fields exhibit expected marks. Housed in an old green label holder. NGC ID# 263V, PCGS# 8624
- 5147 1868 XF45 PCGS.** An original peach-gold example with pleasing color and sharpness. Luster is fairly extensive, and the surfaces exhibit no more than the expected number of abrasions. Since paper money had replaced gold coin in most of the country, the 1868 has a mintage of only 10,630 pieces. Encapsulated in a green label holder. NGC ID# 264N, PCGS# 8653
- 5148 1873-S XF40 ANACS.** A mintage of 12,000 pieces guarantees the rarity of this underappreciated Old West issue. The present butter-gold example displays glimpses of luster. The microgranular surfaces are free from any mentionable marks. Housed in an ANA cache holder. NGC ID# 53M7, PCGS# 8668
- 5149 1874 AU58 NGC.** The 1874 is one of the most plentiful ten dollar gold issues from this decade, but is scarce in Mint State. This Borderline Uncirculated example is well-defined with some remaining luster. A few scattered marks do not hinder the eye appeal.
Ex: Long Beach Bullet (Heritage, 6/2004), lot 1088. NGC ID# 2657, PCGS# 8669

5150 1877-S XF45 NGC. High-grade examples of the 1877-S are rarely encountered, as few coins were salvaged from circulation. A Choice XF or lower AU example is about the finest most collectors can hope to procure. This piece features boldly impressed devices with a degree of rub, and abrasions are peppered over khaki-gold surfaces. NGC ID# 265H, PCGS# 8679

5151 1877-S — Improperly Cleaned — NGC Details. AU. A mere 17,000 eagles were minted at San Francisco in 1877. Like its Californian contemporaries, the issue was cast into circulation nearly in its entirety. AU coins are very scarce. This well-detailed and lightly hairlined coin is somewhat subdued in appearance with an area of lighter coloration at the lower obverse.

**1877-S Liberty Eagle, AU55
Elusive, Low-Mintage Issue**

5152 1877-S AU55 NGC. From a mintage of just 17,000 pieces, the 1877-S Liberty eagle is seldom encountered in high grade. This attractive Choice AU specimen shows just a trace of actual wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain significant amounts of original mint luster. Census: 30 in 55, 13 finer (8/15). NGC ID# 265H, PCGS# 8679

**1880-O Ten Dollar, AU50
Rare New Orleans Issue**

5153 1880-O AU50 PCGS. After an 18-year closure, the New Orleans Mint reopened in 1879 to help strike silver dollars, whose manufacture in great quantity was compelled by the Bland-Allison Act. O-mint coinage of eagles was almost an afterthought, although small numbers were struck each year through 1883. The 1880-O ten dollar mintage was just 9,200 pieces. This well defined apricot-gold example displays substantial luster for designated grade. The reverse is minimally abraded and the obverse shows a few moderate marks. Housed in a green label holder. NGC ID# 265U, PCGS# 8689

5154 1884-S MS62 PCGS. CAC. This boldly struck and lustrous 1884-S ten will have significant appeal for the collector who appreciates old-time color. Both sides are vividly hued in shades of amber-orange, olive, and bronze-gold. Eye appeal is such that grade-limiting abrasions pose little distraction. PCGS has seen only 12 finer representatives of this conditionally challenging San Francisco issue (8/15). NGC ID# 554U, PCGS# 8705

5155 1884-S MS62 PCGS. CAC. Many examples of this San Francisco issue made their way back to the U.S. from foreign holdings, but few coins exceed the MS62 level of this attractive example. Reddish highlights enhance the lightly abraded, wheat-gold surfaces. A lustrous and attractive representative, with CAC endorsement. PCGS has certified just 12 numerically finer coins (8/15). NGC ID# 554U, PCGS# 8705

**1891-CC Ten Dollar, MS62+
Popular Carson City Issue**

5156 1891-CC MS62+ NGC. Variety 2-B. There is a significant decline in the 1891-CC eagle's availability between the MS62 and MS63 grades, making this Plus-designated example appealing to the casual collector. The design elements are sharply rendered and reside amid satiny yellow-gold luster. There are no major abrasions, and we instead note just light chatter that limits the grade. NGC ID# 266U, PCGS# 8720

**1891-CC Eagle, Sharp MS62
FS-501, Repunched Mintmark**

5157 1891-CC/CC FS-501 MS62 PCGS. Variety 4-C. The CC mintmark was first punched too far right, then corrected. While any repunched mintmark is interesting, this variety also shows a dramatic die crack at stars 1 through 5 and a spikelike tine from the underside of Liberty's chin. Yet another die crack along the top of the denomination. This example is fully struck, with reflective fields and blazing mint luster. Several small abrasions are scattered about the surfaces, but attractive sun-gold coloration flashes coppery-red accents for exceptional eye appeal. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

5158 1892-CC Tripled Die Reverse, FS-801, XF45 NGC. Variety 1-A. The ball of the 9 is centered between two dentils, and the die-tripled motto is characteristic of all 1892-CC eagles (40,000 coins struck). This Choice XF example has rich red-gold coloration and partial luster in and around the reverse legends. Lightly marked surfaces display an expected amount of friction. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

**1892-CC Eagle, AU58
Seldom Seen Finer**

- 5159 1892-CC Tripled Die Reverse, FS-801, AU58 PCGS. Variety 1-A.** With a limited mintage of 40,000 coins, the 1892 Carson City ten is a popular issue, but is seldom seen in the upper AU grades; Uncirculated examples are particularly scarce. This near-Mint example shows deep bronze-gold patina, with coppery-red overtones around the peripheries and a few deep violet splashes of color on the obverse portrait. The strike is sharp and luster remains in the protected regions. IN GOD WE TRUST is tripled, as is seen on all 1892-CC eagles. Population: 30 in 58 (1 in 58+), 39 finer (7/15). NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

**1892-CC Eagle, MS62
Few Known Finer**

- 5160 1892-CC Tripled Die Reverse, FS-801, MS62 PCGS. CAC.** The tripled reverse die is common to all known 1892-CC eagles. This obverse is identified by minute repunching of the 89 in the date. Overall, the 1892-CC ten is rare in Mint State and almost unobtainable finer than MS62. This piece is boldly struck, with frosty green-gold luster. Scattered abrasions determine the grade. Population: 22 in 62 (1 in 62+), 2 finer (7/15). NGC ID# 266W, PCGS# 511600 Base PCGS# 8722
- 5161 1892-O MS62 PCGS. Variety 1.** A crisply struck and lustrous green-gold example. The obverse displays distributed small marks. A low mintage New Orleans issue rarely found any finer than the present grade. The late die state with delicate cracks on both sides. NGC ID# 266X, PCGS# 8723
- 5162 1894 MS63+ PCGS.** The upper stars on this Select green and rose-gold example show a touch of softness, while the other devices exhibit sharp detail. The 1894 was used primarily for reserve purposes and international trade. Most examples are heavily bagmarked, and this coin is about two grade points finer than the average certified survivor. NGC ID# 2675, PCGS# 8729
- 5163 1895 MS64 PCGS. CAC.** There are a number of 1895 eagles known in the lower Mint State grade range, but few Choice examples survive and finer pieces are rare. This coin displays a bold strike, with frosty honey-gold luster and a lack of noticeable abrasions. Population: 66 in 64 (4 in 64+), 3 finer (7/15). NGC ID# 2678, PCGS# 8732

- 5164 1897 MS64 NGC.** Vibrant luster and a precise strike aid the eye appeal of this sun-gold Choice Liberty type coin. Field grazes are moderately more prevalent on the obverse.
Ex: Long Beach Signature (Heritage, 9/2002), lot 2487; Long Beach Signature (Heritage, 6/2005), lot 7946, which realized \$1,495.
From The Stephen A. Walling Collection. NGC ID# 26CH, PCGS# 8737
- 5165 1897 MS64+ PCGS.** Despite a mintage that just tops 1 million coins, the 1897 eagle is seldom available as fine as MS64, and better pieces are rare. This Plus-designated coin displays satiny yellow-gold luster and sharp devices. Only 13 pieces are finer at PCGS (8/15). NGC ID# 26CH, PCGS# 8737
- 5166 1901 MS64 PCGS. CAC.** The stars exhibit full centers, and the eagle's feathers and talons are razor-sharp. Light chatter occurs in the fields, namely under the wings, but the lustrous sun-gold surfaces display excellent preservation for the Choice assessment. A couple of small alloy spots appear at the lower obverse. NGC ID# 7LHF, PCGS# 8747
- 5167 1901-O MS62 PCGS. Variety 2.** A boldly struck and lustrous honey-gold New Orleans type coin. Conditionally rare in better Uncirculated grades, the 1901-O is usually encountered generously bagmarked, unlike the present smooth and glossy example. NGC ID# 267R, PCGS# 8748
- 5168 1901-S MS64+ PCGS.** The design elements of this high-end Choice specimen are sharply detailed, aside from star 13, which shows incomplete radials. The lustrous peach-gold surfaces display minimal signs of contact. NGC ID# 267S, PCGS# 8749
- 5169 1901-S MS64+ PCGS. CAC.** A quintessential favorite among type collectors needing an example of the With Motto Liberty Head eagle, this San Francisco date ranks high not only for its availability, but also for the eye appeal and quality. The current coin is Choice for the near-Gem grade. Frosty and lustrous, the sharp strike shows only minor blending on stars 12 and 13. Marks are minimal for the grade, with an alloy dot at the denomination and die-related roughness at STATES OF. Lilac overtones provide terrific eye appeal. NGC ID# 267S, PCGS# 8749
- 5170 1901-S MS64+ NGC. CAC.** The richly frosted surfaces of this flashy, honey-gold ten radiate lilac and rose highlights when the coin is rotated under any light source. The strike is pinpoint sharp everywhere except stars 12 and 13, which show blending at their centers. The prototypical ideal type coin — a near-Gem, just a few marks shy of the next highest level as indicated by the NGC Plus designation and CAC endorsement. NGC ID# 267S, PCGS# 8749
- 5171 1902 MS63 PCGS.** The 1902 eagle is marginally scarce in MS63, but finer representatives are notably rare. This Select example displays a bold strike and satiny orange-gold luster. Grade-limiting ticks are faint and evenly scattered over each side. PCGS lists 23 finer representatives (8/15). NGC ID# 267T, PCGS# 8750
- 5172 1907-S MS62 PCGS.** Garrett and Guth (2006) note that the 1907-S is "easily the scarcest of any Liberty Head eagle of the 20th century" although the 1905-S stakes a similar claim. Most coins grade between MS61 and MS62, and finer coins are rare. This piece has swirling mint frost over light red-gold surfaces with sharp design elements. Minimally marked. Population: 50 in 62 (1 in 62+), 29 finer (7/15). NGC ID# 38EP, PCGS# 8765

INDIAN EAGLES

- 5173 1907 No Periods MS62 PCGS.** An attractive MS62 example of this important first-year type coin, with well-detailed design elements and lustrous orange-gold surfaces that show a scattering of minor contact marks.. NGC ID# 28GF, PCGS# 8852

1907 No Periods Indian Ten, MS63 Collector-Grade No Motto Coin

- 5174 1907 No Periods MS63 PCGS.** This Select No Motto type coin is sharply struck with bright, satiny mint luster. As we have said before, this is one of our favorite issues — most survivors have a uniform satiny appearance and are minimally abraded, even at the MS63 level.
Ex: Central States Signature (Heritage, 5/2004), lot 9835.
From The Stephen A. Walling Collection. NGC ID# 28GF, PCGS# 8852

- 5175 1908 No Motto AU58 NGC.** The 1908 No Motto is a two-year type coin with a tiny mintage of 33,500 pieces, making it widely sought-after among series specialists and type collectors alike. Bright olive and peach-gold surfaces are lightly abraded. The highest points of the well-detailed motifs show minor blending. NGC ID# 28GG, PCGS# 8853

- 5176 1908 No Motto MS62 PCGS.** A coruscating and lightly marked orange-gold example. Although the 1908 No Motto twenty has a mintage in excess of 4,000,000 pieces, its ten-dollar counterpart has a low production of 33,500 pieces. Certified in a green label holder. NGC ID# 28GG, PCGS# 8853

- 5177 1908 No Motto MS62 PCGS.** The low mintage of the 1908 No Motto eagle (33,500 coins) had an affect on the survival of high-end Mint State coins, making this date elusive in MS63 or better grades. This collectible MS62 example shows satiny orange-gold luster and well-defined motifs. A loupe reveals light surface chatter in the absence of major abrasions. NGC ID# 28GG, PCGS# 8853

- 5178 1908-D No Motto MS61 PCGS.** The bulk of Mint State 1908-D No Motto eagles resides in the MS61 and MS62 grades, and finer coins are seldom seen. This collector-grade example is well-struck, with satiny wheat-gold luster and lightly abraded surfaces. NGC ID# 28GH, PCGS# 8854

1908-D Ten Dollar, MS62 No Motto

- 5179 1908-D No Motto MS62 PCGS.** The 1908-D No Motto Indian eagle had a significantly higher mintage than its Philadelphia counterpart (210,000 versus 33,500 coins), but the two dates are relatively similar in high-grade rarity. This Denver coin shows well-defined eagle feathers with satiny orange-gold luster over each side. Light surface chatter is all that limits the grade. NGC ID# 28GH, PCGS# 8854

1908-D Indian Eagle, MS62 Short-Lived No Motto Design

- 5180 1908-D No Motto MS62 PCGS.** An attractive MS62 example of this popular, short-lived design type, with orange and rose-gold surfaces that show a scattering of minor contact marks and vibrant mint luster on both sides. From a mintage of 210,000 pieces, the 1908-D Indian eagle becomes scarce in grades above the MS62 level. NGC ID# 28GH, PCGS# 8854

- 5181 1908-S AU58 PCGS.** This With Motto San Francisco issue boasts a low mintage of only 59,850 pieces and is highly sought-after in all grades. This near-Mint example displays bold design elements with just a touch of wear. Orange-gold surfaces retain significant mint luster. NGC ID# 28GL, PCGS# 8861

1909 Indian Ten, MS63 Rich Orange-Gold Color

- 5182 1909 MS63 PCGS.** Powerfully lustrous with impressive visual appeal. The well-defined obverse offers vibrant sun-gold surfaces that pale to straw-gold at the central portrait, while the reverse exhibits slightly deeper shadings overall. An excellent survivor from this little-saved Philadelphia issue. Finer examples are scarcely seen.
Ex: Long Beach Signature (Heritage, 5/2008), lot 3478. NGC ID# 28GM, PCGS# 8862

- 5183 1909-D MS62 PCGS.** Unlike its plentiful half eagle counterpart, the 1909-D eagle is elusive in pleasing Mint State condition. This MS62 example offers orange-gold cartwheel luster and sharp design elements. Scattered abrasions pose little distraction. NGC ID# 28GN, PCGS# 8863

**1909-S Indian Ten, MS61
Moderately Scarce S-Mint Issue**

- 5184 1909-S MS61 NGC.** Overshadowed by other San Francisco dates in the series, the 1909-S is itself moderately scarce in Mint State. The nicely lustrous surfaces on this example display a frosty granularity that is often seen the early- to mid-series eagles. Light abrasions define the grade, including a couple of shallow scrapes near the reverse motto. NGC ID# 28GP, PCGS# 8864
- 5185 1910 MS61 NGC.** A well-struck Mint State example, this 1910 Indian eagle exhibits vibrantly lustrous yellow-gold surfaces. Scattered abrasions limit the grade, but none are individually bothersome. NGC ID# 28GR, PCGS# 8865
- 5186 1910-S MS61 PCGS.** The 1910-S Indian eagle is a slightly better date in high grade, despite its mintage of 811,000 coins. This Uncirculated example displays sharp detail, with original honey-gold luster. Scattered abrasions are as expected for the grade. NGC ID# 268D, PCGS# 8867
- 5187 1910-S MS62 PCGS.** The 1910-S Indian eagle is scarcer in pleasing Mint State condition than is suggested by its mintage of 811,000 coins. This piece shows bold motifs illuminated by vibrant orange-gold luster. Light, scattered abrasions are characteristic of the issue and grade. NGC ID# 268D, PCGS# 8867
- 5188 1910-S MS62 PCGS.** Although limited in grade, this 1910-S Indian eagle does not exhibit any singularly bothersome abrasions; light chatter in the fields and on the portrait is all that prevents a finer designation. This piece is well-struck and shows satiny wheat-gold luster. NGC ID# 268D, PCGS# 8867
- 5189 1910-S MS62 PCGS.** This San Francisco issue is collectible in MS62, while finer pieces are scarce. This coin displays well-struck motifs and honey-gold satin luster. Light chatter limits the grade in the absence of major abrasions. NGC ID# 268D, PCGS# 8867
- 5190 1911 MS64 PCGS.** An impressive Choice Mint State example of the 1911 Indian eagle, an issue which is seldom encountered finer. This splendid representative displays brilliant and frosty orange-gold luster with virtually mark-free surfaces.
Ex: New York Signature (Heritage, 3/2012), lot 4154. NGC ID# 28GT, PCGS# 8868
- 5191 1911-D AU50 NGC.** The sharply defined design elements of this attractive AU specimen show just a trace of high-point wear and the lustrous yellow and greenish-gold surfaces are lightly abraded and pleasing. NGC ID# 28GU, PCGS# 8869

**1911-D Eagle, AU55
Key Issue, Green Label Holder**

- 5192 1911-D AU55 PCGS.** A Choice About Uncirculated example of this low-mintage Denver date, one of the notable scarcities of 20th century gold coinage. Although not quite as elusive when briefly circulated as compared to Uncirculated examples, this series key is always in demand. Just 30,100 pieces were struck. The current medium-gold example displays the finely granular surfaces that characterize the issue, with the tiny facets capturing and retaining much of the original mint luster. A sharp strike remains, with few discernible marks and plentiful eye appeal. NGC ID# 28GU, PCGS# 8869
- 5193 1911-S AU58 PCGS.** This borderline-Uncirculated example boasts coruscating luster and strong definition. Light yellow-gold surfaces are surprisingly unabraded for the grade, and high-point rub is likely the result of album friction rather than circulation. From a mintage of just 51,000 coins. NGC ID# 28GV, PCGS# 8870
- 5194 1911-S AU58+ NGC.** A lower-mintage date struck to the extent of 51,000 coins, the 1911-S is scarcely seen at this level or finer. This AU58+ example is lustrous with khaki-gold surfaces. A few marks appear on Liberty's cheek, and the faintest trace of friction prevents a higher grade. NGC ID# 28GV, PCGS# 8870
- 5195 1912 MS63 PCGS.** Deep coppery-orange and rose-red hues glow over each side of this Select 1912 Indian ten, drawing attention away from a few scattered abrasions. The strike is sharp and the eye appeal is outstanding for the grade.
From The Stephen A. Walling Collection. NGC ID# 28GW, PCGS# 8871
- 5196 1912-S MS60 PCGS.** This piece is well-struck, with original straw and green-gold hues throughout the luster. Moderate abrasions slightly subdue the cartwheel effect. The 1912-S is a slightly better date in Uncirculated condition, and seldom seen without heavy abrasions. NGC ID# 269G, PCGS# 8872

**1912-S Eagle, MS62
Scarce in Mint State**

- 5197 1912-S MS62 PCGS.** A scarce issue in the series, this San Francisco date is seldom well-produced. The present example is a bit reserved, yet the soft luster is sufficiently attractive and the strike is seldom seen any bolder. One or two light abrasions appear in the left obverse field, but they require a glass for viewing. Any other marks are minimal. Faint olive overtones float over the finely granular surfaces, intermingled with the honey-gold luster. The 1912-S ten is rare and significantly more expensive any finer. NGC ID# 269G, PCGS# 8872

1913-S Indian Ten, AU58
Low-Mintage Issue

- 5198 1913-S AU58 NGC.** The 1913-S maintains semikey-date status, coming from a low mintage of only 66,000 coins. This nearly Mint State example combines affordability with a degree of quality that will appeal to the budget-conscious collector. The wheat-gold surfaces retain modest luster in the fields, and slight friction leaves most details crisp. A single mark on Liberty's cheek is worthy of mention. NGC ID# 28GZ, PCGS# 8874

1914-D Ten Dollar, MS64
Well-Struck and Lustrous

- 5199 1914-D MS64 PCGS.** While 343,500 pieces were struck, many traveled east and then to Europe where they served as financial security through two wars and the Great Depression. Others were melted in the federal Gold Recall. Frosty, fine-textured surfaces cover both sides of this lustrous medium-gold survivor, with sharp definition on the headdress and on the eagle. Only a scattering of tiny marks prevent an even higher grade. PCGS reports just 34 pieces in a finer numeric grade (7/15). NGC ID# 28H3, PCGS# 8876
- 5200 1915 MS63 PCGS.** A well-struck, lustrous example with satiny lemon-gold luster and a few olive-gold overtones. Light, uniformly dispersed abrasions limit the grade, but none are individually detracting. NGC ID# 28H5, PCGS# 8878

1915 Ten Dollar, MS64
Appealing Cartwheel Luster

- 5201 1915 MS64 PCGS.** The 1915 Indian eagle is marginally available MS64, but the scarcity of finer examples drives moderate demand for coins such as the currently offered Choice example. This piece is sharply struck, with vibrant yellow-gold luster. A few minor abrasions limit the grade, but there are no singularly distracting flaws. NGC ID# 28H5, PCGS# 8878

- 5202 1916-S AU58 PCGS. CAC.** A trace of wear is evident on the high points of this near-Mint 1916-S eagle, the last regular-issue gold coin of the decade. Aside from the McKinley commemorative gold dollars, production of gold coinage ceased until 1920. This example has excellent eye appeal despite a few trivial marks. NGC ID# 28H7, PCGS# 8880

- 5203 1932 MS64 NGC.** The 1932 is a go-to date in the Indian eagle series when a single type coin is sought. The luster is typically frosty and the eye appeal is usually outstanding. This Choice example does not disappoint, and also displays well-struck design elements. A few tiny marks on Liberty's cheek and neck are all that preclude a Gem assignment. NGC ID# 28HB, PCGS# 8884

- 5204 1932 MS64+ PCGS.** This high-end Choice Indian eagle displays well-preserved orange-gold surfaces, with frosty mint luster and traces of rose patina. The design elements of this popular type coin are well-detailed and the overall presentation is quite pleasing. NGC ID# 28HB, PCGS# 8884

- 5205 1932 MS64+ NGC. CAC.** Light orange and straw-gold elements adorn each side, combining with radiant luster to provide this near-Gem with splendid eye appeal. Grade-limiting marks are confined to Liberty's cheek and the upper-right reverse field. From the popularly sought-after final issue in the series. NGC ID# 28HB, PCGS# 8884

- 5206 1932 MS64+ PCGS. CAC.** This high-end Choice example displays well-detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

- 5207 1850 — Improperly Cleaned — NGC Details. AU.** Careful rotation reveals vertical hairlines, but the green-gold surfaces lack mentionable abrasions. A first year double eagle interesting for its heavy die lines (as made) near the eagle's beak and a broad die crack down from the tops of UNITED STATES. NGC ID# 268F, PCGS# 8902

- 5208 1852/1852 FS-301 XF45 NGC.** Doug Winter estimates that only 5% to 10% of examples have a boldly repunched date. This bright green-gold Choice XF representative displays light blending over the high points and small scattered abrasions. The devices remain well-detailed, illuminated by original luster in the recesses. NGC ID# 268K, PCGS# 145729 Base PCGS# 8906

- 5209 1854 Small Date AU50 PCGS. Breen-7167.** The date was initially entered with an upward slant, then repunched correctly. A moderately marked sun-gold example with light wear on the curls and wingtips. Luster fills the legends and outlines the stars. NGC ID# 268R, PCGS# 8911

1855 Double Eagle, AU53
Original Patina

- 5210 1855 AU53 NGC.** The collector who appreciates original, uncleaned gold will find this About Uncirculated 1855 double eagle especially appealing. The surfaces show soft olive-gold patina with hints of luster emerging when rotated beneath a light. Slight wear leaves the design elements well-detailed and there are no unsightly abrasions. NGC ID# 268V, PCGS# 8914

1855-S Twenty Dollar, AU58
Lustrous and Appealing

5211 1855-S AU58 PCGS. The 1857-S double eagle is somewhat scarcer in high grade than one would expect given its mintage of nearly 880,000 coins, even with the recovery of a few hundred AU and Mint State examples from the S.S. *Central America* and S.S. *Republic*. This near-Mint representative is sharply detailed, with remnants of luster appearing in the protected areas of the fields. NGC ID# 268X, PCGS# 8916

5212 1856-S XF40 NGC. This Type One twenty served a brief period of time in circulation, unlike the hundreds of Uncirculated survivors recovered from the S.S. *Central America*. Green and orange-gold surfaces showcase myriad abrasions. The devices retain strong detail, though the curl below Liberty's ear is typically soft. NGC ID# 2692, PCGS# 8919

5213 1857-O — Damaged — NGC Details. VF. New Orleans twenties are scarce, and most of those are dated between 1850 and 1853. The 1857-O has a mintage of 30,000 pieces, and approximately 1% of that production has survived. The present lemon-gold example is thickly hairlined, but all legends are bold including the date and mintmark. The central reverse is also well defined. NGC ID# 2694, PCGS# 8921

1859 Liberty Twenty, AU55 Details
Better Philadelphia Date

5214 1859 — Cleaned — ANACS. AU55 Details. A lightly cleaned, but pleasing, Choice AU example from a mintage of just 43,597 pieces. Few examples were saved and the date is scarce-to-rare in all grades. This well-detailed orange-gold specimen shows just a touch of wear on the design elements and the surfaces display the expected number of minor abrasions for the grade. NGC ID# 269A, PCGS# 8926

5215 1859-S XF45 NGC. Bright, yellow-gold surfaces reveal hints of original luster in the protected regions of the fields, while the design elements show little wear. A number of abrasions affect the obverse, not unusual for the grade.
Ex: Long Beach Signature (Heritage, 2/2007), lot 9842. NGC ID# 269C, PCGS# 8928

1861 Double Eagle, Choice AU
Accessible Type One Issue

5216 1861 AU55 NGC. The record-setting 1861 mintage of nearly 3 million double eagles reflects the economic climate after the breakout of the Civil War. The Treasury struck twenty dollar gold coins as backing for Demand notes, which were issued in that year to finance the Union's war efforts. This Choice AU example has rose and green-gold color with abundant mint frost within the protected areas of the design. The devices are well-defined despite a trace of friction over the hair curls. Bagmarks are scattered over each side. NGC ID# 269G, PCGS# 8932

1861 Twenty Dollar, Choice AU

5217 1861 AU55 NGC. The 1861 double eagle has long been popular among type collectors due to its moderate availability in AU and lower Mint State grades. This Choice AU example retains hints of luster in the protected areas of the fields, with medium green-gold patina overall. Scattered abrasions accompany light wear on the high points of the design. NGC ID# 269G, PCGS# 8932

1861 Twenty Dollar, MS61
Mint State Type Coin

5218 1861 MS61 NGC. The 1861 is one of the most plentiful Type One Philadelphia issues, long a collector favorite for type representation. This Mint State example is sharply struck, with satiny yellow-gold luster. A few noticeable marks appear on Liberty's cheek, but other abrasions are minor in nature. The eye appeal is pleasing for the grade. NGC ID# 269G, PCGS# 8932

1865 Double Eagle, AU55
Minimal Abrasions for the Grade

- 5219 1865 AU55 PCGS.** The surfaces of this mildly circulated end-of-war double eagle are Choice for the About Uncirculated grade, with strong remaining mint luster. Apricot-gold color prevails across both sides, and glimpses of prooflike surface are still evident. The motifs retain bold definition. This is a high-quality representative of the assigned grade with considerable eye appeal, as well as fewer than the expected number of bagmarks and abrasions. NGC ID# 269U, PCGS# 8943

1866 Motto Twenty Dollar, AU50

- 5220 1866 Motto AU50 NGC.** An apricot-gold representative of the introductory Motto issue. Lightly circulated and moderately abraded without any singularly distracting marks. The N in IN is repunched above its upper right serif, but the variety differs from the more distinctive FS-801. Although unlisted and minor, the present variety is undoubtedly rare, since we cannot recall a similar example. NGC ID# 269X, PCGS# 8949

1867-S Twenty Dollar, Choice AU
Minimally Abraded

- 5221 1867-S AU55 NGC.** Small Squat S. Gold coins circulated heavily in the West, explaining the scarcity of the 1867-S in higher grades despite a mintage approaching 1 million coins. This Choice AU survivor has partly lustrous yellow-gold surfaces with minor high-point blending. The only mark that deserves attention is a linear depression below and to the right of the T in TRUST. Lightly abraded compared to most high-grade representatives. NGC ID# 26A2, PCGS# 8952

- 5222 1872 AU53 NGC.** A delightfully original About Uncirculated example of this Type Two Philadelphia issue, displaying substantial yellow-gold luster amid minimal evidence of wear. A few minor marks on Liberty's jaw are the only abrasions of note. NGC ID# 26AD, PCGS# 8963

- 5223 1872-S AU58 NGC.** This Type Two San Francisco issue is scarcer in Mint State than might be suggested by its mintage of 780,000 coins. This Borderline Uncirculated example retains substantial yellow-gold luster and sharp detail. No obvious wear is present, but the obverse does exhibit a scattering of slide marks and minor abrasions which limit the grade. NGC ID# 26AF, PCGS# 8965

1874-S Twenty, Lustrous MS61
Popular Type Two Issue

- 5224 1874-S MS61 PCGS.** Scattered marks and grazes on both sides of this Mint State 1874-S twenty determine the grade but do not defeat the eye appeal occasioned by great luster and no trace of high-point wear. These Type Two twenties, particularly from the Carson City and San Francisco branch mints, are extremely popular among collectors. NGC ID# 26AR, PCGS# 8972

1875 Twenty Dollar, Well-Detailed MS62

- 5225 1875 MS62 NGC.** Unlike the other gold denominations of the date, the 1875 double eagle claims a substantial mintage of 295,740 pieces. The date is relatively available in lower grades, but it becomes somewhat scarce in MS62, and finer grades are elusive. The present coin is a well-detailed specimen with lustrous yellow and rose-gold surfaces.
Ex: Long Beach Signature (Heritage, 9/2011), lot 4494. NGC ID# 2547, PCGS# 8973

- 5226 1875-S MS61 PCGS.** The 1875-S is one of the few Type Two double eagles that can be found with little searching in mint condition. However, most examples grade no higher than MS61, and finer examples prove scarce. This well-defined example has medium yellow-gold surfaces that show minimal marks for the grade. NGC ID# 26AU, PCGS# 8975

- 5227 1876 MS61 NGC.** The 1876 Liberty double eagle represents the last year of the Type Two design. This attractive Mint State example offers well-detailed design elements and lustrous orange-gold surfaces with a scattering of minor, grade-consistent contact marks. NGC ID# 26AV, PCGS# 8976

- 5228 1876 MS61 PCGS.** The Light Motto is an ephemeral design subtype introduced on 1876 Philadelphia double eagles. The arrival of the Type Three reverse in 1877 ended its brief run. Heavy Motto examples also exist for the present issue. This Light Motto twenty offers sweeping luster and a sharp strike. The moderately marked surfaces exhibit orange-gold centers and lime-green margins.
From The Stephen A. Walling Collection. NGC ID# 26AV, PCGS# 8976

1876-S Twenty, MS62
Reflective Fields, Sharp Strike

- 5229 1876-S MS62 NGC.** A variety of mintmark positions exist for this final-year of the San Francisco Type Two design, a subject needing more research throughout the Liberty Head double eagle series. This is a well-defined and attractive example with the mintmark extending just beyond the top-right serif of N in TWENTY. Other varieties are known with the mintmark either further left or further right. The scarcity of this S-Mint issue in Uncirculated grades starts just one point higher at MS63 — a grade that the current example approaches with its minimal number of marks and lustrous, reflective appeal. NGC ID# 26AX, PCGS# 8978

1877-S Liberty Twenty, MS62
Lustrous Type Three Example

- 5230 1877-S MS62 NGC.** More available than the other 1877 double eagles struck in Philadelphia and Carson City, the San Francisco issue is a popular selection for the first-year Type Three design with TWENTY DOLLARS spelled out on the reverse. This lustrous representative shows far fewer marks than normally encountered for the grade. A crisp strike accompanies olive-gold accents that flash across the frosted, medium-gold surfaces for excellent eye appeal. Just 9 pieces are graded numerically finer at NGC (7/15). NGC ID# 254B, PCGS# 8984

1879 Twenty, MS61+
Plus-Graded Quality, Nice Appeal

- 5231 1879 MS61+ NGC.** This Type Three double eagle is scarce in all Mint State grades, although several examples returned from European hoards over the past several decades. A reduced mintage of 207,630 pieces reflected the Mint's new focus on silver dollar production at the expense of most gold issues. This example is high-end for its grade, with frosted, medium gold surfaces and bright cartwheel luster. Abrasions are less prominent than expected for the grade. Census: 1 in 61+ (this coin), 40 finer (7/15). NGC ID# 26B6, PCGS# 8988

1882-S Twenty Dollar, MS62
Scarce Finer

- 5232 1882-S MS62 PCGS.** This lustrous, lightly abraded 1882-S double eagle is among the finer pieces typically seen. Higher-grade coins can be found, but they are rare and proportionately expensive. This collectible example is sharply struck with frosty peach and green-gold luster. Scattered abrasions determine the grade. NGC ID# 26BG, PCGS# 8998

- 5233 1883-S MS62 NGC.** Tall S. The stars exhibit full centers, Liberty's hair strands are boldly defined, and the eagle's neck and wing feathers are sharply rendered. Each side features green and rose-gold hues with glimmering mint luster. Scattered abrasions occur primarily in the right obverse field. The reverse is comparatively clean. NGC reports 80 finer submissions (6/15). NGC ID# 26BJ, PCGS# 9000

- 5234 1884-S MS62 PCGS.** A lovely straw-gold double eagle, this example has hints of delicate rose overtones in the protected areas of the design. As with other S-mint issues from this decade, the devices are sharply rendered.
Ex: Summer FUN Signature (Heritage, 7/2014), lot 4818 NGC ID# 26J5, PCGS# 9002

1884-S Twenty Dollar, MS63
Frosty and Strongly Defined

- 5235 1884-S MS63 NGC.** This issue was heavily exported for trade, and most examples that have returned to the collector marketplace in recent decades are heavily abraded. MS63 coins are challenging to locate, and finer pieces are rare. This offering exhibits frosty luster over surfaces colored in shades of honey and green-gold with sharp design features. Minor grazes limit the grade, but no obtrusive abrasions are present. Only nine coins are rated finer at NGC (8/15).
Ex: FUN Signature (Heritage, 1/2015), lot 7578. NGC ID# 26J5, PCGS# 9002

**1884-S Liberty Head Twenty, MS63
Frosty, Minimally Marked Example**

5236 1884-S MS63 NGC. A terrific example of the Select Uncirculated grade, with remarkably few marks and bold eye appeal. Fully struck throughout, the rich-gold coloration is Mint-fresh with fleeting glimpses of rose and olive color amid the cartwheel luster. There are no singularly distracting marks to mention. NGC has certified just nine numerically finer examples of the issue (7/15). NGC ID# 26J5, PCGS# 9002

5237 1885-S MS62 NGC. The deeply lustrous orange-gold surfaces are well-struck and show only scattered marks, with some light haze on the high points from long-term bag storage. Slightly better than usually seen for the issue. NGC ID# 28ZH, PCGS# 9005

**1885-S Double Eagle, MS63
Vibrant Luster**

5238 1885-S MS63 PCGS. Series expert Mike Fuljenz cites the 1885-S as one of the only early date S-mint Type Three twenties that can be found at a reasonable price point in MS63. Finer examples, however, are generally out of reach for the average collector. This is a highly lustrous example with frosty orange and rose-gold surfaces. The 1885-S is sometimes softly defined compared to other issues from the California facility, but this Select coin is needle-sharp throughout. PCGS has only seen 35 submissions in higher grades (8/15). NGC ID# 28ZH, PCGS# 9005

**1885-S Liberty Twenty, MS63
Beautiful Two-Toned Coloration**

5239 1885-S MS63 PCGS. Frosty green-gold margins surround warmer rose-gold centers on this sharply struck Select example. Light chatter on the cheek contributes to the grade, though no singularly obtrusive abrasions are present. PCGS has only certified 35 finer representatives, and NGC has seen only 11 such pieces (8/15). Ex: *FUN Signature* (Heritage, 1/2015), lot 7585. NGC ID# 28ZH, PCGS# 9005

5240 1888 MS61 PCGS. Well-defined with shimmering mint frost. The surfaces are mostly orange-gold with lilac accents. Several thin alloy streaks appear at the upper and left obverse. Ex: *Dallas On Line Session* (Heritage, 12/2005), lot 8611; *Central States Signature* (Heritage, 4-5/2009), lot 3992; *FUN Signature* (Heritage, 1/2015), lot 7592. NGC ID# 26BT, PCGS# 9008

5241 1888-S MS62 NGC. Rose-gold centers lighten to green-gold color at the margins throughout this splendid S-mint representative. Glistening frosty luster cascades over surfaces that show light bagmarks on Liberty's cheek and in the fields. NGC ID# 26BU, PCGS# 9009

5242 1888-S MS62 PCGS. This lovely Liberty Head twenty is typical for the issue with razor-sharp strike definition and deep reddish and orange-gold coloration. The 1880-S is one of the most accessible California issues from the decade. A frosty, minimally marked type representative. NGC ID# 26BU, PCGS# 9009

1888-S Double Eagle, Sharp MS63

5243 1888-S MS63 PCGS. The apricot-gold and reddish-orange surfaces are relatively clean for the grade on this Select 1888-S twenty, a late-series S-mint coin that is a couple of grade points finer than the average certified example. A nice sharp strike and great luster throughout add significantly to the eye appeal. NGC ID# 26BU, PCGS# 9009

**1889 Twenty Dollar, MS62+
Low-Mintage Philadelphia Issue**

5244 1889 MS62+ NGC. The quality of this deeply frosted, lightly abraded double eagle was recognized by NGC, which awarded the desirable Plus designation for high-end appeal at the assigned grade level. It is a significant distinction because so few examples of the date are certified any finer. Just 44,070 pieces were struck at the Mint in 1889 — a token mintage, making this issue an unrepresented Philadelphia date in many collections. The current coin is the sole recipient of the NGC Plus designation in MS62. Census: 1 in 62+, 9 finer (7/15). NGC ID# 2695, PCGS# 9010

5245 1889-S MS62 PCGS. Bright yellow and green-gold surfaces display sharply struck design features. Scattered abrasions determine the grade and impact the luster flow somewhat. Ex: *FUN Signature* (Heritage, 1/2015), lot 7605. NGC ID# 26BW, PCGS# 9012

5246 1889-S MS62 NGC. An attractive Type Three double eagle from the San Francisco Mint, with sharply detailed design elements and vibrant mint luster throughout. The rich yellow-gold surfaces show a few minor contact marks and luster grazes. NGC ID# 26BW, PCGS# 9012

**1889-S Double Eagle, MS63
High-End for the Grade**

- 5247 1889-S MS63 PCGS.** The 1889-S Liberty twenty was one of the issues whose availability was most heavily affected by the discovery of the Saddle Ridge Hoard, with several hundred examples recovered, many in Mint State. This piece is not pedigreed to the Hoard, but the bright, radiant luster and largely mark-free surfaces support the possibility that its origin is indeed from the recent California discovery. Bold design elements further contribute to the eye appeal. NGC ID# 26BW, PCGS# 9012

**1889-S Twenty Dollar, MS63
Strongly Struck Motifs**

- 5248 1889-S MS63 PCGS.** Orange and green-gold hues color the lustrous, minimally abraded surfaces of this Select S-mint double eagle. The design elements are strongly struck, including Liberty's hair and the star centers. A *Guide Book of Double Eagle Gold Coins* remarks that examples of the 1889-S "are readily available in circulated grades and in Mint State from MS60 to 62. Any higher grade coin is rare, curiously so." PCGS has graded only 43 pieces finer (8/15). Ex: FUN Signature (Heritage, 1/2015), lot 7609. NGC ID# 26BW, PCGS# 9012
- 5249 1890 MS62 NGC.** This attractive MS62 specimen offers well-detailed design elements and lightly marked orange-gold surfaces that show a few hints of rose. From a low mintage of 75,940 pieces, NGC has graded 22 numerically finer examples (7/15). NGC ID# 26BX, PCGS# 9013

**1890-S Double Eagle, Lustrous MS63
Conditionally Scarce S-Mint Issue**

- 5250 1890-S MS63 PCGS.** MS63 is about the finest grade that most collectors will encounter when searching for an 1890-S twenty dollar. PCGS and NGC combined have graded only 40 examples finer (8/15). Orange-gold and lime-green surfaces display pleasing mint frost and exhibit sharply struck design elements. Ex: FUN Signature (Heritage, 1/2015), lot 7626. NGC ID# 26BZ, PCGS# 9015

- 5251 1894 MS63+ PCGS.** The original, frosty luster of this high-end MS63 example gleams brightly in the centers while the margins show deeper orange-gold color. The strike is sharp and the motifs are vibrantly illuminated by a radiant cartwheel effect. A few light abrasions on Liberty's cheek limit the grade. NGC ID# 26CB, PCGS# 9025

- 5252 1894-S MS63 PCGS.** Flashy yellow-gold surfaces provide this Select example with lovely visual appeal. Scattered marks fail to pose any significant distraction. The certified population drops sharply in higher grades, adding to the desirability of MS63 pieces. Ex: Central States Signature (Heritage, 4/2014), lot 6975; New York Signature (Heritage, 10/2014), lot 4459. NGC ID# 26CC, PCGS# 9026

- 5253 1896 MS63 NGC.** Twenty dollar gold coin production at the Mint declined by nearly 30% between 1895 and 1896. Still, this is an accessible issue through MS63. This coin offers scintillating luster over orange-gold surfaces. Fully struck motifs add considerably to the appeal. Ex: Beverly Hills Signature (Heritage, 11/2014), lot 8964. NGC ID# 26CF, PCGS# 9029

- 5254 1896 Repunched Date, FS-301, MS63 PCGS.** All four digits are repunched north. A lustrous green-gold representative that offers vibrant luster and a solid strike. Luster grazes are scattered but inoffensive. Normal date examples of the issue are also known, and are more prevalent than the present variety. Population: 17 in 63, 2 finer (6/15). NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

**1896 Double Eagle, MS64
Repunched Date**

- 5255 1896 Repunched Date, FS-301, MS64 PCGS.** All four date numerals are boldly recut south. This variety is elusive in Mint State and is rarely seen as fine as the MS64 level. Even as a date, the 1896 twenty is rarely offered finer than the current Choice example. This piece shows a bold strike and vibrant yellow-gold luster. Light grazes on Liberty's cheek preclude a full Gem grade. PCGS lists just six Gems finer (7/15). NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

- 5256 1896-S MS62+ PCGS.** Frosty green-gold surfaces show lighter accents of rose at the centers. The stars and hair strands are sharply struck, and bagmarks from storage and transport are evenly scattered over each side. An attractive Type Three San Francisco double eagle. NGC ID# 26CG, PCGS# 9030

- 5257 1896-S MS62+ PCGS.** This is one of the more collectible S-mint issues from the 1890s. Most Uncirculated coins grade between MS61 and MS62 with green and rose-gold color and myriad bagmarks. Such is the case with this example. The radial lines are crisply defined, as are Liberty's lower hair curls. NGC ID# 26CG, PCGS# 9030

- 5258 1896-S MS63 PCGS.** The 1896-S is typically found with swirling mint frost and medium green and rose-gold color. Such is the case with this Select example. The fields further exhibit a degree of semiprooflike reflectivity, and a touch of softness occurs over the hair curls. Ex: FUN Signature (Heritage, 1/2015), lot 11703. NGC ID# 26CG, PCGS# 9030

5259 1898 MS62 NGC. Compared to its contemporaries, the 1898 double eagle has a small mintage of just 170,300 coins. This frosty example offers attractive green-gold surfaces with glimpses of rose coloration at the interiors. The strike is moderately soft over the portrait, but well-defined overall. NGC ID# 26CK, PCGS# 9033

5260 1898 MS62 NGC. A slightly incomplete strike is evident on this lustrous twenty. However, it is trumped by the exceptional eye appeal generated between the frosty luster and light green and rose-gold surfaces.

Ex: Summer FUN Signature (Heritage, 7/2014), lot 4848. NGC ID# 26CK, PCGS# 9033

5261 1898 MS62 NGC. This attractive Type Three Liberty double eagle exhibits sharply detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces show a scattering of minor contact marks that do little to detract from the outstanding eye appeal. NGC ID# 26CK, PCGS# 9033

5262 1898 MS62 NGC. The bright orange-gold surfaces of this attractive MS62 example show a few scattered minor contact marks, but they tend to blend into the background, behind the vibrant mint luster. Well-detailed design elements add to the considerable eye appeal. NGC ID# 26CK, PCGS# 9033

1898 Twenty Dollar, MS63 Rarely Encountered Finer

5263 1898 MS63 PCGS. Intensely frosted mint bloom is the initial draw on the viewer's eye for this Select Mint State 1898 double eagle, showing original rose-gold centers that transition to green-gold at the margins. The strike is sharp, while grade-consistent abrasions are noted on Liberty's cheek. PCGS has certified only 15 finer representatives (8/15).

Ex: FUN Signature (Heritage, 1/2015), lot 7667. NGC ID# 26CK, PCGS# 9033

1898 Twenty Dollar, Sharp MS63 Frosty Cartwheel Luster

5264 1898 MS63 NGC. This late 19th century double eagle issue is readily accessible through the MS62 level, though Select pieces are elusive, and anything finer is a condition rarity. This MS63 example has characteristically bold design definition on Liberty's head. Frosty luster cartwheels over the yellow-gold surfaces, contributing to the understated, yet undeniable eye appeal. NGC has graded just 23 finer pieces (8/15).

Ex: Houston Signature (Heritage, 12/2010), lot 4674; FUN Signature (Heritage, 1/2015), lot 7668. NGC ID# 26CK, PCGS# 9033

5265 1898-S MS63+ PCGS. An ideal S-mint type representative, this Plus-designated Select coin is one of more than 2.5 million double eagles struck at San Francisco in 1898. Frosty rose and khaki-gold surfaces offer sharp definition over the devices with lightly peppered marks throughout. NGC ID# 26CL, PCGS# 9034

1898-S Double Eagle, MS64+ Intense Mint Luster

5266 1898-S MS64+ PCGS. CAC. This San Francisco issue is available in MS64, but is seldom seen finer. This Plus-graded example is boldly struck and yields intense, frosty mint luster. There are a few trivial grazes detected with a loupe, but the overall quality is nearly Gem. Remarkably few MS64 examples of this issue have been awarded a Plus designation. NGC ID# 26CL, PCGS# 9034

5267 1899 MS63+ PCGS. Green-gold color dominates this high-end Select double eagle, while glints of peach and rose appear sporadically. Coruscating luster shimmers over surfaces that feature fully defined design elements and minimally scattered marks for the grade, notably on the reverse. NGC ID# 26CM, PCGS# 9035

5268 1899 MS63+ NGC. CAC. Thin die cracks travel through the well-struck stars and the moderately incomplete date. Vibrant mint frost issues from orange and lavender-gold surfaces that are undeniably clean for the grade. A lamination occurs above the eagle's right (facing) wing. NGC ID# 26CM, PCGS# 9035

5269 1899-S MS63 NGC. A typical S-mint double eagle, frosty luster issues from light yellow-gold surfaces with tinges of green in the fields. The stars, curls, and feathers show pinpoint detail. Each side is surprisingly smooth with minimal bagmarks.

Ex: New York Signature (Heritage, 10/2014), lot 9221. NGC ID# 26CN, PCGS# 9036

5270 1899-S MS63+ PCGS. CAC. Intense luster cartwheels around each side of this Plus-designated 1899-S double eagle, showcasing sharp design elements and revealing few significant abrasions. This issue's availability begins to decline significantly in finer grades. NGC ID# 26CN, PCGS# 9036

5271 1900 MS64+ PCGS. Examples of the 1900 are readily collectible through Choice condition, but they are scarce with a Plus designation and very scarce in Gem or finer. This piece has abundant mint frost over sharply struck green and peach-gold surfaces. Marks are confined mainly to the left obverse field. NGC ID# 26CP, PCGS# 9037

5272 1901 MS64 NGC. A relatively small run of 111,430 double eagles was accomplished at Philadelphia in 1901. This near-Gem has rich orange-gold color, needle-sharp definition, and glowing luster. Light chatter in the fields is expected. NGC ID# 26CS, PCGS# 9039

5273 1901 MS64+ PCGS. Suitable for a 20th century type set, this near-Gem 1901 Liberty double eagle boasts sharp detail and satiny rose-gold luster. A few light, scattered abrasions limit the grade, but none are singularly obvious. NGC ID# 26CS, PCGS# 9039

1901-S Double Eagle, Vibrant MS63

5274 1901-S MS63 PCGS. The 1901-S Liberty double eagle has often surfaced in European holdings in recent years, making the issue reasonably available in lower Mint State grades, but high-grade specimens remain elusive. This attractive Select example displays well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster. NGC ID# 26CT, PCGS# 9040

5275 1902 AU58 NGC. A lightly abraded Near-Mint example of this popular date. Just the faintest trace of friction shows on the high points of the sharply detailed design elements and the pleasing peach-gold surfaces retain almost all of their original mint luster. NGC ID# 26CU, PCGS# 9041

5276 1903-S MS63 NGC. This is an excellent representative for the collector in search of a fully struck San Francisco Type Three double eagle. Light yellow-gold surfaces show occasional green overtones, and frosty mint luster radiates over each minimally abraded side. NGC ID# 26CX, PCGS# 9044

1903-S Twenty, Appealing MS64 Blazing Luster

5277 1903-S MS64 NGC. Blazing luster, a bold strike, and excellent preservation combine to produce top-notch eye appeal on this near-Gem 1903-S double eagle. A tad less than 1 million of these coins were struck in 1903 San Francisco, but the mintage would be subsumed by the huge numbers of 1904-dated S- and P-mint twenties. NGC shows only 22 in finer grades (8/15). NGC ID# 26CX, PCGS# 9044

5278 1904 MS64+ PCGS. The 1907 is the leading issue among Liberty Head twenties for type representation because of its high mintage and survival rate. This near-Gem offers full strike definition and frosty luster over radiant peach-gold surfaces. Unimportant grazes barely prevent a Gem assessment, but they do not affect the eye appeal. NGC ID# 26CY, PCGS# 9045

1904 Double Eagle, MS65 An Ideal Type Coin

5279 1904 MS65 PCGS. The 1904 double eagle is popular among type collectors and gold investors, both of whom prefer Gem or better quality. This MS65 coin is free of bothersome abrasions and displays radiant orange-gold luster such as is a hallmark of the issue. Finer examples become elusive and proportionately expensive. NGC ID# 26CY, PCGS# 9045

1904 Twenty Dollar, MS65+ Vibrant, Original Luster

5280 1904 MS65+ NGC. The 1904 is the go-to date in the Liberty double eagle series when seeking a 20th century type coin, as it is readily available through the Gem level. This piece boasts the added distinction of a Plus designation, and the corresponding surface quality is outstanding. The strike is sharp and the frosty surfaces exhibit vivid orange and yellow-gold hues, swirling over each side. NGC ID# 26CY, PCGS# 9045

1904-S Double Eagle, Fully Struck Gem Extremely Rare Any Finer

5281 1904-S MS65 PCGS. Unlike its Philadelphia cousin, the 1904-S is scarce in Gem condition, and finer representatives are extremely rare. The strike is predictably bold with full detail on the hair, stars, and feathers. Frosty luster blankets light peach-gold surfaces. Each side shows a number of tiny bagmarks, but none of them are individually obtrusive. There are only six finer examples recorded at PCGS (8/15). NGC ID# 26CZ, PCGS# 9046

1905 Double Eagle, MS62
Low-Mintage Philadelphia Twenty

- 5282 1905 MS62 NGC.** The huge double eagle mintage in 1904 (more than 6.2 million coins) was followed by a tiny mintage of just 58,900 pieces in 1905, making the issue an absolute scarcity in all Mint State grades. Only small abrasions mark the attractive, sun-gold surfaces of this lustrous example. A sharply struck twenty, with a small orange alloy mark near star 10 but no real distractions for the grade. NGC reports just 19 numerically finer pieces (7/15). NGC ID# 26D2, PCGS# 9047

1905-S Double Eagle, MS63
Surprisingly Elusive in High Grade

- 5283 1905-S MS63 NGC.** Although the 1905-S Liberty double eagle claims a mintage of 1.8 million pieces, the issue is much more difficult to locate in high grade than that large production total suggests. This attractive Select example exhibits sharply detailed design elements and vibrant mint luster, with scattered minor contact marks that account for the grade.
Ex: *Long Beach Signature* (Heritage, 1-2/2015), lot 4353. NGC ID# 26D3, PCGS# 9048

1905-S Double Eagle, Appealing MS63

- 5284 1905-S MS63 PCGS.** Despite a mintage in excess of 1.8 million coins, the 1905-S double eagle becomes increasingly elusive in higher Mint State grades, and is decidedly rare at the Gem level. This sharply struck Select piece shows frosty orange-gold surfaces with light, scattered abrasions that contribute to the grade.
Ex: *Houston Signature* (Heritage, 12/2014), lot 4842. NGC ID# 26D3, PCGS# 9048

1906 Liberty Twenty, MS62
Scarce, Sharp Appeal

- 5285 1906 MS62 NGC.** The 1902, 1905, and 1906 issues form a scarce, often-overlooked trio in the Liberty Head double eagle series. This 1906 is a particularly appealing example for the MS62 grade. Medium green-gold surfaces display frosty mint luster and only scattered minor abrasions. A small double reeding mark on the chin is the sole mark of any consequence. The strike is bold for the issue — one of just 69,500 pieces minted. NGC ID# 26D4, PCGS# 9049

- 5286 1906-S MS63+ PCGS Secure.** Vibrant, frosty mint luster cartwheels over each side of this Plus-designated MS63 example, illuminating hues of honey and yellow-gold. There are a few minor abrasions on Liberty's cheek but none of singular importance. The strike is a trifle soft on the high points of the devices. NGC ID# 26F6, PCGS# 9051

- 5287 1907 MS63+ PCGS.** James B. Longacre's Liberty Head design was finally retired in 1907, having graced the double eagle for 57 years. This is an impressive final-year example with frosty lemon and green-gold surfaces. Sharply struck, as usual, and appropriate for type purposes. NGC ID# 26D7, PCGS# 9052

- 5288 1907 MS64 NGC.** The well-preserved peach-gold surfaces of this attractive Choice example show only a few minor contact marks. Vibrant mint luster and sharply detailed design elements occur throughout. NGC has graded 19 finer examples (8/15).
Ex: *Long Beach Signature* (Heritage, 1-2/2015), lot 4354. NGC ID# 26D7, PCGS# 9052

- 5289 1907-S MS63 NGC.** The 1907-S double eagle claims a mintage of more than 2 million pieces, but most survivors exhibit extensive bagmarks from rough storage. This attractive example is sharply detailed and highly lustrous with pleasing peach-gold surfaces that show only minor signs of contact.
Ex: *Summer FUN Signature* (Heritage, 7/2014), lot 4873. NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

- 5290 1908 No Motto MS65 PCGS.** Short Rays Obverse. A beautifully preserved peach-gold Gem of this shortly issued design subtype. The strike is good aside from the customary softness on the eagle's leg feathers. Housed in a green label holder. NGC ID# 26F6, PCGS# 9142

- 5291 1908 No Motto MS65 PCGS.** Short Rays Obverse. Luster dominates the nicely struck peach-gold surfaces of this Saint-Gaudens type coin. The third party grade is limited solely by a pair of brief marks below the branch stem. NGC ID# 26F6, PCGS# 9142

- 5292 1908 No Motto MS66 NGC.** This is an exceptionally preserved No Motto type coin, showing frosty rose-gold luster with hints of lilac and honey color throughout. A sharp strike includes complete delineation of the fingers on Liberty's torch hand. Finer examples are seldom seen. NGC ID# 26F6, PCGS# 9142

- 5293 1908 No Motto MS66 PCGS.** Short Rays obverse. An apricot-gold example with lime-green undertones near the rims. Lustrous and well struck with an unabraded reverse and a couple of moderate obverse fields marks. NGC ID# 26F6, PCGS# 9142

5294 1908 No Motto, Wells Fargo Nevada, MS65 PCGS. Short Rays Obverse. A lustrous peach-gold example of the famous No Motto holding. The strike is crisp except on Liberty's nose. Minor marks are distributed. Certified in a green label holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

5295 1908 No Motto, Wells Fargo Nevada, MS65 PCGS. Short Rays obverse. A beautiful apricot-gold Gem representative of the famous Wells Fargo hoard, distributed in the late 1990s. The lustrous surfaces are well struck except for the usual blending on the eagle's leg plumage. Housed in a green label holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

5296 1908 No Motto, Wells Fargo Nevada, MS65 PCGS. Short Rays Obverse. Both the quality and quantity of the Wells Fargo holdings astounded numismatists during the late 1990s, when the hoard emerged from bank vaults. The present peach-gold Gem is remarkably unabraded for the MS65 level, although a speck or two of struck-in grease is noted on the eagle's plumage. Certified in a green label holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1908 With Motto Twenty, Near-Gem

5297 1908 Motto MS64 PCGS. This satiny olive-gold near-Gem is well-struck except for the torch fingers and the lips, which rarely have full detail on this issue. The fields are refreshingly smooth, and minor contact on the clothing is of little concern. Significantly scarcer than the No Motto, which apparently was hoarded as an ephemeral type.
Ex: Dallas Signature (Heritage, 11/2006), lot 2766. NGC ID# BNAK, PCGS# 9147

5298 1908-D Motto MS64 PCGS. Fully struck with light lemon-gold coloration, this first-year With Motto representative (one of 349,500 coins struck) is suitable for inclusion in a quality type set. Marks are surprisingly scant for an example in this grade, adding the to already strong aesthetic appeal. Scarcely seen finer. NGC ID# 26F9, PCGS# 9148

5299 1909/8 AU55 PCGS. FS-301. A sun-gold representative of the sole overdate of the Saint-Gaudens series. Both sides display moderate abrasions appropriate for a sojourn in circulation. First reported by Edgar H. Adams soon after issue, the variety was neglected for decades afterward, although the first edition of the *Guide Book* reports the error. NGC ID# 26FC, PCGS# 9151

5300 1909/8 AU58 PCGS. FS-301. A crystal-clear hubbed overdate, the only such anomaly in the Saint-Gaudens series and eternally popular with collectors for that reason. This frosty, yellow-gold near-Mint example retains nearly all of its mint luster over lightly textured surfaces. A few light abrasions and a flat spot on Liberty's raised knee define the assigned grade. NGC ID# 26FC, PCGS# 9151

5301 1909 MS62 PCGS. CAC. This is the scarce Normal Date variety with brilliant green—gold surfaces, scattered marks, and sharp design motifs. An attractive example of an elusive issue. NGC ID# 26FC, PCGS# 9150

5302 1909 MS63 PCGS. A strongly struck and highly lustrous Saint-Gaudens twenty, each side features pleasing orange and khaki-gold color with glimpses of lilac. The 1909 was heavily exported, and repatriated coins are often extensively bagmarked from rough transport. Scarcely seen finer. NGC ID# 26FC, PCGS# 9150

1909-D Double Eagle, AU58

Still-Lustrous Surfaces

5303 1909-D AU58 PCGS. CAC. The 1909-D Saint-Gaudens double eagle is a slightly better date, boasting a low mintage of only 52,500 coins. This Borderline Uncirculated representative possesses sharp detail with just a brush of friction over the Liberty's knee and breasts, as well as the upper edge of eagle's wing. Lustrous and honey-gold in color. NGC ID# 26FD, PCGS# 9152

5304 1909-S MS64 PCGS. The 1909-S is a popular issue for type representation because of its availability through MS64, bold strike characteristics, and vibrant luster. The latter attributes easily apply to this near-Gem. Splendid rose-gold surfaces are devoid of any singular impairments. NGC ID# 26FE, PCGS# 9153

5305 1909-S MS64 NGC. Available through MS64, the 1909-S Saint-Gaudens double eagle becomes conditionally scarce in Gem condition. Thickly frosted khaki-gold surfaces show minimal bagmarks in the fields, and the only singular impairment is a small rim nick right of the eagle's upper wing feathers. Sharply defined. NGC ID# 26FE, PCGS# 9153

1909-S Twenty Dollar, Frosty MS65

5306 1909-S MS65 PCGS. This frosty Saint offers lustrous yellow-gold surfaces and sharp design elements. It is an available issue but seldom found in Gem quality, and rarely seen finer. PCGS has only encapsulated 12 at the Premium Gem and Superb Gem levels (8/15).
Ex: Palm Beach Signature (Heritage, 3/2005), lot 7436. NGC ID# 26FE, PCGS# 9153

5307 1910 MS64 PCGS. This collectible Saint-Gaudens twenty has coruscating luster over attractive rose and orange-gold surfaces. The torch hand shows bold finger separation, the columns on the Capitol are distinct, and the remaining motifs exhibit equally sharp detail. Both sides are void of any singular abrasions. NGC ID# 26FF, PCGS# 9154

5308 1910-D MS64+ PCGS. CAC. A blend of medium orange and rose-gold tones colors this high-end near-Gem. The strike is as bold as the eye appeal is strong, and scattered marks are entirely undistracting. In 1910, the Denver Mint struck 429,000 double eagles. Representatives are available through MS65, but the issue becomes conditionally elusive in higher grades. NGC ID# 26FG, PCGS# 9155

- 5309 1910-S MS64+ PCGS. CAC.** A notable melt rarity, the surviving population of this San Francisco double eagle has increased somewhat thanks to foreign sources, but the back-and-forth across continents and oceans yielded relatively few high-grade coins. This example either was fortunate, or it never left U.S. shores in the first place. Attractive, minimally marked surfaces are sharp and high-end for the grade. The frosty, sun-gold color provides great eye appeal. NGC ID# 26FH, PCGS# 9156
- 5310 1911-D MS65 PCGS.** This Gem 1911-D double eagle exhibits rich, satiny luster in deep orange-gold hues, with few abrasions in evidence. The sharp strike includes delineation of the fingers on Liberty's torch hand, and intricate detail in the eagle's feathers. NGC ID# 26FK, PCGS# 9158
- 5311 1911-D MS65+ NGC. CAC.** Examples from this Denver issue usually come well-struck with glowing luster, and this high-end Gem delivers on both those fronts. Light orange-gold coloration adds to the compelling CAC-recognized eye appeal. Each side is free of any singular marks. NGC ID# 26FK, PCGS# 9158
- 5312 1911-D MS66 PCGS.** The vivid orange-gold surfaces of this amazing Premium Gem display a few hints of red, with vibrant mint luster on both sides and no mentionable distractions. The design elements are well-detailed and PCGS has graded only seven numerically finer examples (8/15). NGC ID# 26FK, PCGS# 9158
- 5313 1911-D/D FS-501 MS64+ PCGS.** The mintmark is blatantly repunched due east. A popular variety, relatively available in Uncirculated grades. This lustrous apricot-gold near-Gem is nicely struck and has a well preserved reverse. The obverse is also smooth despite infrequent minor field marks. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158
- 5314 1911-D/D FS-501 MS64 PCGS. CAC.** The Denver mintmark is obviously repunched directly east. A coruscating and well struck apricot-gold representative. Careful inspection is required to locate the few grade-limiting marks. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158
- 5315 1911-S MS64 PCGS.** Wheat-gold color with accents of rose centrally give this Choice Saint-Gaudens twenty wonderful aesthetic appeal. Swirling mint frost, typical of the San Francisco facility, and a minimal number of scattered ticks heighten the visual quality. NGC ID# 26FL, PCGS# 9159
- 5316 1911-S MS64 NGC.** Vibrant luster enlivens each side of this minimally abraded, honey-gold representative. Struck from well-worn dies, as evidenced by faint metal flow lines in the recesses, but nonetheless exhibiting sharp design definition.
Ex: New York Signature (Heritage, 10/2014), lot 1210. NGC ID# 26FL, PCGS# 9159
- 5317 1911-S MS64 NGC.** A lovely and lustrous orange-gold Choice double eagle. The obverse is impressively free from bagmarks, while the reverse has a smattering of unimportant contact. Certified in a prior generation holder. NGC ID# 26FL, PCGS# 9159

1912 Twenty Dollar, MS64 Seldom Seen Finer

- 5318 1912 MS64 PCGS.** The Philadelphia issue is the only Saint-Gaudens double eagle from the year 1912, essential for a complete date set. This Choice Mint State example is among the finest typically offered, as Gem examples are rare. This piece shows a bold strike and satiny green-gold luster. A few light abrasions are of little distraction. PCGS lists 42 finer submissions (7/15). NGC ID# 26FM, PCGS# 9160
- 5319 1913-D MS63 PCGS.** Mixed orange and lavender-gold hues appear over each side, combining with satiny luster. Minor strike softness occurs over the Capitol dome and leaves. The reverse is remarkably clean, while the obverse shows small scattered marks and a notable flaw in the left field above the rays. NGC ID# 26FP, PCGS# 9162
- 5320 1913-D MS64 NGC.** The pleasing orange-gold surfaces of this attractive Choice example show a few highlights of green, with vibrant mint luster and few signs of contact. The design elements are sharply detailed and eye appeal is quite strong. NGC ID# 26FP, PCGS# 9162
- 5321 1914 MS62 PCGS.** The 1914 Saint-Gaudens double eagle is a lower-mintage date, struck to the extent of just 95,250 pieces. This Uncirculated coin shows a bold strike, with vibrant orange-gold luster. Light, scattered abrasions are as expected for the grade. NGC ID# 26FS, PCGS# 9164
- 5322 1914-D MS64 PCGS. CAC.** A near-Gem example with the green CAC endorsement. This lustrous and well-produced Denver Mint twenty is smooth and attractive, with medium-gold coloration and faint rose overtones. The central motifs are sharply struck with great eye appeal. NGC ID# 26FT, PCGS# 9165
- 5323 1914-S MS65 NGC.** The 1914-S is an available date through the Gem grade level, but finer pieces are scarce. This MS65 example shows a crisp strike and vibrant orange-gold luster. Some minor die erosion appears around the extreme outer peripheries. NGC ID# 82KA, PCGS# 9166
- 5324 1915 MS63 NGC.** Compared to its San Francisco counterpart, the 1915 Saint-Gaudens double eagle is elusive in pleasing Mint State condition. This Select example is well-struck, with vibrant orange-gold luster and minimal abrasions. A single tiny alloy spot appears near the obverse rim at 8 o'clock. NGC ID# 26FV, PCGS# 9167
- 5325 1915 MS63+ PCGS.** The Philadelphia Mint maintained its rigorous quality standards in 1915, with most coins showing crisp strike definition and frosty luster. This MS63+ coin is typical in those respects. The surfaces display yellow-gold color with glints of green and rose. Light chatter over each side is undistracting. NGC ID# 26FV, PCGS# 9167
- 5326 1922 MS64 PCGS. CAC.** This is an available issue overall, although it is curiously overlooked for type purposes. The present MS64 example displays bold design definition and frosty wheat-gold luster. A few light, scattered ticks determine the grade. NGC ID# 26G3, PCGS# 9173

**1922 Saint-Gaudens Twenty, MS65
Vibrant, Multihued Patina**

- 5327 1922 MS65 PCGS.** Although Gem examples of this issue are seen with moderate frequency, finer pieces are prohibitively rare. This coin is boldly struck and frosty. A beautiful array of orange, peach, mint, and lilac-gold hues blanket the luminous surfaces, causing a few trivial ticks to be nearly forgotten. PCGS lists only eight coins finer (8/15). NGC ID# 26G3, PCGS# 9173

**1923 Twenty Dollar, MS65
Extremely Rare Any Finer**

- 5328 1923 MS65 PCGS.** The vast majority of Mint State 1923 double eagles grade MS64 or lower. This Gem is scarce by comparison, and finer coins are almost uncollectible. This piece shows a well-executed strike with frosty luster and just a few small ticks. Orange and peach-gold hues show tinges of lilac and mint-green throughout each side. PCGS lists only three coins finer (8/15). NGC ID# 26G5, PCGS# 9175

**1923 Saint-Gaudens Twenty, MS65
Only Three Coins Certified Finer**

- 5329 1923 MS65 PCGS.** The eagle's feathers and Liberty's fingers are sharply defined on this satiny Gem 1923 double eagle, while the well-preserved surfaces exhibit soft wheat-gold hues. This is essentially the finest grade most collectors will have the chance to acquire. PCGS lists only three MS66 coins finer, and NGC shows none (8/15). NGC ID# 26G5, PCGS# 9175

1923 Double Eagle, Frosty Gem

- 5330 1923 MS65 PCGS.** The 1923 double eagle is elusive in MS65 compared to coins in Choice condition, but the true appeal of this grade comes from the fact that finer examples are virtually uncollectible. PCGS and NGC combined report only three Premium Gems finer (8/15). This coin is well-struck, with frosty orange-gold luster. NGC ID# 26G5, PCGS# 9175

1923 Twenty, Lustrous MS65

- 5331 1923 MS65 PCGS.** The 1923 is a popular P-mint from the 1920s and is generally available in Gem condition but it is almost non-existent any finer (only three PCGS coins are finer, none at NGC). This is an evenly toned coin with lovely rose-colored patina and glowing mint luster. The surfaces are remarkably free from any abrasions that could be considered distracting. NGC ID# 26G5, PCGS# 9175

-
- 5332 1924 MS65+ PCGS. CAC.** Although plentiful, the 1924 double eagle is often lacking in regards to vibrant luster. This high-end Gem is a notable exception. The strike is sharp and each side displays cartwheeling wheat-gold luster that is uninterrupted by surface abrasions. NGC ID# 26G7, PCGS# 9177

- 5333 1924 MS66 NGC.** A beautiful peach-gold Saint-Gaudens type coin. Although more than a half-million pieces have been certified, most are much more bagmarked than the present exceptional example. Housed in a former generation holder. NGC ID# 26G7, PCGS# 9177

- 5334 1924 MS66 NGC. Ex: Hilt Collection.** Boasting an ideal balance of affordability and quality, this Premium Gem 1924 double eagle is hard to beat for type purposes. The strike is sharp and the surfaces showcase frosty wheat-gold luster. NGC ID# 26G7, PCGS# 9177

- 5335 1924 MS66+ NGC.** A radiant Premium Gem example of the go-to date for type purposes. This Plus-designated Saint-Gaudens double eagle shows a bold strike and frosty wheat-gold luster. A small mark on Liberty's knee is the only surface flaw of note. NGC ID# 26G7, PCGS# 9177

- 5336 1925 MS65 PCGS.** The 1925 is a plentiful issue in most grades, suitable for type representation. This Gem example is boldly struck, with frosty peach-gold luster that displays hints of deeper rose throughout. Trivial contact on the high points of Liberty's figure is all that precludes an even finer grade. NGC ID# 26GA, PCGS# 9180

5337 1925 MS65 PCGS. The highly lustrous surfaces are beautifully toned in orange, mint-green, lilac, and rose, and the design elements are crisply impressed. A squiggly scratch is visible on the upper reverse. The 1925 is one of the more available P-mint twenties from the 1920s, and the rich color will certainly make this a popular and heavily contested item. NGC ID# 26GA, PCGS# 9180

5338 1925 MS66 PCGS. A delightful Premium Gem, with well-detailed design elements and vibrant mint luster throughout. The vivid orange-gold surfaces are virtually pristine and eye appeal is outstanding. PCGS has graded seven numerically finer examples (8/15). NGC ID# 26GA, PCGS# 9180

5339 1927 MS66 PCGS. CAC. A finely textured, frosty and lustrous Premium Gem Saint-Gaudens twenty, with brilliant sun-gold luster and a sharp strike through the centers. More than five thousand pieces have achieved this MS66 level, yet a mere 15 examples are graded numerically finer by PCGS (8/15). The CAC endorsement edges this coin up among the many contenders. NGC ID# 26GG, PCGS# 9186

TERRITORIAL GOLD

5340 (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge — Bent — Genuine PCGS. AU Details. K-24, R.3. A diagonal bend is apparent between the first A and N in CAROLINA. The same bend affects the reverse between the C and R in BECHTLER. The obverse border has laminations (as made) at 5 and 10 o'clock. A sharp caramel-gold example with minimal marks and little actual wear. Listed on page 382 of the 2016 *Guide Book*.

CALIFORNIA FRACTIONAL GOLD

5341 1855 Liberty Octagonal 1 Dollar, BG-533, Low R.4, MS63 PCGS. A sharply struck, minimally abraded, and mildly subdued caramel-gold example. Struck from lightly rusted dies. A majority of survivors are in circulated grades, and only a single coin is certified finer by either service. Population: 6 in 63, 1 finer (8/15). NGC ID# 2BLY, PCGS# 10510

1870 Round Liberty Quarter, MS67+ BG-808, Tied for Finest Certified

5342 1870 Liberty Round 25 Cents, BG-808, R.3, MS67+ PCGS. A highly lustrous and well struck sun-gold Superb Gem. A Frontier & Co. variety featuring the large, crude Liberty head associated with the various Pierre Frontier firms. Pristine aside from a delicate graze on the left obverse field. Population: 6 in 67 (2 in 67+), 0 finer (8/15). NGC ID# 2BSW, PCGS# 10669

1872/1 Indian Round Quarter Dollar BG-868, MS67 Prooflike

5343 1872/1 Indian Round 25 Cents, BG-868, High R.4, MS67 Prooflike NGC. Deep mirrors and frosty devices give this spectacular Superb Gem the cameo contrast for which NGC has awarded a Prooflike designation. Closer inspection reveals unsurpassed preservation and bold detail on the feathers, hair strands, and wreath leaves. A very scarce factional gold overdate variety. Census: 2 in 67 Prooflike, 0 finer (8/15). NGC ID# 28YP, PCGS# 710729

1859 Liberty Octagonal Half Dollar MS66 Prooflike, BG-901 Single Finest Certified

5344 1859 Liberty Octagonal 50 Cents, BG-901, High R.6, MS66 Prooflike NGC. As of (8/15), the present example of BG-901 is the single finest certified by either leading service. The mirrored apricot-gold surfaces are devoid of distractions. Breen-Gillio Die State II with low relief portions of the portrait absent, due to a lapped obverse die. The maker was San Francisco jewelry firm Frontier, Deviercy & Co. NGC ID# 2BVV, PCGS# 710759

1859 Liberty Octagonal Half Dollar BG-902, Superb Gem

5345 1859 Liberty Octagonal 50 Cents, BG-902, Low R.4, MS67 NGC. A pristine peach-gold Superb Gem that boasts flashy semiprooflike fields and a sharp strike. Frontier, Deviercy & Co. was the issuer. As of (8/15), the single highest-graded example from either leading service. NGC has yet to certify any pieces as either Prooflike or Deep Prooflike. NGC ID# 2BVW, PCGS# 10760

- 5346** 1871 Liberty Octagonal 50 Cents, BG-926, High R.6, MS63 NGC. A flashy and attractive lemon and sun-gold octagonal half. The strike shows occasional blending. BG-926 manufacture was by the Levison Brothers, who struck California fractional gold only during 1871. As of (7/15), NGC has certified only four examples in all grades. NGC ID# 2BWR, PCGS# 10784

**1882 Octagonal Indian Half, MS64
Very Rare BG-966**

- 5347** 1882 Indian Octagonal 50 Cents, BG-966, High R.7, MS64 PCGS. An unabraded olive-gold example of this rare Breen-Gillio variety. The dies are rotated and moderately clashed. The strike is good despite softness on the left-side stars. Made by Nast, Greenzweig & Co., a leading San Francisco jeweler during 1882. Population: 3 in 64, 0 finer (8/15). NGC ID# 2BY9, PCGS# 10824

- 5348** 1864 Liberty Round 50 Cents, BG-1016, R.4, MS64 Prooflike NGC. Jet-black fields encompass rich yellow-gold devices, accounting for the Prooflike designation. The central strike definition is strong with softness over the stars and wreath elements. A few wispy marks appear over each side. Census: 3 in 64 Prooflike, 0 finer (8/15). NGC ID# 2BYS, PCGS# 710845 Base PCGS# 10845

- 5349** 1876 Indian Round 50 Cents, BG-1038, R.4, MS65 Prooflike NGC. A honey-gold Gem with mirrored fields and a good strike. Only stars 3 through 5 lack a full impression. As of (8/15), tied with one other example as the finest certified at either service.
Ex: FUN Signature (Heritage, 1/2007), lot 6827; St. Louis Central States Signature (Heritage, 5/2007), lot 5492, which realized \$1,150. NGC ID# 2BZK, PCGS# 710867

- 5350** 1871 Liberty Octagonal 1 Dollar, BG-1104, High R.4, MS64 PCGS. A nicely struck and moderately mirrored near-Gem of this scarce octagonal dollar variety. The surfaces are unblemished and attractive. A Frontier & Co. design that loosely mimics the Federal Type One gold dollar. Population: 9 in 64, 3 finer (8/15). NGC ID# 2C33, PCGS# 10915

- 5351** 1875 Indian Octagonal 1 Dollar, BG-1127, R.4, MS63 PCGS. The flashy peach-gold fields are free from detractors. The centers show slight blending of impression. Period Two octagonal dollars are scarcer than their quarter dollar and half dollar counterparts. Population: 14 in 63, 13 finer (8/15). NGC ID# 2C3V, PCGS# 10938

- 5352** 1876/5 Indian Octagonal 1 Dollar, BG-1129, R.4, MS63 PCGS. A collectible example of this scarce Period Two octagonal gold dollar variety, struck by Christopher Ferdinand Mohrig of San Francisco. The wreath is moderately well-detailed, but much of the remaining design elements show the usual weakness. Prooflike fields produce a cameo effect on the obverse. Yellow-gold in the fields with deeper violet hues over some of the relief elements. Population: 17 in 63, 15 finer (7/15). NGC ID# 2C3X, PCGS# 10940

COMMEMORATIVE SILVER

- 5353** 1893 Isabella Quarter MS65 PCGS. CAC. Original high-grade survivors from this Columbian Exposition issue typically feature either multicolor pastel hues or mottled golden-tan patina, and this Gem is in the latter category. Softly frosted luster enlivens each side, and the strike is bold throughout. A splendid all-around example. NGC ID# BYJ9, PCGS# 9220

**1893 Isabella Quarter, MS66
Comprehensive Multicolor Toning**

- 5354** 1893 Isabella Quarter MS66 NGC. Aquamarine, rose-red, and apricot-gold toning graces this lustrous and fully struck representative. The fields and Queen Isabella's cheek display unobtrusive contact. Among the few commemorative types to depict a foreign monarch. Encapsulated in a former generation holder. NGC ID# BYJ9, PCGS# 9220

- 5355** 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B. An affordable, yet, sharply detailed example of this first commemorative silver dollar. Both sides show satiny luster beneath a blanket of olive-gray toning. A few minor abrasions are undetectable to the naked eye. NGC ID# BYKW, PCGS# 9222

- 5356** 1900 Lafayette Dollar MS63 PCGS. DuVall 2-C. Dusky caramel-gold toning encompasses this lustrous and well struck Select commemorative. The fields are essentially unabraded, although a trace of struck-in grease on Washington's jaw is accompanied by faint hairlines. NGC ID# BYKW, PCGS# 9222

- 5357** 1900 Lafayette Dollar MS63 PCGS. DuVall 3-D. A scarcer die pair with the lowest leaf on the thin-stemmed olive branch hovering over the 9 in the date. Cartwheel luster sweeps crisply struck and lightly toned chestnut-gold and silver-gray surfaces. Unobtrusive marks on the dual portraits decide the grade.
Ex: New York Signature (Heritage, 12/2011), lot 4163, which realized \$1,380. NGC ID# BYKW, PCGS# 9222

- 5358** 1900 Lafayette Dollar MS63 PCGS. CAC. DuVall 1-B. Tan-gold and stone-gray toning embraces this satiny and refreshingly unabraded representative. The strike is bold, and the eye appeal surpasses its numerical assessment. NGC ID# BYKW, PCGS# 9222

- 5359** 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C. The borders display a hint of straw-gold toning, but this lustrous Choice silver dollar is predominantly brilliant. Well struck and impressively unabraded. As nice as can be obtained in the designated grade. NGC ID# BYKW, PCGS# 9222

**1900 Lafayette Dollar, MS64+
Faintly Toned**

- 5360 1900 Lafayette Dollar MS64+ PCGS. DuVall 2-C.** An available variety in a near-Gem grade, with strong, satiny luster that shows just a blush of light golden toning. The design elements are well-defined and grade-determining abrasions are limited in scope and severity. The Lafayette dollar is the sole silver dollar in the classic commemorative series, appealing to a variety of collecting pursuits. NGC ID# BYKW, PCGS# 9222

- 5361 1921 Alabama 2x2 MS65 PCGS. CAC.** A spectacular Gem, with well-detailed design elements and vibrant mint luster on both sides. The well-preserved, mostly brilliant surfaces show hints of pale gold and lavender toning. NGC ID# BYJV, PCGS# 9225

- 5362 1936 Albany MS67+ PCGS. CAC.** This delightful MS67+ specimen exhibits well-detailed design elements and vibrant mint luster throughout, with highlights of greenish-gold and amber toning. The surfaces show no mentionable distractions and eye appeal is outstanding. PCGS has graded two numerically finer examples (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# 26MK, PCGS# 9227

**1937 Battle of Antietam Half Dollar
Splendid MS67+**

- 5363 1937 Antietam MS67+ PCGS. CAC.** Outstanding eye appeal and brilliant frosty luster are the calling cards of this album-toned Antietam half. Rainbow shades surround the silver centers, with flashy copper-gold and lemon-yellow highlights. A glass reveals a microscopic mark on McClellan's chin, but the smooth surfaces are for all purposes pristine and well-struck. Population: 13 in 67+, 17 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYF4, PCGS# 9229

- 5364 1935-D Arkansas MS67 PCGS.** The glowing, frosty luster of this Superb Gem 1935-D Arkansas Centennial half dollar is immediately apparent, giving this coin eye appeal superior to that of many of its comparably graded counterparts. The strike is sharp and the delicately preserved surfaces show just a hint of iridescent toning. Population: 53 in 67 (7 in 67+), 1 finer (7/15). NGC ID# BYF6, PCGS# 9234

- 5365 1935-D Arkansas MS67+ PCGS. CAC.** A few hints of greenish-gold and amber toning visit the peripheries of this high-end Superb Gem, with well-detailed design elements and satiny mint luster throughout. No mentionable distractions are evident. Population: 53 in 67 (7 in 67+), 1 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYF6, PCGS# 9234

- 5366 1937-S Arkansas MS66 PCGS Secure. CAC.** Dusky shades of lavender, gray, greenish-gold, and amber toning visit the well-preserved surfaces of this impressive Premium Gem, with sharply detailed design elements and satiny mint luster under the patina. Population: 69 in 66 (3 in 66+), 6 finer (8/15). NGC ID# BYFD, PCGS# 9243

- 5367 1939-S Arkansas MS66 PCGS.** This conditionally scarce Premium Gem is sharply struck and free of bothersome abrasions. Both sides are toned in deep olive-gray, lavender-brown, and russet hues, although the reverse shows a dash of mint-green and rose color near the lower-left border. There are 12 Superb Gems finer at PCGS (8/15). NGC ID# BYFL, PCGS# 9251

- 5368 1939-S Arkansas MS66 PCGS.** This Arkansas Centennial half dollar issue is scarce in Premium Gem condition, and finer pieces are rare. This coin displays a bold strike, with soft champagne-gold toning. The surfaces are notably well-preserved. PCGS lists 12 Superb Gems finer (8/15). NGC ID# BYFL, PCGS# 9251

**1936-S Bay Bridge Half, MS67+
High-End for the Issue**

- 5369 1936-S Bay Bridge MS67+ PCGS. CAC.** A sharp strike and rich, iridescent colors enhance the surfaces of this lustrous and frosty Superb Gem. The issue was widely distributed to celebrate the opening of the San Francisco-Oakland Bay Bridge, making it one of the more-available classic commemorative half dollars. Amber-gold and forest-green shades boldly accent the mark-free fields and stylized devices. Population: 13 in 67+, 10 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYFM, PCGS# 9254

- 5370 1935/34 Boone MS67+ PCGS. CAC.** An attractive mix of lavender, gray, and greenish-gold toning highlights the impeccably preserved surfaces of this high-end Superb Gem, with sharply detailed design elements and vibrant mint luster underneath. Population: 55 in 67 (7 in 67+), 2 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# 34SZ, PCGS# 9262

**1935/34-S Boone Half Dollar, MS67
Sharp and Satiny**

- 5371 1935/34-S Boone MS67 PCGS.** After the initial coinage in 1934, the Boone Bicentennial half dollar was again produced in 1935, but the bicentennial date, 1934, was added to the field above PIONEER YEAR. Thus, the issue bears two dates. This Superb Gem is conditionally rare. The strike is bold and the golden-toned surfaces exhibit fine matte-like luster. There are no bothersome abrasions. Population: 18 in 67 (3 in 67+), 2 finer (8/15). NGC ID# BYFW, PCGS# 9264

5372 1936 Bridgeport MS67+ PCGS. CAC. This high-end Superb Gem exhibits impeccably preserved surfaces with vibrant satiny mint luster, under shades of lavender-gray and greenish-gold patina. The design elements are well-detailed eye appeal is outstanding. Population: 79 in 67 (5 in 67+), 0 finer (7/15).
From *The Rolling Thunder 50 Piece Commemorative Collection*. NGC ID# BYG9, PCGS# 9279

5373 1925-S California MS66+ PCGS. CAC. This is a sharp, vibrantly lustrous California Diamond Jubilee half dollar, devoid of bothersome abrasions. The obverse displays a blush of pale champagne toning over much of the interior, while the periphery is toned in vivid violet, blue, and sun-gold hues. The reverse is two-faced, showing an array of multicolor toning on the left side and near-brilliance on the right with a hard olive-brown line separating the two schemes. NGC ID# BYGA, PCGS# 9281

1925-S California Diamond Jubilee Half Plus-Graded Superb Gem

5374 1925-S California MS67+ PCGS. CAC. Mint luster shines brightly beneath an attractive mix of bold and pastel colors that encircle both sides of this high-end Superb Gem California half. Steel-blue and sun-gold toning predominate the coloration, although subtle lilac, pink, and amber hues enliven the margins. The high points are free of marks or friction, while the strike is sharp throughout. More than 86,000 pieces were distributed — a considerable achievement, but less than the lofty goals of the San Francisco Citizens' Committee. Few examples survive so well-preserved. Population: 111 in 67 (5 in 67+), 6 finer (7/15).
From *The Rolling Thunder 50 Piece Commemorative Collection*. NGC ID# BYGA, PCGS# 9281

1925-S California Half Dollar, MS67+ Vivid Multicolor Toning

5375 1925-S California MS67+ NGC. CAC. From a distribution of 86,394 pieces, the 1925-S California half dollar is conditionally rare in grades above the MS67 level. This high-end Superb Gem offers impeccably preserved lustrous surfaces under a blanket of violet and champagne-gold toning. NGC has graded 15 numerically finer examples (8/15). NGC ID# BYGA, PCGS# 9281

1936-D Cincinnati Half Dollar, MS67 Ex: W.P.E. Collection

5376 1936-D Cincinnati MS67 PCGS. CAC. Ex. W.P.E. Collection. A powdering of reddish-gold and sky-blue toning accentuates the pearlescent silver surfaces of this sharply struck Superb Gem Cincinnati. Faint iridescent colors play among the border devices while deep mint luster visits the satiny fields. The entire authorized distribution of 15,000 pieces (5,000 pieces each for P-D-S production plus assay coins) was achieved through sales to investors and collectors, making the 1936 mintage a success for the Cincinnati Music Center. Population: 48 in 67 (6 in 67+), 2 finer (7/15).
From *The Rolling Thunder 50 Piece Commemorative Collection*. NGC ID# BYCL, PCGS# 9284

5377 1936 Cleveland MS67 PCGS. Remarkably well-preserved, this lustrous Cleveland half displays a slight ivory-gold sheen with deeper lavender and blue shades near the borders. Great eye appeal for the issue, which is nearly unavailable any finer. Population: 81 in 67 (9 in 67+), 1 finer (8/15). NGC ID# BYGB, PCGS# 9288

5378 1936 Cleveland MS67 PCGS. CAC. The well-preserved surfaces of this impressive Superb Gem radiate vibrant mint luster and show vivid shades of greenish-gold and lavender-gray toning. The design element are well-detailed, adding to the strong visual appeal. Population: 81 in 67 (9 in 67+), 1 finer (7/15).
From *The Rolling Thunder 50 Piece Commemorative Collection*. NGC ID# BYGB, PCGS# 9288

5379 1936-S Columbia MS67+ PCGS. CAC. The virtually flawless surfaces of this high-end Superb Gem display vibrant mint luster and highlights of greenish-gold, lavender-gray, and magenta toning. The design elements are sharply detailed throughout. PCGS has graded six numerically finer examples (7/15).
From *The Rolling Thunder 50 Piece Commemorative Collection*. NGC ID# 338Z, PCGS# 9293

5380 1936 Columbia PDS Set MS65 PCGS. Gold CAC. The trio are individually housed in identically graded holders bearing consecutive certification numbers and gold CAC seals. A well struck and unmarked cream-gray trio that has likely remained together since its issue nearly 80 years ago. The San Francisco example has glimpses of peripheral tan-brown toning. (Total: 3 coins) NGC ID# BYGE, PCGS# 9294

**1892 Columbian Half Dollar, MS67
Attractive Registry Contender**

- 5381 1892 Columbian MS67 PCGS.** This is a remarkable Columbian half dollar that is near the top of the Condition Census. The central obverse is fully brilliant with frosty luster inside a peripheral frame of orange-gold, yellow, blue, and violet patina. The reverse is entirely toned, primarily displaying cobalt-blue color with iridescent margin toning. Population: 33 in 67 (6 in 67+), 1 finer (8/15).
*Ex: ANA National Money Show (Heritage, 2-3/2014), lot 4344.
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# 254S, PCGS# 9296*

- 5382 1935 Connecticut MS67 PCGS. CAC.** Booming luster and peripheral golden-tan toning confirm the originality of this beautifully preserved Superb Gem. Exceptional quality for this popular state type. Encapsulated in a green label holder. Population: 82 in 67 (8 in 67+), 1 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYGH, PCGS# 9299

**1936 Delaware Tercentenary Half Dollar
High-End Superb Gem**

- 5383 1936 Delaware MS67+ PCGS. CAC.** Beautiful toning adorns the borders of this high grade Delaware Tercentenary half. Apple-green, cherry-red, and orange-gold colors are particularly intense along the left obverse margin. The surfaces are free of all but two or three pinprick marks, and the mint luster circulates freely among the crisp devices. Population: 10 in 67+, 2 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYGJ, PCGS# 9301

- 5384 1936 Elgin MS67+ PCGS. CAC.** The virtually pristine surfaces of this high-end Superb Gem are visited by attractive shades of greenish-gold and lavender toning, with vibrant mint luster underneath. The design elements are well-detailed and eye appeal is outstanding. PCGS has graded seven numerically finer examples (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# 339B, PCGS# 9303

**1936 Gettysburg Half Dollar, MS67
Rare Any Finer**

- 5385 1936 Gettysburg MS67 PCGS. CAC.** Many Gettysburg Anniversary halves survive from a distribution of 26,928 pieces, but few achieve preferred Superb Gem status with attractive eye appeal. This example displays pleasing satin luster enhanced by an overall gold patina that is strongest at the margins. CAC endorsement confirms the quality. Just five pieces are graded numerically finer at PCGS and NGC combined. NGC ID# BYGM, PCGS# 9305

**1936 Gettysburg Anniversary Half Dollar
MS67+, Outstanding Quality and Appeal**

- 5386 1936 Gettysburg MS67+ PCGS. CAC.** A distribution of 26,928 pieces was disappointing, but hardly unexpected given the onslaught of commemorative halves issued in 1936. Celebrating the "Blue and Gray Reunion," the uniformed portraits of unnamed Union and Confederate soldiers dominate the obverse, while the reverse depicts Union and Confederate shields separated by a fasces. Ruby-red, olive-green, and lilac toning enhances the lustrous silver surfaces of this high-quality Superb Gem half. Population: 8 in 67+, 2 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYGM, PCGS# 9305

**1922 Grant No Star Half, MS67
Tied for PCGS Finest**

- 5387 1922 Grant No Star MS67 PCGS. CAC.** *Ex: W.P.E. Collection.* Despite a mintage more than 13 times that of the With Star variety, the No Star Grant half is comparably rare in the highest grades. This exceptional example is tied for the numerical finest at PCGS, with light-blue and golden-gray toning that appears sparingly over lively, bright silver surfaces. A sharply struck Superb Gem, with CAC endorsement. Population: 48 in 67 (2 in 67+), 0 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYGP, PCGS# 9306

5388 1922 Grant With Star MS64 PCGS. Delicate shades of pale gold toning enhance the outstanding eye appeal of this popular silver commemorative, with well-detailed design elements and vibrant mint luster on both sides. NGC ID# BYPP, PCGS# 9307

5389 1928 Hawaiian MS64 PCGS. From a low distribution of 9,958 pieces, the 1928 Hawaiian half dollar is one of the keys to the silver commemorative series. This sharply detailed Choice example offers well-preserved lustrous surfaces that show highlights of pale gold toning. NGC ID# BYGR, PCGS# 9309

5390 1928 Hawaiian MS64 PCGS. CAC. Attractive for the Choice grade level, with satiny luster and minimal abrasions. The strike is bold throughout each side. Amber-gold peripheral toning on the obverse exhibits hints of green and violet, while the interior is pale champagne. The reverse shows light mint-gold color overall, deepening just slightly at the borders. NGC ID# BYGR, PCGS# 9309

1928 Hawaiian Half, MS65 Unusually Vibrant Luster

5391 1928 Hawaiian MS65 PCGS. This is an appealing Gem Hawaiian half dollar, showing stronger luster than is typical of the issue. The design elements are well-struck and a few small surface ticks are not detracting. The reverse and much of the obverse interior show soft champagne toning, while the obverse periphery also exhibits deeper russet overtones. NGC ID# BYGR, PCGS# 9309

1928 Hawaiian Half Dollar, MS65 Key Silver Commemorative Type

5392 1928 Hawaiian MS65 NGC. Lightly toned and lustrous with a good strike and clean surfaces. A few minute russet freckles are noted near UNITED STATES. The scarcest classic silver commemorative type. Much of the mintage was distributed to non-collector Hawaiian residents. Encapsulated in a prior generation holder. NGC ID# BYGR, PCGS# 9309

1928 Hawaiian Half, MS65 Sesquicentennial of Captain Cook's Landing

5393 1928 Hawaiian MS65 PCGS. CAC. Commemorative coinage in 1928 included 6,028 Oregon Trail Memorial half dollars and 10,008 Hawaiian Sesquicentennial half dollars. The latter was by far the headlining issue. The mintage figure included eight assay coins and 50 matte proofs. The regular issue pieces were quickly distributed through the Bank of Hawaii. Many examples were purchased by folks not practiced in the art of coin preservation, and thus few high-grade pieces survived. This Gem example is finer than the typical coin, and is also sharply struck. Both sides show satiny luster blanketed in dusky olive-gold and lilac-gray hues. NGC ID# BYGR, PCGS# 9309

5394 1935 Hudson MS66 PCGS. Few examples of the Hudson Sesquicentennial half dollar survive finer than the present Premium Gem. This satiny coin exhibits dusky lavender-gray and champagne toning over the interiors, with splashes of deeper russet, amber, and forest-green around the borders. Only 14 coins are finer at PCGS (8/15). NGC ID# BYGS, PCGS# 9312

5395 1935 Hudson MS66+ PCGS. CAC. The 1935 Hudson commemorative half dollar claims a distribution of 10,008 pieces. This high-end Premium Gem is well-detailed and lustrous, with no mentionable distractions. PCGS has graded 14 numerically finer examples (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYGS, PCGS# 9312

1946 Iowa Centennial Half, MS68 None Finer at PCGS

5396 1946 Iowa MS68 PCGS. CAC. A remarkable Superb Gem Iowa half, adorned with lilac, rose, forest-green, and amber-gold toning across both sides. The strike is crisp and full throughout including the eagle's head. Just over 100,000 pieces were struck of this well-produced silver commemorative, and all were sold. The present piece is one of the finest survivors. Population: 82 in 68 (9 in 68+), 0 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYGV, PCGS# 9316

**1925 Lexington Half, MS67
Just One Finer Example Certified**

5397 1925 Lexington MS67 PCGS. Distributed through banks for the Lexington-Concord Sesquicentennial, a significant sale of 162,013 pieces represented just over half of the 300,000 authorized mintage. The remaining coins were remelted. A dusting of orange-gold and powder-gray toning settles on the smooth-satin surfaces of this sharply struck example. Mint luster shines through the pleasing patina. Few Lexington halves display the Superb Gem quality embodied by this gleaming coin. Population: 22 in 67 (3 in 67+), 1 finer (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# 33BJ, PCGS# 9318

5398 1918 Lincoln MS67 PCGS Secure. CAC. The 1918 Lincoln commemorative half dollar is a prime condition rarity in grades above the MS67 level. This sharply detailed Superb Gem is brightly lustrous and the well-preserved surfaces show hints of greenish-gold and lavender toning. PCGS has graded two numerically finer examples (8/15). NGC ID# BYGU, PCGS# 9320

**1918 Illinois Centennial Half Dollar, MS67+
Deeply Struck, Frosted Silver Surfaces**

5399 1918 Lincoln MS67+ PCGS. CAC. The eye appeal of this Lincoln commemorative half is outstanding. A full strike covers both sides, where Lincoln's portrait and the eagle's breast are boldly brought up. Cartwheel silver luster pierces the thin veil of powder-gray patina, with a single tiny scrape above Lincoln's eyebrow the only mentionable mark. Population: 15 in 67+, 2 finer (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# BYGU, PCGS# 9320

**1936 Long Island Half, MS67
None Finer at PCGS**

5400 1936 Long Island MS67 PCGS. CAC. Ex: Troy Wiseman Collection. The Dutch interaction with Native American culture provides the historical theme for the 1936 Long Island tercentenary commemorative half dollar. About 80% of the authorized mintage (100,000 pieces) was sold, for a net distribution of 81,826 pieces. While the issue has a reputation for careless production, this Superb Gem example shows quality that is far above the norm. There are no significant marks on the satin-silver surfaces, and a swath of rainbow toning at the margins adds strong eye appeal. CAC endorsed. Population: 65 in 67 (4 in 67+), 0 finer (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# BYGX, PCGS# 9322

**1936 Lynchburg Sesquicentennial Half, MS67+
Well-Produced and Well-Preserved**

5401 1936 Lynchburg MS67+ PCGS. CAC. Lynchburg, Virginia native son Senator Carter Glass appears on the obverse of this tastefully designed commemorative half. The former secretary of the Treasury would have appreciated the careful attention to detail by the Lynchburg Sesquicentennial Association, which authorized a 20,000-piece mintage (plus 13 pieces for assay) and sold them all. This softly lustrous Superb Gem displays rainbow iridescence from the borders into the central fields. There are no distracting marks to lessen the obvious appeal. Population: 11 in 67+, 0 finer (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# BYDJ, PCGS# 9324

**1920 Maine Centennial Half, MS67
Uncommonly Vibrant Luster**

- 5402 1920 Maine MS67 PCGS.** The Maine Centennial half dollar was modeled by Anthony de Francisci, more famously known for the Peace dollar which debuted as a regular issue in 1921. The Maine half dollar had a distribution of 50,028 coins (including assay pieces), few of which survive in Superb Gem condition. This example is razor-sharp and impressively vibrant with frost-white luster. There are no discernible abrasions and the eye appeal is exceptional. Population: 43 in 67 (5 in 67+), 0 finer (8/15). NGC ID# BYGY, PCGS# 9326

**1920 Maine Centennial Half, MS67
Ex: Scher-Young**

- 5403 1920 Maine MS67 PCGS. CAC.** Ex: Scher-Young. Faint glimpses of iridescent colors appear at the sloped borders of this essentially untoned, brilliant and frost-white Maine Centennial half dollar. Free of the often-seen friction and handling marks that plague the issue, this Superb Gem example is tied for the finest-known at PCGS. Worthy of a strong bid based on its exceptional surface quality and remarkable eye appeal. Population: 42 in 67 (5 in 67+), 0 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYGY, PCGS# 9326

- 5404 1934 Maryland MS67 PCGS. CAC.** Vibrant mint luster and sharply detailed design elements are the calling cards of this spectacular Superb Gem, with well-preserved surfaces that show highlights of lavender toning. Population: 64 in 67 (4 in 67+), 0 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYGZ, PCGS# 9328

- 5405 1921 Missouri MS65 PCGS Secure. CAC.** Delicate shades of champagne-gold and lavender-gray toning blanket the well-preserved surfaces of this attractive Gem, with sharply detailed design elements and ample mint luster underneath. PCGS has graded 42 numerically finer examples (8/15). NGC ID# BYH2, PCGS# 9330

- 5406 1921 Missouri 2x4 MS65 PCGS. CAC.** This impressive Gem offers well-detailed design elements and vibrant mint luster, with no mentionable distractions. Housed in an old green label holder. PCGS has graded 34 numerically finer examples (7/15). NGC ID# 2FE9, PCGS# 9331

- 5407 1923-S Monroe MS65+ PCGS.** The Plus designation sets this Gem Monroe half dollar in a class above the bulk of the certified population. Satiny surfaces display vibrant luster which penetrates a light champagne hue over each side. Peripheral overtones of plum, russet, and amber-gold attest to the originality of the patina. Finer examples are seldom seen. NGC ID# BYH4, PCGS# 9333

- 5408 1923-S Monroe MS66 PCGS.** Ex: Young Collection. Rich shades of greenish-gold and lavender-gray toning blanket the well-preserved lustrous surfaces of this impressive Premium Gem. The design elements are well-detailed throughout. Population: 82 in 66 (5 in 66+), 6 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYH4, PCGS# 9333

- 5409 1923-S Monroe MS66 PCGS. CAC.** The 1823 Monroe Doctrine embodied America's opposition to further colonial expansion in the New World. John Quincy Adams suggested the policy that James Monroe championed as president. The two are immortalized on the present high-grade commemorative. Dappled olive-brown and slate toning graces lustrous and minimally abraded surfaces. Housed in an old green label holder. Population: 82 in 66 (5 in 66+), 6 finer (8/15). NGC ID# BYH4, PCGS# 9333

- 5410 1938 New Rochelle MS67+ PCGS. CAC.** This high-end Superb Gem offers sharply detailed design elements throughout and impeccably preserved lustrous surfaces with hints of magenta, silver-gray, and greenish-gold toning. PCGS has graded six numerically finer examples (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYDX, PCGS# 9335

- 5411 1936 Norfolk MS68 PCGS. CAC.** Fully struck with smooth, satiny, nearly pristine surfaces that display wonderful russet-red, burnt-orange, bright-green, and lemon-yellow colors near the obverse peripheries. The light-gray reverse is lightly toned. PCGS has graded one numerically finer example (7/15).
Ex: Baltimore Signature (Heritage, 7/2003), lot 328; Long Beach Signature (Heritage, 2/2009), lot 2139, which realized \$1,035.
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYH5, PCGS# 9337

- 5412 1933-D Oregon MS67+ PCGS. CAC.** A net distribution of just 5,008 pieces makes the 1933 Denver issue one of the lower mintages in the long-running Oregon Trail commemorative series. This lustrous example offers sharply struck pearlescent centers surrounded by deep amber highlights at the rims and slight iridescent shades throughout. Just two pieces are certified numerically finer at PCGS. Population: 14 in 67+, 2 finer (8/15). NGC ID# BYH9, PCGS# 9343

- 5413 1934-D Oregon MS67 PCGS. CAC.** A spectacular Superb Gem example of one of the most popular silver commemorative issues, from a small distribution of 7,006 pieces. Delicate shades of pink toning blanket the impeccably preserved, lustrous surfaces, and sharply detailed design elements add to the outstanding eye appeal. Population: 71 in 67 (4 in 67+), 1 finer (8/15). NGC ID# BYHA, PCGS# 9344

- 5414 1937-D Oregon MS68 PCGS. CAC.** Boldly toned blue-silver with strong patches of tan-crimson and gunmetal-violet along the borders. A magnificently preserved Oregon half from an issue of just 12,008 pieces. Population: 52 in 68 (3 in 68+), 1 finer (8/15). NGC ID# BYHG, PCGS# 9347

- 5415 1938-D Oregon MS68 NGC.** Phenomenal eye appeal combines with technical perfection on this coin. Lovely multicolored original toning on the obverse periphery runs from indigo through rose, sunset-orange, and aqua, while the reverse features, appropriately, a wagon train riding westward into the predominantly sunset-orange colors. This issue is popular not only for its artistic merit, but also as an "alternative" 1938-D half dollar. Census: 61 in 68 (1 in 68+, 34 in 68 ★, 2 in 68+★), 2 finer (8/15).
Ex: FUN Signature (Heritage, 1/2006), lot 7514. NGC ID# BYHK, PCGS# 9349

- 5416 1939 Oregon PDS Set MS66 PCGS.** The Boone and Texas series ended in 1938, and only the Oregon and Arkansas types were issued in 1939, the year a law was passed to prevent further emissions. The final Oregon set has the lowest mintage of the type, just 3,000 pieces plus a few extras destined for assay. The present trio is identically graded but housed in separate holders with consecutive serial numbers. Lightly toned and satiny with pleasing preservation. (Total: 3 coins) NGC ID# BYHN, PCGS# 9355
- 5417 1939 Oregon PDS Set MS66-67 NGC.** This matched set contains one example each of the popular 1939, 1939-D, and 1939-S Oregon Trail half dollars. The 1939 and 1939-D are graded MS67 and the 1939-S is graded MS66. Each has sharply detailed design elements, satin surfaces, and glimpses of greenish-gold and amber toning. Certified in NGC holders with consecutive serial numbers. NGC ID# BYHN, PCGS# 9355
- 5418 1915-S Panama-Pacific MS66 NGC.** Characteristic of the issue, this Premium Gem Panama-Pacific half dollar shows soft, satiny luster that masks a few faint grazes which limit the grade. The strike is well-executed and each side shows just a hint of light golden toning. Finer pieces are scarce. NGC ID# BYHP, PCGS# 9357
- 5419 1936-S Rhode Island MS67 PCGS.** Rich toning provides this Superb Gem with exceptional eye appeal, with the obverse arguably being the more attractive side. The colors include hues of yellow, orange, red, and several shades of green. Neither PCGS nor NGC has awarded a higher numeric grade to a single example (7/15). NGC ID# BYHV, PCGS# 9365

**1936-S Rhode Island Half, MS67+
Tied for Finest Certified**

- 5420 1936-S Rhode Island MS67+ PCGS.** CAC. Lilac toning with faint rose highlights covers the obverse, while the reverse displays intense shades of ruby-red, forest green, and gray-lilac. Mint luster flashes beneath the attractive patina. The entire production of 15,000 S-Mint pieces was distributed successfully by the Rhode Island and Providence Plantations Tercentenary Committee, Inc. Many survive in high grades, but none finer than this Plus-graded Superb Gem. Population: 31 in 67 (7 in 67+), 0 finer (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# BYHV, PCGS# 9365
- 5421 1936 Rhode Island PDS Set MS67 PCGS.** CAC. Each of the three Superb Gems is individually housed in identically graded holders bearing green CAC seals and consecutive certification numbers. The set includes: **1936**, faint olive-gold toning; **1936-D**, occasional blushes of golden-brown and apple-green patina; and a **1936-S**, iridescent aquamarine and canary-gold peripheral patina. (Total: 3 coins) NGC ID# BYHV, PCGS# 9366
- 5422 1937 Roanoke MS67+ PCGS.** CAC. This high-end Superb Gem displays sharply detailed design elements and vibrant mint luster throughout. Delicate shades of greenish-gold and lavender toning enhance the impeccably preserved surfaces. PCGS has graded 17 numerically finer examples (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# BYHW, PCGS# 9367

- 5423 1936 Robinson MS67 PCGS.** CAC. Hints of sea-green and amber toning visit the well-preserved surfaces of this delightful Superb Gem, with sharply detailed design elements and vibrant mint luster on both sides. Population: 76 in 67 (1 in 67+), 2 finer (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# BYHX, PCGS# 9369
- 5424 1935-S San Diego MS67+ PCGS.** CAC. The brilliant centers of this high-end Superb Gem yield to vivid shades of lime-green at the peripheries, with vibrant mint luster and sharply detailed design elements throughout. PCGS has graded five numerically finer examples (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# BYHY, PCGS# 9371
- 5425 1926 Sesquicentennial MS65 PCGS.** CAC. A well-struck example, free of bothersome abrasions. This Gem Sesquicentennial half dollar displays vivid sun-gold toning over much of each side, with vibrant underlying luster. PCGS lists only eight pieces finer (8/14). NGC ID# BYJ4, PCGS# 9374
- 5426 1935 Spanish Trail MS64 PCGS.** The Old Spanish Trail commemorative half dollar (10,000 coins struck for collectors, eight for assay purposes) was the brainchild of businessman L.W. Hoffecker, who also designed and promoted the coins. This near-Gem offers bright silvery surfaces with satin luster. Small ticks and wispy marks limit the grade. NGC ID# 34AP, PCGS# 9376
- 5427 1935 Spanish Trail MS64 PCGS.** This is a lovely choice example of the Spanish Trail half dollar, showing satiny luster with just a touch of golden toning. El Paso, TX is indistinct, but the design elements are otherwise well-rendered. A few light, scattered abrasions on the reverse are all that limit the grade. Housed in a green label holder. NGC ID# 34AP, PCGS# 9376
- 5428 1935 Spanish Trail MS66 PCGS.** Delicate shades of champagne-gold and lavender toning enhance the virtually pristine surfaces of this spectacular Premium Gem, with sharply detailed design elements and outstanding eye appeal. NGC ID# 34AP, PCGS# 9376
- 5429 1935 Spanish Trail MS66 PCGS.** Vivid shades of sea-green and magenta toning surround the brilliant surfaces of this well-preserved silver commemorative, with sharply detailed design elements and vibrant satiny mint luster. NGC ID# 34AP, PCGS# 9376
- 5430 1935 Spanish Trail MS67 PCGS.** CAC. The design elements of this popular silver commemorative are sharply detailed throughout and the virtually pristine surfaces radiate vibrant mint luster. Housed in a green label holder. PCGS has graded two numerically finer examples (7/15). *From The Rolling Thunder 50 Piece Commemorative Collection.* NGC ID# 34AP, PCGS# 9376
- 5431 1925 Stone Mountain MS67 PCGS.** A sharp, superbly preserved example of this popular commemorative and conditionally elusive so fine. This MS67 Stone Mountain half shows satiny surfaces with dusky olive-gold toning overall. PCGS lists eight coins finer (8/15). NGC ID# BYJ6, PCGS# 9378
- 5432 1925 Stone Mountain MS67 PCGS Secure.** CAC. Attractive shades of greenish-gold and lavender toning blanket the pristine surfaces of this delightful Superb Gem, with satiny mint luster and well-detailed design elements underneath. PCGS has graded eight numerically finer examples (8/15). NGC ID# BYJ6, PCGS# 9378

**1925 Stone Mountain Half, MS67+
Plentiful Issue, Few Are Finer**

- 5433 1925 Stone Mountain MS67+ PCGS. CAC.** More than 1.3 million pieces were distributed, although another million pieces were melted as unsold. High-grade pieces are available with regularity, although few can match the frosty, lustrous appeal of this example. The strike is first-rate and nearly full, while faint iridescent hues flash at the borders. The mounted figures of generals Robert E. Lee and Thomas "Stonewall" Jackson show full details. This exceptional Stone Mountain half is among the finest known. Population: 12 in 67+, 8 finer (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYJ6, PCGS# 9378

**1935 Texas Half, MS68
Fantastic Preservation**

- 5434 1935 Texas MS68 NGC.** Fabulous preservation and eye appeal to match. This well-defined survivor exhibits strong "halo" luster through a light dusting of tan, gold, and silver-white patina. By a narrow margin, the Philadelphia edition of the 1935 Texas half has the lowest mintage for the design and year. Census: 15 in 68, 0 finer (8/15).
Ex: Long Beach Signature (Heritage, 9/2008), lot 1218. NGC ID# BYJA, PCGS# 9382

**1935-D Texas Independence Half, MS68
Lambent, Delicately Toned Surfaces**

- 5435 1935-D Texas MS68 NGC.** Quantities of the 1935-D Texas Independence Centennial half dollar survive in grades through Premium Gem, and MS67 coins are obtainable with patience; cross over into the MS68 category, however, and this issue becomes a major condition rarity. This representative exhibits glowing, satiny luster that illuminates soft shades of ice-blue, champagne, and deeper amber colors over each side. The strike is sharp and the eye appeal is fully gratifying. Census: 7 in 68 (3 in 68 ★), 0 finer (7/15). NGC ID# BYJC, PCGS# 9383

- 5436 1936-D Texas MS67+ PCGS. CAC.** A Superb Gem Texas half dollar with frosty luster and just a blush of light golden toning. This piece showcases notably bold definition on the central eagle and on Victory's knee, two design elements that usually exhibit weakness. PCGS lists 14 finer examples (7/15). NGC ID# BYJF, PCGS# 9387

- 5437 1936-S Texas MS67+ PCGS. CAC.** A conditionally scarce Superb Gem example of this Texas half dollar issue, with only two pieces finer at PCGS (8/15). This coin is satiny with traces of light golden toning overall. Some minor striking softness appears on Victory's knee, hand, and breast. NGC ID# BYJG, PCGS# 9388

- 5438 1936-S Texas MS67+ PCGS. CAC.** Shades of sea-green, lavender-gray, and amber toning visit the impeccably preserved surfaces of this high-end Superb Gem. The design elements are well-detailed and PCGS has graded only two numerically finer examples (8/15). NGC ID# BYJG, PCGS# 9388

- 5439 1937 Texas MS67 PCGS. CAC.** This is a beautifully preserved, satiny Texas Independence Centennial half, and conditionally scarce at the Superb Gem grade level. Victory's knee shows a touch of softness, but the obverse appears sharp. Light champagne toning graces each side. Only four examples are finer at PCGS (8/15). NGC ID# BYJK, PCGS# 9390

- 5440 1937-D Texas MS67+ PCGS. CAC.** From a small distribution of 6,605 pieces, this high-end Superb Gem exhibits sharply detailed design elements and vibrant mint luster on both sides, with attractive highlights of greenish-gold and lavender toning. PCGS has graded two numerically finer examples (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYJJ, PCGS# 9391

- 5441 1946-S Booker T. Washington MS67+ PCGS. CAC.** Vivid, polychromatic colors cover both sides of this high-end Superb Gem half dollar, with variations of red, green, yellow, and violet toning. The kaleidoscopic effect is dazzling, and the mint luster pervasive over both sides of this sharp and memorable, one-of-a-kind BTW half dollar. Population: 10 in 67+, 2 finer (7/15). NGC ID# 34MG, PCGS# 9406

- 5442 1949 Booker T. Washington PDS Set MS67 PCGS. CAC.** Housed in individual holders bearing consecutive certification numbers, identical grades, and green CAC seals. All three Superb Gems are lustrous and minimally toned with exemplary preservation and only a hint of incompleteness of strike on Washington's jaw. (Total: 3 coins) NGC ID# BYK5, PCGS# 9419

- 5443 1953-S Washington-Carver MS67 NGC.** Superb Gem Washington-Carver half dollars rank among the rarest of all commemorative issues. Mottled green-brown and gray patina covers the majority of both sides. Smaller splashes of blue-green, russet, and red-orange appear when examined closely. Census: 19 in 67 (3 in 67 ★, 1 in 67+★), 0 finer (7/15). NGC ID# 332B, PCGS# 9440

- 5444 1936 York MS67+ PCGS. CAC.** The virtually pristine surfaces of this high-end Superb Gem radiate vibrant mint luster, under delicate shades of lavender and greenish-gold toning. The design elements are sharply detailed throughout. PCGS has graded 26 numerically finer examples (7/15).
From The Rolling Thunder 50 Piece Commemorative Collection. NGC ID# BYKV, PCGS# 9449

COMMEMORATIVE GOLD

- 5445 1903 Louisiana Purchase, Jefferson, MS65 NGC.** This Gem example is boldly struck on the central devices as well as around the peripheries. Satiny yellow-gold luster cartwheels beneath a light, and there are no bothersome abrasions. NGC ID# BYLD, PCGS# 7443

1903 Louisiana-Jefferson Dollar, Bright MS67

- 5446 1903 Louisiana Purchase, Jefferson, MS67 PCGS.** This bright wheat-gold Louisiana Purchase-Jefferson gold dollar is in the highest grade for the issue obtainable at PCGS (and virtually so at NGC as well), a highly lustrous and problem-free example with great eye appeal. The 1903 gold dollars marked the first commemoratives of the new denomination. Population: 95 in 67 (2 in 67+), 0 finer (8/15). NGC ID# BYLD, PCGS# 7443

- 5447 1903 Louisiana Purchase, McKinley, MS65 PCGS.** This is an eye-catching coin, exceptionally appealing even for the Gem grade level. Rich orange-gold surfaces yield tinges of lavender and mint-green throughout each side, while the underlying luster sets the patina aglow. The border dentils are indistinct, but the central devices are sharp. NGC ID# BYLE, PCGS# 7444

- 5448 1904 Lewis and Clark MS64 PCGS.** At first glance, this sharp, satiny Lewis and Clark Exposition gold dollar appears at least a grade point finer — only a loupe reveals trivial lines in the fields which preclude the Gem designation. Yellow-gold luster illuminates each side. NGC ID# BYLF, PCGS# 7447

- 5449 1915-S Panama-Pacific Gold Dollar MS65 NGC.** This Gem Panama-Pacific gold dollar is boldly struck, with satiny yellow-gold luster that is devoid of bothersome abrasions. This issue had a small distribution of just 15,000 coins, and is in high demand in the better Mint State grades. NGC ID# BYLH, PCGS# 7449

- 5450 1916 McKinley MS66 PCGS.** An exemplary coin, near the upper end of the Premium Gem grade. Close study with a glass finds the frosty surfaces virtually pristine, save for a couple extremely faint luster grazes in the upper-left obverse field which appear when tilted at an angle beneath a light. The strike is sharp and the eye appeal is outstanding. NGC ID# BYLK, PCGS# 7454

- 5451 1917 McKinley MS66 PCGS.** The last two commemorative gold dollar designs aimed to fund birthplace memorials for presidents. The first one struck, the McKinley, sought to celebrate a man who was assassinated less than two decades before. On this piece, the shimmering yellow-gold surfaces of the obverse yield to shining sunset-orange on the reverse. A solidly struck and highly lustrous representative that offers plenty of eye appeal.
Ex: Long Beach Signature (Heritage, 5/2007), lot 1989. NGC ID# BYLL, PCGS# 7455

- 5452 1922 Grant No Star MS65 PCGS.** An equal number of Grant With Star and No Star gold dollars were struck in 1922 (5,016 pieces each), and the two issues are about equally available overall. This Gem features exceptional portrait detail. Rich orange-gold color and swirling luster grace well-preserved surfaces. NGC ID# BYLN, PCGS# 7458

- 5453 1922 Grant No Star MS65 PCGS. CAC.** This is a boldly struck Gem example with glowing yellow-gold luster and satin surfaces. The No Star Grant Memorial gold dollar is slightly scarcer than its With Star counterpart in high grade. NGC ID# BYLN, PCGS# 7458

- 5454 1922 Grant With Star MS65 PCGS.** The Grant issues make up two of the nine coins in the classic commemorative gold dollar series. This Gem example of the With Star variant is boldly struck, with characteristic satin-yellow luster. No bothersome abrasions are present. NGC ID# BYPS, PCGS# 7459

1922 Grant Memorial Gold Dollar, MS67 High-End With Star Example

- 5455 1922 Grant, With Star MS67 PCGS. CAC.** The grades of most Grant gold dollars are dictated by faint, lint-induced hairlines on the obverse portrait, not by traditional abrasions. This Superb Gem is virtually pristine, with no such evidence of handling apparent even when studied with a loupe. The strike is equally impressive, and frosty yellow-gold luster satisfies the eye. PCGS lists only a single MS68 coin finer (8/15). NGC ID# BYPS, PCGS# 7459

- 5456 1926 Sesquicentennial MS65 NGC.** The Sesquicentennial quarter eagle is the final gold issue in the classic commemorative series, and is one of only two such issues of the two and a half dollar denomination. This Gem example is well-struck and attractively preserved, with frosty orange-gold luster. NGC ID# 2FE9, PCGS# 7466

- 5457 1926 Sesquicentennial MS65+ PCGS. CAC.** Rich orange-gold luster rolls in cartwheels across this Sesquicentennial quarter eagle, which goes beyond the MS65 designation to score a coveted Plus from PCGS. Beyond the noteworthy preservation, the strike is pleasing, and even critical coin connoisseurs would be hard-pressed to find a better coin in the Gem grade range. NGC ID# 2FE9, PCGS# 7466

SESSION FIVE

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. After proxy bidding closes, live bidding will take place through Heritage Live!®, that lets you bid live during the actual auction. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bids will not be recognized, so we advise placing your proxy bids in advance.)

8390 1907 Jamestown Tercentennial Official Medal MS64 Brown NGC. HK-346. Bronze, R.4. Jamestown, Virginia.

8391 1898 Alaska Indian Octagonal, One Pinch Gold, MS64 NGC. Gould-Bressett 134, HK-843. M.E. Hart's Coins of the Golden West.

EXPOSITIONS AND FAIRS

- 8392** 1886 Founding of Providence Celebration Mayoral Gold Medal. 14 carat gold, 17.1 gm. Produced by Charles F. Irons, an emblem manufacturer based in Providence, Rhode Island, for the 250th anniversary of the founding of the same city. The uniface medal shows the founder, Roger Williams, in a boat with hand extended towards a Native American in friendship, with the phrase WHAT CHEER above. The peripheral legends read PROVIDENCE 250th ANNIVERSARY above, 1636 June 23-24 1886 below. "What cheer" was the greeting given to Williams by the local Narragansett Indians when he arrived in Providence in 1636. Two loops at 11 and 1 o'clock connect 20-mm links to a 16-mm x 53-mm badge that reads MAYOR. A pin for attachment to clothing is affixed to the back. A 75-mm x 140-mm pressboard box with blue satin interior, emerald leather top, and working latch mechanism is included. The mayor who was responsible for planning the 250th anniversary celebration, Thomas A. Doyle, passed away on June 9, 1886, only days before the festivities. It is likely that this special gold medal was being crafted for him before he died. Therefore, we assume that the incumbent mayor at the time of the celebration, Gilbert F. Robbins, was the original owner of this fascinating relic.
Ex: Long Beach Signature (Heritage, 9/2008), lot 28223.
- 8393** 1905 Lewis & Clark Exposition, 1/4 Oregon Gold, MS66 Prooflike NGC.
- 8394** 1905 Lewis & Clark Exposition, 1/2 Oregon Gold, MS65 NGC. NGC ID# 2X83, PCGS# 661060
- 8395** 1914 Montana Gold MS62 NGC. 0.77 gm. 12.5 mm. M.E. Hart's Coins of the Golden West. This variety was sold at the 1915 Panama-Pacific International Exposition.

CONFEDERATE STATES OF AMERICA

- 8396** Trio of (1961) Defaced Dies, Bashlow Restrike Confederate Cents. The lot includes: Goldline MS66 NGC; Silver MS66 NGC; Copper MS66 Red NGC. (Total: 3 tokens)

ALASKA TOKEN

- 8397** 1909 Alaska-Yukon-Pacific Exposition, 1/4 DWT, MS62 PCGS Secure. Gould-Bressett 169, Bruce-X-Tn3.

CALIFORNIA GOLD CHARMS

- 8398** 1883-Dated Miner with Pick, Q Reverse, MS65 NGC. 0.13 gm.
- 8399** 1936 San Francisco / Oakland Bay Bridge MS63 NGC. 0.53 gm.

20TH CENTURY TOKENS AND MEDALS

- 8400** 1909 Cooper Union 50th Anniversary Medal MS64 NGC. Bronze, 68mm. Designed by Oscar Roty. Dies by Tiffany & Co.

MISCELLANEOUS MEDALS AND TOKENS

- 8401** 1846-Dated Old Settlers Club, Milwaukee, WI — Mount Removed, Scratched — NGC Details. Unc. Gold, 27 mm.
- 8402** (2004) Libertas Americana Medal, Paris Mint Restrike, PR69 Ultra Cameo NGC. Silver, 40 mm.
- 8403** (2014) Libertas Americana Medal, Paris Mint Restrike, Five Ounce Silver, PR69 Ultra Cameo NGC.

PROOF SETS

- 8404** 1939 Proof Set NGC. This set includes: 1C PR66 Red, 5C Reverse of 1938 PR66, 10C PR65, 25C PR65 and 50C PR63. (Total: 5 coins)
- 8405** 1940 Proof Set NGC. This set includes: 1C PR64 Red and Brown, 5C Reverse of 1940 PR66, 10C PR66, 25C PR65 and 50C PR65. (Total: 5 coins)
- 8406** 1941 Proof Set NGC. This set includes: 1C PR64 Red and Brown, 5C PR66, 10C PR66, 25C PR67 and 50C PR66. (Total: 5 coins)
- 8407** Seven Proof Sets. The lot includes (1) 1950, (1) 1951, (1) 1952, (2) 1953, (1) 1954, and (1) 1955 proof set. The 1955 set is in Mint packaging while the six earlier proof sets are housed in plastic Capital holders. A majority of the coins are brilliant but some coins exhibit peripheral toning. (Total: 35 coins)

MINT SETS

- 8408** Three Uncertified Double Mint Sets. The lot includes (1) 1957, (1) 1958, and (1) 1959 double mint set, each with an outer mailing envelope. The 1959 coins are brilliant, while the 1957 and 1958 coins are toned. The coins typically grade MS63 to MS65.

☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐1 ☐2 ☐3 INCREMENT(S)
Lots will be purchased as much below top bids as possible.

☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$ _____
at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?
☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

(Signature required) Please make a copy of this bid sheet for your records.

☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS

☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

7 Easy Ways to Bid

1 Internet

Simply go to www.pearsoncmg.com

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Proxy bidding ends one hour prior to the session start time. Live Proxy bidding continues through the session.

2 eMail

You can also

You can also email your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Postal Mail

Simply complete the B

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 In Person

Come to the auction and view the lots in person and bid live on the floor.

5 FAX
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

6 Live By Phone
Call 877-HERITAGE (437-482)

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Live using HERITAGELive!®
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment
< \$10.....	\$1
\$10 - \$49.....	\$2
\$50 - \$99.....	\$5
\$100 - \$199.....	\$10
\$200 - \$499.....	\$20
\$500 - \$999.....	\$50
\$1,000 - \$1,999.....	\$100
\$2,000 - \$4,999.....	\$200
\$5,000 - \$9,999.....	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999.....	\$1,000
\$20,000 - \$49,999.....	\$2,000
\$50,000 - \$99,999.....	\$5,000
\$100,000 - \$199,999.....	\$10,000
\$200,000 - \$499,999.....	\$20,000
\$500,000 - \$999,999.....	\$50,000
\$1,000,000 - \$4,999,999....	\$100,000
\$5,000,000 - \$9,999,999....	\$250,000
>= \$10,000,000.....	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF

THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if assigned to an auction conducted by Auctioneer). In

Terms and Conditions of Auction

addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not

be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. #1364738. The New York City licensed auctioneers are: Samuel Foose 0952360; Robert Korver 1096338; Kathleen Guzman 0762165; Michael J. Sadler 1304630; Scott Peterson 1306933; Andrea Voss 1320558; Nicholas Dawes 1304724; Ed Beardsley 1183220; Bob Merrill 1473403; Paul Minshull 2001161; Fiona Elias 2001163; Brian Nalley 2001162; Jennifer Marsh 2009623; Alissa Ford 2009565, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards or receive a guaranty. A registered bidder may inquire whether a lot is subject to an advance, a reserve, or a guaranty. Auctioneer has made advances to various consignors in this sale and a guaranty. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 3-23-2015

How to Ship Your Purchases

[illegible]

Agent Shipping Release Authorization form

Heritage Auction Galleries requires "Third Party Shipping" for certain items in this auction not picked up in person by the buyer. It shall be the responsibility of the successful bidder to arrange pick up and shipping through a third party; as to such items auctioneer shall have no liability.

Steps to follow:

1. Select a shipping company from the list below or a company of your choosing which will remain on file and in effect until you advise otherwise in writing.
2. Complete, sign, and return an Agent Shipping Release Authorization form to Heritage (this form will automatically be emailed to you along with your winning bid(s) notice or may be obtained by calling Client Services at 866-835-3243). The completed form may be faxed to 214-409-1425.
3. Heritage Auctions' shipping department will coordinate with the shipping company you have selected to pick up your purchases.

Shippers that Heritage has used are listed below. However, you are not obligated to choose from the following and may provide Heritage with information of your preferred shipper.

Navis Pack & Ship
11009 Shady Trail
Dallas, TX 75229
Ph: 972-870-1212
Fax: 214-409-9001
Navis.Dallas@GoNavis.com

The Packing & Moving Center
2040 E. Arkansas Lane, Ste #222
Arlington, TX 76014
Ph: 817-795-1999
Fax: 214-409-9000
thepackman@sbcglobal.net

Craters & Freighters
2220 Merritt Drive, Suite 200
Garland, TX 75041
Ph: 972-840-8147
Fax: 214-780-5674
dallas@cratersandfreighters.com

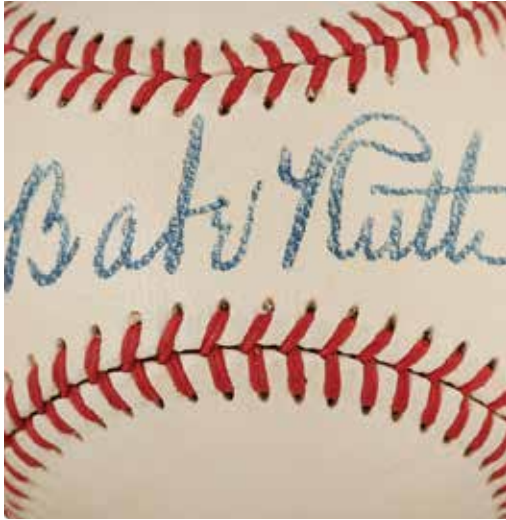

- It is the Third Party Shipper's responsibility to pack (or crate) and ship (or freight) your purchase to you. Please make all payment arrangements for shipping with your Shipper of choice.
- Any questions concerning Third Party Shipping can be addressed through our Client Services Department at 1-866-835-3243.
- Successful bidders are advised that pick-up or shipping arrangements should be made within ten (10) days of the auction or they may be subject to storage fees as stated in Heritage's Terms & Conditions of Auction, item 35.

NOTICE of CITES COMPLIANCE; When purchasing items made from protected species.

Any property made of or incorporating endangered or protected species or wildlife may have import and export restrictions established by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). These items are not available to ship Internationally or in some cases, domestically. By placing a bid the bidder acknowledges that he is aware of the restriction and takes responsibility in obtaining and paying for any license or permits relevant to delivery of the product. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or for failure to mark lots containing protected or regulated species.

MyRECOMMENDATIONS

ONLINE SUGGESTION TOOL

The last piece of the puzzle? Heritage has it.

Our new online tool, MyRecommendations looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available—even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with **MyRecommendations** visit Heritage's US Coin pages now at [HA.com/Coin](https://www.ha.com/Coin).
